#### DECades ago, VOLKSWAGEN REVOLUTIONIZED THE ENTIRE AUTOMOTIVE INDUSTRY

by creating a new set of driving values which changed forever the way we judge an automobile. This dedication continues to this very day, as our German engineers aspire to design and build products that combine contemporary automotive technology with the classic virtues of durability, reliability and quality. The result is a unique combination of performance and practicality that makes a Volkswagen one of the outstanding automotive values in the world. To prove it to yourself, test drive the 1987 GTI 16V. You'll marvel at its excellent driveability. Only then will you fully understand

what distinguishes a Volkswagen from every other car on the road. Our confidence in our products has led us to provide a Protection Plan that's as simple and straightforward as a Volkswagen itself. Your new GTI 16V is protected by a 2-year unlimited mileage limited warranty on the entire vehicle (except tires). And a 6-year limited warranty is provided against corrosion perforation. A nationwide network of authorized Volkswagen dealers stands ready to provide you with quality parts and service to help make your Volkswagen as pleasurable years down the road as it was the first day you owned it.

The Volkswagen GTI has always been the standard of performance hatchbacks. But now you can witness how we've raised our standards once you get behind the wheel of this road-hugging rocket: the GTI 16V! Thanks to the combination of our German ingenuity and contemporary automotive technology, the GTI 16V is truly an exciting car to drive. Thanks to the fact that

it's a Volkswagen, the GTI 16V is also very affordable to own.

As soon as the engine of the GTI 16V roars to life, you know you're in for the ride of your life. Throbbing beneath the hood is a 1.8 liter fuel-injected powerplant coupled to a close-ratio 5-speed transmission. Each cylinder of this dual overhead cam engine sports four valves instead of the usual two. The result is an exhilarating 125 horsepower that can take you from 0 to 50 mph in just 5.7 seconds. To transform this power into performance, our engineers have installed such race-bred technology as an independent sport suspension with stabilizer bars. Quick-ratio power rack and pinion steering. And 4-wheel power disc brakes, front vented. The driver is rewarded with handling that's crisp, responsive and reassuring. As well as with the wonderful realization that driving will never be dull again.

Since driving habits are as individual as you are, a complete selection of options and dealer installed accessories is available to help you equip your new GTI 16V to suit your personal preferences. Equipment pictured above includes: a sunroof, multi-function display, AM/FM cassette stereo radio with anti-theft feature, power mirrors, power windows and a rear window wiper/washer (standard).
