Mustang with available EcoBoost® engine technology shown.

LIBERATING. BY DESIGN.

The moment you're in its presence, the 2017 Mustang captures you. And then it sets you free. It might start with the liberating sensation that courses through your veins the moment you accelerate. Or it could be the resounding rhythm of Mustang's iconic growl, fueling your independence as you anticipate its legendary torque. No matter how it happens, you'll be transfixed. Then blissfully transformed.

A lineup of liberating choices. An available 2.3L EcoBoost® engine delivers calculated power and efficiency* with 310 hp and 320 lb.-ft. of torque.** A 3.7L V6 promises a rush with 300 hp and 280 lb.-ft. of surefire torque.** And a 5.0L V8 in the iconic GT cranks out 435 hp and the spine-tingling pleasure of 400 lb.-ft. of torque.**

Independent front and rear suspensions. A fully independent rear suspension and double-ball-joint front suspension work together to provide extreme handling and precise control.

*EPA-estimated rating of 21 city/30 hwy/24 combined mpg, available 2.3L EcoBoost auto fastback. Actual mileage will vary. Class is High-Power Sports Cars based on Ford segmentation. **Tested with 93-octane fuel.

Shelby® GT350R. With a revised front splitter, carbon-fiber wheels and a carbon-fiber rear wing, you'll become one with the road – or track – in the most potent Mustang yet.

Stopping point. Serious performance calls for six-piston Brembo™ front brake calipers and 15.5" two-piece cross-drilled iron discs mounted to aluminum hats.

FASTBACK SPIRIT. NEVER-LOOK-BACK ATTITUDE.

In the 2017 Shelby GT350,[®] all eyes will be on you – if only for a few seconds. Because with 526 hp pulsing from a 5.2L flat-plane crank V8, you'll never look back. And with a world-class TREMEC[®] 3160 six-speed manual transmission, you'll also appreciate getting acquainted with 429 lb.-ft. of torque. Add in vented wheel wells, turbulence-reducing fender vents and the most capable brake lineup ever on a Mustang, and you'll encounter adrenaline-infused triumph around every bend.

SPEAKING IS BELIEVING.

It's easy to see how you'll own the road in a cockpit-inspired interior with its low, sporty driver's seat ready for takeoff. But it's the moment you speak your first command that you'll be a true believer in SYNC³ and its high-speed DNA. The next generation of voice-activated technology with hands-free calling helps you stay connected to your world so your eyes can stay on the road and your drive.

Smart hardware meets smart software. Launch mobile apps from your paired and connected smartphone using SYNC® AppLink™* with voice commands or a touchscreen with swipe capability.**

Heat things up. Or cool 'em down. Six-way, power-adjustable leather-trimmed driver and front-passenger seats¹ can be heated or cooled.

*Available on select models and compatible with select smartphone platforms. SYNC AppLink requires any compatible apps to be installed and running on a capable smartphone while connected to Ford SYNC. Commands may vary by phone and AppLink software. Message and data rates may apply. **Don't drive while distracted. Use voice-operated systems when possible; don't use handheld devices while driving. Some features may be locked out while the vehicle is in gear. Not all features are compatible with all phones. Message and data rates may apply. ¹Available in EcoBoost® Premium and GT Premium models.

PULSE-RAISING TECHNOLOGY.

Electronic Line-Lock.* Invaluable for testing your skills, the front brakes stay locked while Mustang is in gear, so the rear tires can warm up for some action-oriented grip.

Track Apps.™** See your performance metrics on a 4.2-inch in-dash LCD screen. You can measure g-forces and 60-0 braking times with automatic and countdown starts.

MagneRide™ Damping System.† Engineered to react faster than the blink of an eye to enable optimal performance on the track, while maintaining comfort on the road.

*The Electronic Line-Lock feature can be found only on GT models, and should be used only at the track. **Track Apps is standard on all models.

†Standard and only on Shelby GT350®/Shelby® GT350R models. ††Launch control is only available on GT manual. †††Optional feature.

Launch Control.¹ Works with Track Apps™ by integrating the brakes, traction control and powertrain control to deliver the smooth, consistent starts you crave.

Selectable Drive Modes.¹ You determine thrill levels by customizing your drive modes. Your Mustang will adjust its handling and response dynamics to optimize control based on your selection.

FORD CREDIT

Let us help you get into your new Ford.

While shopping for a new vehicle at your Ford Dealership, be sure to check out great financing and leasing options with Ford Credit. You may even find out that getting into the car you want is simpler than you thought. For some valuable financing information, including a payment calculator, check out FordCredit.com today.

Advantages of Ownership

A number of benefits come with owning a Ford. Explore them with your Ford Dealer and by enrolling at FordOwner.com.

- Maintenance updates and tips
- Master your vehicle with how-to videos
- SYNC® Support

*Wheel and exterior color availability varies by model and trim level. Please see ford.com for complete details. **Additional cost.

EXPAND YOUR HORIZONS.

It's so much more than the wind in your face. It's your fist in the air. The open sky above. The open stretch ahead. And the possibilities that feel like they'll never end. Of course, that's just a hint of the dream you'll live in a Mustang convertible. And with a center-mounted single-latch release, your top will go down with a one-handed move right from the driver's seat. Perfect.
