## Golf. The practical performer.

Golf's full instrumentation is perfectly placed within the driver's field of vision.

Golf's practicality begins with a choice of either a gas or diesel engine. When teamed up with a 4-wheel independent suspension, rack and pinion steering, front disc brakes and front-wheel drive, the performance is superb.

### Unexpected comfort

The spacious interior accommodates five comfortably. Then pampers you with standard convenience features like fully reclining bucket seats, tinted glass, rear window defroster and intermittent wipers. The huge cargo area offers up to 39.6 cubic feet of useable space, thanks to the fold-and-tumble feature of the rear seat.

Golf: a hatchback that combines comfort and performance so intelligently.

## GTI. It'll drive you wild with delight.

GTI's fully reclining sport bucket seats cradle you with lateral support.

The Volkswagen GTI can embarrass a lot of sports cars costing a lot more. A 102-horsepower 1.8-liter fuel-injected engine coupled with a close-ratio 5-speed transmission can take you from 0 to 50 in 6.6 seconds. Handling and maneuverability are second nature to GTI, thanks to an independent sport suspension with stabilizer bars. Rack and pinion steering, 4-wheel power-assisted disc brakes. And Pirelli P600 steel belted radials.

### The cockpit also performs

Inside, the GTI greets you with a sport steering wheel. Full instrumentation. A multi-function computer. And sport bucket seats.

The GTI is an investment that repays you with more fun for your money than any other performance car.

## Jetta. The affordable German road car.

Jetta sports one of the largest trunks in its class.

As a true German road car, the Jetta is engineered for dazzling performance. It sports an independent suspension, power front disc brakes, rack and pinion steering and front-wheel drive. As a Volkswagen, its choice of gas, diesel or turbo diesel engines provide unheard-of economy.

### World-class luxury

Few people can enjoy Jetta's performance in absolute comfort. Fully reclining bucket seats are standard. As are such convenience features as tinted glass, rear window defroster and dual remote controlled mirrors. The luggage capacity of the trunk is an astonishing 16.6 cubic feet.

Maybe you can't afford not to own one.

## Jetta GLI. Pleasure matches performance.

A convenient cassette storage tray is included with the optional AM/FM stereo cassette radio.

The Jetta GLI is designed for driving enthusiasts. They'll revel in the 102 horsepower 1.8 liter fuel-injected engine. A 5-speed close ratio transmission. Fully independent sport suspension with stabilizer bars. Power rack and pinion steering. And 4-wheel power disc brakes.

### Comfort and control

Inside, sportiness blends with luxury. Sport seats with velour upholstery and leatherette bolsters offer support. Full instrumentation and a multi-function computer provide driving data. And standard convenience features, like a child safety lock system for the rear doors, abound.

The Jetta GLI has an enthusiasm for driving pleasure few cars can match.

Comfortable, fully reclining bucket seats are standard on Cabriolet.

When the Cabriolet brought back open-air touring, it didn't forget old-fashioned performance. You'll thrill to the beat of a powerful 1.8 liter fuel-injected engine with 5-speed transmission. You'll conquer the road with an independent sport suspension, rack and pinion steering and front disc brakes.

**Performance is in the air**

Before you put the top down, note that it's insulated, has three layers and features a heated real glass rear window. Now, settle into the fully reclining bucket seats, turn up the AM/FM stereo cassette with 4 speakers (both standard) and take off.

The Cabriolet will give you the most refreshing ride of your life.

**Cabriolet. The fun starts up when the top goes down.**

**Cabriolet "Best Seller?"  
How to improve on a good thing.**

An electrically heated rear glass window is standard on Cabriolet (Best Seller model shown).

No wonder this Cabriolet moves out of the showroom so quickly. Its special color coordinated looks make this a guaranteed "Best Seller." It offers all of the same standard equipment as the Cabriolet plus body colored bumpers and mirror housings, unique sport design cloth bucket seats, sporty alloy wheels, and more.

Available in 4 distinct color combinations, the Alpine White Best Seller features matching white seats and roof, plus white painted alloy wheels. The Black version sports racy black seats and roof. Toronado Red is featured at left. And the Helios Blue Metallic Best Seller comes with matching blue seats and roof.

So if you want a "Best Seller," you'd better hurry. They go like the wind.

## Scirocco.

It goes as fast as it looks.

Scirocco's reclining bucket seats are height adjustable for more comfort.

Beneath the hood beats a powerful 1.8 liter fuel-injected engine coupled to a 5-speed transmission. Beneath you sit an independent sport suspension, rack and pinion steering and vented front disc brakes—engineering features sophisticated enough to tame the most winding road.

### A no nonsense cockpit

The cockpit means business. There's a leather covered sport steering wheel. Full instrumentation that's perfectly placed. And fully reclining bucket seats designed for lateral support.

You may find some of these features in world-class sports cars, but you won't find them at Scirocco's affordable price.

## Quantum.

Grand touring in grand comfort.

Power windows and mirrors are standard on the Quantum GL Sedan.

The Quantum GL Sedan absolutely coddles its occupants with an impressive list of standard comfort and convenience features. They enjoy air conditioning. AM/FM stereo cassette with 4 speakers and power antenna. Cruise control. Reclining sport bucket seats. Power windows. And much more.

### Grand performance

Yet the Quantum can transport these same occupants with stunning quickness and agility. That's because its powerful 2.2 liter fuel-injected engine and 5-speed transmission are teamed with such advanced engineering as 4-wheel independent suspension, power rack and pinion steering and power-assisted front disc brakes.

Together, such performance and luxury make the Quantum a grand value.

## Vanagon. A big, comfortable room that moves.

Brilliant technology keeps Vanagon in its leadership position among vans. For example, a 2.1 liter fuel-injected engine with 4-speed transmission combines with fully independent suspension, rack and pinion steering and front disc brakes to deliver performance and handling more akin to a sedan than a van.

### Automatic all-wheel drive

This year, Volkswagen engineers have added the Vanagon Syncro and Camper Syncro, fitted with an all-wheel drive system that engages automatically when needed. Traction and handling are improved in foul weather, during cornering and in off-road ventures, giving you greater peace-of-mind driving than you've ever experienced before. Now the Vanagon and Camper are more practical and versatile than ever.

Vanagon and Camper Syncro's all-wheel drive system can take you places you've never been before. Should the rear wheels begin to spin, as on ice, snow or loose gravel, power is automatically shifted to the front wheels for greater traction. The all-wheel drive system is constantly in action with the degree of power to the front wheels being regulated by the particular driving conditions.

Getting to the camp grounds is always fun in the Camper. The 2.1 liter fuel-injected engine with 4-speed transmission invites brisk driving. While the rack and pinion steering, fully independent suspension and front disc brakes provide uncanny agility and control. And with the all-wheel drive Camper Syncro model, it's easier to get to even the most remote camping areas.

### Home on the range

Once you've arrived, the Camper GL will make you feel right at home. You can open the unique pop-top roof with its skylight. Cook in a fully equipped kitchen. Dine on swivel seats that face swing-out tables. And sleep soundly in two double bed areas.

So no matter how far you travel, you'll never miss home.

Put your feet up, plug in the TV and you'll never know you left home.
