

Change is in the wind.

Introducing The Future Of Minivans.

Windstar's standard safety equipment includes air bags for both the driver and front passenger.

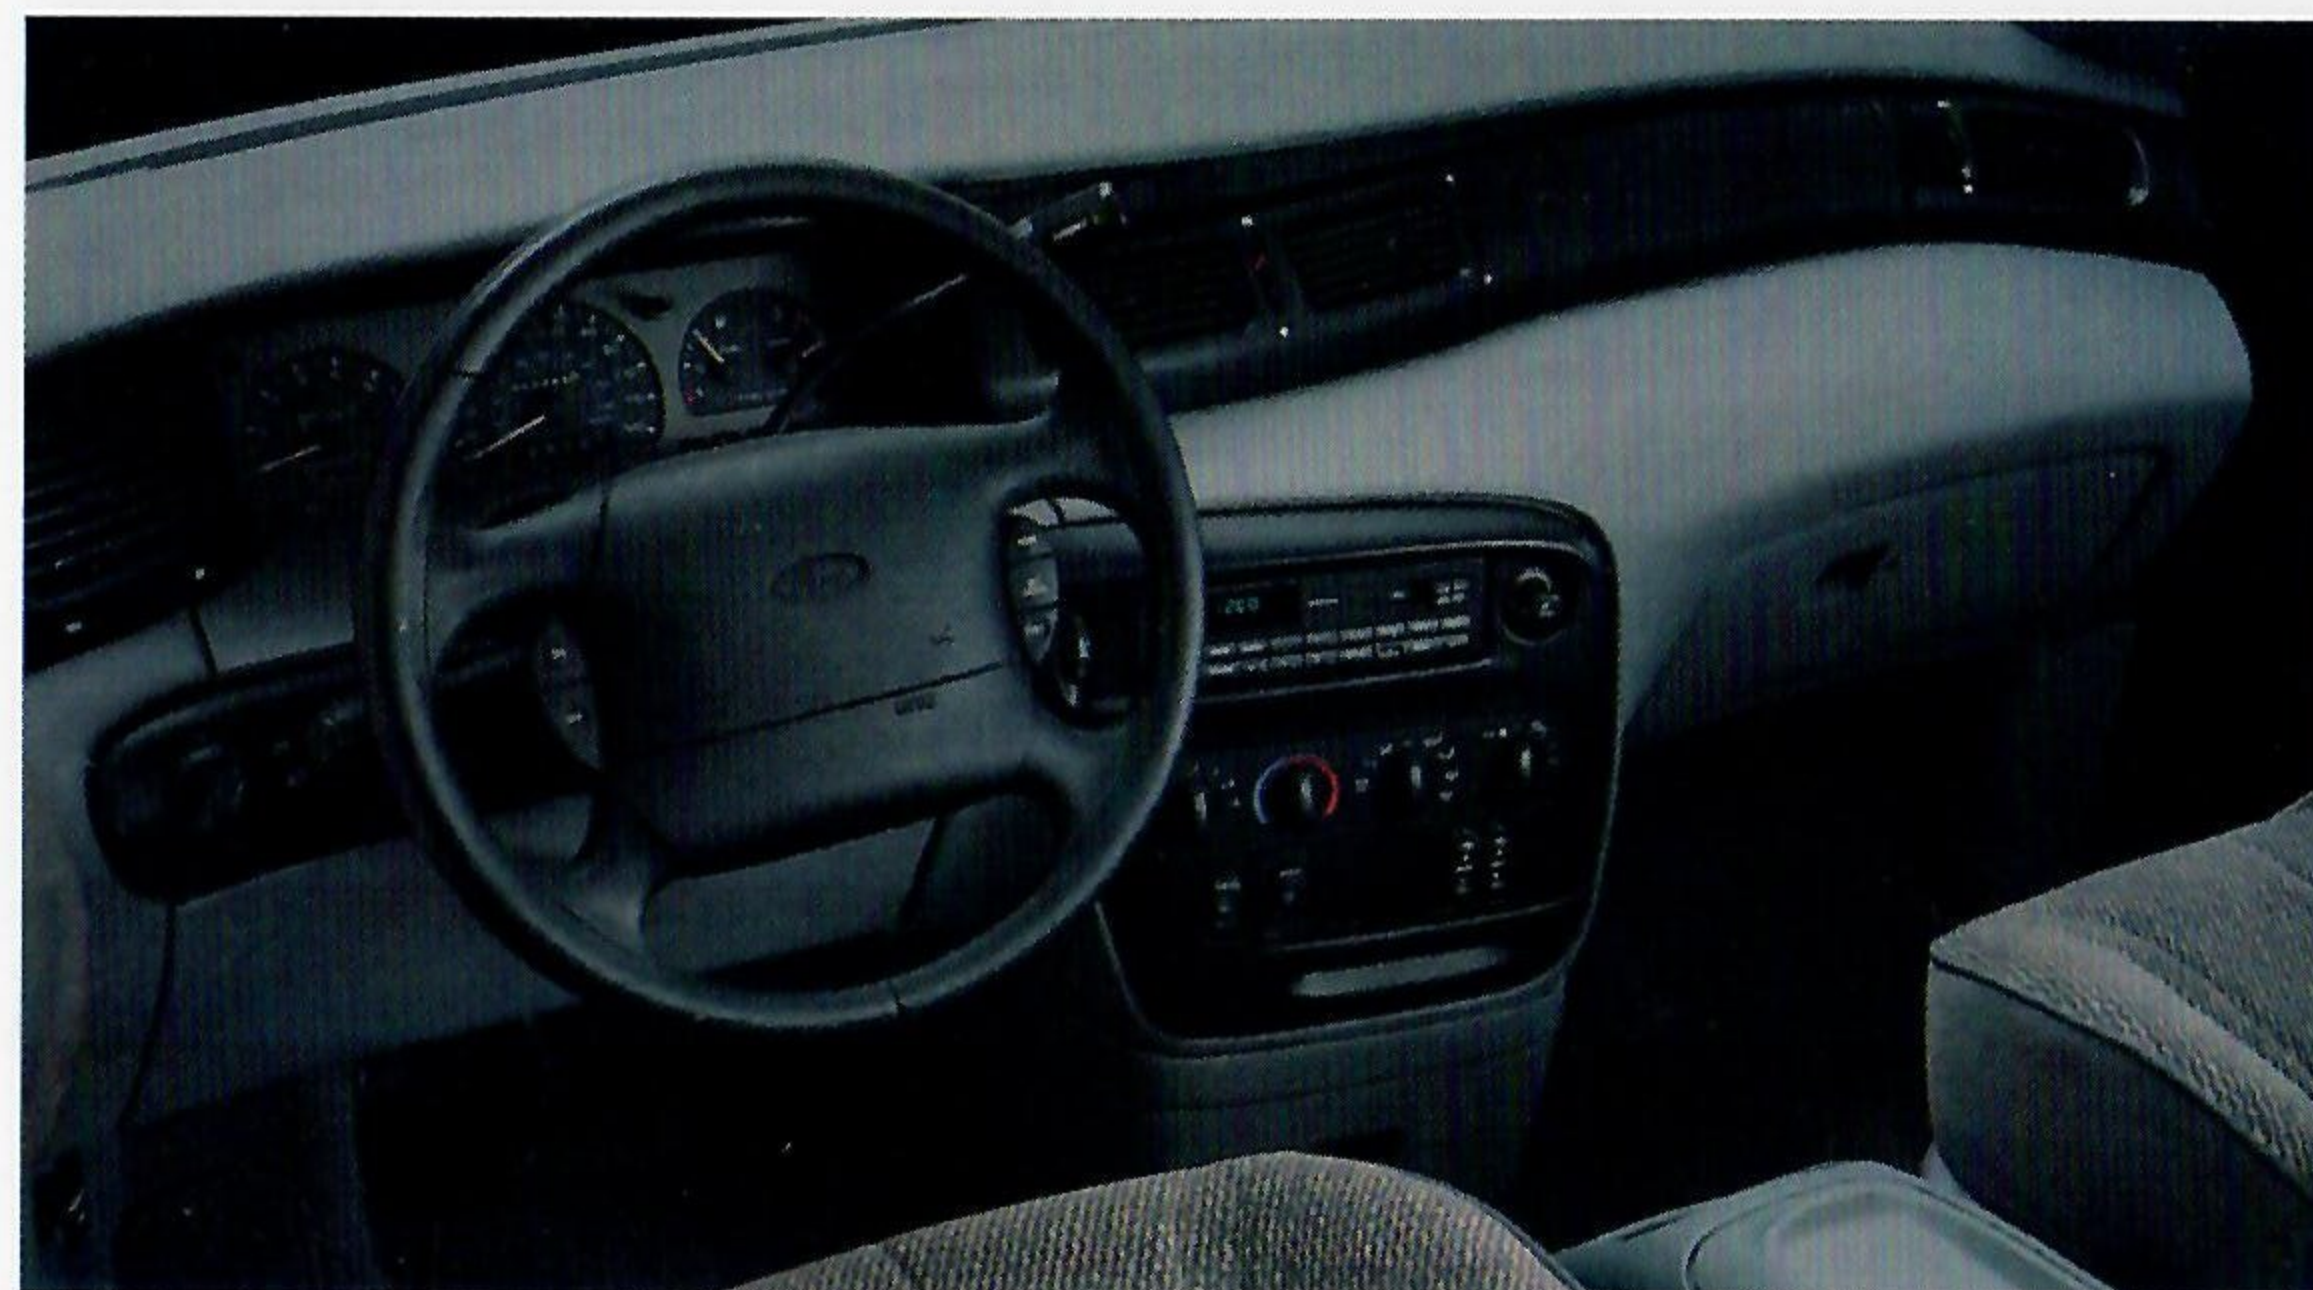

The all-new, front-wheel-drive 1995 Ford Windstar will change the way you think about minivans. It establishes a whole new standard by which all others will be judged.

A new standard for safety.

At Ford, we know that minivans carry the most precious cargo in the world: your family and friends. That's why Windstar has an impressive list of *standard* safety features.

In fact, Windstar is the *only* minivan that meets all federal passenger car safety standards* and has dual air bags,** 5-mile-per-hour bumpers and a 4-wheel anti-lock braking system—all standard. *No other minivan can say that.*

Windstar's list of safety features also includes 3-point safety belts, with front belts that can

be adjusted for height and comfort. A child-proof lock on the sliding door that, when activated, prevents small children from inadvertently opening it. A front crush zone designed to help protect passengers in the event of a front-end collision. Plus side-door intrusion beams. In fact, Windstar already meets the 1997 dynamic side-impact safety standard for passenger cars.

Windstar's front and rear 5-mile-per-hour bumpers help minimize damage and potentially expensive collision bills. According to a recent national survey, these bumpers alone can save thousands of dollars in repair bills.

For added peace of mind, every Windstar comes with a free 24-hour Roadside Assistance Program that's good

anywhere in the continental United States. Should you ever run out of gas, need a hand changing a flat tire, or get locked out of your Windstar during its 3-year/36,000-mile bumper-to-bumper warranty period—help is just a toll-free phone call away.

Secure handling and the smoothest ride available.

Under Windstar's sleek, aerodynamic exterior, the wheels have been moved out, widening the stance for secure handling. The wheelbase has also been lengthened to give Windstar a smooth, car-like ride. In fact, it's the smoothest ride of any minivan.

With a 155-horsepower, fuel-injected 3.8 liter V-6 engine, Windstar will quickly give you confidence when passing and merging in traffic. Power

rack-and-pinion steering and front-wheel drive help provide precise maneuverability. A specially tuned MacPherson strut front suspension, complete with a stabilizer bar, and an electronically controlled 4-speed automatic transaxle round out Windstar's handling equipment. And it all adds up to a safe, secure driving experience.

The quietest interior of all leading minivans.

A rigid body structure and special sound-deadening materials give Windstar the quietest interior of all leading minivans. In fact, Windstar is so quiet that front-seat passengers can talk with third-seat passengers at normal conversation levels. Try *that* in other minivans.

Front-wheel drive, 4-wheel anti-lock brakes and rack-and-pinion steering are just a few of the features that give Windstar a secure ride—whatever the weather.

Windstar seats seven comfortably, with an additional 23.8 cubic feet of cargo space behind the rear seat. Optional quad captain's chairs shown. (See your dealer for availability.)

Spacious interior, with flexible seating arrangements.

The ability to transport both passengers and cargo is essential in a minivan—and no one understands this better than Ford. That's why Windstar has

the most interior room and the most cargo space of all leading minivans. 144 cubic feet, to be exact. So Windstar can comfortably seat up to seven people and still have 23.8 cubic feet of space behind the third-row seat

for all they bring along.

When you require more leg room, the rear seat slides backward or forward up to 7 inches. And Windstar's flexible new seating system can be reconfigured in as many as 15 different ways. Plus, Windstar's low step-in height makes it easy for you and all your passengers to get in and out.

Loading and unloading cargo is also a breeze, with Windstar's easy-opening sliding side door and wide rear liftgate. What's more, the second- and third-row seatbacks can be folded flat to accommodate oversized cargo up to 4 feet wide. And for maximum cargo space, both sets of rear seats can be removed entirely.

Outstanding interior appointments with uncommon fit and finish.

Inside Windstar, you'll see a level of attention to quality and detail not found in other mini-

vans. Like an exclusive flow-through, wrap-around dash with easy-to-reach controls and backlit gauges for improved nighttime visibility. Optional keyless and remote keyless entry systems assure that you'll never get locked out. Plus, if you inadvertently leave Windstar's interior lights on, a "battery saver" feature turns them off after 40 minutes.

There's also a floor console available, complete with an electric "power point" for the use of cellular phones, electric shavers or other small appliances. An optional high-capacity air conditioner with efficient side and roof-mounted air vents for better air circulation. Second-row radio controls with headphone jacks. Conveniently placed cup holders with juicebox cutouts throughout. And an optional compact disc player.

Plus a host of other features that make driving Windstar even more of a pleasure.

Need proof? Take a test drive.

The only way to truly appreciate Windstar's smooth, secure ride is to experience it for yourself. Visit your nearest

Ford dealer and test drive Windstar today.

* Except models equipped with Privacy™ glass.

**Always wear your safety belt.

Windstar's flexible seating system can be reconfigured up to 15 different ways—to meet your specific requirements.
