

Welcome to Hyundai. Welcome to Candoism.

Innovation is at the heart of what we do. We call it 'Candoism' and it keeps us focused on the future. Since launching our industry-leading 5 year unlimited mileage warranty, we've become one of the world's fastest growing car companies.

In 2016 we launched IONIQ – the only car available in Hybrid, Electric and Plug-in Hybrid options. 2017 saw us premiere the i30 N, an exciting dive into the world of high quality performance vehicles. In 2018 we introduced the KONA electric, the first fully-electric subcompact SUV in the European market. 2019 will see the launch of NEXO, our latest innovation in the mass production of zero-emission Hydrogen Fuel Cell vehicles. We've also revolutionised the buying experience with Click to Buy – our clever website which allows you to buy your next Hyundai from the comfort of your sofa. We're proud of what we've achieved in a short space of time.

So what happens next? The answer is inspired by you, our customers, because our next innovation will happen with you in mind. For us 'done' will never be 'done' – we're always excited to start again. Welcome to Candoism. Welcome to Hyundai.

The Hyundai IONIQ: the world's first car with three different electrified powertrains. The Hybrid, Plug-in Hybrid and Electric, all designed with your lifestyle in mind.

Car shown IONIQ Hybrid Premium SE in Polar White Solid Paint

The first car in the world to feature three electrified powertrains.

The unique choice of three electrified powertrains in one model gives the Hyundai IONIQ a very special status. As a ground-breaking achievement, the focus is on combining efficiency, low emissions and outstanding performance. From start/stop city driving to long-distance trips, the IONIQ provides the perfect option for a variety of lifestyles.

IONIQ Hybrid

The IONIQ Hybrid's electric motor works together with the petrol engine when you pull away or come to a standstill. It smoothly improves fuel consumption and lowers emissions in start/stop city driving, while providing an extra kick of power and torque if required.

IONIQ Plug-in Hybrid

The IONIQ Plug-in Hybrid can travel up to 26 miles on electric power, which covers most day-to-day trips. On longer trips, the electric motor works intelligently with the petrol engine to improve fuel economy and reduce CO2 emissions, or offer more performance.

For pure, zero-emission driving, the fully electric powertrain is this model's trump card. Delivering a significant 120PS, its battery gives you maximum range of 174 miles. Just as impressively, you can charge it to 80% in just 30 minutes.

A pioneering design concept that combines form with function.

The IONIQ's streamlined exterior creates far more than a striking, coupé-style silhouette. It creates an aerodynamic form that improves every aspect of efficiency.

Sleek and attractive, the IONIQ makes a powerful first impression. However, it's the detail that's gone into its exterior that makes it a real game-changer. Whatever your perspective, the elegant lights draw the eye with their curved outline, seamlessly integrated into the car's profile. The side sill mouldings keep air close to its body, while the front wheel air curtains redirect turbulent air. The beautiful sloping fast-back style roofline enhances the airflow even further, adding to a clean, stylish design that's built around aerodynamic performance. It's the reason that the IONIQ won the coveted 2016 Red Dot Award for outstanding design in the 'Vehicle' category. Judged by industry experts from around the world, Red Dot rewards ground-breaking innovations across a huge range of sectors.

The IONIQ Hybrid: a driving experience with no compromises.

The IONIQ Hybrid combines technology with power to deliver a smooth driving experience. The electric motor and engine work seamlessly together to deliver plenty of torque when you need it most and maximum efficiency when cruising or at low speed.

6-speed Dual Clutch Transmission

The impressive Dual Clutch Transmission (DCT) places the IONIQ Hybrid truly at the forefront of innovation, delivering a smooth ride for a truly enjoyable driving experience. It works with one clutch operating odd-numbered gears and the other operating even-numbered gears, giving you faster responsiveness and a more dynamic overall experience. There are two driving modes to suit your style, including SPORT mode, which combines electric and engine power resulting in more weight to the steering for a reactive and thrilling drive. ECO mode optimises fuel economy and efficiency for a different style of driving. When you're decelerating, the engine is turned off and the kinetic energy from the brakes is converted into electrical energy that's stored in the battery. Whichever option you select, you'll enjoy an experience that rivals any car in its class, not just Hybrids.

The IONIQ Plug-in Hybrid: ultra-low emissions at your command.

The Hyundai Plug-in Hybrid combines the qualities of a conventional hybrid electric vehicle and an all-electric vehicle. Cover your daily drive with up to 26 miles of electric range and head further afield while enjoying the efficient benefits of the 1.6 GDi engine. A car to truly fit your lifestyle.

When used as a conventional hybrid electric vehicle, the HEV computer selectively operates between the engine and the electric motor - or even both at the same time - depending on the level of power required to travel. When it's operating in electric mode, the vehicle is driven only using the electric motor until the charge from the high voltage battery becomes too low, at which point it reverts to the hybrid mode automatically. Pure electric mode gives you up to 26 miles of zero tailpipe emissions, depending on your driving style and road conditions. To help maximise driving efficiency, IONIQ Plug-in Hybrid is fitted with ECO-DAS (Eco Driving Assist System). ECO-DAS includes a unique Coasting Guide feature that analyses route information from the navigation system and gives advance notification on when to slow down - helping to minimise braking and reduce fuel consumption. The efficiency of IONIQ Plug-in Hybrid is greatly enhanced if the car is mainly driven in electric mode, this is why we strongly recommend that you install a wallbox on your driveway or garage. The high voltage battery can be fully charged by connecting the plug to an external electric power source. It takes about 2 hours 15 minutes to fully recharge the 8.9 kWh battery.

These figures were obtained using a combination of battery power and fuel. The IONIQ Plug-in Hybrid is a Plug-in Hybrid vehicle requiring mains electricity for charging. Figures shown are for comparability purposes. Only compare fuel consumption, CO, and electric range figures with other cars tested to the same technical procedures. These figures may not reflect real life driving results, which will depend upon a number of factors including accessories fitted (post-regististration), variations in weather, driving styles and vehicle load.

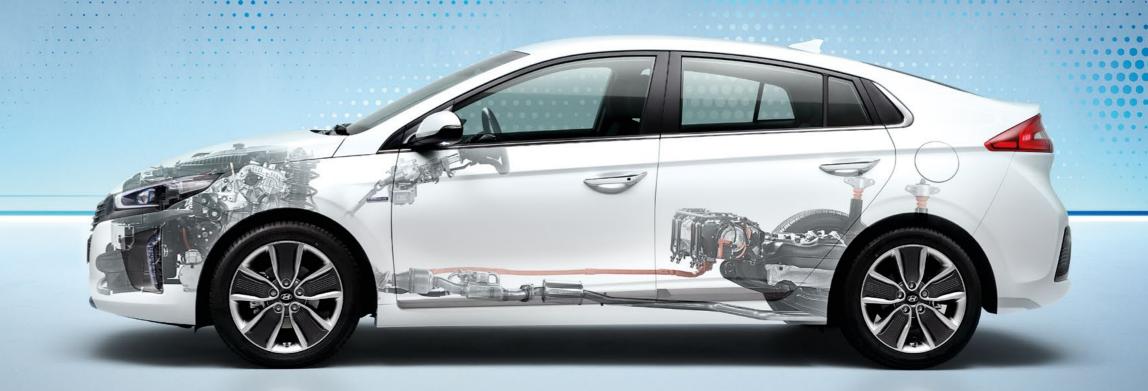

The IONIQ Electric: zero tailpipe emissions, maximum enjoyment.

With impressive customisation on offer, the electric experience will surpass your expectations. Take it for a spin and admire its performance attributes on the open road.

Packed with leading-edge features and options, the innovative IONIQ Electric arrives with flexible selections to suit your style. SPORT mode provides you with a significant boost by increasing your torque from 265Nm to 295Nm, delivering an extra burst of acceleration. The IONIQ Electric also utilises regenerative braking to great effect, charging your battery while you're on the move. Steering-mounted paddles allow you to adjust the regenerative braking strength. By clicking the left hand paddle, you'll increase the regenerative braking effect to put more power in the battery while maximising efficiency. Click the right-hand paddle to decrease the regenerative braking effect for a more refined experience. Customisation of drive modes is made easy through the 8" touchscreen allowing you to adjust the maximum speed, climate control and the level of regenerative braking. With 120PS available and a maximum range of more than 174 miles', the IONIQ Electric rises to every challenge.

Efficient and energetic, IONIQ Hybrid arrives with power in all the right places.

Cutting-edge technology powers the IONIQ, maximising all available energy to deliver the optimum drive. Its outstanding performance is down to the ambition and ingenuity of our engineers, who have pushed the boundaries in delivering a car that excels on every level.

The epitome of forward-thinking motoring, the 1.6-litre GDi direct-injection petrol engine in the IONIQ Hybrid and Plug-in Hybrid is intelligently designed to work with the electric motor to deliver maximum power and economy. As the latest evolution of our 16-valve Kappa design, it works by keeping the intake valves open for longer than a traditional combustion engine, reducing the compression ratio in the process. This makes it more fuel efficient and works perfectly on the hybrid, where engine torque can be boosted instantly by the electric motor.

We've utilised friction-reducing roller bearings, low-viscosity oil and a cooled Exhaust Gas Recirculation (EGR) system to optimise heat recovery and produce a design that boosts thermal efficiency by 40%. By using innovative technology, such as rectangular section copper wire and internal core components that are up to 10% thinner than normal, it delivers in excess of 95% efficiency. In simple terms, it means that the energy is used almost solely to power the vehicle, rather than being lost on the way. The result is instantly available torque that creates smooth acceleration and a truly agile driving experience that surpasses other cars in its class.

Start/Low Speed Electric Motor (EV mode)

IONIQ runs solely using its electric motor (zero fuel consumption).

Acceleration/Uphill

Engine + Electric Motor

The Kappa 1.6 GDi engine starts automatically to work with the electric motor providing a fuel-efficient operation.

Driving Engine

IONIQ operates using only its engine when travelling steadily at mid-to-high speeds.

Deceleration/Downhill Recharging

Engine is turned off and kinetic energy is captured by the brakes and converted into electrical energy, which is used to recharge the battery.

Engine Hold

When the vehicle is not in motion, both the engine and motor are stopped.

Images shown reference examples of various driving scenarios. The performance of the Hybrid System is influenced by the driving style, the state of charge of the high voltage battery, the route, the weather condition, the weight of the cargo and other external factors.

Lightweight, aerodynamic and electrified. It's efficient in every way.

With the clever integration of an electric motor, it should be obvious that the IONIQ is built with economy in mind. However, there is so much more that adds to its efficiency, from its aerodynamic form to the lightweight materials we used. It really is all in the detail.

A sleek, smooth silhouette is more than just a design style; it's a scientifically developed form that creates an incredible drag co-efficient (Cd) of just 0.24. With cleaner airflow on every aspect, including the wheels and side sill mouldings, less power is required to propel the car forward, resulting in fewer emissions. Crucial to efficiency is the car's weight — or rather lack of it. Selected body panels, such as the bonnet and tailgate, are made of aluminium to decrease both their own weight, and the IONIQ's overall kerb weight. The bonnet is 6.5kg (46%) lighter than its steel equivalent, while the tailgate is 6.1kg (45%) lighter. This 12.6kg saving comes with no compromise on noise or vibration. It's these small gains that contribute to the bigger picture: an extremely lightweight, efficient model in every way.

The IONIQ's interior is designed around the philosophy of clean simplicity.

With elements that cleverly lift and highlight key features, the interior represents continuous evolution with the latest designs, showcasing an ergonomic, simple layout.

As forward-thinking as the rest of the car, its fine touches bring all the key elements to life in a fluid and elegant manner. At the heart of it all sits a D-cut steering wheel with chrome spokes that bring an air of sportiness to the design. Continuing the theme are the chrome-accented gear knob and footrests which add to its modernist luxury feel. On the IONIQ Hybrid and Plug-in Hybrid, thin blue lines feature on the dashboard and instrument cluster, while copper-coloured accents in the IONIQ Electric bring that live-wire feel to the inside. Memory function driver's seat and heated front and rear seats arrive on top-spec models, while soft-touch materials add to the feel of premium quality that runs throughout the DNA of the interior design. It even features thicker glass to keep noise pollution down to a minimum.

INTERIOR & SPACE
Interior shown IONIQ Hybrid Premium SE.
HYUNDAI IONIQ

2:32_{nu} Radio Necto New/gation Phone Phone Phone Necto Nexto N

8" touchscreen infotainment unit (fitted as standard on Premium and Premium SE trims). Hybrid model shown, screen layout dependent on model variant.

Wireless phone charging pad (compatible smartphone required) (fitted as standard on Premium and Premium SE trims).

Infinity high-definition sound system (fitted as standard on Premium and Premium SE trims).

USB charging port and tablet storage (fitted as standard on all trims)

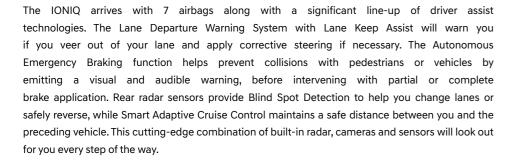

In a connected world, everything's at your fingertips.

As a contemporary car in every way, the IONIQ places connectivity right at its heart. With LIVE Services, interconnected music and a surround-sound speaker system, its abundance of technological capabilities will elevate your journey to the next level.

Designed with your lifestyle in mind, the IONIQ ensures that you can take a trip and always stay connected. When it comes to accessing your music safely and easily, you'll have an impressive level of choice on the Premium and Premium SE, thanks to Bluetooth®, Apple CarPlay™ and Android™ Auto. You can create a perfect synergy between your life on and off the road by utilising the selected apps on compatible phones. Bluetooth® connectivity helps you stay connected with friends and family, and you don't need to worry about your battery running out on a call thanks to the wireless smartphone charging facility which is both simple to use and extremely useful. The IONIQ's satellite-navigation system will make it hard to take a wrong turn. It comes with a 7-year free subscription to LIVE Services for up-to-the-minute weather, traffic and speed camera updates, and even specific searches to help you locate local points of interest. High-definition Clari-Fi technology restores digitally repressed sound, while there's an Infinity premium surround—sound system with eight speakers, subwoofer and external amplifier from the Premium Trim. Finally, important driving information such as charge level is displayed on a 7"TFT instrument cluster and 8" touchscreen with a pin-sharp pixel resolution.

Its extra-sensory technologies help keep you safe.

The IONIQ's safety features befit such an advanced model. A combination of advanced technologies and preventative innovations help keep you on track.

Autonomous Emergency Braking (AEB)*

Blind Spot Detection System (BSD)*

Recharge at home or on the move.

With all the economic benefits that come with electric power, possibly one of the most important efficiencies is the speed and ease at which the battery charges. You'll benefit from charge scheduling, where you can choose to charge immediately or set a departure time so the IONIQ can prepare the car with maximum efficiency.

Both the IONIQ Plug-in Hybrid and IONIQ Electric are designed to impress when it comes to battery life. The Plug-in Hybrid has an on-board charger of 3.3kW and takes just 2 hours and 15 minutes to go from empty to full. The IONIQ Electric boasts a 6.6kW on-board charger that takes just 4 hours 25 minutes from empty to 100% charge using a 7kW wallbox. On the move, DC rapid chargers – available on the Electric – will allow you to charge up to 80% in as little as 30 minutes. The inbuilt heating system improves the process, saving the high voltage charge for driving, especially in cold conditions. On both the Plug-in Hybrid and the Electric, you'll look out for three LEDs on the top of the dashboard. They gradually light up when it's successfully plugged in so you can check its charging status from outside.

Charging to fit your lifestyle.

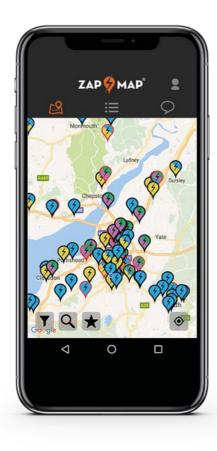

Make the most of your IONIQ Electric or your Plug-in Hybrid by installing a homecharger, since at least 80% of your charging will be done at home – allowing you the flexibility to go out and explore whenever you like. Not only is it safe and efficient, it's also extremely simple since we've appointed POD Point as our preferred supplier. You'll benefit from their high level of service at all times. You'll quickly find that charging your IONIQ Plug-in Hybrid or Electric will become a part of your routine, whether that's at home or out and about. When you're on the road, you'll have a huge variety of charging points at your disposal. Whether you're at the train station or taking a trip to the shops, you'll be able to recharge your car in keeping with your lifestyle. Just visit the zap-map website for a detailed look at all the charging points closest to you.

Charging on-the-move

CCS Combo

(IONIQ Electric only)

Charging speed: Rapid Connection to car: CCS Combo

Output connection: CCS Combo Estimated charge times:

50 kW: approx. 30 minutes (to 80% of the charge)

Rating: Varies from manufacturer to manufacturer. Not supplied by HMUK.

7-Pin Type 2

(IONIQ Electric and Plug-in Hybrid)

Charging speed: Normal Connection to car: Type 2 Output connection: Type 2 Estimated charge times: Approx. 4 hours 25 minutes (to fully charge, 100%) Rating: 240V/32A/7kW

Charging at home

7-Pin Type 2

(IONIQ Electric and Plug-in Hybrid)

Charging speed: Normal Connection to car: Type 2 Output connection: Type 2 Estimated charge times: Approx. 4 hours 25 minutes (to fully charge, 100%) Rating: 240V/32A/7kW

Emergency

In-Car Control Box (ICCB)*

(IONIQ Electric and Plug-in Hybrid)

Charging speed: Trickle/Slow Connection to car: Type 2 Output connection: 3 Pin Plug Estimated charge times: Approx. 12 hours (to fully charge, 100%) Rating: 230V/10A/2.3kW*

Please note that the IONIQ Electric 6.6 kW on Board charger (OBC) will impose the following maximum rating: 230V/28A/6.6kW and the IONIQ Plug-in Hybrid OBC will impose the following maximum rating: 230V/14A/3.3kW

POD POINT * Not to be used with an extension lead HYUNDAI IONIQ

Hybrid SE offers the following features as standard:

- 4.2" Driver's Supervision Instrument Cluster with TFT Display
- 5" Touchscreen Media Centre
- 15" Alloy Wheels with Aerodynamic Wheel Trims
- Air Conditioning Dual Zone Climate Control
- · Automatic Headlights with Dusk Sensor
- Autonomous Emergency Braking (AEB)
- Bluetooth® Connectivity
- Cruise Control Smart Adaptive Speed Control

- Driver's Seat Lumbar Support (Electric)
- Hill-start Assist Control (HAC)
- Lane Departure Warning (LDW) System with Lane Keep Assist (LKA)
- Leather Wrapped Steering Wheel
- Paddle Shift Gear Change
- Parking Sensors Rear
- Parking System Rear Camera and Guidance System

- · Radio, RDS, DAB
- Seat Trim Cloth
- Spare Wheel Emergency Space Saver (Steel)
- Speakers 2 Tweeters, 2 Front, 2 Rear
- Tyre Pressure Monitoring System (TPMS) with Individual Tyre Pressure Display
- USB and AUX Connections Front

Hybrid Premium Offers the following features over Hybrid SE:

- 7" Driver's Supervision Instrument Cluster with TFT Display
- 8" Touchscreen Satellite Navigation including Traffic Messaging Channel, MapCare and LIVE Services
- · Automatic Dimming Rear View Mirror
- · Door Mirror Puddle Lights
- Door Mirrors Power Folding
- · Driver's Seat Heated

ELECTRIC RANGE AND EFFICIENCY					
Maximum Potential EV Driving Range (Miles/Km)		-		26/52	174/280
Electric Driving Efficiency (kWh per 100Km)		-		9.4	11.5

- Charging times for the high voltage battery may vary as it is dependent on the condition of the high voltage battery, charger specifications and ambient temperature.
- + Kerb Weight defined as the total weight of a vehicle with standard equipment (the minimum figure and factory fitted optional equipment (the maximum figure) and all necessary operating consumables such as oils, coolant, air conditioning refrigerant and a full tank of fuel, while not loaded with either driver, passengers
- ‡ Payload is the difference between the Gross Vehicle Weight and the Kerb Weight.
- ** Gross Vehicle Weight is the maximum allowable weight of the vehicle, fully loaded with passengers and cargo (The Payload) and includes the weight of the vehicle.
- †† The Gross Train Weight is the weight of the fully loaded vehicle plus a fully loaded trailer and must not be exceeded.
- #Figures shown are for comparability purposes; only compare fuel consumption and CO, figures with other cars tested to the same technical procedures. These figures may not reflect real life driving results, which will depend upon a number of factors including accessories fitted (post registration), variations in weather, driving styles and vehicle load. There is a new test for fuel consumption and CO2 figures. The CO2 figures shown, however, are based on the outgoing test cycle and will be used to calculate vehicle tax on first registration.
- *** g/km = grams of emitted substance per kilometre travelled. CO₂ = Carbon Dioxide. There is a new test used for fuel consumption and CO₂ figures. The CO₂ figures shown however, are based on the outgoing test cycle and will be used to calculate vehicle tax on first registration.
- th These figures were obtained using a combination of battery power and fuel. The IONIQ Plug-in Hybrid is a plug-in hybrid vehicle requiring mains electricity for charging. Figures shown are for comparability purposes. Only compare fuel consumption, CO₂ and electric range figures with other cars tested to the same technical procedures. These figures may not reflect real life driving results, which will depend upon a number of factors including accessories fitted (post-registration), variations in weather, driving styles and vehicle load. There is a new test for fuel consumption and CO, figures. The CO, figures shown, however, are based on the outgoing test cycle and will be used to calculate vehicle tax on first registration.
- ### These figures were obtained after the battery had been fully charged. The IONIQ Electric is a battery electric vehicle requiring mains electricity for charging. Figures shown are for comparability purposes; only compare fuel consumption, CO₃ and electric range figures with other cars tested to the same technical procedures. These figures may not reflect real life driving results, which will depend upon a number of factors including the starting charge of the battery, accessories fitted (post-registration), variations in weather, driving styles and vehicle load. There is a new test for fuel consumption, CO₂ and electric range figures. The electric range shown however, was achieved using the outgoing test procedure.

HYUNDAI IONIQ

Hyundai Finance

Hyundai Finance provides a range of products to make the purchase of your Hyundai even more accessible. To meet your requirements, our plans are simple but offer you the same quality and flexibility as your new Hyundai. Applying for a finance plan through your local Hyundai dealer is easy and they will support you in choosing the right plan for your needs.

As a customer your satisfaction is at the heart of our business, and whilst you are able to manage your account online, we are only a phone call away should you require any help or assistance. We offer two main products to assist your car purchase:

CONDITIONAL SALE

Conditional Sale is a simple and traditional way to finance your car over a fixed period. You decide to fund the entire purchase price or put down a deposit and as your interest rate is fixed you'll pay the same amount each month. After all repayments have been made you'll own the car.

PERSONAL CONTRACT PURCHASE (PCP)

Personal Contract Purchase could make it easier for you to get behind the wheel of your Hyundai, it may also help you to change your car on a more regular basis.

The way it works is simple — you decide what level of deposit to pay. From nil, up to a maximum of 50%. You also decide your repayment period (typically 25, 37 or 49 months) and set your anticipated annual mileage. This will determine your optional final payment.

You will then make fixed monthly repayments based on the outstanding balance and interest, less your optional final payment, and at the end of your monthly repayment period you will have three choices: return, retain or renew.

RETURN: you can hand the car back to us with nothing further to pay (subject to fair wear and tear, and/or excess mileage charges may apply).

RETAIN: you can pay the optional final payment and the car is yours.

RENEW: you can part exchange the car, using any equity over and above the optional final payment as deposit on your next car (equity is anticipated, but this cannot be guaranteed).

T&Cs apply. Subject to status. Applicants must be 18 or over. Guarantee/Indemnity may be required. Hyundai Finance. RH1 1SR

5 Year Unlimited Mileage Warranty

At Hyundai we continually invest in the latest manufacturing technology designed to give you years of enjoyable motoring. Our trust in our products is backed up by our comprehensive aftercare package to ensure you have the best possible experience as a Hyundai owner.

Only Hyundai-trained technicians will carry out any warranty work, and we'll also check for any software updates to keep your car running smoothly. You can be sure that we'll only use Hyundai Genuine Parts - tested and approved by us.

5 YEAR UNLIMITED MILEAGE WARRANTY

Peace of mind comes as standard with our manufacturer-backed, unlimited mileage, 5 year warranty* which protects your Hyundai against manufacturing defects and is fully transferable to the next owner.

HYUNDAI ROADSIDE ASSISTANCE

24 hour roadside assistance should you ever need it, anywhere in the UK or Channel Islands, with Onward Travel included to get you home if your car can't be fixed at the roadside.

5 ANNUAL VEHICLE HEALTH CHECKS

Free, expert visual inspections by your Hyundai dealer on key areas of your car, to help spot any potential problems early.

ADDITIONAL AFTERCARE

A 12 year anti-perforation warranty against perforation of the bodywork, from the inside of the panel outwards.

- * Vehicles used for taxi, daily rental hire and reward or light commercial vehicles are limited to 100,000 miles. Terms and conditions apply. Visit hyundai.co.uk/warranty for further details.
- † Complimentary Hyundai Roadside Assistance automatically covers your Hyundai for 12 months from the date of first registration and can be re-activated annually upon adhering to the recommended service schedule at an Authorised Hyundai Dealer. Visit hyundai.co.uk/assistance for further details.
