

Developed by enthusiasts, for enthusiasts.

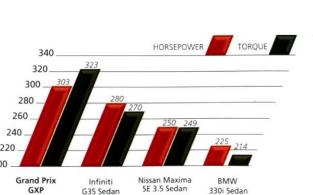

Upholding the honor of "best performing vehicle" in the market's most intensely competitive segment is not something that can simply be assumed. It must be earned. The unconventional thinking and bold technology of the Grand Prix GXP are designed to do just that. A glance at the competition tells you this is no idle boast. The Grand Prix GXP is the most powerful car in its class.* And, no other car in this class offers a V8 engine, Displacement on Demand, or the combined technology of StabiliTrak, Magnasteer II, TAPshift, and Head-Up Display. The modern definition of performance, however, is more than a list of features or superlative test track results. It is the complete integration and refinement of every system and every detail. One look and you can sense it. One drive will prove it.

acceleration times of 5.9 seconds.

(2) is the first of its kind in a production (3) is a total control system designed to suspension has new spring rates, specific to your speed. Four-channel ABS is sedans. The all-new 303-hp 5.3L LS4 V8 FWD car, matching tire contact area to help the driver confidently use GXP's thrust to the drive-by-wire throttle yields width per side, and GXP-specific fenders calipers are from international brake P255/45ZR18 performance tires.

power. At its foundation are cross-drilled Bilstein gas-charged struts. They help of weather. Both work in concert with for maximum performance. From the superior heat dissipation.
