

## VOLESWAGEN WARRANTY

**PROTECTION.** Our confidence in the new Volkswagens is so strong, we back them with Volkswagen Protection Plus. All 1993 Volkswagen passenger cars feature a comprehensive plan that includes the best limited powertrain warranty in the business: 10-year/100,000-mile coverage for original owners. No other vehicle manufacturer in the world offers a longer powertrain warranty,

and there's no deductible to complicate things. Every Volkswagen is also protected for six years or 60,000 miles (whichever comes first) against water body corrosion perforation. It's a testament to the steps we take to maintain our vehicles' structural integrity and appearance. Yet, we offer even more: a two-year/24,000-mile "bumper-to-bumper," no deductible limited warranty that covers all defects in materials and workmanship. (Items are covered by their manufacturers.) We also pay for scheduled maintenance for two years/24,000 miles and provide 24-hour roadside assistance through a two-year membership in the United States Auto Club Motorist Division, Inc. About the only thing we don't cover is an accelerated car wash. For details about all these warranties and other programs, please see your Volkswagen retailer. You'll find a Volkswagen not only provides driving enjoyment, it also allows complete ownership confidence. And that's what Volkswagen Protection Plus is really all about.

A few words about the features and options shown elsewhere. Volkswagen Credit Corp., Inc. retains the information and specifications in the brochure to be correct at time of printing. Features, specifications, model/equipment, trim, options, colors and prices are subject to change without notice. Some features may have restrictions. Please refer to your retailer for details concerning availability of options and verify that your vehicle includes the equipment you ordered. There are suppliers for various manufacturers. Some vehicles are produced with options which may be available at extra cost or may not be available in some states. Volkswagen, the Volkswagen logo, and Protect are registered trademarks of Volkswagen AG. United States Auto Club Motorist Division, Inc. is a registered trademark of the United States Auto Club. Motorist is a registered trademark of the Robert Bosch Corporation. Volkswagen regularly works to realize service information about our products and services product performance in its field. We then prepare bulletins for conveying our position and helping to meet your needs. These bulletins are also available to you. To get updating information on your local Volkswagen retailer, for further information regarding the New Passat (V6 or any other Volkswagen model), please call 1-800-333-8887. Your dealer may have a brochure upon your next visit. Also call or write the manufacturer. Don't drink and drive. ©1992 Volkswagen AG or U.S.A. U.S. from file #400700007

Volkswagen

THE NEW PASSAT  FROM VOLKSWAGEN

**C**onventional

wisdom says a luxury car should isolate you from the road. However, we believe a luxury car should heighten your experience of the road. The new Volkswagen Passat GLX offers a compelling alternative to the conventional luxury car, an alternative that's designed around things that really matter. Like safety, reliability, adaptability and driving pleasure. Passat GLX offers that experience the owners of every Volkswagen. So we look for the best solutions, conventional or not, to engineering questions. New and better solutions that retain the joy of driving while making good sense. As a result, we offer a simple example of fresh thinking for a higher level

of performance, safety, comfort and features. Important engineering points that make this driver's car achieve a higher standard of automotive excellence. The New Passat GLX is a product of Volkswagen's meticulous German engineering; a refined, affordable package with advanced features that both drivers and passengers can appreciate. Like anti-lock brakes. Steel air bag supplemental restraint system. Traction control. Substantial V6 power. Four-wheel independent suspension. A light, easy interior. And a degree of engineering quality that serves to define function and comfort in a car today. The New Passat GLX. German engineering at its best.

**S**afety.

Without question, drivers and passengers must be protected. The New Passat GDI can help you survive accidents and, better yet, avoid them altogether with its sophisticated passive and active safety features. Like standard dual air bag supplemental restraints. And a 3-point emergency tensioning retractor safety belt restraint system that instantly, upon frontal impact, positions the belts for optimum performance. The car is a virtual steel cage with front and rear crumple zones that help absorb crash energy, guiding it away from the passenger compartment. The active interior is designed to help minimize chances of injury. After all, without protection for those who matter, nothing else matters at all.

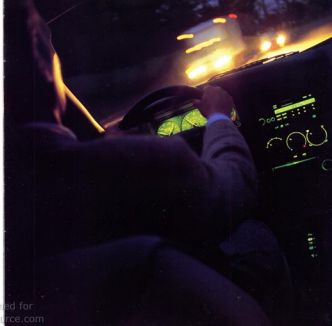

A driver's challenge: keep his eyes on the road. An on-board "steering" feature can help. The New

Passat GDI provides some safety capabilities. Like a 4th engine with power to manual traction control, an electronic differential locking system that helps power individual

wheels. Storage for better road handling. Front-wheel power the Anti-Lock Braking System (ABS) to help in skid control. Even "day-long" to advance wear\* that's long lived without before the need to replace and handling and a safe drive.

\*Always maintain a 100.

# P erformance.

In terms of 0-to-60 mph (0-100 km/h) time, the New Passat GTE quickly delivers its German engineering brought to life by a remarkable, 170-horsepower, 2.0 liter, Fuel-Injected V6 engine that allows responsive acceleration and passing. And the New Passat GTE displays its European performance heritage by harnessing that power with handling features that provide what's really important on the road — a stable, smooth, controlled ride. A four-wheel independent suspension and advanced steering and braking systems give the New Passat GTE its refined road manners. Total performance is at the heart of every New Passat GTE. It's an experience to appreciate every time you drive.

The New Passat GTE offers strong performance on a daily basis. Standard equipment includes:

- ① A traction control system to help reduce wheel spin in wet or slippery conditions.
- ② Four-wheel independent suspension that lets the wheels move individually for a smooth, controlled ride.
- ③ A 4-wheel steering and brake system that maximizes your wheel steering effect by turning the rear wheels back slightly behind the front wheels.
- ④ Four-wheel power disc brakes with an optional Brake System (ABS) to help provide steering control if a wheel begins to lock. It's all brought together by over 2000 sq ft of a specially treated 16-gauge stainless steel body.

See the complete list of options for the New Passat GTE at [www.vw.com](http://www.vw.com).

**I**nterior design. The New Passat GLX's spacious interior stands as a statement of functional refinement and sensible elegance. A liberal complement of standard equipment assures a high degree of comfort. Seats are sculpted with thigh and lumbar supports. Child safety locks prevent unintended exits. And the dimensions inside both the New Passat GLX Sedan and Wagon are generous. The Wagon allows up to 68.9 cu. ft. (1500 L) of cargo space with the rear seat down. The Sedan's split rear seat folds down and the seat back folds flat to create a level surface that combines with the trunk for added room. The result: excellent interior design that yields an excellent driving experience.

Volkswagen's understanding of value does not mean going without. On the contrary, the New Passat GLX is endowed with more than a fair share of amenities to make a drive enjoyable for everyone. This includes an eight-speaker Premium AM/FM stereo cassette with CD changer control capability, cruise control, multi-

function trip computer and more, all standard. Optional leather seating surfaces add a finishing touch.

# F

eatures and equipment. The list is long; each item is vital. Because each item helps provide the safety, comfort, convenience or performance advantages that complete the New Passat SED. Like the standard power door locks and windows with a "one-touch" automatic down feature. Environmentally-friendly CPC-free air conditioning. A special filter to help keep out irritating pollen. Fresh thinking from a company that runs the world's largest automotive recycling operation. More features are displayed on the next page, and a full list of standard and optional equipment is found on page 19. It all helps to ensure a higher standard of automotive excellence.

① Easy New Passat SED windows are equipped with power windows for outside operation using a "one-touch" automatic down feature. The optional power glass control lets you close the windows from the driver's seat.

② The optional power door locks help keep the vehicle and its contents safe. The optional power windows help keep the vehicle and its contents safe. The optional power windows help keep the vehicle and its contents safe.
