There's something remarkably refreshing about the Jetta. What could it be? Well, for starters, there's the design. It's got curves most cars dare only dream about. Then there's all the German engineering, which certainly makes for some spirited driving. **Ka-pow!** And let's not forget about its strict diet either. A daily dose of that nutritious asphalt can work wonders. Who knows what it is? We'll say this though – the Jetta's energetic nature sure keeps you on your toes. A good place to be when you're steppin' on the gas.

3 Something special

If there's one thing the Jetta's got going for it, it's freshness. And it's got plenty of it, in body and soul. Basically, the Jetta is an automotive embodiment of the free-spirited individuals who choose to drive it. Smart in its design, the Jetta receives stares from many a passerby. Yet, it exudes modesty. Its lines are clean. But it'll never pass up the opportunity to get its wheels a little dirty. No matter which Jetta you pick, rest assured that fresh feeling comes standard on every model. Over time, you'll find this characteristic is as good as any of the many standard features it has to offer.
