* = Figures shown are for comparability purposes. Only compare fuel consumption, CO₂ and electric range figures with other cars tested to the same technical procedures. These figures may not reflect real life driving results, which will depend upon a number of factors including the starting charge of the battery, accessories fitted (post-registration), variations in weather, driving styles and vehicle load. The CO₂ figures have been determined according to the WLTP test. The CO₂ figures were previously based on the NEDC equivalent. † = 48V Mild Hybrid Technology provides many benefits including improved recovery of kinetic energy during braking and support of the combustion engine when accelerating. This helps to reduce CO₂ emissions whilst improving fuel consumption and performance. Figures in () apply to cars with automatic transmission. ^ = Combined power from Petrol and Electric engines.
