GLS IN NAUTICAL BLUE

V6 Engine

The 2.7-liter, double overhead cam, all-aluminum V6 engine, along with a tuned intake system, delivers 173 horsepower and 178 lb.-ft. of torque, giving the Tucson GLS and Limited the dynamic performance you want.

Automatic Transmission

The 4-speed automatic transmission features an electronically controlled gearbox with SHIFTRONIC[®], which gives you the option of clutchless manual shifting for a sporty and active driving experience.

LIMITED IN BEIGE LEATHER

**Heated Seats**

Being cold is never fun. The Limited's heated driver and front passenger seats are activated with the touch of a button, so you're on your way to warmth whenever chilly weather blows in.

**Automatic Temperature Control**

Limited's fully automatic system with outside temperature display also monitors air quality via AQS and switches into recirculation mode upon detecting a certain threshold of outside pollution.

**Electrochromic Mirror**

The Limited's electrochromic auto-dimming rearview mirror not only reduces glare from lights behind you, it also features a compass to keep you moving forward in the right direction.

**Premium Audio System**

Every great adventure deserves its own soundtrack. That's why there's an available six-disc in-dash CD changer with six powerful speakers, an equalizer and a hard-working subwoofer.

Spontaneity comes easily when someone else has thought of everything. And the Tucson interior is full of all the most thoughtful features. From one serious audio system and ample storage for all your bring-alongs to the standard air conditioning system, the Tucson is loaded with all the things that make it really easy to be easy going.

SOME OF TUCSON'S GREATEST STANDARD SAFETY TECHNOLOGIES ARE THE ONES WE HOPE YOU'LL NEVER SEE.

LIMITED IN BEIGE LEATHER

¹ The Electronic Stability Control (ESC) and the Traction Control System (TCS) will not compensate for careless driving techniques, and are not substitutes for safe driving practices.

² The Supplemental Restraint (airbag) System (SRS) is designed to work with the 3-point seatbelt system. The SRS deploys in certain frontal and/or side-impact conditions where significant injury is likely. The SRS is not a substitute for seatbelts, which should be worn at all times. Children under the age of 13 should be restrained securely in the rear seat. NEVER place a rear-facing child seat in the front seat of a vehicle that has a passenger-side airbag.

**Electronic Stability Control**

ESC is an active safety system that automatically applies the brakes to individual wheels and adjusts throttle input as required to help keep the vehicle on its intended path.

**Structural Integrity**

For added protection, each door is reinforced with side-impact door beams, and the unibody construction is engineered with high-tensile steel for optimum structural integrity.

**Tire Pressure Monitoring System**

TPMS sensors monitor air pressure in the front and rear tires and alert the driver when a tire's air pressure is critically low. And it's a standard feature on GLS and Limited models.

Tucson's class-leading active and passive safety technologies feature Electronic Stability Control with Traction Control,¹ ABS and six airbags²—including standard side-curtain airbags. All are further enhanced by reinforced front and rear crumple zones and an energy-absorbing steering column. In other words, we've got you covered.
