Notes

Pre-Collision Assist with Pedestrian Detection[®]

Standard across the range, this system combines multiple sensors to see the road ahead. This AEB system is designed to help detect and mitigate frontal collisions with vehicles and vulnerable road users like pedestrians and cyclists by automatically applying the brakes.

Traffic Sign Recognition[®]

Traffic Sign Recognition can automatically detect and display the current speed limit. It can even provide an audible and visual warning if you exceed the detected speed limit, helping you to avoid speeding fines. Standard on all Rangers.

Lane Keep Assist with Lane Departure Warning[®]

Every Ford Ranger can detect if you unintentionally drift out of your lane, initially vibrating the steering wheel to alert you, then applying steering torque to help direct the vehicle back into the lane.

Semi-Auto Active Park Assist[®]

Not only will this system use ultrasonic sensors to help you find a suitable parallel park, it will steer you in automatically, while you focus on the accelerator and brake.

SYNC[®]3 with Apple CarPlay & Android Auto^{4,7}

Use voice commands to locate your next worksite, make hands free phone calls and listen to text messages. Connect your compatible smartphone through Apple CarPlay, Android Auto or Applink[®] for hands-free control of your favourite apps.

Power Roller Shutter

Standard on Wildtrak, the redesigned power operated roller shutter offers improved security and additional load space. Opened through the key fob, dash or inside the tray this new design is a great way to secure your load.

3.5 Tonne Towing¹

With up to 3,500kg braked towing capacity and 6,000kg gross combined mass in conjunction with Trailer Sway Control[®], you'll be able to handle big loads with confidence.
