THE 1985 GOLF

The all-new Golf is the new definition of hatchbacks. It offers a choice of efficient gas or diesel engines.* As well as superb performance, thanks to rack and pinion steering, 4-wheel independent suspension, power front disc brakes and road-lugging front-wheel drive.

The Golf will drive you into the future in absolute comfort. The spacious interior seats five, features reclining bucket seats, low road noise and a huge cargo area: 17.9

cubic feet with the seat up. A wide array of convenience features are standard, including rear window defogger, intermittent wipers and tinted glass.

With the all-new Golf, the future is here now.

*See EPA mileage figures on specifications page.

Golf's full instrumentation is perfectly placed within the driver's field of vision.

THE 1985 JETTA

The all-new Jetta is the first affordable German road car. No, nothing is left out. Rack and pinion steering, 4-wheel independent suspension, power front disc brakes and front-wheel drive provide world-class performance. While efficient gas, diesel or turbo diesel engines* achieve world-class economy.

Complete driver control is complemented by total comfort. The interior is roomy enough for five and offers such standard amenities as

fully reclining bucket seats, tinted glass, intermittent wipers and child-proof rear door locks. Amazingly, the Jetta's 16.6 cubic foot trunk is one of the largest in its class.

Stylish aerodynamic headlights help lower Jetta's drag coefficient to 0.34.

Standard power front disc brakes and an independent rear suspension contribute toward Jetta's exceptional maneuverability.

*See EPA mileage figures on specifications page.

THE 1985 CABRIOLET

The Cabriolet is designed to go like the wind. Its power is generated by a 1.8 liter fuel-injected engine coupled with a 5-speed close ratio transmission. And since the Cabriolet sits atop a sports suspension, rack and pinion steering and vented power front disc brakes, it handles superbly.

Inside, fully reclining bucket seats and an electronic AM/FM stereo cassette with 4 speakers are standard. Above, the insulated, three-layered top is fitted with a real glass window

with electric defroster.

The Cabriolet brings back good old-fashioned performance and pleasure in open air touring.

Cabriolet's full instrumentation includes a center console with tachometer, oil pressure and temperature gauges.

Optional cloth sport seats add to the comfort and thrill of driving a Cabriolet.

THE 1985 SCIROCCO

Every drive in a Scirocco is a command performance. At your command is a 1.8 liter engine coupled with a 5-speed close ratio transmission for power. A sports suspension, rack and pinion steering, vented power front disc brakes and front-wheel drive provide Scirocco's celebrated dazzling performance.

The cockpit is a true command center. Full instrumentation. All controls within easy reach. The leather-covered steering wheel and shift knob

perfectly placed. And the fully reclining sport seats properly adjusted to the right height.

The Scirocco not only puts you in command of the car. It puts you in command of the road.

Scirocco's dual diagonal braking circuits help ensure safe straight-line stops.

Full instrumentation includes a standard oil temperature gauge.

THE 1985 QUANTUM

The Quantum Wagon is truly an affordable European family wagon, combining sedan-like comforts with the spaciousness and versatility that only a wagon can deliver. Its 1.8 liter fuel-injected engine and 5-speed transmission handles creepily and performs superbly. Air conditioning and fully reclining front bucket seats are standard. Its cargo area can accommodate extra large loads. And its attention to detail is a rewarding experience.

The Quantum GL Sedan with its advanced technology, responsive performance (you can even order an optional turbo diesel engine) and high level of standard features make it an outstanding value among touring sedans. Power windows are standard. As are a central locking system and an AM/FM stereo cassette. Here is a rare combination of performance, luxury and value in a grand touring sedan.

Quantum Wagon's standard rear window sunshade allows a clear, unobstructed view of traffic.

THE 1985 VANAGON

If you've got a lot to carry, get the latest passenger-van from Volkswagens, the versatile Vanagon. The powerful Water Boxer engine, together with rack and pinion steering and 4-wheel independent suspension, provide sedan-like handling and control. You can carry seven people and 49.7 cubic feet of cargo. Contoured front bucket seats with fold-down arm rests are standard on the Vanagon GL.

The Camper's a complete home

on the road, featuring a unique pop-top roof. Two double bedroom areas. Kitchenette. Even front bucket seats that swivel to face swing-out tables.

The Vanagon and Camper. Leaders in room, versatility and value.
