

MANAGER SERIES™

MANAGER SERIES

MANAGING YOUR TRUCK INVESTMENT WITH MAXIMUM PROFITABILITY.

If you want to deliver more profit per trip, join the companies that operate a Mack® Mid-Liner® Manager Series™ truck. It's today's most versatile medium-duty cabover, for everything from beverage hauling, oil delivery and box van assignments to flatbed and refuse tasks.

The Mid-Liner truck is fuel efficient, highly reliable, maneuverable and comfortable. So you spend less money on fuel and maintenance. And drivers spend their time more productively, making more deliveries in a single day.

The cab is driver-friendly, with comfortable seating, coordinated gray interior trim, roof and door panels. It's also exceptionally quiet, with room for three, and is mounted on a 3-point system of shock absorbers and rubber pads for smooth, all-day riding comfort. A well-designed instrument panel, panoramic windows, power steering, and standard 6-speed or optional automatic transmission, help boost driver efficiency and company profits.

Mack dependability lets your company concentrate on its business, without worrying about the business of trucking.

Easy-to-read instrumentation, comfortable fabrics and thoughtful design touches make time spent in a Mid-Liner cab more productive than ever.

**DEPENDABLE
POWER TO HAUL
THE HEAVIEST OF
PAYLOADS.**

The 6-cylinder diesel engine is fuel-injected, turbo-charged, charge-air cooled, and available in 180 or 210 horsepower versions. Both engines can handle any hauling assignment, without highway restriction.

Mid-Liner trucks have Mack's heavy-duty reputation behind them. So they need less frequent maintenance and go further between service intervals than ordinary trucks. There's no need to tilt the cab for routine service checks. Regular items like oil, windshield fluid and radiator fills are conveniently located right behind the cab. Batteries are maintenance-free. Mack's dependable reputation extends to the frame, too. It resists the bending and twisting that punish lesser trucks.

Durable design. Exceptional payload capacity, power and driver comfort. Plus, a comprehensive warranty program. The more you compare, the more you see Mack's Mid-Liner Manager Series truck is the best medium-duty investment you can make.

Retractable side turn signals adjust to any body width, making the truck more visible and safer to operate in traffic.

Panoramic windshield features 2-speed wipers with intermittent control and a more powerful motor. Driver's side wiper is a pantograph-type with longer blade that cleans 70% of the windshield — the largest swept area in its class.

New grille design improves air flow and engine cooling. Integrated turn signals are better protected and offer improved aerodynamics.

Pop-out grille section speeds routine maintenance and simplifies headlamp adjustment/replacement.

Two serrated, self-cleaning steps provide surer footing to make cab entry/exit easier and safer.

Two-piece, full-length front air deflector improves overall aerodynamics and channels dirt and splash away from side of truck.

Optional front bumper air dam improves vehicle aerodynamics while reducing turbulence under the truck at highway speeds.
