3000GT

VR4

3000GT

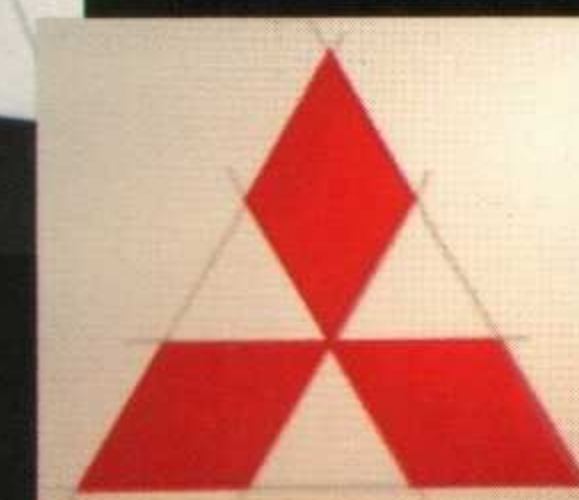

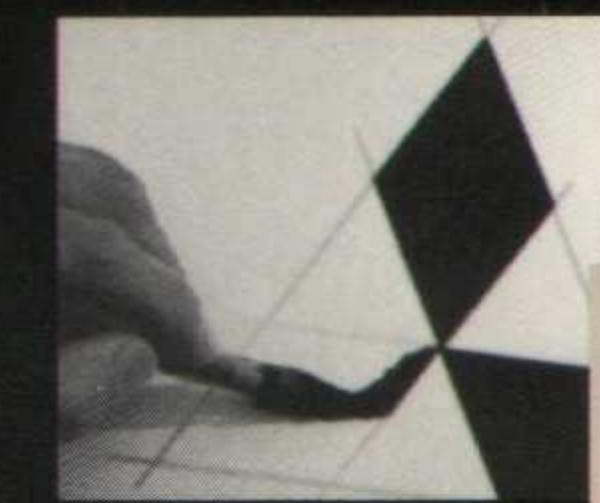

The 3000GT VR-4 is shown in Caracas Red and comes standard with Active Aero System™, including retractable front air dam and motorized rear spoiler, 17-inch cast alloy wheels and Z-rated high-performance tires, heated power-remote sideview mirrors, projector-type fog lamps, power and diversity antenna and remote keyless entry system.

The Mitsubishi 3000GT — concentrating over 75 years of automotive experience on the art and science of high-performance driving.

Before it even pulls away from the curb, this GT delivers a message of pure power. A sharply tapered hood, deeply angled windshield and strategically placed air dam and spoiler conspire to pierce the atmosphere. The profile is low and aggressive. And the wide, muscular stance promises a purely exhilarating driving experience.

Twist the ignition key and the engine answers with a deep, impatient voice. Step on the accelerator and experience the performance of a 24-valve, four-cam powerplant. Feel the urgent response generated by digital fuel injection and one of the most powerful microprocessors in automotive use. Head into a corner and the balanced, athletic suspension slices through turns in the road.

You're driving in a low-slung, high-tech cockpit, where over 75 years of automotive experience bring you more heritage than Porsche, Ferrari, Lamborghini or Jaguar. Expect something phenomenal. This is the 1994 Mitsubishi 3000GT.

For more than 75 years, Mitsubishi's three diamonds have signified the company's commitment to automotive innovation through the implementation of thoughtful technology — technology to benefit both mankind and the environment. Mitsubishi. The new thinking in automobiles™.

VR4

3000GT

The 3000GT VR-4 is shown in Martinique Yellow Pearl and comes standard with a 320-horsepower twin turbocharged and intercooled DOHC 24-valve V6 engine, full-time all-wheel drive, six-speed manual transmission, four-wheel steering, electronically adjustable shock absorbers, four-wheel disc anti-lock braking system (ABS), and volume adjustable Active Exhaust™ system.

3000GT VR-4 — stretching the limits of high performance with twin turbocharging, all-wheel drive and four-wheel steering.

Without question, Mitsubishi's new thinking in automobiles has created one of the most potent and technologically advanced sports GT cars in the world. The 3000GT VR-4. A stunning ultra high performance automobile that must be driven to be believed.

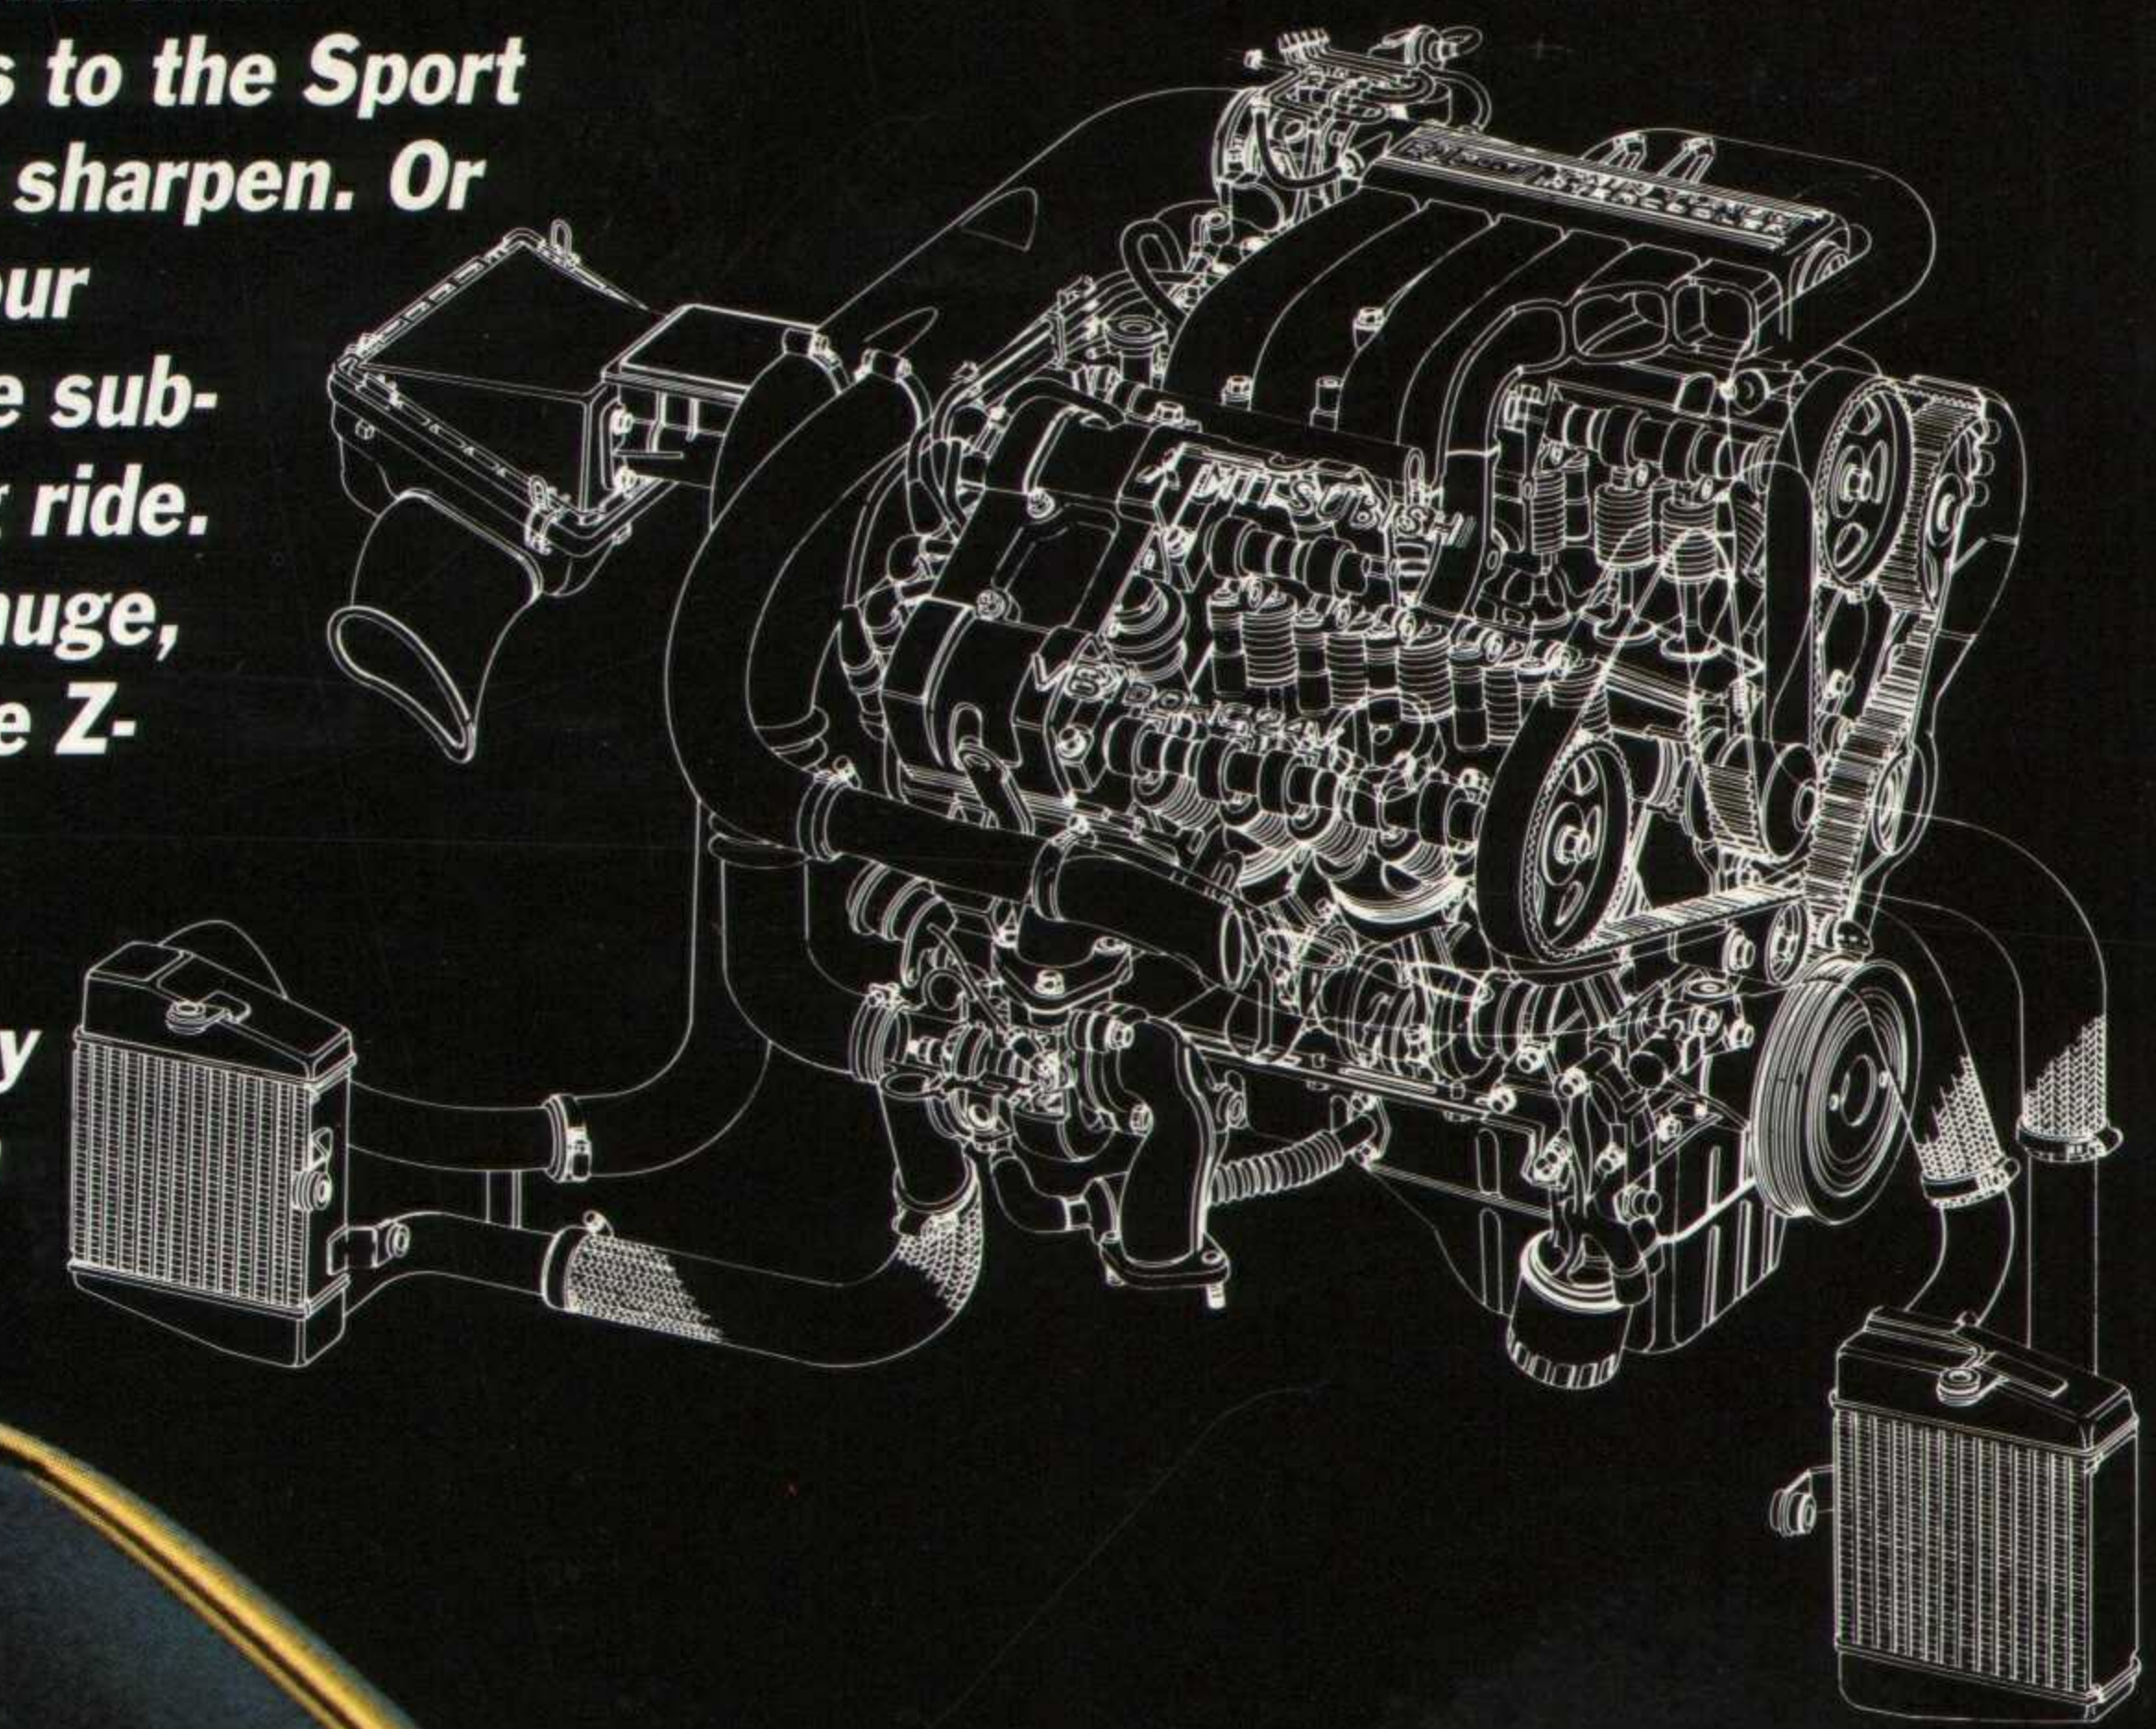

This car can explode off the line with 320 twin-turbocharged horsepower. A German-designed six-speed manual gear box can summon 60 mph in well under six seconds. Sweep into a turn with the riveting stability and unparalleled confidence of same-phase four-wheel steering.

Then power out of the turn with the astonishing grip and magnetic traction of full-time all-wheel drive. As the speedometer needle swings past 50 mph, the front air dam and rear spoiler automatically adjust for greater stability. The performance is genuinely awesome.

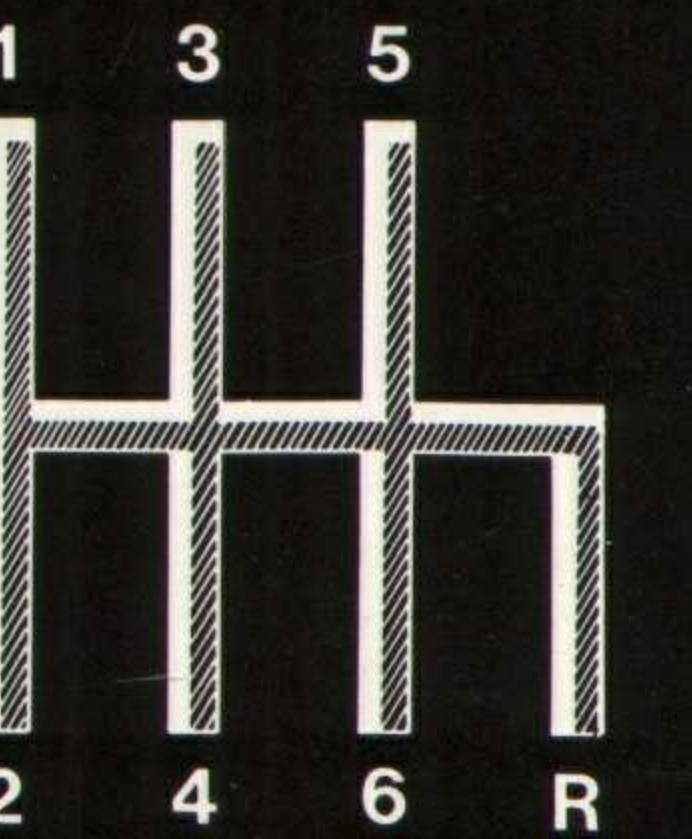

Bring the steering and suspension to life by setting the electronically controlled shock absorbers to the Sport mode. Reflexes sharpen. Or switch to the Tour mode for a more subtle and forgiving ride. In either case, huge, super low profile Z-rated tires and 17-inch cast alloy wheels stay firmly locked on

the road. And four massive ventilated disc brakes with an anti-lock system (ABS) guarantee that, while performance is dramatic, stopping is not.

The 3000GT has an ability to move over the pavement like nothing else. It is provocative performance without compromise.

Designed by the renowned German manufacturer Getrag, the 3000GT VR-4's new six-speed gearbox provides direct, close ratio performance that maximizes the engine's output. Built to handle the VR-4's enormous torque, the transmission, nevertheless, maintains a quick, precise action.

More power than a Ferrari 348, Porsche 911 Carrera or Chevrolet Corvette LT1. With its twin intercooled turbochargers, four cams, 24 valves and electronic engine management system, the 3000GT VR-4 powerplant creates an incredible 320 horsepower at 6000 rpm. Hydraulic valve lash adjusters, four-bolt main bearing caps, dual coil distributorless ignition and platinum-tipped spark plugs ensure that the power is always strong and reliable.

VR4

3000GT

The 3000GT VR-4 is shown with standard dual air bags*, Mitsubishi/Infinity® premium high-power audio system, steering wheel remote audio controls, automatic climate control, seven-way adjustable driver's seat with five-way power adjustments, tilt steering column, security system, cruise control, power windows, door locks and sideview mirrors and split/folding rear seat.

Creating an environment devoted to the passion of driving.

As you approach the 3000GT VR-4, a touch on the remote keyless entry system unlocks the doors and disarms the security alarm. Slip behind the steering wheel and settle into a leather-lined, seven-way adjustable driver's seat. Side bolsters, lumbar support and height adjustment are power operated, and the headrest can be set for both height and angle. Tilt the steering column into place and adjust the self-defrosting, power-operated sideview mirrors. The 3000GT is tailored to your body.

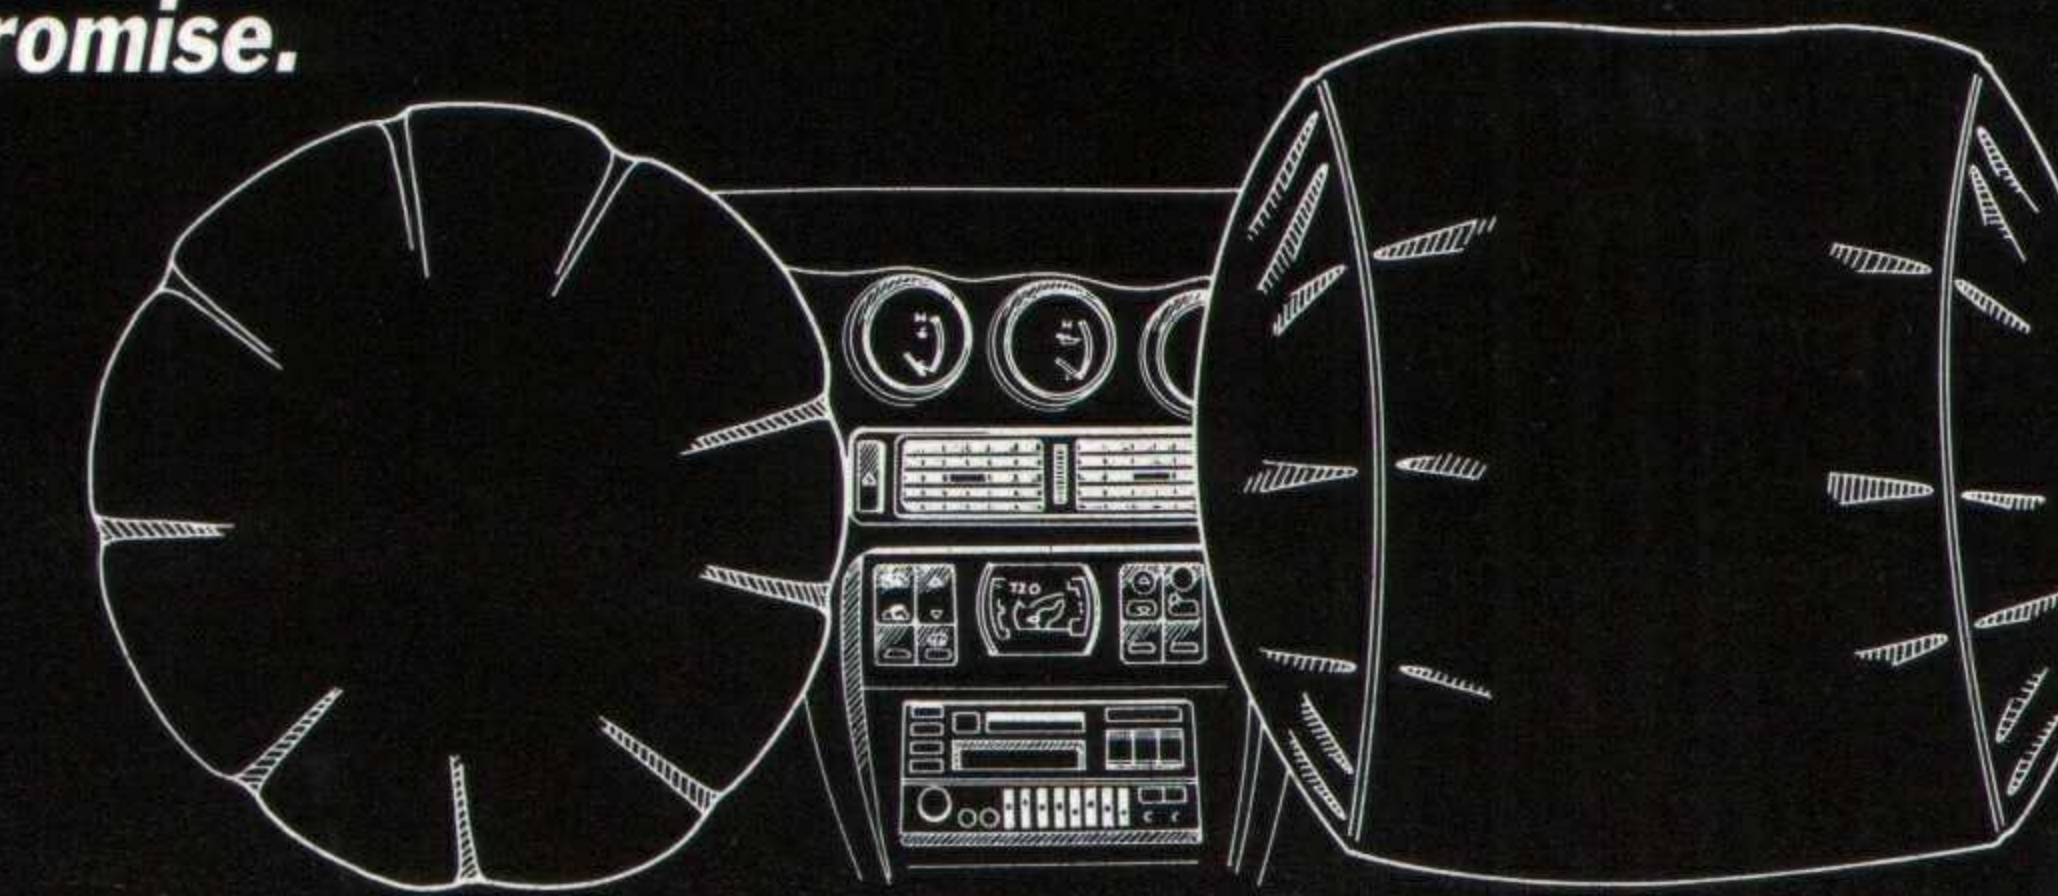

Glance across the instrument panel, and clear analog gauges for vehicle and engine speed, oil pressure, coolant temperature and turbo boost read out the VR-4's pulse. A fully-automatic climate control system brings the cabin to the temperature you set — and then maintains it, regardless of conditions outside. A Mitsubishi/Infinity® premium high-power sound system offers a separate amplifier, graphic equalizer, eight acoustically matched speakers, anti-theft feature and steering wheel mounted remote con-

trols to provide bright, sophisticated audio performance.

Each control, from the leather wrapped steering wheel and shifter, to the switches for speed-sensitive windshield wipers, headlights, fog lamps and cruise control, has a solid, smooth and evenly weighted feel. A polished and substantial movement.

This is an interior devoted to the driver. Devoted to the sound and ultimate feel of high performance. Without compromise.

High-tech performance deserves high-tech safety features. Which is why every 1994 3000GT comes standard with driver and front-passenger air bags. Designed to supplement the three-point safety belts, dual air bags provide unsurpassed protection in a frontal collision.

*Designed to supplement the three-point shoulder/lap safety belts

WR4

3000GT

**Perfecting an atmosphere
of pure exhilaration.**

When Mitsubishi created the interior of the 3000GT, there were two priorities: the exhilaration of driving and the joy of travel. Which is why every 3000GT is crafted with a soul of performance and a flair for luxury. Heavily bolstered seats. Meticulous upholstery.

An instrument panel and center console that wrap around the driver and front passenger, blending into the doors with smooth, organic form. And a quality of fit, finish and materials once found only in a luxury sedan.

Seatbelt system has been altered to clearly depict interior. This system should be used properly at all times while driving. Beige leather shown.

SL

3000GT

The 3000GT SL is shown in Danube Blue Pearl and comes standard with a 222-horsepower DOHC 24-valve V6 engine, electronically controlled shock absorbers, 16-inch alloy wheels and V-rated high performance tires, anti-lock braking system (ABS), dual air bags, a Mitsubishi/Infinity® premium high-power audio system, remote keyless entry system, security system, cruise control, power windows, door locks and heated sideview mirrors, power-operated driver's seat and split/folding rear seat.

3000GT SL — sporting capability proves to be the ultimate luxury.

By tradition, the term Grand Touring defines an automobile with the power, reflexes and exclusive styling of a high-performance sports car — combined with the refinement and sophistication of a substantial luxury sedan. A vehicle as composed and confident on a mountain pass as it is on the streets of a city. Mitsubishi continues the tradition and raises the standard of Grand Touring automobiles with 3000GT SL.

Powered with high technology, 3000GT SL moves under the authority of a 222-horse-

power V6. An engine with more muscle than many V8s. At low speeds, this engine is understated and docile, using quiet reserves of torque for effortless response off the mark. As the tachometer swings past 4500 rpm, a dual stage intake system opens to build even more power.

Balancing ride and handling characteristics is a front strut, rear multi-link suspension with electronically controlled shock absorbers. In Tour mode the suspension is resilient and more relaxed, delivering supple control. In Sport mode, the steering and suspension become direct and assertive, generating stunning cornering force and directional stability. Four internally ventilated disc

brakes with an anti-lock system (ABS) can extinguish speed with startling efficiency.

In matching the qualities of a premium sedan, 3000GT SL features a comprehensive list of luxury features. Such as, a premium high-power Mitsubishi/Infinity® audio system that features eight speakers, graphic equalizer, separate amplifier and steering wheel remote audio controls. A security system, and power-operated driver's seat, windows, door locks and sideview mirrors. Additional luxuries include an available electronically controlled four-speed automatic transmission and the option to choose leather seating trim.

Mitsubishi applies a liberal dose of high technology to the long-standing tradition of Grand Touring automobiles. The result is a modern classic.

GT

3000GT

The 3000GT is shown in Sable Black and comes standard with a 222-horsepower DOHC 24-valve V6 engine, 16-inch alloy wheels and V-rated high performance tires, dual air bags, six-way adjustable driver's seat, AM/FM cassette stereo with six speakers and graphic equalizer, cruise control, power windows, door locks and sideview mirrors, and split/folding rear seat.

3000GT — making power and performance the top priority.

Ask three different drivers what GT stands for, and you're likely to get three different answers. From speed and style to comfort and technology, drivers have their own ideas. But for drivers who place performance first and foremost, Mitsubishi has a car built right to their specifications. The 1994 3000GT.

A 24-valve, four-cam V6 with 222 horsepower provides more than performance — it generates unadulterated acceleration and seemingly endless reserves of torque.

With Mitsubishi's dual stage Variable Induction Control (MVIC™) and a sophisticated electronic engine management system, this powerplant responds with lightning precision. Right to its 7000 rpm redline. A tightly defined five-speed manual gear box, or electronically teamed four-speed automatic complete the powertrain and maximize the 3000GT's potential.

Planting a broad footprint on the pavement is a fully independent suspension with front struts mounted to their own subframe, and a rear multi-link design that gives the back tires an uncommonly

aggressive bite. Without feeling brittle or unyielding, the 3000GT suspension uses gas-charged shocks and thick stabilizer bars to extract tenacious grip. Body lean barely exists. Creating a sense of driving confidence supported by four massive, internally ventilated disc brakes that are capable of hauling this car down from speed without fade or drama.

High performance, brilliant styling and an interior equipped for the passion of driving make 3000GT the definition of hot. Which is exactly what this GT stands for.

3000GT

Diamond CareSM

Diamond Care ensures that your new 3000GT is thoroughly prepared, inspected and explained prior to delivery. After delivery, a toll-free number brings 24-hour road service. For the first 36 months or 36,000 miles, free towing will be provided to the nearest Mitsubishi Motors Dealer for a warrantable repair. And after the first 1,000 miles of ownership, you are invited back for a free vehicle inspection.

Mitsubishi Triple Diamond Protection PortfolioTM

Choose from three Mitsubishi extended service contracts to extend your comprehensive service coverage for up to six years or 100,000 miles. Ask your Mitsubishi Motors Dealer for details.

Mitsubishi Triple Diamond Concierge ServiceSM

As an addition to the Diamond CareSM Quality Commitment program, a toll-free call provides extended courtesies, including a free loaner or rental car for up to five days (up to a maximum of \$30 per day) if warrantable repairs cannot be made in one day, emergency road service and free towing, and a Concierge Service coordinator to assist you in making any necessary hotel and air travel reservations. See your Mitsubishi Motors Dealer for details.

BUCKLE-UP FOR SAFETY.

Specifications Features & Options

3000GT is offered in Panama Green Pearl, Caracas Red, Zurich White Pearl and Sable Black. 3000GT SL and VR-4 are offered in all colors.

Note: EPA figures not available at the time of this printing. See your Mitsubishi Motors Dealer for mileage figures. Technical data, features, options and other equipment shown in this brochure are based on the latest information available at the time of printing and are subject to change without notice. Some vehicles are shown with optional equipment. For further information on options and accessories, contact your Mitsubishi Motors Dealer. Availability of vehicles with specific features may vary.
