MERCHANDISE

FIERCE EXPRESSION

For well over a century, Alfa Romeo designers and engineers have built a legendary Brand by achieving remarkable symmetry: their goals of creating heightened emotions and developing innovative technology are passionately pursued in equal measure. These defining principles $inspire\ everything\ from\ our\ most\ powerful\ Formula\ 1\ entries\ to\ today's\ Stelvio\ Quadrifoglio\ --\ all\ clocking\ in\ world-class\ performance\ laps$ on racing's most challenging tracks. The main takeaway from the unique, driver-centric design of Alfa Romeo? A relentless intensity that transforms every road — and every passenger.

BLOOD BROTHERS

THE HEART OF THE BRAND

Alfa Romeo Racing and the Stelvio Quadrifoglio share a special bond: Alfa Romeo DNA that's steeped in pacesetting innovation. Alfa Romeo has long leveraged racetrack technology with street-smart design, making its mark in Formula 1 racing and commuter lanes alike.

DNA THAT ADAPTS EASILY

ALFA DNA DRIVE MODE SELECTORS Both the Alfa DNA Drive Mode Selector and Quadrifoglio's exclusive Alfa DNA Pro instantaneously adapt the behavior of the vehicle to the selected driving mode. The systems automatically reset to "Natural" at the vehicle start while retaining the ability to change modes at any time.

RACE (only on Quadrifoglio with Alfa DNA Pro) activates the over-boost function, opens up the dual-mode exhaust system and turns off ESC,1* increasing torque to maximize performance.

NATURAL is a comfort setting for a perfect balance in daily driving and is calibrated to be the default setting.

DYNAMIC opens the available dual-mode exhaust (standard on Quadrifoglio) and delivers sharper throttle response, enhanced steering feedback and performance shift-mapping for sporty on-road driving.

ADVANCED EFFICIENCY is engineered to deliver maximum fuel efficiency; on Quadrifoglio, it also changes the threshold for all of the safety systems.

*A note about this brochure: all disclosures can be found on the last page. DNA / 16

Beyond breathtaking performance, Alfa Romeo Stelvio represents a way of living ... the Italian way ... where passion drives everything from food to music to design. Its influence is unmistakable with every glance and touch. As shown here inside Stelvio Ti Sport, Red performance Sport leather-trimmed seats set a spirited tone. The cabin embraces a striking combination of materials, including genuine Aluminum trim, paddle shifters, pedals and footrest. The heated front seats are leather-trimmed and the steering wheel is leather-wrapped; 14-way power driver seat includes 4-way lumbar support with power bolsters and manual thigh support. It's all just a snapshot of the wide-ranging interior choices available across the Stelvio lineup, as outlined in the specification pages.

VALUABLE CONNECTIONS

APPLE CARPLAY® COMPATIBILITY This is smart iPhone® integration, so you will experience your favorite features through your dashboard. With Siri,® all you have to do is ask — catch up on calls and messages, get directions from Apple Maps or request a song through Apple Music. The system lets you browse music or discover nearby gas stations, parking, restaurants and more. Plus, Maps helps to anticipate where you're headed.

ANDROID AUTO^{TM4} INTEGRATION Bring the best of Google with you in your Stelvio. Talk to Google on Android Auto and get things done with your voice so you can keep your focus on driving. Easily send messages, get directions, control media and more. Just say, "Hey Google" or long-press the voice control button on your steering wheel. Standard.

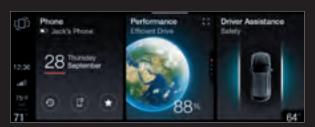

Apple CarPlay integration shown above.

TECHNOLOGY / 23

SCREEN GEMS

In Stelvio, a wealth of information is right at your fingertips. For example, explore the inner workings of the Alfa DNA/Alfa DNA Pro Mode Selector settings with data pages that outline the functionality of its key performance features. Each mode has a unique page within the Drive Mode Explorer that highlights vehicle settings, including steering, shift behavior, pedal mapping and more.

Stelvio takes multitasking to a new level with indispensable content that features a choice of interactive widgets that scroll horizontally. Swipe through music, phone, navigation, performance and settings widgets that put essential controls conveniently within reach.

Enjoy 3D navigation with the 8.8-inch touchscreen that presents a vertically maximized view. This three-dimensional map enhancement provides the driver with a display closer to reality and superior orientation. Signpost images are integrated into the format, providing a consistent place where drivers can reliably look for vital information like speed limits, exit numbers, road numbers and more. Navigation is standard on Ti models and above, available on Sprint.

FORWARD COLLISION WARNING (FCW) WITH FULL-SPEED STOP⁵ This system provides both audible and visual warnings to the driver and is able to bring the vehicle to a full stop when a frontal collision may be imminent. Standard on all 2021 Stelvio models.

AIR BAG⁶ SYSTEM Stelvio features a standard comprehensive system that includes driver and front-passenger dual advanced air bags, supplemental front-seat-mounted side air bags (pelvic-thorax), front and rear side-curtain air bags, along with driver and front-passenger inflatable knee air bags.

ANTISLIP REGULATION (ASR) AND TRACTION CONTROL SYSTEM (TCS) The standard ASR limits the spin of the driving axle during a driver torque request in the event the adherence limit is reached, optimizing vehicle traction. Standard TCS limits the wheelspin of a single drive wheel by applying brake torque to the wheel while an equivalent amount of torque is transferred via the differential to the other wheel, providing the vehicle the torque required to drive away.

FORESEEN CIRCUMSTANCES

HILL START ASSIST (HSA) AND HILL DESCENT CONTROL (HDC) These standard systems aid the driver during maneuvers when the vehicle is on a slope. HSA maintains and releases brake pressure during vehicle drive-off, while HDC maintains a constant speed by varying brake pressure, allowing a controlled vehicle descent.

ADAPTIVE CRUISE CONTROL WITH FULL STOP (ACC STOP)⁷ This available system helps drivers maintain a safe distance from the vehicle ahead and, under certain traffic conditions, can bring Stelvio to a full stop without driver intervention.

LANE DEPARTURE WARNING (LDW)⁸ Drivers benefit from this available feature that emits an audio and dash-light visual warning of an inadvertent lane departure, reminding the driver to stay the course.

DYNAMIC STEERING TORQUE (DST) Electronic Stability Control (ESC)¹ directs the Electric Power Steering (EPS) to produce optimal stopping stability. It provides greater stability in certain braking and dynamic situations — like when there is a different adherence for each wheel. Standard on all Stelvio models.

ALFA STEERING TORQUE (AST) The AST functionality integrates ESC1 with electric steering in order to increase the safety level of the vehicle. Thanks to AST, in dangerous situations like braking on a surface with varying grip, ESC1 will order the activation of additional torque on the steering wheel. Standard on all Stelvio models.

BACK-UP CAMERA® WITH DYNAMIC GRID LINES AND REAR PARK SENSORS¹⁰ are standard on all Stelvio models.

BLIND SPOT MONITORING (BSM)¹¹ This Quadrifoglio exclusive system has dual ultra-wideband radar sensors that aid the driver when changing lanes, and when trailing vehicles are in the blind spot, via an illuminated sideview mirror icon.

REAR CROSS-PATH DETECTION⁹ This Quadrifoglio exclusive system is activated any time the vehicle is in Reverse. It lets the driver know there is an object in the rear pathway with illuminated icons on the sideview mirror and with an audible chime.

THE ACTIVE DRIVER ASSIST SYSTEMS

Alfa Romeo offers Enhanced Driver Safety and Active Driver Assist Systems (ADAS), packaged to various groups, that represent the latest steps toward a future of autonomous driving. With these available systems, drivers are complemented with advanced safety technology when behind the wheel.

LANE KEEP ASSIST⁸ With a forward-looking camera system, this system actively helps keep the vehicle within the marked lane by changing the direction of the vehicle by applying brake drag or affecting the steering system. It helps reduce collision potential and road departures by providing a visual and audible warning should the vehicle drift outside of lane boundaries or if the driver removes their hands from the wheel. Available.

ACTIVE BLIND SPOT / "SIDE ASSIST" 11 Change lanes confidently or stay right where you are with this warning system that detects approaching traffic from behind, along with its rate of travel. An LED signal in the corresponding exterior side mirror indicates a vehicle that's too close, while steering-wheel resistance adds another accident-avoidance action. Available.

TRAFFIC SIGN RECOGNITION¹² This system can detect posted speed-limit signs and, along with information in the navigation system's map database, recommend to the driver to adapt their set cruising speed accordingly. Available.

DRIVER ATTENTION ALERT⁸ The system monitors for and detects signs of drowsiness based on driver behavior, following up with a driver alert and recommendation for rest. Available.

HIGHWAY ASSIST SYSTEM (HAS)¹³ HAS is an autonomous system designed to help with acceleration, braking and steering on highways, reducing driver workload and fatigue. While performing lane-centering steering, it requires drivers to remain engaged by keeping hands on the wheel. Available.

TRAFFIC JAM ASSIST¹⁴ When traffic is moving slowly on well-marked roads (up to 37 mph), this enhancement to Adaptive Cruise Control with Full Stop (ACC Stop)⁷ assumes control of the accelerator, brake and steering to keep the vehicle within its lane. Front radar sensors and a front camera help the system orient itself to lane markings, traffic and structures; when conditions reach the limits of the system's abilities, it alerts the supervising driver to take over. Available.

STELVIO SPRINT
