

Ford MUSTANG

Go Further

Visionary. Ingenious. Remarkable.
Every car bears his signature.

Henry Ford

FORD MUSTANG

The sensational Ford Mustang is here. Loaded with innovative technology and delivering world-class levels of performance and style, the Mustang is more than just a sports car. It's the heart and soul of Ford.

ALIVE

There is a precision to the Ford Mustang that goes far beyond design. It's a feeling of performance and control. This is a car that will make you feel alive. Electrified and inspired. The Ford Mustang is a focused and exclusive machine that just demands to be driven.

Xenon headlights

Mustang's headlights have been designed to be as functional as they are beautiful. Powerful xenon technology delivers a clear, crisp light for enhanced night-time driving.

SEDUCTIVE

The look may say new, but its soul is pure Mustang. Strong side lines with wide shoulders, a noticeable set of haunches and a raked roofline combine for a powerful muscle car look. The Ford Mustang changes the way we see things. It's a presence you just can't ignore.

CONNECTED

For the fortunate few, the best place to connect with the Ford Mustang is at the wheel. Beneath the iconic double-brow fascia, two large clear gauges put information right in front of the driver, while the key vehicle controls fall naturally to hand.

Ford SYNC 3 with Voice Control and Touchscreen

Mustang's new SYNC 3 system lets you control music, manage your calls, text messaging and phone Apps, satellite navigation (optional) and climate control with simple voice commands.

Touchscreen technology

The intuitive 8" colour touchscreen connects with your smartphone applications using AppLink, Apple CarPlay and Android Auto, letting you configure your home screen the way you want it. New 'swipe' and 'pinch-to-zoom' features, plus the latest 3D map view with one-box search tool make SYNC 3 even easier to use.

ICONIC

Inside Mustang, the aeronautical design theme delivers a thrilling drive. Important controls are within easy reach with **aircraft-style toggle switches, analogue dials** and **digital feedback** that can be read at a glance. The manual **gearshift** is perfectly placed with a short-throw between gears. And the **steering wheel** feels just right in your hands, featuring tactile **paddle shift controls** on automatic transmissions.

DISTINCTIVE

What sets the Ford Mustang apart is the sheer pleasure of a shape that differs so much from the rest. From the shark-bite nose front to the sculpted rear shoulders, its cool, classic form is one of pure emotion.

Aerodynamics
Mustang is the first Ford to be equipped with front wheel aerocurtains to guide air across the front wheels. At the rear, the tapered bodywork funnels air off the back of the car, optimising aerodynamics.

Twin-scroll turbocharger

The 2.3-litre Ford EcoBoost is the first Ford engine to use a low-inertia twin-scroll turbocharger. Together with the integrated exhaust manifold that maximises pulse energy to the turbine, the result is improved responsiveness for overtaking manoeuvres, lower emissions and improved efficiency.

EFFICIENT

Based on state-of-the-art technology, Mustang's **2.3-litre Ford EcoBoost** engine offers the perfect balance between dynamic performance and effortless efficiency. A high-capacity direct injection system precisely controls fuel delivery, while a twin-scroll turbocharger delivers more power – 317 PS (233 kW) – and instant throttle response.

2.3-litre Ford EcoBoost petrol engine

With its specially-designed 2.3-litre Ford EcoBoost engine, the Mustang is hungry for fun, not fuel. Part of the Ford EcoBoost family, this powerful four-cylinder unit combines a low-inertia twin-scroll turbocharger, high-precision direct injection and Twin independent-Variable Cam Timing (Ti-VCT) to reduce fuel consumption and emissions, while maximising dynamic performance.

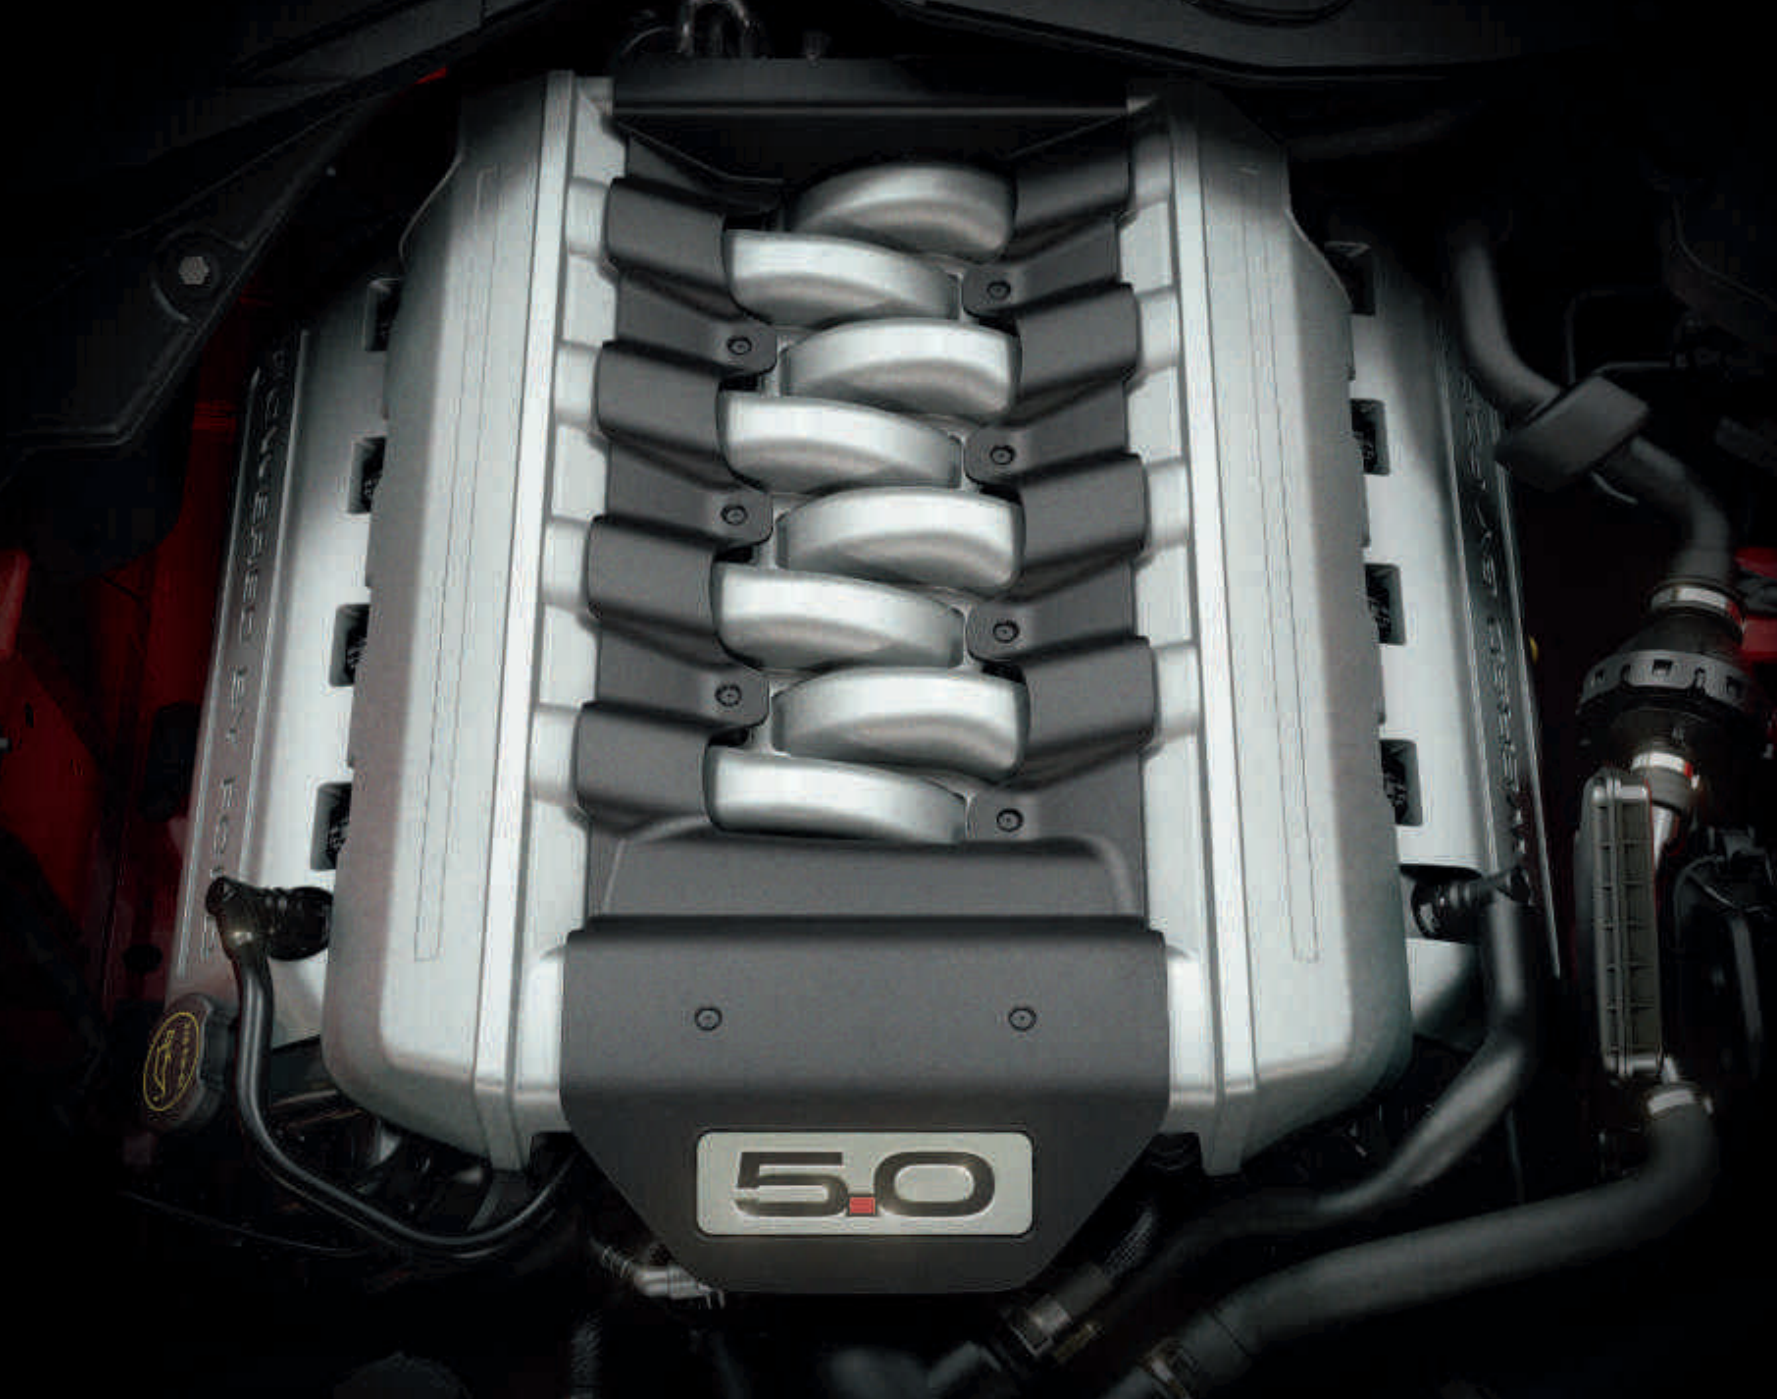

Mustang powered by **FORD EcoBoost**

VOCAL

The numbers are impressive. The drive is authoritative and effortless. The engine's distinctive throaty growl provides the soundtrack to every drive.

5.0-litre V8 petrol engine

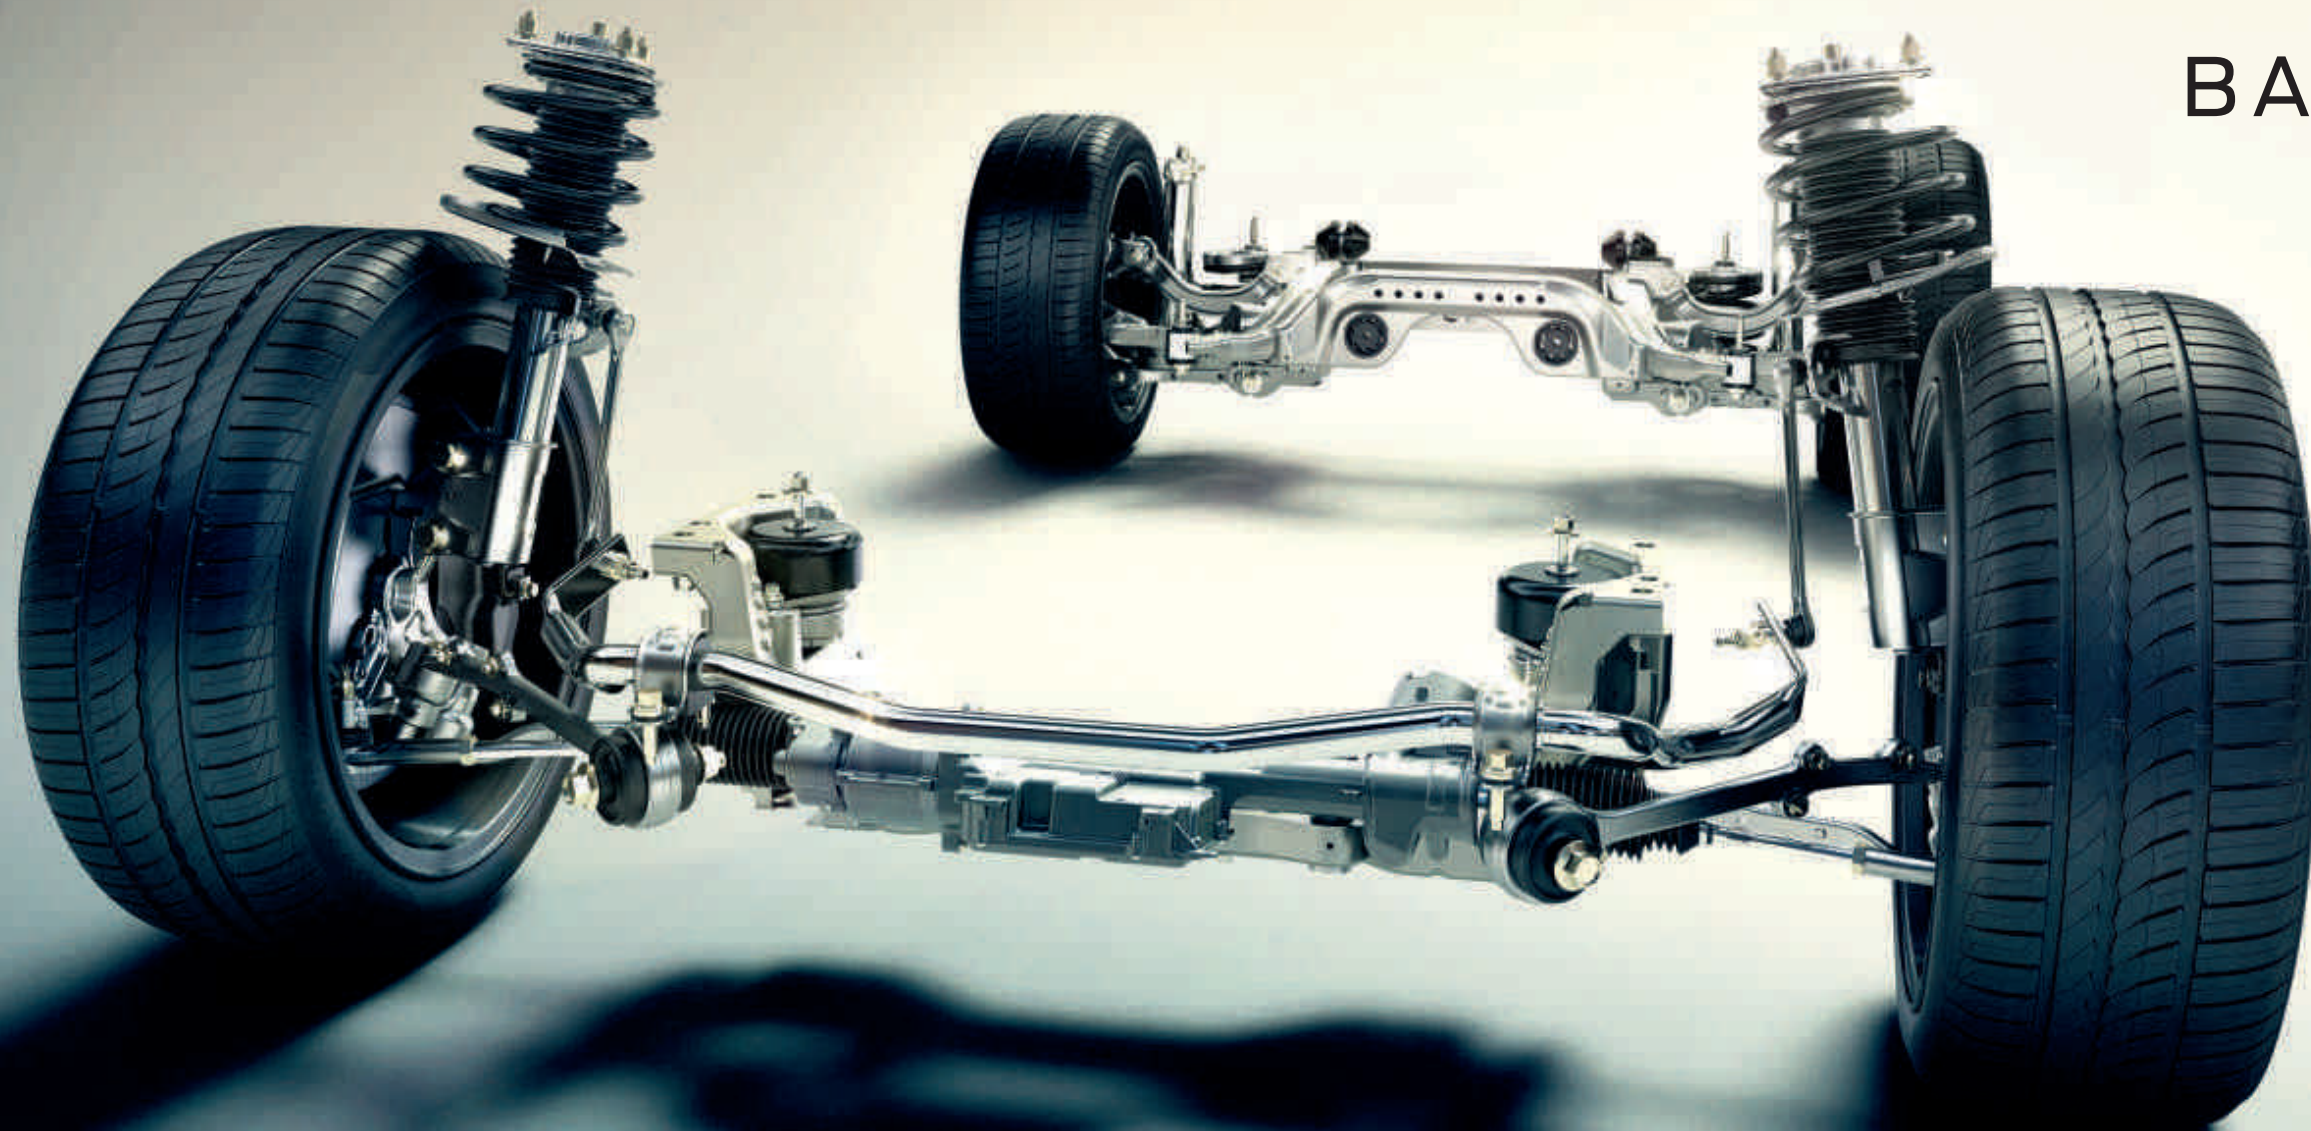

Performance of an epic scale is provided by our most powerful 5.0-litre V8, with an awesome 416 PS (306 kW) and a muscular 530 Nm of torque.

LIBERATED

Enjoy the wind in your hair with the captivating Ford Mustang Convertible. Designed from the start as a convertible, it's packed with all the performance and attitude of the Fastback, but with the added thrill of open-top driving.

BALANCED

Ford Mustang is designed to deliver world-class dynamics and ride quality. Starting with a stiff body structure as the foundation, the fully-independent suspension provides more precise wheel control, while enhancing handling, steering and comfort. It's not just advanced suspension. It's a whole new level of exhilaration.

Steering

Electronic Power-Assisted Steering (EPAS) delivers the agility, turn-in precision and high-speed control expected from a world-class sports car. Mustang's system has three settings – Normal, Comfort and Sport – plus the ability to compensate for drift due to road camber or crosswinds, and to counteract any high-speed wheel imbalance.

Front suspension

Sports-tuned front suspension uses a double ball-joint MacPherson strut system. Mounted on a stiff subframe, it ensures superb road holding and driving fun, even in the most extreme manoeuvres.

Rear suspension

Mustang's advanced multi-link independent rear suspension combines precise, agile handling with everyday refinement. Aluminium components reduce unsprung mass, while the stiff structure helps retain razor-sharp control of the wheels.

AGILE

While Mustang has always been a unique sports car, now the experience soars to a new high. The specially-developed chassis with fully-independent suspension is designed to make this the most agile Mustang ever. Add to that its low centre of gravity, a limited slip differential and selectable driving modes and you'll find Mustang is equally at home on the hairpin bends of a mountain pass, on the motorway or in town.

Limited slip differential

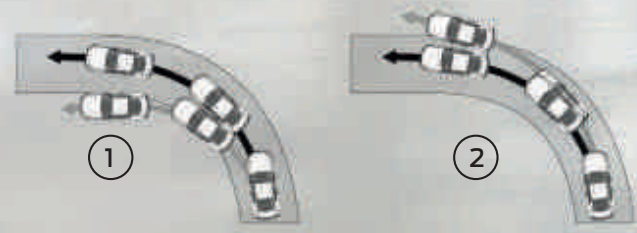

Mustang's mechanical limited slip differential is ideally suited to rear-wheel drive sports cars. Should one wheel start to slip, engine torque is automatically transferred to the other wheel. This greatly improves traction and agility during acceleration out of corners and on slippery surfaces.

Selectable driving modes

Mustang also comes with electronic chassis calibration. Four driver-selectable modes – Normal, Sport+, Track and Snow/Wet – determine throttle response, gearshift points (on automatic transmission models), steering effort and Electronic Stability Control (ESC) calibration to suit different driving conditions.

ATHLETIC

Mustang lets you adapt your car's performance to suit your driving style. Switch on the ignition and full AdvanceTrac Electronic Stability Control (ESC) is engaged. Press the ESC button once to disengage Traction Control, or twice to reduce the level of assistance of ESC. Press and hold the button for more than five seconds to fully disable the ESC system. The choice is yours.

AdvanceTrac Electronic Stability Control (ESC)

Mustang's AdvanceTrac Electronic Stability Control (ESC) is designed to automatically compensate for loss of control due to oversteer **(1)** or understeer **(2)**. The system detects sudden changes in steering, braking and vehicle attitude, and adjusts the speed of individual wheels to help keep you safely on track.

CONFIDENT

High-performance cars need high-performance brakes, and the Ford Mustang is no exception. Created with safety and control in mind it features four-piston brake callipers (six-piston front callipers on GT models), as well as ventilated discs front and rear. A powerful anti-lock braking system (ABS) provides sure-footed stability, while Emergency Brake Assist (EBA) and Electronic Brake Prefill help achieve the best possible stopping power.

Braking system

For optimal performance, vehicles fitted with the 2.3 EcoBoost engine feature a powerful anti-lock brake system (ABS) with four-piston callipers and 352x32 mm ventilated front discs. GT models are equipped with six-piston Brembo front callipers, as well as even larger 380x34 mm diameter front discs and front brake cooling vents for ultimate stopping power.

Tyres

To ensure maximum grip and rewarding handling, 2.3-litre Ford EcoBoost models are fitted with 255/40 R19 tyres all round. The V8-powered GT gets larger 275/40 R19 tyres on the rear to maximise performance potential.

INTELLIGENT

New Ford SYNC 3 with Voice Control, 8"-Touchscreen and Emergency Assistance[†] offers a more sophisticated interface between driver and technology. Bluetooth® and USB connectivity let you integrate SYNC 3 with your external devices, while Apple CarPlay, Android Auto, and Applink allow you to bring your compatible smartphone technology into your car.

[†]Ford Emergency Assistance is an innovative SYNC feature that uses a Bluetooth®-paired and connected mobile phone to help vehicle occupants initiate a direct call to the local Communications Centre, following a vehicle crash event involving an airbag deployment or fuel pump shut off. The feature operates in more than 40 European countries and regions. Emergency Assistance is not supported by all European languages. See www.ford.co.uk for latest information.

Note The Bluetooth® word mark and logos are owned by the Bluetooth SIG, Inc. and any use of such marks by Ford Motor Company Limited and its associated companies is under licence. Other trademarks and trade names are those of their respective owners.

SMART

Driving, parking or simply enjoying the ride, Mustang's smart features make your experience even more special. The door mirrors incorporate **puddle lamps** (standard) that beam the iconic Mustang logo on the ground when you unlock the doors. Select reverse gear and the **rear-view camera** (standard) automatically displays the view from behind the car on the 8" TFT touchscreen. **Climate controlled front seats** (optional) help keep you sitting at a comfortable temperature. **The Satellite Navigation with ShakerPro Audio System** (optional) includes a premium 12-speaker sound system with a powerful 8" boot-mounted subwoofer. And the six-speed **SelectShift automatic transmission** (optional), with its steering wheel-mounted shift paddles, blips the throttle for faster downshifts when Sport+ or Track mode is engaged.

BODYSTYLES

Fastback

With its long sculpted bonnet, steeply sloped windscreen and low roofline, the Fastback retains the key design elements of the classic Mustangs.

Convertible

Designed as a convertible from the ground up, the Mustang Convertible features unique rear wings and a flatter bootlid. The result is a beltline which flows seamlessly around the car, enhancing its sleek and muscular profile.

Safety features

♦**Note:** A rear-facing child seat should never be placed in the front passenger seat when the Ford vehicle is equipped with an operational front passenger's airbag. The safest place for children is properly restrained on the rear seat.

¹⁾Safety feature. ²⁾Driver assistance feature.

Active bonnet

In the event of frontal impact with a pedestrian, the active bonnet raises 10cm to increase the gap to the engine block. This increases pedestrian safety without affecting Mustang's sleek design profile.

Mechanical features

All-independent suspension

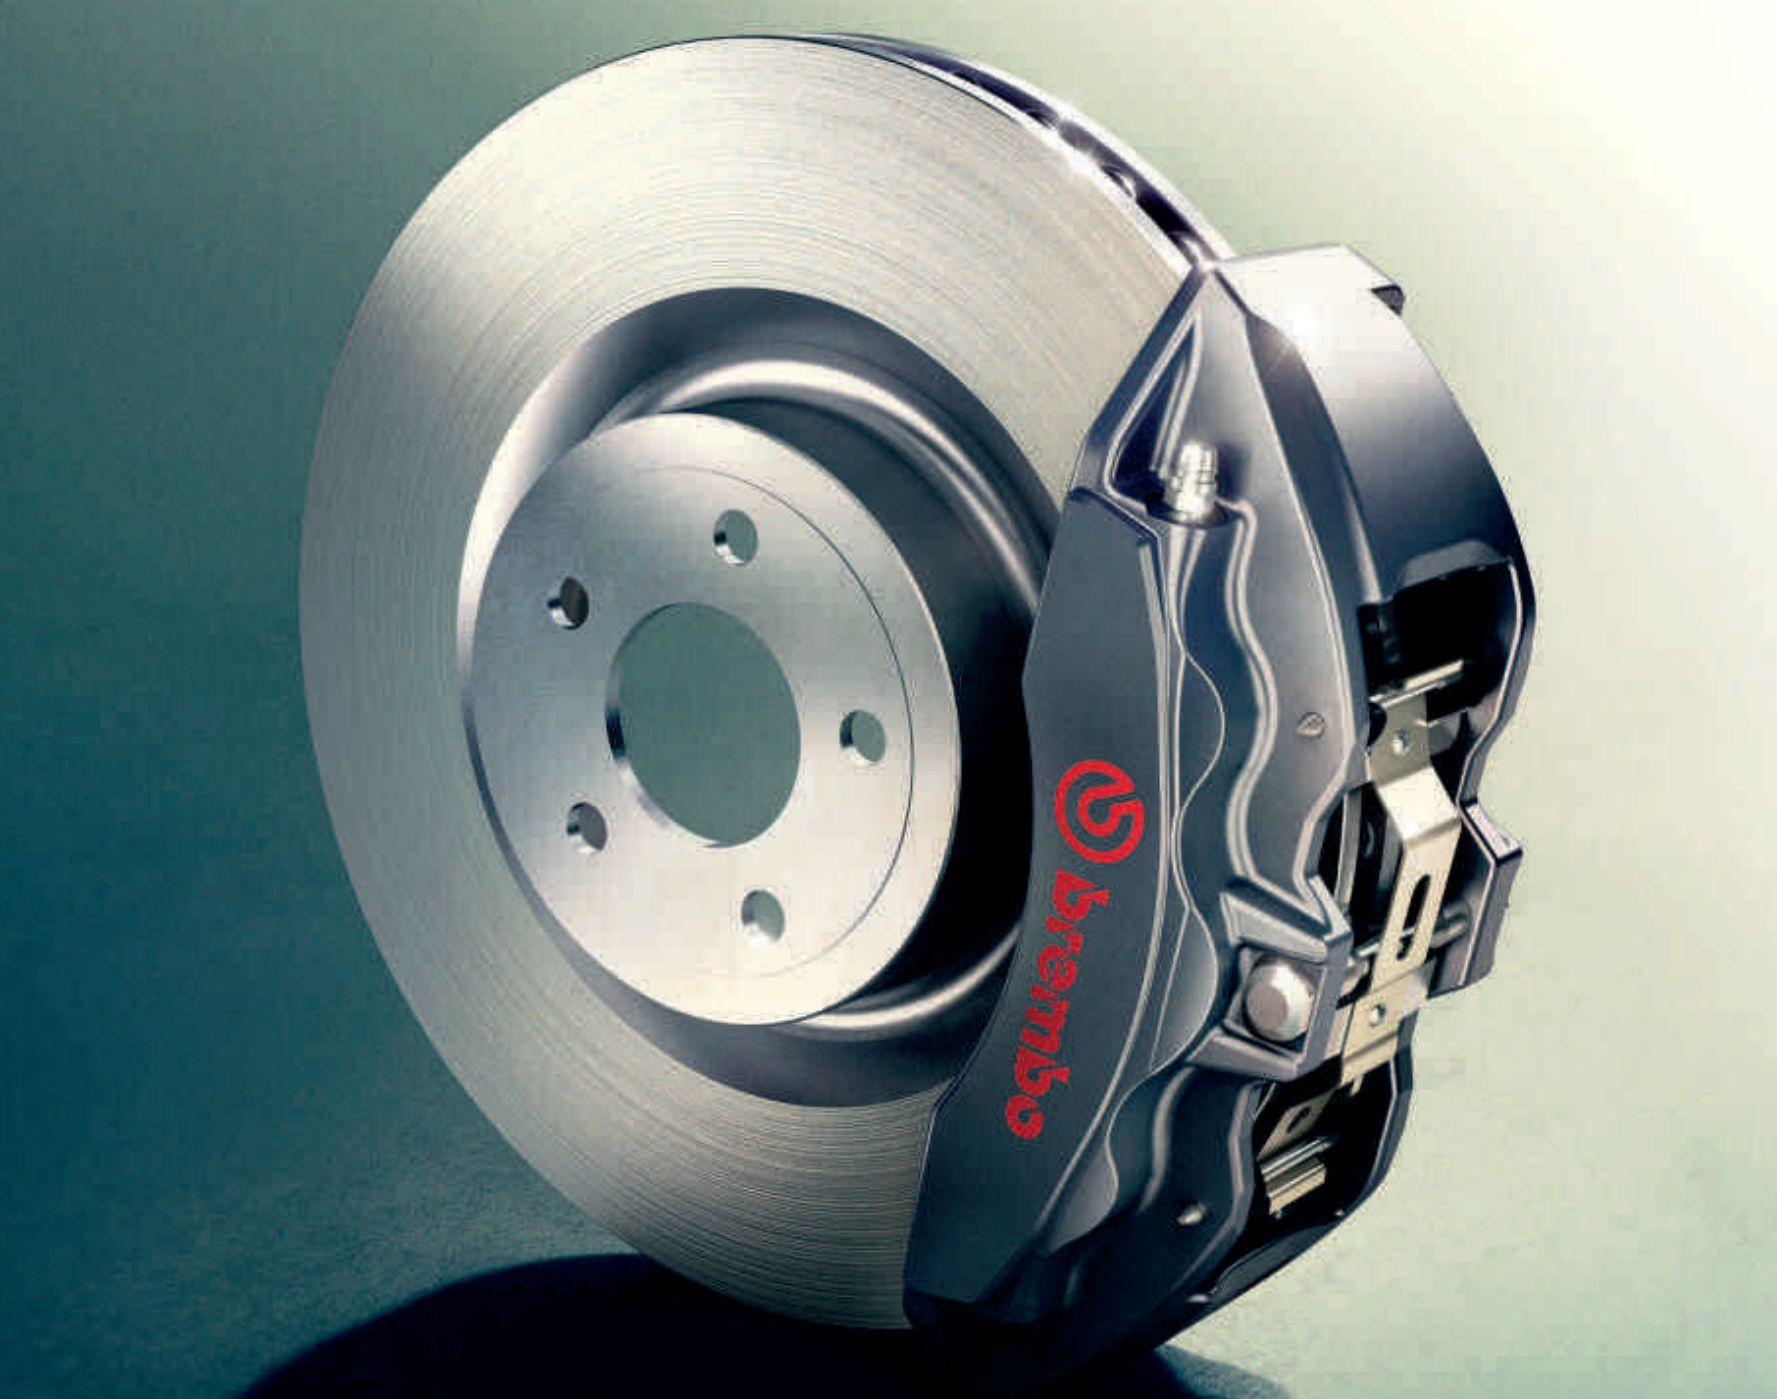

The Mustang's suspension geometry has been tuned to provide anti-squat, anti-lift and anti-dive characteristics. This helps keep Mustang's body more level under hard acceleration or braking.

GAUGE YOUR PERFORMANCE

^aFord test figures. ^{ab}The declared fuel consumptions and CO₂ emissions are measured according to the technical requirements and specifications of the European Regulations (EC) 715/2007 and (EC) 692/2008 as last amended. Fuel consumption and CO₂ emissions are specified for a vehicle variant and not for a single car. The applied standard test procedure enables comparison between different vehicle types and different manufacturers. In addition to the fuel efficiency of a car, driving behaviour as well as other non-technical factors play a role in determining a car's fuel consumption and CO₂ emissions. CO₂ is the main greenhouse gas responsible for global warming. A guide on fuel economy and CO₂ emissions which contains data for all new passenger car models is available at any point of sale free of charge or can be downloaded under <http://carfueldata.dtf.gov.uk/>.

The fuel economy figures quoted in the table below are achieved by following strict EU governed test procedures and are specifically designed to enable customers to compare vehicles from all manufacturers on a like-for-like basis. Fuel consumption is directly affected by the length of the journey; number of passengers and amount of luggage carried; individual driving style; road and traffic conditions; weather conditions; vehicle age, mileage, condition and standard of maintenance; use of vehicle features such as air conditioning; and any modifications to the vehicle such as the addition of a roof rack. Your fuel economy will vary based on these and other factors and, for these reasons, many drivers may not achieve the EU fuel economy figures (below) in day-to-day driving, although the vehicle is technically capable of doing so.

The Government fuel figures do not express or imply any guarantee of the fuel consumption of any particular vehicle. The vehicles themselves have not been tested and there are inevitably differences between individual vehicles of the same model. In addition, a vehicle may incorporate particular modifications. Furthermore, the driver's style and road and traffic conditions, as well as the extent to which the vehicle has been driven and the standard of maintenance, will affect its fuel consumption. **Insurance groups** are only as recommended by the Association of British Insurers. You should always consult your insurance adviser for confirmation.

Ford and BP – working together to reduce fuel consumption and emissions.

Ford One Call

In the unlikely event that your Ford Dealer can't help you or if you need to speak to us directly, call 0203 564 4444
