SPORT COUPE

Let It Spark Your Imagination

Built in the Bivouac tradition of quality and flair. Going beyond what might be expected. Creating an automobile for the few that want more than the routine.

Presenting the Bivouac Sport Coupe.

The custom engineered stainless steel header stands ready to meet with and form a weather tight bond when the convertible top is up and locked in place.

A classic, sculptured fiberglass boot adds style to this "American Beauty".

Top up or top down the sporty yet sophisticated lines enhance the already exciting low profile of this Bivouac creation.

We've taken it out of the ordinary and we've given it an appearance and a feel of the untamed.

Begin the process. Get behind the wheel and experience the fun!

The Culmination Of Two Years Work

Each automobile interior is completely removed to provide total access to structural members. Peripheral frame reinforcement is then accomplished in accordance with strict manufacturer requirements. A reinforced network of steel is also welded into place behind the rear seat panel to ensure lateral integrity of the frame. Standard door windows are replaced with heavy duty glass to ensure a weather-proof seal.

Only after this critical and extensive reinforcement program does the Sport Coupe meet and exceed required testing for structural soundness and automobile safety.

A custom crafted 32 oz. vinyl (the finest available) is used on every top assembly.

Begin the process and accept the challenge.

Get behind the wheel and experience the Bivouac Sport Coupe.

Prices and equipment subject to change without notice.
