1 Based on Alfa Romeo premium import high-performance mid-size SUV segment and the latest available competitive information. 2 No system, no matter how sophisticated, can repeal the laws of physics or overcome careless driving actions. Performance is limited by available traction, which snow, ice and other conditions can affect. When the ESC warning lamp flashes, the driver needs to use less throttle and adapt speed and driving behavior to prevailing road conditions. Always drive carefully, consistent with conditions Always wear your seat belt. 3 ACC is a driver convenience system, not a substitute for active driver involvement. The driver must remain aware of traffic conditions and be prepared to use the brakes to avoid collisions. 4 LDW is a driver convenience system, not a substitute for active driver involvement. The driver must remain aware of traffic conditions and be prepared to use the brakes to avoid collisions. 5 FCW system is solely an alert system for the front of the vehicle which does not take any actions to change the vehicle dynamics to avoid a collision and is not a substitute for active driver involvement. The driver must remain aware of traffic conditions and be prepared to use the brakes to avoid a collision and is not a substitute for active driver involvement. The driver must remain aware of traffic conditions and be prepared to use the brakes to avoid a collision and is not a substitute for active driver involvement. The driver must remain aware of traffic conditions and be prepared to use the brakes to avoid a collision and is not a substitute for active driver involvement. The driver must remain aware of traffic conditions and be prepared to use the brakes to avoid a collision and is not a substitute for configuration to change the vehicle which does not take any actions to change the vehicle avoid active and the driver must remain aware of traffic conditions and be prepared to use the brakes to avoid a collision and is not a substitute for subscription. For those who are rarely satisfied, Stelvio Quadrifoglio delivers best-in-class 505 hp; \* 4-mode Alfa DNA Pro Drive Mode Selector with Race mode, and a twin-clutch rear differential that optimizes traction. Drivers of Stelvio will make the most of every turn, thanks to the standard 8-speed automatic transmission and steering column-mounted aluminum paddle shifters that allow for shifting in less than 100 milliseconds. The view from inside the cockpit offers a natural leather landscape accented with crafted stitching; outside offers a unique rear fascia and a dual-mode quad exhaust.

Giulia Ti Sport stirs up adrenaline with athletic talents that reward drivers at every turn, while Giulia Ti Lusso steps up its Italian propensity for high style. These are performance sedans whose competitive side extends to creature comforts. A leather-wrapped dash and upper door trim and genuine wood or aluminum interior trim graciously greets drivers and passengers. The leather-wrapped steering wheel with available steering column-mounted aluminum paddle shifters puts both performance and luxury in hand.

Alfa Romeo 4C has perfected the Italian art of seduction — irresistible style, craftsmanship and performance cues include a leather-wrapped, flat-bottom steering wheel, performance seating with accent stitching, available carbon fiber Italian flag exterior mirrors and front fascia with carbon fiber vents. The available Carbon Fiber Interior Trim Group includes a carbon fiber instrument panel bezel, shift bezel, air vents and cluster bezel. A combination of sport suspension, large self-ventilated cross-drilled brake discs and staggered wheels reflect the 4C passion-fueled heritage of racing. Along with its advanced ride control system, the connections among driver, road and car couldn't be stronger.
