How to use this book.

Use the index on the opposite page (3) to find a particular car model—for example, New Yorker 4-door hardtop. Or use the index to find a particular seat—for example, cloth and vinyl 3-in-1 divided bench seat.

The page with the seat illustrations tells you on what models the seat is available. On the opposite page you'll find swatches of the upholstery choices for that seat.

The section on "Stripes, Moldings, Interior Accents and Vinyl Roots" gives information on those trim items for all Chrysler models.

This book contains information that was accurate at the time of publication. Chrysler Motors Corporation reserves the right to make changes, without notice or obligation, in colors, materials and specifications. For this reason, the availability and code number of specific items should be determined from the latest code lists.
