

Saab-Scania of America Inc.  
takes pleasure in announcing  
the availability of an  
Exclusive Appointments Group  
for the Saab Turbo.

The luxury edition Turbo is displayed  
in Saab dealer showrooms throughout America.

A small number of motoring enthusiasts in the United States will have an opportunity this year to own one of the world's most elegant automobiles.

Saab has combined extraordinary personal luxury with the technological sophistication of its 1983 Turbo in the Exclusive Appointments Group. Each Turbo equipped with this group has new deep-contour design seats covered in soft Sierra Tan leather. The backs of the front seats have deep convenient pockets to hold magazines, papers, and other appointments for the rear-seat passengers. A handsome new front console and electric sunroof further distinguish the Exclusive Appointments Group. Each car in the group is also fitted with fog lights.

The Exclusive Appointments Group is available in both 3-door and 4-door Turbos in Slate Blue, Silver and Black.

## LUXURIOUS LEATHERS

Scotland's Bridge of Weir Leather Co., Ltd. has provided upholstery leathers for seats in the House of Lords and aboard the President's airplane, Air Force One. The leathers prepared for the Saab Turbo are thinner, more supple and softer than ordinary automotive leathers.

A capacious magazine pocket on the back of each front seat keeps papers handy for rear-seat passengers.

Soft and supple upholstery-grade leathers cover the seating surfaces and sides of the luxury edition Turbo's seats. The Sierra Tan leather is laid over deep-contour seats for maximum support and extraordinary luxury.

**LEATHER INTERIOR**
