## Jetta. Affordable value from Europe's Number One carmaker.

### Value.

That's a word with special meaning for us at Volkswagen. Because for over 40 years, Volkswagen has been a world leader in automotive technology and value.

Today, Volkswagen is the world's fourth largest carmaker and the only carmaker that combines European design and performance at an affordable price. You'll appreciate these qualities the first time you get behind the wheel of a new Volkswagen.

And your appreciation will grow with each passing mile. Jetta is designed to live up to the Volkswagen tradition, and to provide an exceptionally gratifying driving and ownership experience.

As a result, the way it looks, feels and drives is distinctive to driver and passenger environments reflect years of ergonomic study.

Its fuel injected engine, independent suspension, rack and pinion steering and front wheel drive enhance driver control and impart a sense of confidence that must be personally experienced to be appreciated.

And they make driving a new Jetta a great deal of fun. To help assure that confidence continues, every Jetta is protected by a 2-year/24,000-mile limited warranty against defects in materials and workmanship, a 5-year/50,000-mile limited powertrain warranty and a 6-year limited warranty against corrosion and rust perforation.

Test drive a Jetta to see what we mean by Volkswagen value.

And why it's time to think about Volkswagen again.

Test drive a Jetta to see what we mean by Volkswagen value.

Jetta Cabriolet features a fully 1.8 liter fuel injected engine that averages 308 hp @ 5400 rpm (100 hp in California).

## Jetta. Volkswagen's affordable road car.

An ignition timing map is programmed into Jetta's Digifant electronic control unit to ensure smooth engine operation.

At Volkswagen, we think there's only one thing better than a true European road car: a true European road car at a price you can afford.

That's the idea behind the Volkswagen Jetta. In it you'll find comfort, performance and sheer driving satisfaction. All at an affordable price.

Jetta's value begins with its patented Digifant electronic engine management system. The Digifant system uses a powerful microprocessor to command the engine's ignition, knock sensor, idle speed control and electronic fuel injection. The system even compensates for altitude and weather changes.

All of which means smoother, crisper, more spirited response across the engine's entire operating range.

The Digifant system works in concert with a fully synchronized smooth shifting 5-speed transmission (or optional automatic)

and four wheel independent suspension system. Power rack and pinion steering, power front disc brakes, steel belted radial tires and front wheel drive provide uncanny handling and agile maneuverability. From behind the wheel you experience a pleasurable sense of power, comfort and driver control.

That's why Jetta is the best-selling European nameplate in the U.S.: it drives as if price were no object, yet it has a price you can afford.

That's what Volkswagen value is all about.

Jetta GL is powered by a highly refined 1.8 liter fuel injected powerplant that incorporates the latest European technology. It produces a maximum of 100 horsepower @ 5400 rpm for a responsive driving experience.

## The most popular European road car in America.

There are many excellent European road cars sold in America. But American car buyers choose Volkswagen Jetta more often than any other European nameplate.

Every Jetta is equipped with an impressive number of standard features, such as a powerful 1.8 liter OHV fuel injected engine, 5-speed trans-

mission and four wheel independent suspension. Jetta GL is also available with a diesel engine, which gives it the best fuel economy in its class (see EPA estimates on page 19).

Jetta's features work together to give you a true sense of comfort and driver control. The Jetta's torsion beam rear suspension, for example, functions

as an integral stabilizer to help minimize body lean during hard cornering. And a patented track-correcting rear axle eliminates steering affect from the rear wheels, a reassuring feature when road conditions are less than ideal.

A height adjustable steering column, fully reclining bucket seats, rear window defroster

and dual remote controlled mirrors are standard.

And for extended traveling, Jetta has one of the largest trunks in its class—even larger than such luxury cars as the Mercedes-Benz 300 series.

In America, the best selling European road car is the one that has it all—but at an affordable price: Volkswagen Jetta.

## More choices, more performance.

The Jetta Carat is designed for the driver who admires Jetta value, but wants more flexibility and option choices.

Carat's interior has been designed to enhance comfort and traveling pleasure for both driver and passengers. Infinitely adjustable velour front bucket seats, for example, provide firm support while allowing you to tailor your seating position to your individual needs.

Passengers will appreciate thoughtful touches like an illuminated right hand vanity mirror, rear seat headrests and a center rear armrest that contains a convenient beverage tray.

And like Jetta GL, the Carat is genuinely comfortable for five adults. Space utilization has been maximized resulting in generous head-, shoulder-, and leg-room for all passengers. And trunk space that offers exceptional carrying capacity for all your belongings.

To help encourage a sense of security and peace of mind, the Carat is equipped with automatic passive restraints for front seat passengers, three-point seat belts for outboard rear passengers, and a central locking system that secures the doors, trunk and fuel filler door at the turn of a key.

Carat has a powerful 105 horsepower DHC engine which delivers smooth, brisk acceleration. Its power assisted steering and brakes have just the proper weight and feel. A patented four wheel independent suspension system helps even out bumps in the road. And for reassuring roadholding capabilities, Carat delivers the extra traction and all-weather driving confidence of front wheel drive.

Carat: it gives you everything you'd expect from a Jetta. And more.

Headrests for rear seat passengers give Jetta Carat an additional measure of style and split.

## Jetta GLI 16V. A powerful reason to drive a Volkswagen.

The Jetta GLI 16V is equipped with a new 2.0 liter fuel injected engine, the most powerful engine available in a Jetta. Each cylinder of the dual overhead cam powerplant has four valves instead of two, resulting in a dramatic increase in energy output: 134 horsepower at 5400 rpm.

Even more remarkable is

what this power feels like when teamed with the GLI 16V's close-ratio 5-speed transmission, special sport-tuned suspension and power disc brakes at all four wheels.

Inside, the design of the GLI 16V's driver and passenger environments are tributes to years of ergonomic study.

Vetour upholstered Recaro®

bucket seats with electric height adjustment, and a leather-wrapped height adjustable sport steering wheel are standard. Before you is instrumentation so sensibly arranged you can read it at a glance.

There's even a multi-function computer that relays specific driving information such as distance traveled, average driving

speed and average fuel consumption.

From its control enhancing front air dam and rear spoiler to its 1500\* 15-inch cast alloy wheels and optional anti-lock braking system, the GLI 16V is an outstanding example of a European sports sedan.

Best of all: it all comes at a Volkswagen price.

## Sensibly designed; room for five.

Jetta's interior is designed to promote a feeling of comfort and control. It's something you'll appreciate the moment you take the wheel.

First, you'll notice how much room there is. Five adults will find they have enough headroom and legroom to please everyone. And if it's necessary to take a lot of luggage along,

Jetta can be equally accommodating. Its 16.6 cubic feet of cargo space make its trunk significantly larger than most cars in its class, including Toyota Camry.

Jetta's analog instrumentation and controls are positioned so they can be easily read and quickly activated. Infinitely adjustable, velour upholstered

front bucket seats are fully reclining and height adjustable, and are designed to ensure precisely the right combination of comfort and support.

Together with the height adjustable steering wheel, you'll be able to find the driving position that's just right for you.

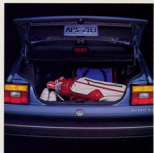

With standard convenience features like tinted glass, dual

remote controlled mirrors and a rear window defroster, Jetta is a pleasure to drive.

And unique to own: you can enjoy Jetta with four friends.

Or all by yourself.

Test drive a Jetta at your authorized Volkswagen dealer. And see why it's time to think about Volkswagen again.

# Jetta Specifications

Mechanical	GL	Carat	GLI 16V
1.8 liter 100 HP 4-cylinder fuel injected engine	•

**A WORD ABOUT UPDATED SERVICE INFORMATION:** Volkswagen regularly sends its dealers useful service information about our products. Volkswagen reserves product performance in the field. We then prepare bulletins for servicing our products better and helping to avoid costly repairs. Now you can get these bulletins, too. To get ongoing information, see a local Volkswagen dealer.

Volkswagen United States, Inc. reserves the specifications in this brochure to be correct at time of printing. However, specifications, standard equipment and options are subject to change without notice. Delayed availability on height adjustable seat and steering wheel. Some options may be unavailable when your vehicle is built. Please ask your dealer for advice concerning current availability of options and verify that your vehicle includes the optional equipment you ordered. Tires are supplied various manufacturers. Canada: Use: GM, GLI, Jetta, Navigator and Volkswagen are registered trademarks of Volkswagen AG. Seatbelts save lives. Don't drink and drive.
