

**Some new perspectives on the SUV.**

**In case you haven't heard, the Saturn VUE, an all-new Sport Utility Vehicle, will be arriving fall 2001.**

**Now, we understand that may be a little too long for some of you to wait for such an eagerly anticipated vehicle. That's why we're providing you with the handy cutout in the back of this brochure.**

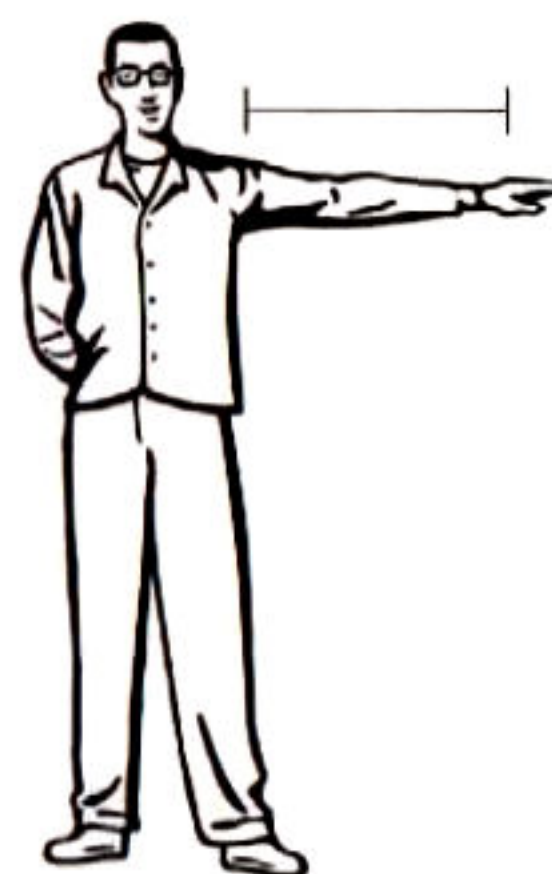

**(Think of it as your own personal SUV on a stick.)**

**Feel free to punch it out and take it with you wherever you go. That way, you'll get a pretty good idea of all the places the real Saturn VUE can go, all the things it can do and all the heads it can turn.**

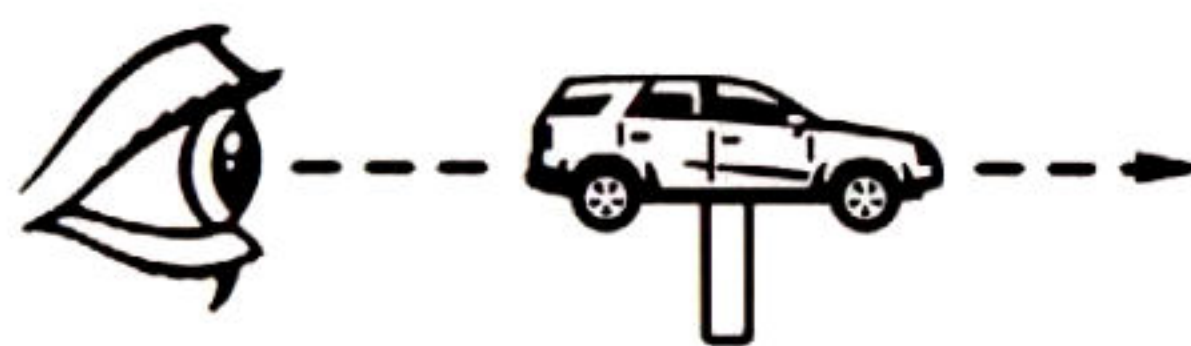

**All of which should help you see the new Saturn VUE from the most important perspective of all:**

**Your own.**

**Happy squinting.**

*Fig. 1: Punch out SUV on back page and hold at arm's length.*

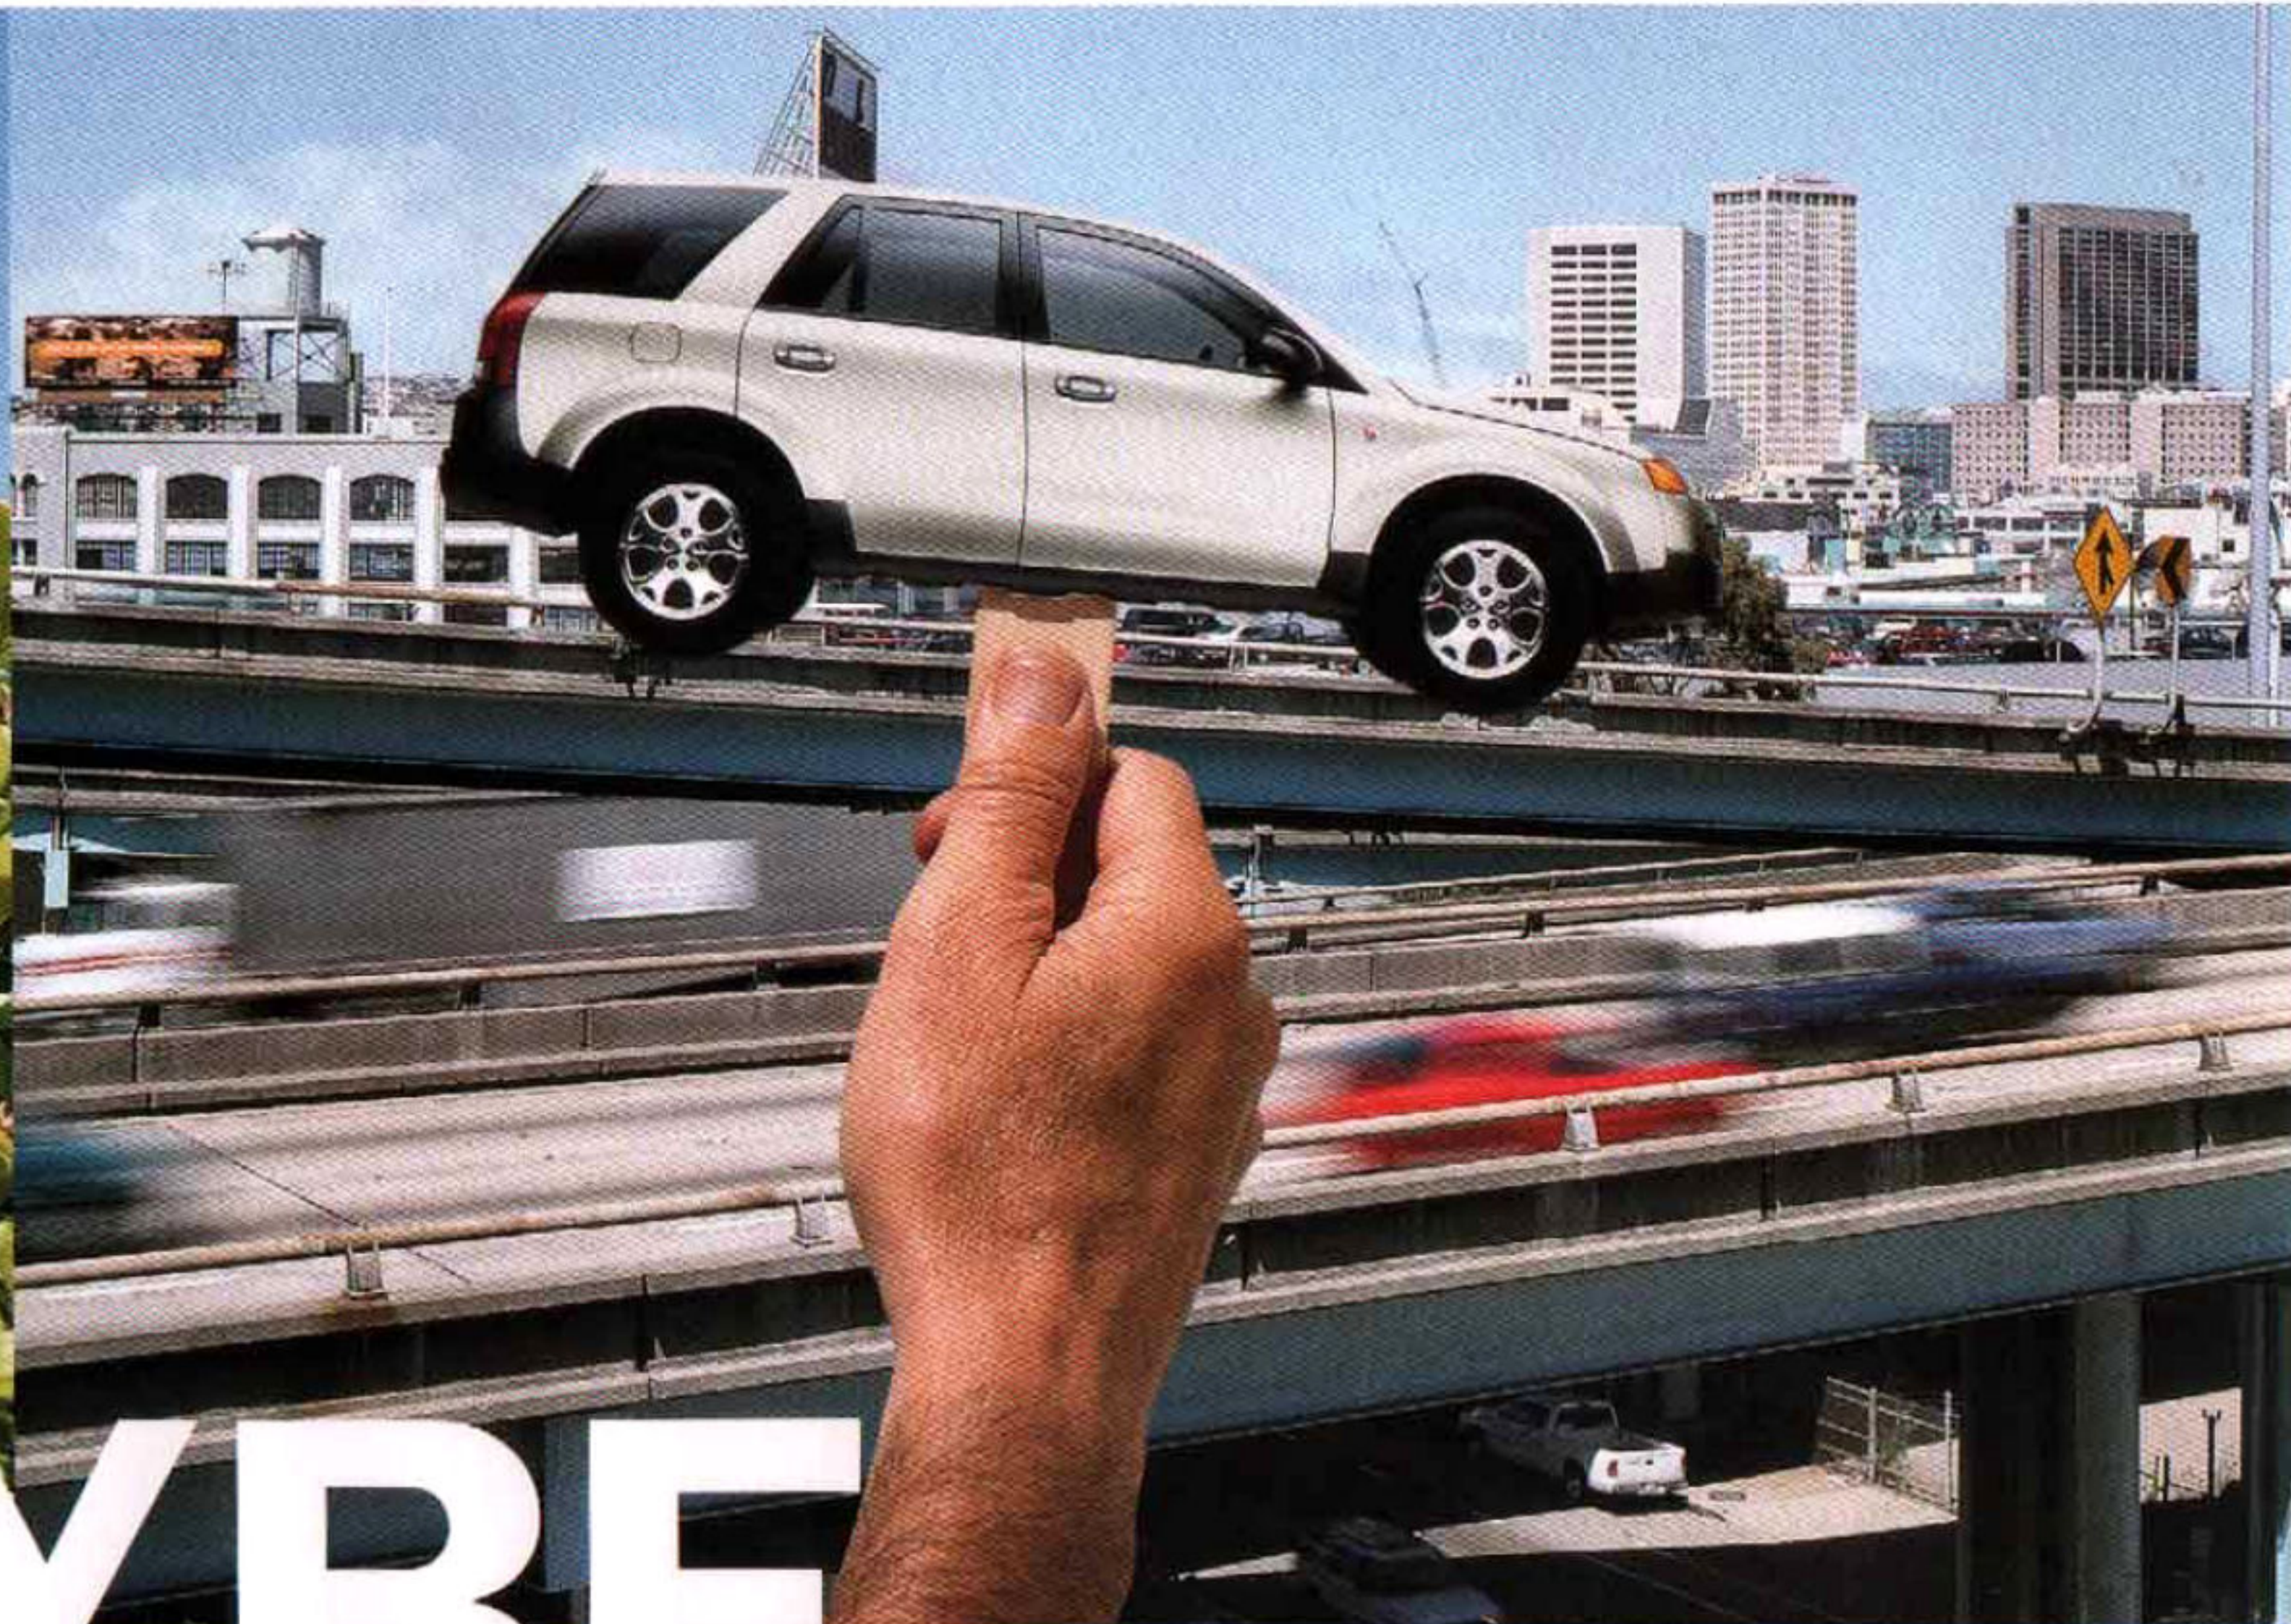

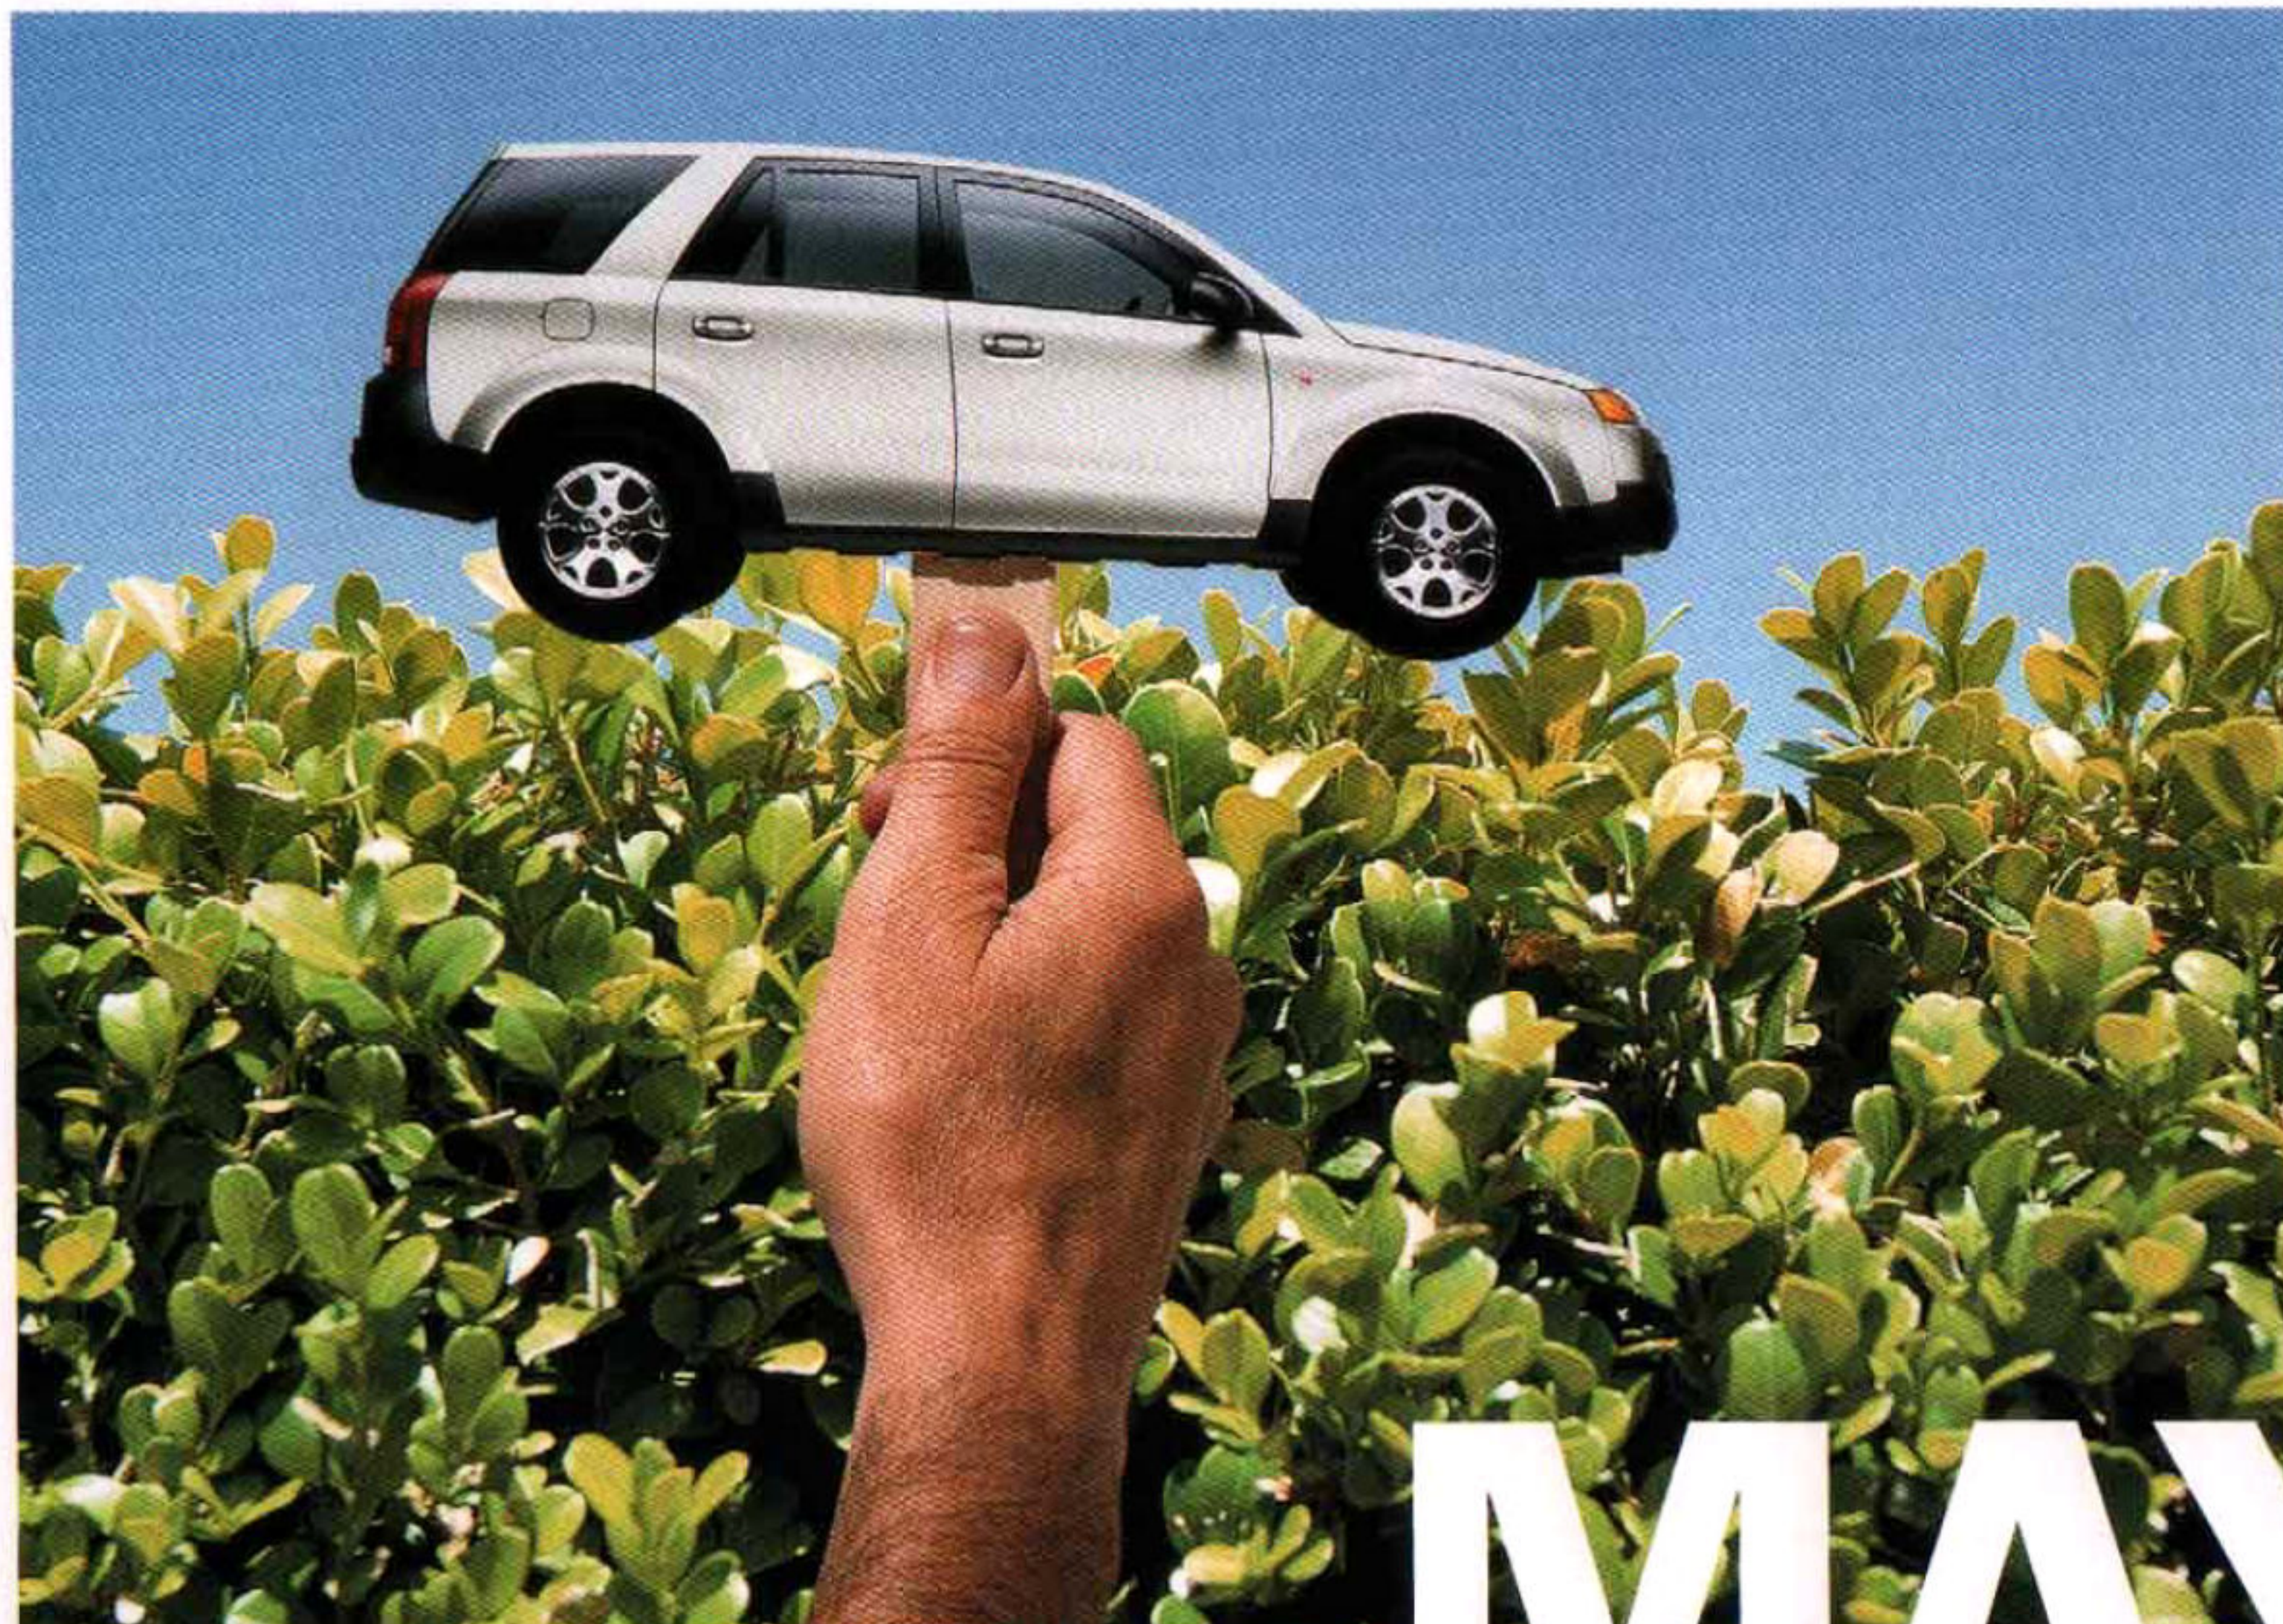

*Fig. 2: Place it against various backgrounds (your driveway, your parking space at work, your favorite country road). And remember, the more creative you are, the better.*

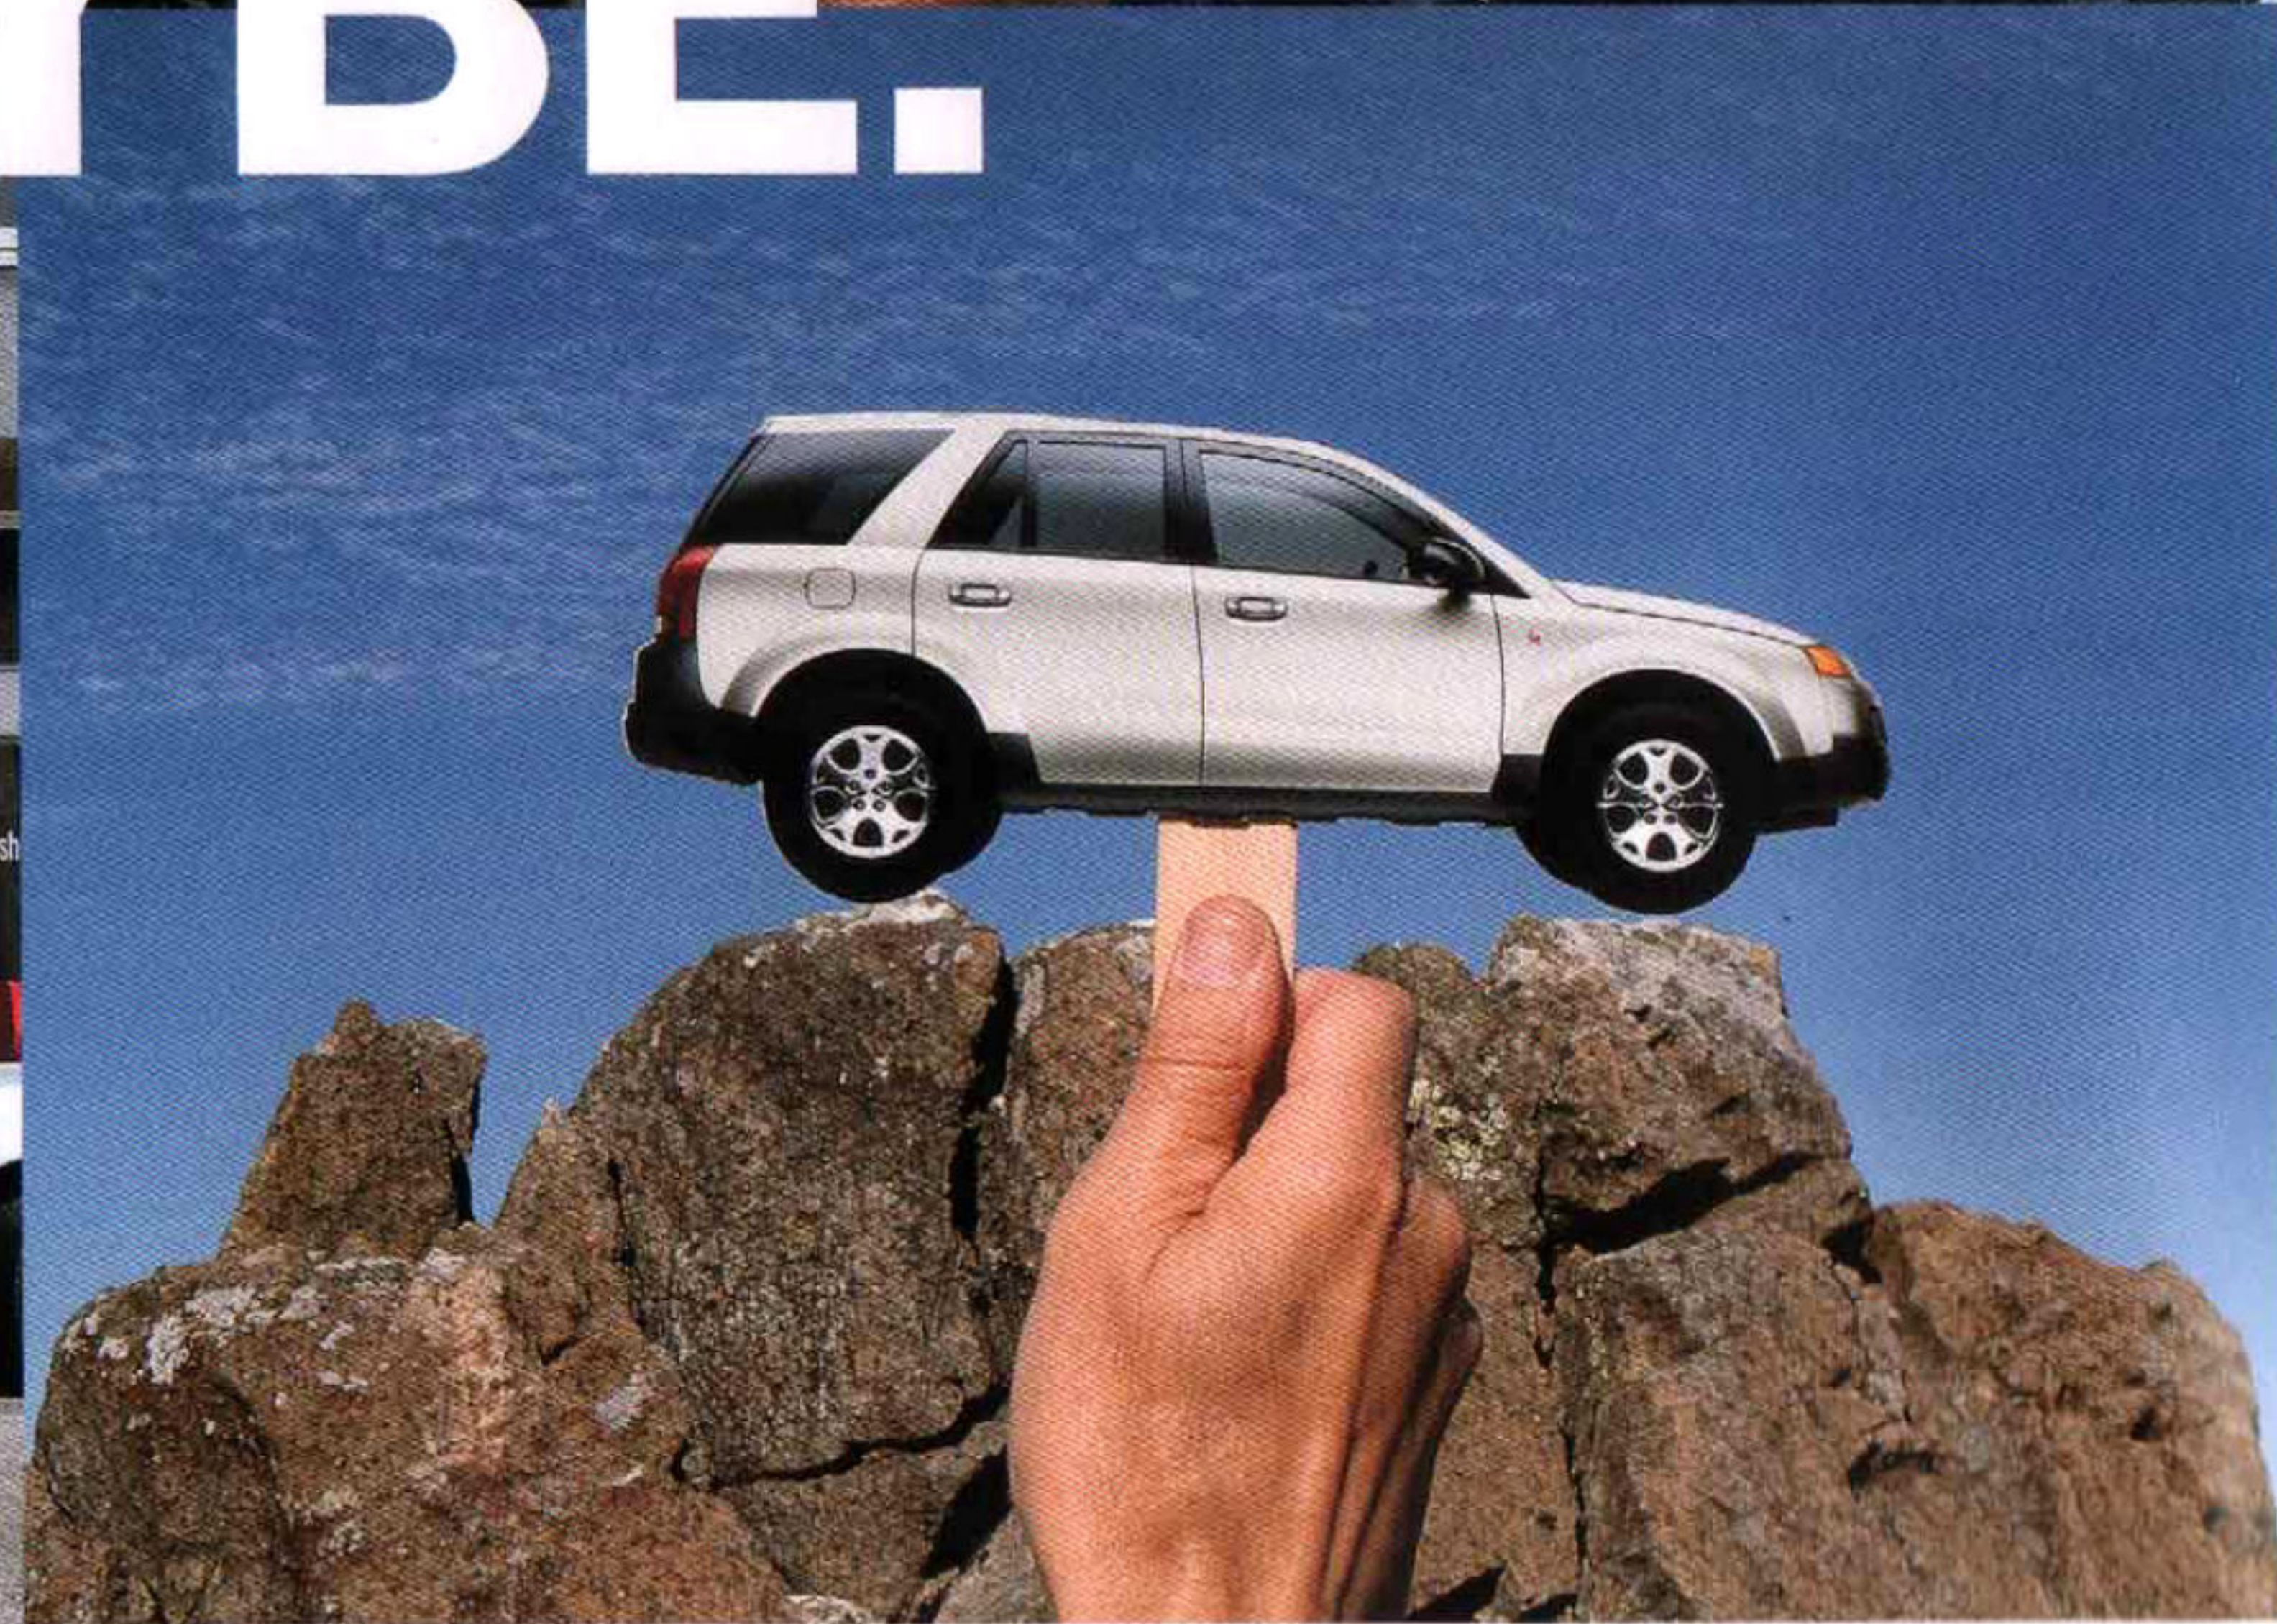

*Fig. 3: Dream about all the wonderful experiences you and your Saturn VUE will have together.*

HMMMMMM.

MAYBE.

YEAH.

**On the outside:** An entirely new vehicle from the inside out, the Saturn VUE offers just the right amount of space and utility in a rugged, contemporary package. And to keep that package looking good for some time to come, we used our signature dent-resistant polymer panels.

**On the inside:** Since we understand you'll be spending most of your time inside your new Saturn VUE, we've given a lot of attention to the interior. There you will find nice touches, like a unique center console, rear cargo organizer and storage areas galore.

**On the safe side:** In keeping with our reputation for safety and security, the Saturn VUE is built around a high-strength steel spaceframe. Front and rear crumple zones help protect occupants in the event of an accident, as do available Head Curtain Air Bags.

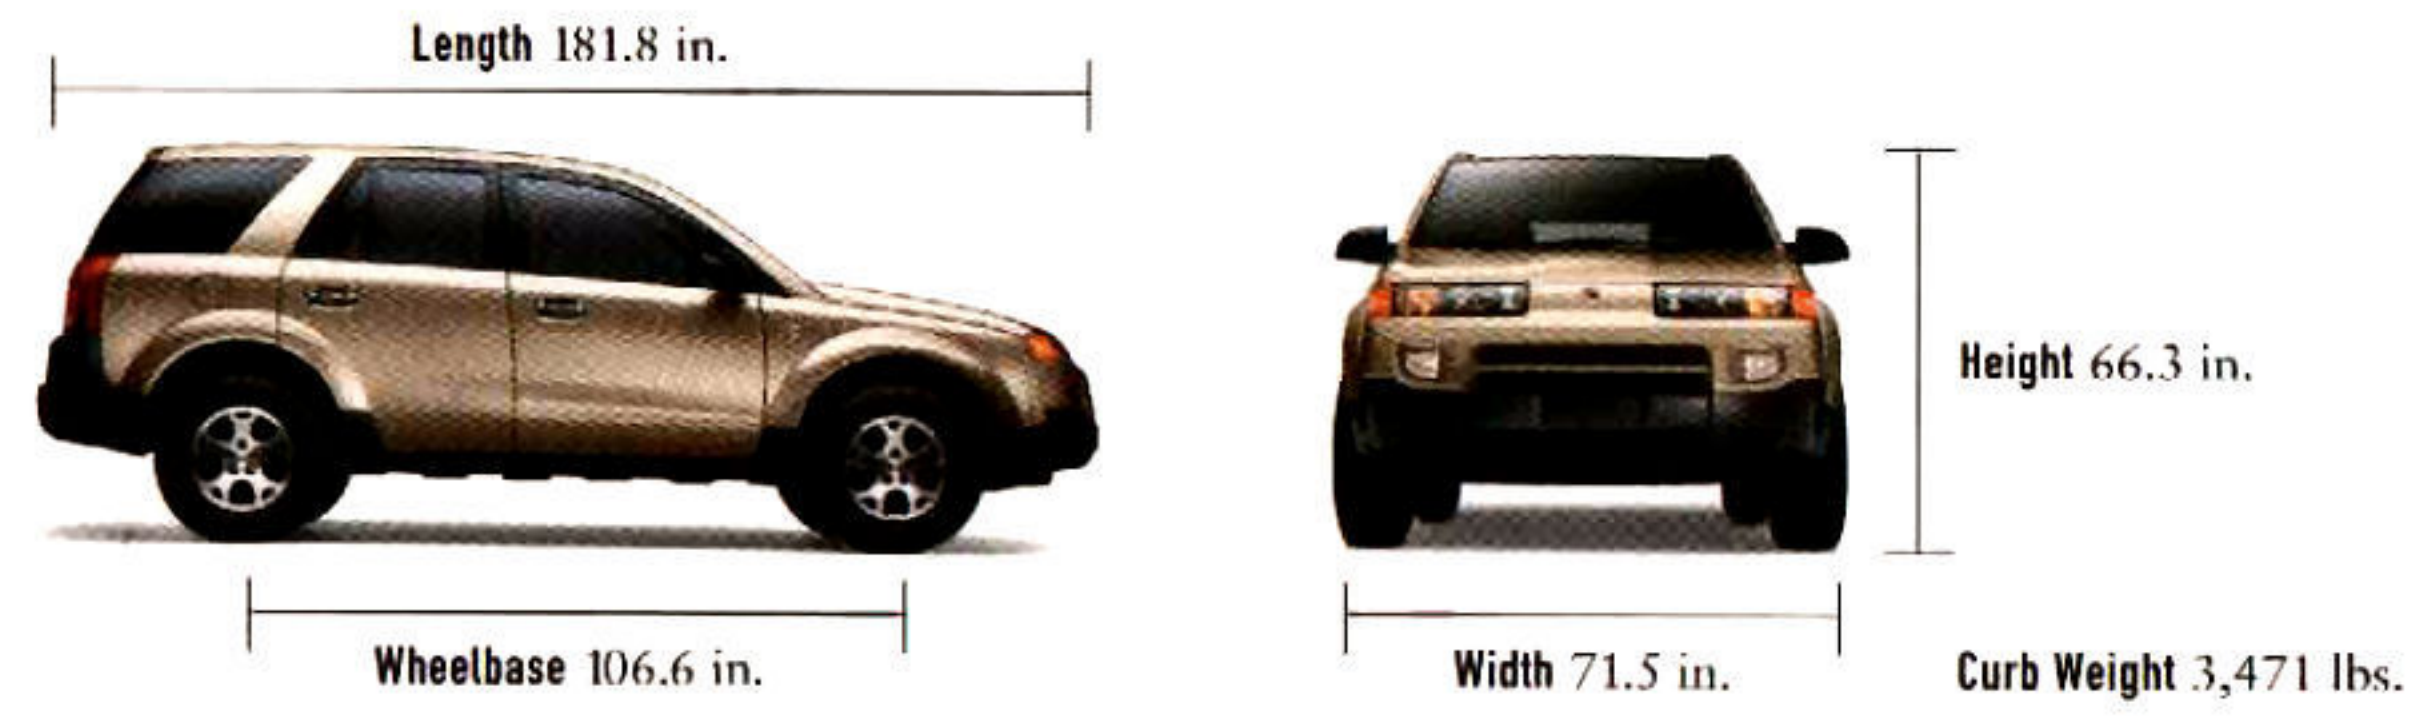

**On the fun side:** By combining an available 3.0-liter, V-6 engine, four-wheel independent suspension and on-demand all-wheel drive, the Saturn VUE delivers a level of performance that's often lacking in other SUVs. Also available is a continuously variable transmission, the first in a vehicle of this kind.

\*Head Curtain Air Bags are designed to reduce the risk of head and neck injuries to front and rear seat occupants on the near side of certain side-impact collisions. Always use safety belts and proper child restraints, even with air bags. Children are safer when properly secured in a rear seat. For more Saturn safety information, see the Owner's Handbook.

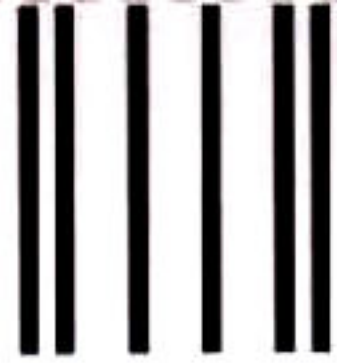

*Press along dotted line,  
remove and enjoy.*

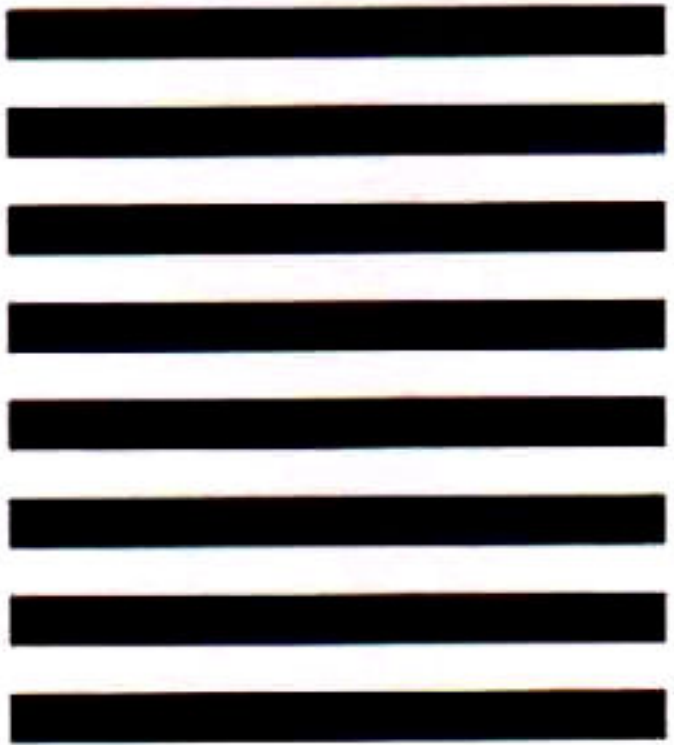

**Actual life-size dimensions of the Saturn VUE.**
