

you don't have
as long to wait as
you thought.

The new Oldsmobile Silhouette. Coming this fall.

It didn't take forever to create the first luxury minivan able to do all the things families need to do.

It just took Oldsmobile®.

And in the new Oldsmobile Silhouette®, there's finally one

vehicle that's versatile enough to pick up cargo in the afternoon, but sophisticated enough to take your friends out to dinner in the evening.

It's innovation like that, that the New Generation's all about.

And beginning this fall, you'll have a chance to make your entire family part of it.

 The New Generation of
OLDSMOBILE

And these are some of the things it's coming with.

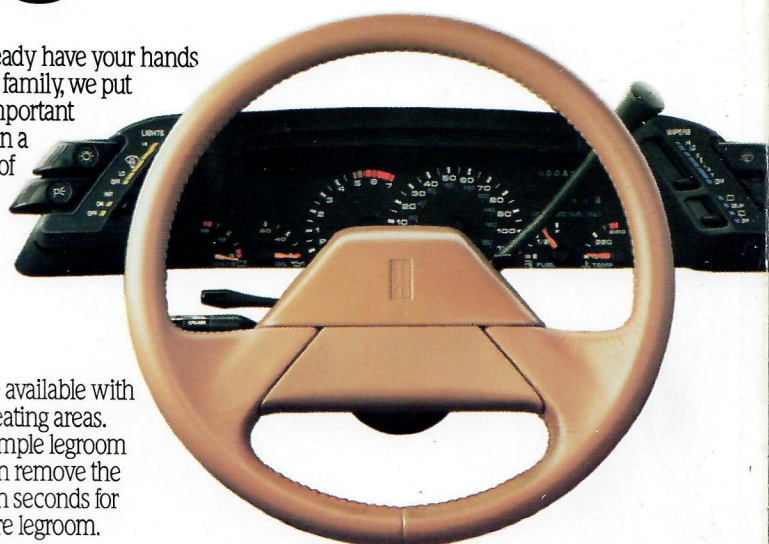

Silhouette has two standard temperature-control systems. Specially treated glass that helps keep the heat outside. And air conditioning that helps keep you cool inside.

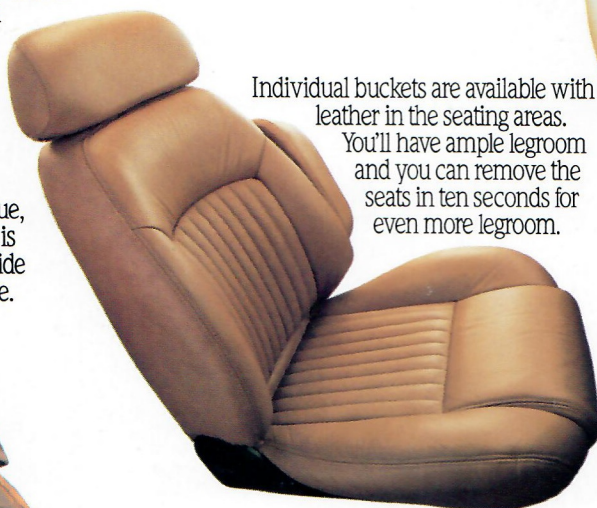

With a standard 3.1-liter V6 that gives 175 lbs.-ft. of torque, Silhouette's front end is as distinctive inside as it is outside.

Since you already have your hands full with your family, we put most of the important controls within a finger's reach of the wheel.

Individual buckets are available with leather in the seating areas. You'll have ample legroom and you can remove the seats in ten seconds for even more legroom.

Silhouette offers an available CD-stereo cassette player with dual front and rear speakers, for a system better than many people have in their homes.

Removing Silhouette's rear seats creates an interior with lots of room. To load it, we've designed a hydraulically assisted hatch that opens with little effort.

As good as our aluminum-styled wheels look on this page, they look even better on Silhouette's 14" radials.
