

THE 1984

VOLKSWAGENS

THE SMARTEST PURCHASE YOU CAN MAKE
TO MEET YOUR TRANSPORTATION NEEDS.

IT'S NOT A CAR. IT'S A VOLKSWAGEN.

1984 RABBIT The Volkswagen Beetle changed forever the way that people thought about cars. Since then, all the automotive virtues that made the Beetle so unique have been built into every Volkswagen: durability, efficiency, reliability, common sense, lasting value and fun to drive.

The Rabbit, our successor to the legendary Beetle, follows in this great tradition. You get a choice of several highly efficient engines.* A 1.6 liter Diesel engine with 4-speed or optional 5-speed transmission.

As well as a choice of both carbureted and fuel-injected gasoline engines. You also get lots of interior room, including a spacious hatch-back luggage compartment. Plus a long list of standard comfort features, such as fully reclining bucket seats, an electric rear window defroster, tinted glass and intermittent wipers. For more dazzling performance, the GTI boasts a special high performance 1.8 liter fuel-injected gasoline engine, racing-type suspension and the ability to embarrass many sports cars. For pure driving fun,

put down the top of the Karmann-crafted Convertible and enjoy the spirited performance of the 1.8 liter fuel-injected gasoline engine and sports-tuned suspension with the wind in your hair.

1984 JETTA The Jetta, a German family sedan you can afford, shares the same sophisticated engineering as well as comfort and convenience features of the Rabbit. You'll enjoy excellent fuel economy.* The Turbo Diesel in the Jetta GL, for example, combines the economy of a Diesel* with the

performance of a gas engine. You'll marvel at the nimble handling, and the interior room—enough for 4 full-sized passengers. You'll also enjoy a very generous trunk, with classic lines especially appealing to those who prefer the styling of more traditional European sedans.

Your Volkswagen dealer can help you select the Rabbit or Jetta that best fits your driving needs. Whichever you choose, you'll drive away with one of the most outstanding automotive values of the year.

whims, diamond silver Rabbit GL (metallic paint and radio optional, radio is standard on Convertible)

SCIROCCO AND GTI RACING.

The Scirocco, our true high technology sports car, has earned three National Championships, one Trans Am title and was the winning car on the Pro-Solo professional autocross circuit last year.

Scirocco has been nearly unbeatable for three consecutive years, thanks to its advanced 1.8 liter overhead cam fuel-injected gasoline engine, 5-speed close-ratio transmission, sports suspension and rack-and-pinion steering.

On the autocross circuit, Scirocco has won the Pro-Solo by beating such established performance

cars as the Chevrolet Corvette and Mitsu RX-7.

The Scirocco's racing partner, the GTI, has been awarded more than its fair share of competitive honors as well.

The GTI was the 1983 Jensen Pro-Solo Stock 2 champion, the overall winner in the Canadian National Highlands Rallye, and based on the Handicap Challenge, the standard Rabbit was the overall champion at several Pro-Solo events.

You'll be seeing and hearing a lot more about the GTI. Just keep your eye on the winner's circle.

Unbrn brown metallic Quantum Sedan. Bronze grey metallic Wagon (both with optional sunroof and metallic paint)

1984 QUANTUM The 1984 Quantums are grand touring cars in the classic European tradition. Both the Sedan and Wagon share the same advanced German engineering to meet the demands of such world-class performance. Both are powered by the same 2.2 liter, 5-cylinder fuel-injected gasoline engine with 5-speed manual transmission. Automatic transmission and Turbo Diesel are available. Both the Sedan and Wagon also sport power-assisted rack-and-pinion steering and 4-wheel independent suspension. Acceleration is spirited. Handling is particularly agile. And standard cruise control makes long trips an absolute pleasure.

Adding to that pleasure is a long list of standard comfort and convenience features. Including air conditioning, power windows, electronic AM/FM stereo cassette with 4 speakers, a center console with rear seat heat ducts and a central locking system. The Wagon's luggage area is extremely spacious, with a split rear seat in a 60/40 combination. One or both sides can be folded down to accommodate extra-long payloads.

1984 VANAGON AND VANAGON CAMPER

When it comes to carrying capacity and space, the Vanagon is in a class all its own. It's a real workhorse-

it can carry seven people or nearly a ton of cargo. But it's also a pleasure to drive, in any kind of weather, thanks to its front and rear heater system with flow-through ventilation and 3-speed blower. For even more comfort the Vanagon GL lets you enjoy contoured velour seats with fold-down armrests and tinted glass all-around. All Vanagons have a new fuel-injected Water Boxer engine that's 22% more powerful and 19% more fuel efficient.* This new power, plus rack-and-pinion steering and 4-wheel independent suspension, help the Vanagon perform and handle more like a sedan than a van.

The Vanagon Camper makes the ideal travelling companion. Its rear bench seat and unique pop-up top convert to two double beds. It contains a stove, refrigerator and sink. Two swivel bucket seats that can face two swing-out tables. A skylight. Extra storage space in every corner. And even outlets for small appliances, like a TV. In every detail, the Vanagon Camper is the perfect automotive home-away-from-home.

Your Volkswagen dealer can fulfill all your touring needs—with a Quantum for grand touring in the classic European manner, or with a Vanagon for cross-country touring and camping in the all-American style.

May red Scirocco with optional sunroof

1984 SCIROCCO. German engineering has made Scirocco a true high technology sports car. And competitive racing has endowed it with outstanding performance and handling. But because Scirocco is a Volkswagen, it offers extraordinary fuel efficiency.* And a very un-sports car-like price. Your Volkswagen dealer will gladly arrange a test drive of this most intelligent combination of performance and value in the sports car world.
