

J E T T A III

We've never changed a Volkswagen just for the sake of change. Everything we've ever done has been to make our cars

**IT'S THE VOLKSWAGEN
YOU'VE ALWAYS
KNOWN. AND THE
JETTA YOU'VE ALWAYS
WANTED.**

better. ● Introducing the completely redesigned Jetta_{GL} lineup, totally new Volkswagens filled with bold changes.

● The Jetta_{GL} GL and GLS present the familiar traits of visionary Volkswagen engineering and design integrity. Qualities that make Jetta_{GL} functional in use, high in value and fun to drive. Qualities that have also given Volkswagen its deserved worldwide reputation for high production standards, and made it the best-selling marque in Europe for the seventh straight year. ● The new Jetta_{GL} GLS is a roomy, 4-door, affordable engineering wonder. And it

is, in a word, "loaded." A remarkably extensive array of standard features includes CFC-free air conditioning, power central locking and anti-theft vehicle alarm system. ● Yet, the Jetta_{GL} GLS offers even more. At its core is a new powerful 2.0 liter fuel-injected engine for better acceleration and overall performance. A re-tuned suspension gives it a smoother ride and tighter handling. And its quiet interior is spacious enough for five adults. Features that make driving a Jetta_{GL} GLS all that much more rewarding. ● And, when you get right

Jetta_{GL} GLS in Alpine White.

down to it, that's what this Volkswagen is all about: driving. Bottom line, the Jetta_{GL} GLS is a terrific way to go—everywhere.

Audi[®] GLS in Pearl Red Clearcoat Metallic[®]
*Always responsibly.

The Jetta_{GLS} interior is a full commitment to comfort and convenience.

❑ The Premium AM/FM stereo cassette and eight-speaker sound system fill the interior with high-quality sound.

❑ Standard cruise control helps alleviate driver fatigue.

❑ Power windows with convenient "one touch" down feature are standard.

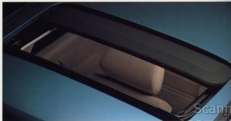

❑ Enjoy your favorite audio entertainment choices with the new available trunk-mounted six-disc CD changer.

❑ A new DC-free air conditioning system is standard on Jetta_{GLS}. Its compressor eliminates surging and increases efficiency.

❑ The GLS interior ensures spacious seating for five, and new fabrics and patterns to add an elegant touch.

❑ An available power glass moonroof with shade, tilt and slides open. A refreshing Jetta_{GLS} feature.

❑ The split-folding rear seat with amount is standard on GLS. It's lockable and offers direct access to the trunk for easier loading and more flexible cargo capacity.

Half the pleasure of driving a Jetta_{GLS} is because of where you're sitting. We completely reworked the interior for maximum comfort and convenience and to avoid driver distractions. ● Front and rear seats conform to real human contours. Both front seats fully recline and have height and lumbar adjustments. The split rear seat folds down—

WE DIDN'T DESIGN
AN INTERIOR AS MUCH
AS WE CREATED AN
ENVIRONMENT.

completely or partially—for added trunk space. ● The standard features of Jetta_{GLS} are abundant and impressive—especially for such an affordable car. Air conditioning, cruise control, advanced eight-speaker Premium cassette stereo, power windows and a power central locking system, for example, are just a few. ● If you really enjoy driving, you'll find Jetta_{GLS} provides the right environment for it.

The Jetta_{GL} presents the kind of logic and performance standards you would expect to find only in cars priced significantly higher. ● Yet, innovative, advanced Volkswagen engineering and a traditional commitment to quality has allowed Jetta_{GL} to stand as proof that it is quite possible to build a thoroughly satisfying road sedan at an affordable price. A concept Volkswagen has been able to manage successfully

**THE RIGHT
PRIORITIES IN
ALL THE
RIGHT PLACES.**

for years. ● Like the Jetta_{GLS}, the GL is a taut, precise vehicle designed to deliver both performance and comfort. It's as well suited for the endless bustle of urban commuting as it is for long lazy stretches of Sunday cruising. ● New aerodynamic styling gives Jetta_{GL} a sleek silhouette. The lines

are more rounded and appealing. The look is fresh, cuts down wind resistance, and, with Jetta_{GL}'s wider track,

Jetta_{GL} in Satin Silver Glossed Metallic.

enhances both appearance and handling. ● The standard power rack-and-pinion steering, power 4-wheel disc brakes, all-season, low-profile radial tires and 4-wheel independent suspension also contribute to better control. ● Jetta_{GL}'s new 2.0 liter engine develops 15% more horsepower than its predecessor. It's quieter too. Matched to a standard 5-speed manual transmission or an optional 4-speed electronically controlled automatic, Jetta_{GL}'s performance is crisp, clean and definitely inspiring. ● The all-new Jetta_{GL}. A car that confirms what driving ought to be: affordable and fun.

Jetta, GL in Turquoise Clearcoat Metallic

Jetta_{GL} interior provides an array of features for a maximum level of comfort.

- A new available, electronically controlled 4-speed automatic transmission has two integral modes: "economy" for added efficiency and "sport" for added performance.
- The standard height-adjustable steering wheel accommodates individual driver needs.
- A beverage holder, standard, adds a convenient touch and prevents awkward spill situations.
- The standard anti-theft vehicle alarm and power central locking systems add security and convenience.
- Jetta_{GL} instrumentation includes speedometer, trip odometer, tachometer, digital clock, service reminder and warning lights, standard.
- Eight high-quality speakers, including separate woofers and tweeters, are standard on Jetta_{GL}.
- Jetta_{GL} (GL) front bucket seats are fully reclining and trimmed in velour fabric, down here in beige.

*See US website at your Volkswagen retailer.

Making the Jetta_{GL} roomier wasn't enough. We wanted to make sure a driver could focus on driving and four passengers could enjoy the ride.

● Ergonomic improvements are therefore readily apparent. For example, all gauges and controls are laid out well within the driver's sight and reach.

INSIDE,
FOCUSING ON ROOM
WAS JUST THE START.

● New sound-deadening insulation minimizes road noise. In front, the seats fully recline, with the driver's seat also height-adjustable. And in the rear, the fold-down seatback increases an already large cargo capacity. ● The right standard touches are there, too. Everything from a height-adjustable steering wheel to an anti-theft vehicle alarm system and more. All making Jetta_{GL} a thoroughly enjoyable experience inside and out.

This is where you learn what's really at the core of a Jetta. The answer should be obvious: advanced German performance engineering. The result is Fahrvergnügen, the distinctly European driving experience you can enjoy only in a Volkswagen. ● Jetta sports

passing acceleration. Pair it with the smooth shifting standard 5-speed manual transmission, or the available new electronic 4-speed automatic which operates in a higher revving "sport" mode for performance, or an "economy" mode for added efficiency* depending on your driving style. ● Then, try Jetta around a few sharp curves. The 4-wheel independent suspension has been re-tuned with optimized geometry and increased suspension travel to keep the ride flat and firm. Power steering and power 4-wheel disc brakes lend precision handling and stopping ability. And both front and rear tracks are wider for improved directional control. ● Sure, technically we designed Jetta to be a practical five passenger sedan, but we never designed it to act like one. Rest assured, it doesn't.

*See EPA estimates at your Volkswagen retailer. Motronic is a registered trademark of the Robert Bosch Corporation.

a new 2.0 liter, 115-hp., fuel-injected engine developed specifically for American driving conditions. It's monitored by a Motronic® management system that senses and adjusts for factors like temperature and altitude. As a result, fuel economy and performance are maximized* ● Spirited engine performance features high peak torque and a broad overall range for responsive

**THE HEART
AND SOUL OF EVERY
VOLKSWAGEN.**

Jetta GL in Turquoise Overcast Metallic.

Some of the best qualities of Jetta are things you really can't see too easily, but there's no question you can feel them.

- The independent front suspension features MacPherson struts, coil springs and 20mm stabilizer bar. Steering geometry has been optimized for precision handling.
- The fully synchronized 5-speed overdrive manual transmission is standard. Shifts are smooth and easy.

The new Jetta_{III} is an exciting—and secure—car to drive. Because we have no higher priority than the safety of our cars' occupants, the Jetta_{III} has advanced safety features that make peace of mind standard equipment. ● The body is a cage of steel beams,

and two rear 3-point safety belts and a rear center lap belt. Unique upward-sloping "rising ramp" front seats and a knee bolster also work with the system to help reduce injuries. ● Yet, while surviving an accident is obviously a key objective, avoiding one altogether is infinitely better. ● A dual diagonal circuit braking system, rack-and-pinion power steering, a firm suspension and more, provide a driver with the ability to respond to road surprises. Of course, there are many more safety features.

For a complete list, turn to Page 18. ● You'll find we've given Jetta_{III} what it needs to give you a true sense of driving security and confidence.

plates and tubes—including side impact bars. It's been reinforced significantly. Front and rear "crumple" zones, like those created by our exclusive mash seam welded front chassis members, guide crash energy in predetermined directions. ● Inside, there is an automatic front safety belt system with supplemental manual lap belts

The Jetta_{III} body is reinforced with welded steel cross-beams, plates, bars and tubes. It's a critical protective cage surrounded by front and rear ends with crush-absorbing "crumple" zones.

We know our customers appreciate superior performance in comfortable, secure cars. We also know these same people make quality, reliability, durability, overall efficiency and environmental concerns high priorities, too. How well our cars do in these areas determines our success with you. For these reasons, our engineers are always looking for—and finding—better, smarter ways to benefit the customer. Following are a few examples of how our commitment shows.

ECOLOGY

Volkswagen is a leader among auto manufacturers in its on-going commitment to the environment. We have completely eliminated use of ozone-depleting chlorofluorocarbons (CFCs) in the Jetta_{III} air conditioning system. Paint top coats do not use lead chromates or cadmium pigments (with no compromise in quality). Brake and clutch linings are asbestos-free. Plus, we are preparing our cars for future ease of resource recovery, using materials that allow a vast majority of a vehicle to be reprocessed when separated into component parts. Jetta_{III} plastic components are coded specifically for that purpose. Worldwide we also recover and recycle over 4,000 tons of paper—the equivalent of 60,000 trees. As techniques develop, we will continue to make the improvements necessary to maintain our commitment to the environment.

DURABILITY AND RELIABILITY

Volkswagen enjoys a reputation for building dependable cars that last. To compromise here would jeopardize the high standards we place upon ourselves. That's why

QUALITY

Of late, this has been the buzzword of the industry. Sometimes it's an adjective, sometimes a noun. But more often than not, the word is used without regard as to whether or not it fits. We at Volkswagen believe that as often as we apply the word to our cars, it really doesn't mean anything until you apply the word to our cars. So, to reinforce our standards we put every Jetta_{III} through a series of rigorous inspections when it's built. Cars are checked, adjusted and re-checked before they leave the factory. Added retailer preparation time, supplemental test drives and early product observation systems also help to thoroughly monitor and improve Jetta_{III} quality levels.

As much as we can tell you about Volkswagen and Jetta_{III}, the best way to appreciate one is to test drive it at your Volkswagen retailer. You'll then understand why we firmly believe this is one of the most dynamic and enjoyable sedans on the road.

DRIVETRAIN

CONFIGURATION Front Engine/Front Wheel Drive

| | |
|-----------------------------|--|
| ENGINE | |
| Type | 4-Cylinder in-line |
| Displacement | 2.0 Liter |
| Max torque @ RPM (ft. lbs.) | 95 @ 1,400 |
| Max power (hp @ RPM (B, H)) | 132 @ 3,700 |
| Valves/Inlet | Single overhead cam, ball drive |
| Fuel/Air Supply | Separated multi-port electronic fuel injection |
| Ignition | Digital electronic with knock sensor |
| Engine Controls | Autovac™ electronic engine management |

TRANSMISSION

Standard 5-speed manual
Optional electronically-controlled 4-speed automatic with dual integrated shift modes

ELECTRICAL

| | |
|------------|---|

SAFETY FEATURES

Auto, seats or exceeds all NHTSA safety standards. Safety features include the following:
Adjustable headrest for front seats
Automatic front safety belt system with supplemental lap belts
Automatic transmission shift lock
Bumped wheelie
Brake fluid pressure loss warning light
Center high mounted stop lamp
Collapsible energy absorbing steering column
Dual diagonal circuit braking system
Energy absorbing steel body sub-structure with front and rear crush zones
Energy absorbing steering wheel
Rearward-facing tether system
Interior floor of energy absorber
Key-in-ignition warning
Rack cross welded front frame rails
Non-oversteer rear axle
Plowthrough fuel cell
Rear seat headrest
Rising ramp seat design
Lock-correcting rear axle
Industry reinforcements including floor sills and upper side rails and instrument panel cross-beam
3-point rear safety belts

FUNCTIONAL FEATURES
