### A WORD ABOUT COMPONENTS AND OPTIONAL EQUIPMENT

The Pontiacs described in this brochure incorporate thousands of different components produced by various divisions of General Motors and by various suppliers to Pontiac. From time to time during the manufacturing process it may be necessary in order to meet public demand for particular vehicles or equipment, or to meet federally mandated emissions, safety and fuel economy requirements or for other reasons, to produce Pontiac products with different components or differently sourced components than initially scheduled. All such components have been approved for use in Pontiac products by Pontiac Motor Division and will provide the quality performance associated with Pontiac.

The Pontiacs listed in this brochure are equipped with GM-built engines produced by various divisions. For complete details about engine sources and availability, please refer to the engine data sheet available from your Pontiac dealer.

With respect to extra-cost optional equipment, make certain you specify the type of equipment you desire on your vehicle when ordering it from your dealer. Before you take delivery of the vehicle, we suggest that you make sure it includes the optional equipment you ordered and that if there are changes, they are acceptable to you.

Every 1978 Pontiac can be ordered in standard '78 colors or in your department's specific color and color break pattern.

For more information on any 1978 Pontiac police vehicle or for assistance in compiling technical information for formulating your '78 police fleet specifications, please contact your Pontiac dealer.

Pontiac Motor Division reserves the right to make changes at any time, without notice, in prices, colors, materials, equipment, specifications and models, and also to discontinue models.

# 1978 PONTIAC POLICE CARS

In 1978, law enforcement agencies will again be looking for police vehicles that fill their specific needs for versatility, performance, reliability and comfort. And again, Pontiac's ability to fill these needs will be demonstrated by its wide acceptance among states, counties and municipalities which purchase police vehicles.

Why? Because 1978 Pontiac police cars are again designed to be among the pacesetters in reducing vehicle weight while retaining interior space. And with their fresh new 1978 styling features, these vehicles once more project Pontiac's traditional image of modern automotive prestige and authority.

## Catalina

- Light Duty POLICE PATROLS (Sedan or Wagon)
- Heavy Duty FREEWAY ENFORCER (Sedan)

## Phoenix

- Light Duty POLICE PATROL Sedan
