

On the road of life there are passengers and there are drivers.

Scanned for  
A2Resource.com

**Drivers wanted:** Today, mankind is safe, insulated from the elements. We've got climate control. Home shopping. 500 channels. We can surf the net. We've even got cars that are so smooth and quiet, you don't even know you're driving.

Volkswagen is about feeling something again.

Everything about driving one feels different. You feel the road, the car and how you're connected to it all.

The interiors are clean and un-fussy. The gauges are clear and simple to read. The controls are all within easy reach.

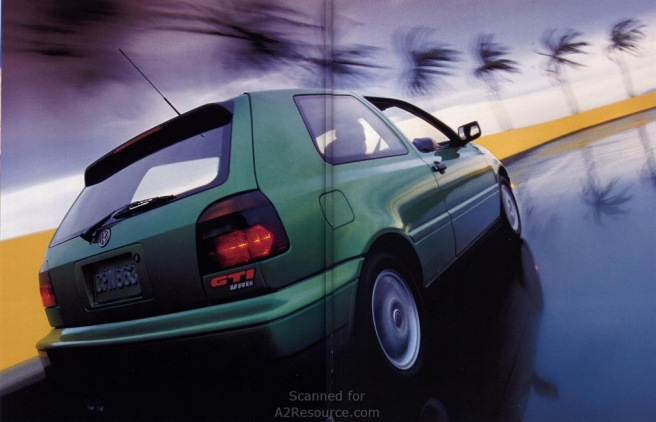

The seats sit slightly higher so you can see more of the world around you.

Practicality, safety and affordability have not been sacrificed for acceleration and handling. Rather, they comfortably co-exist in all models. The list goes on, but it's the sum of its parts that really makes Volkswagen a unique car for unique people.

The German engineered Volkswagen.

It's technology that invigorates. Never isolates.

**That's what we're about. Is that what you're about?**

Scanned for  
A2Resource.com

The Volkswagen Golf, GTI and Cabrio are cars with a different set of priorities; built for people who take a stick shift view of the world around them. Even if they happen to prefer automatics.

This is German engineering at its finest. Timeless designs. Clean, simple interiors. Easy to read gauges. Hatchbacks and cargo space that make loading and unloading easy. Amenities and options that add to the driving experience without getting in the way of it.

These cars are about feeling something again. They are about being connected to the road, the car and everything around you.

That's what we're about. Is that what you're about?

**Above left:** The integral padded roll bar of the Volkswagen Cabrio is an important safety feature.

It provides support to the convertible top and windows, adds rigidity to the body structure and helps protect occupants in the event of a rollover. Cabrio shown in Candy White.

**Above right:** Golf GL, shown in Candy Blue Metallic.

Winner of the prestigious European Car of the Year award when first introduced, Golf GL features a 20-hp 115 hp 4 cylinder engine for real performance and excellent fuel economy.

With 105 cubic feet of interior room, Golf GL is also quite spacious.

**Preceding page:** GTI V16 in Bright Sun-Green Metallic features a 2.8 liter 172-horsepower fuel injected 6-cylinder engine that'll take you 0-60 in about 7.1 seconds.

Traction control on the GTI V16 helps to provide grip when starting out in rain or snow by transferring torque to the wheel with the greatest traction.

**The Volkswagen Jetta** connects you to the world around you. And the 172 hp VR6 engine in the GLX gets you out and into it at 60 mph in just 7.5 seconds (manual transmission). A custom ten-speaker Bose® music system\* provides the appropriate soundtrack.

Everything about the Jetta serves the driver, from its true German road handling to a simple turn of the key that locks all the doors, activates the anti-theft alarm system and even closes the power windows and sunroof.†

And because getting out and into the world by yourself isn't nearly as much fun as bringing some friends along for the ride, the Jetta seats 4 comfortably. It even has a fold down rear seat for extra cargo space. The Jetta. It awakens your senses. And it makes sense.

**Above left.** Jetta GLX in Secure Green Metallic.

Its amazing 170-horsepower VR6 engine gets 0-60 in 7.5 seconds (manual transmission).

Track-correcting rear axle means you don't have to fight the steering wheel around tight corners.

The GLX includes aggressive 17" alloy wheels and fog lamps for better visibility.

**Above right.** Jetta GL in Suede Silver Metallic.

America's top-selling European 4-door sedan.

The low-drag body of the Jetta GL improves performance and fuel economy by reducing wind resistance.

Smooth-profile mirrors and door handles help give Jetta GL a drag coefficient lower than that of a BMW 525i Sedan.

**Preceding page.** The Jetta GLS is powered by a potent 2.0 liter fuel-injected engine.

Independent torsion-beam rear suspension allows each rear wheel to react independently to road bumps and potholes, making the Jetta GLS a predictable handling, smooth-riding car.

Shown in Flash Red.

**Following page.** Jetta GLX.

Over 100 high-level interior production seating surfaces (3-door garage seating).

Shown with optional automatic transmission.

\*Optional on the GLX, optional on GLS and GL.

†Power windows standard on GLS and GLX, power windows standard on GLX, optional on GL and GLS.

**Above left.** Passat GLX Wagon shown in Pearl Red Metallic.

The Passat GLX Wagon has almost 70 cubic feet of cargo space with the rear seat down. It includes such standard safety features as dual air-bag supplemental restraints, driver safety belt restraint system, front and rear crush zones, roll-overed steel safety cage and side-impact door beams.

**Above right.** Want until you feel the exceptional handling and control of the Passat GLS.

It's German engineering at work. Rack-and-pinion steering, front-wheel drive, 4-wheel independent suspension and 4 wheel disc brakes are all standard. Passat GLS shown in Windsor Blue Metallic.

**Preceding page.** The compact size of the powerful VR6 engine in the Passat GLX lets the hoodline fall away at a steep angle from the windshield for clear

view of the pavement ahead and fewer blind spots. This enhances driver safety by increasing outward visibility. Shown in Black Magic Metallic.

**Following page.** Passat GLX Sahara. Beige leather seating surfaces. Shown with optional automatic transmission.

**The Volkswagen Passat** is designed to break you back into life. Not lock you away from it. In the Passat GLX, the 172 hp VR6 engine can take you from 0-60 in 8.3 seconds (manual transmission). Traction control transfers that power to where it's needed most, so you always have a feel for the road, no matter what the weather conditions are.

Inside, you'll find more passenger space than any Volvo or Mercedes Benz E class and an intelligently designed interior that puts the needs and comfort of the driver first.

Drive the Passat. We think you'll find it a very different type of road sedan. But then again, Volkswagen has always been different.

**Volkswagen Peace of Mind.** Driving is like life: to really enjoy it, you need true peace of mind. Which is exactly what Volkswagen is all about and we give you that peace of mind in a lot of ways.

First, and foremost, with safety. Our finest engineering has gone into developing **Active Safety** features that help you, the driver, feel in control and self-assured.

Front-wheel drive, rack and pinion steering, and front disc brakes are standard on every Volkswagen model because they help deliver precise, predictable handling in all driving situations.

Traction Control and ABS brakes are also available on certain models for superior performance regardless of weather or road conditions.

Peace of mind also includes Volkswagen's structurally intelligent **Passive Safety** features, designed to help protect you in a collision. Our anti-intrusion door beams deliver side impact protection.

In addition to front and rear crush zones, we've also engineered a high tensile steel safety cage around the passenger compartment that surrounds and helps protect the people inside. Dual air bag supplemental restraints, of course, are standard on every model.

In some cases, peace of mind takes on a different meaning. That's why an anti-theft alarm system is standard equipment. It protects the doors, trunk, (rear hatch on

the Golf and Passat Wagon), hood, and factory-installed stereo cassette player and provides hazard light plus horn alarms as well as an ignition system lock out.

The convenience of a central locking system is also standard: a simple turn of the key allows for selective unlocking of one door or all doors, simultaneously locking all doors, closing the power windows and sunroof (if so equipped), and activating the security alarm system.

For a feeling of extra security, Volkswagen also offers an accessory remote locking system, just a push of a button locks or unlocks your door and arms your alarm.

**Volkswagen peace of mind** is with you right into the next millennium. It's called Volkswagen Protection Plus.

Not simply a warranty. Protection Plus is the most comprehensive customer care/owner protection plan in the industry, pure and simple. It begins with an unbeatable 10-year/100,000-mile limited warranty on the powertrain for the original owner. With absolutely no hidden deductibles to worry about, Volkswagen covers any and all defects in material and workmanship for most engine, transmission and drivetrain components.

10/100,000

It also includes a 2-year/24,000 mile 'bumper-to-bumper' limited warranty that covers any unlikely defects in material or workmanship (tires are warranted by their manufacturer).

Find something defective and we'll fix it free.

Volkswagen also provides a limited warranty against corrosion perforation that's good for 6 years with no mileage limitation.

You don't even pay for scheduled maintenance for the first 2 years/24,000 miles.

What about the unforeseen? Protection Plus includes 24-hour

\*Roadside assistance services provided by Professional Dispatch Group, Wilmet, Ontario, L2C 8B5 Canada.

roadside assistance through a two-year membership in *Guaranteed Mobility* which provides you with emergency roadside assistance when you need it, trip interruption expense reimbursement, and your own personalized travel and mapping service.

Peace of mind means building the safest cars we can and backing them with the best protection plan you can find.

That's what Volkswagen is all about.

**Accessories.** Every Volkswagen comes fully equipped to jump start your senses. But to put pulse-pounding into overdrive, we offer a few extra **dealer-installed** options. Start with the trunk mounted **six-disc CD changer** that makes listening to hours of your favorite music easy. A full lineup of performance **alloy wheels** that actually reduce unsprung weight for better handling are also available. Optional **mud flaps** protect your car's finish.

Need more storage space? Start with **roof rack carrier bars**. Then add an easy-to-install **luggage carrier** or **ski racks**, or **bicycle carrier** that holds up to three bikes safely and securely—even at normal highway speeds. They're all part of the Volkswagen **roof rack system**.

All Volkswagen models also offer the added convenience and safety of a **keyless entry system** which lets you lock or unlock your doors and arm your alarm system with the touch of a button. To help protect carpeting, we offer a set (4) of durable **tufted nylon floor mats** that match the interior of your car. For long distance drivers, there's a **cruise control kit** to help reduce driver fatigue.

On the Golf, Jetta and Passat, you can add a **sunroof wind deflector** to cut down glare and wind noise when the sunroof is open. An aerodynamic **rear deck lid spoiler** is available on the Jetta and Passat.

On the Cabrio as well as other Volkswagen models, you can protect your hood from flying road pebbles with a **front end cover**. And, if you like, add a **rear windscreen** to your Cabrio and reduce wind turbulence when cruising with the top down.

### Non-Metallic Colors

### Cabrio Roof Colors

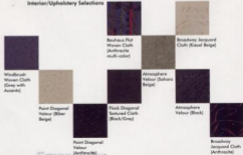

### Clearcoat Metallic Colors<sup>1</sup>

### Leather Selections<sup>2</sup>

### Interior/Upholstery Selections

<sup>1</sup> Metallic paint optional at extra cost.

<sup>2</sup> Leather is optional if vinyl (not used) on rest being only with matching vinyl on other surfaces.

**Paint Colors.** At Volkswagen, German engineering describes not just the mechanics of the cars but the mechanics of the cars too. For example, Volkswagen utilizes a meticulous 26-step in-jetting process to ensure a leather and top-looking finish. One step involves submerging the entire car body into a vat of electrically

charged primer. Attracted by the opposite electrical charge of the body, primer is actually drawn to the metal and into every recess and crevice. This results in 250% more protective paint adhering to the metal versus a conventional die application. Volkswagen also galvanizes the inner shell of its emission areas, so if the paint is

scratched or chipped, the treated panels continue to prevent rust. Some cars have sealed with a PVC coating that never cracks or allows corrosive moisture to penetrate. Volkswagen uses environmentally friendly water-based primers on shell in exposed joints free of look. Read it Volkswagen.

**Fabrics & Colors.** Volkswagen's interior materials are actually tested in the scorching heat of the desert and the blistering cold of the Arctic tundra. It's the only way we know to ensure that our fabrics will look great and wear well during your years of ownership.

\*Metallic paint optional on extra cost. Leather is optional on extra cost.

**Paint Colors.** At Volkswagen, custom engraving allows us not just the mechanics of the cars but the semantics as well: point, for example, Volkswagen utilizes a meticulous 23-step painting process to ensure a lustrous and long-lasting finish. One step involves submerging the entire car body into a vat of electrically

charged primer. Attracted by the opposite electrical charge of the body, primer is actually drawn to the metal and into every recess and cavity. This results in 250% more protective paint adhering to the metal versus a conventional dip application. Volkswagen also galvanizes the metal itself in corrosion areas, so if the point is

scratched or chipped, the treated panel's continue to prevent rust. Some are heat treated with a PVC coating that never cracks or allows corrosive moisture to penetrate. Volkswagen uses environmentally friendly water-based primers as well as topcoat free of toxic lead or cadmium.

**Fabrics & Colors.** Volkswagen's interior materials are carefully tested in the scorching heat of the desert and the blistering cold of the Arctic tundra. It's the only way we know to ensure that our fabrics will look great and wear well during your years of ownership.

**Paint Colors.** At Volkswagen, German engineering designers put just the mechanics of the cars but the cosmetics as well: paint, for example. Volkswagen utilizes a meticulous 24-step painting process to ensure a lustrous and long-lasting finish. One step includes undercoating the entire car body into a vat of electrolytically

charged primer. Attracted by the opposite electrical charge of the body primer is actually drawn to the metal and into every crevice and rivet. This results in 100% more protective paint adhering to the metal versus a conventional dip application. Volkswagen also galvanneal the metal body, corrosion proof, so if the paint is

scratched or chipped, the treated panels continue to prevent rust. Seams are best sealed with a PVC coating that never cracks or allows moisture to penetrate. Volkswagen uses environmentally friendly water-based primers on steel on typical joints free of toxic lead or cadmium.

**Fabrics & Colors.** Volkswagen's interior materials are actually tested in the scorching heat of the desert and the blushing cold of the Arctic tundra. It's the only way to know to ensure that our fabrics will look great and wear well during your years of ownership.

\*Metallic paint optional on some cars (except for Passat)  
 \*\*Available (depending on surface only) in optional or extra cost
