TRUCK

S-15 JIMMY

GMC S-15 JIMMY

TRUCK

A truck you can live with

4-Wheel to the Back Country or Country Club

That's the beauty of 4-WD S-15 Jimmy — versatility. It's built tough to conquer the back country. On the other hand, Jimmy's sharp, sporty looks are right at home under the marquee at the country club or theater. S-15 Jimmy also is available as a 2-wheel-drive model (see page 4).

In fact, S-15 Jimmy is a handsome sport utility truck that can be equipped to carry four adults and their luggage nearly anywhere they choose to go. With the available 2-passenger rear seat folded flat, Jimmy has up to 67.2 cubic feet of space for cargo on a flat load floor over 68 inches long. Plenty of room for camping gear, prospecting tools, bike, or whatever.

From 2-WD to 4-WD Nonstop with Insta-Trac

When road conditions call for added traction, whether on or off-the-road, 4-WD S-15 Jimmy responds with terrain-eating power. One hand on the transfer case shift lever changes your driving mode from 2 WHEEL to 4 HIGH and back again. No slowing or stopping to get out to lock the hubs, no second lever to set. You stop only to shift into or out of 4 LOW.

Ride-Smoothing 4-WD Torsion-Bar Suspension

4-WD Jimmy's torsion-bar independent front suspension helps smooth the lumps of off-roading, provides good ground clearance, yet maintains a low overall height for good balance and easy step-up entry into the truck. An available Off-Road package includes Delco/Bilstein gas-pressure shocks; special torsion bars, jounce bumpers, and front stabilizer bar; transfer case stone shield; and front tow hooks. Also, a Heavy-Duty Front Suspension package is available for snowplow applications.

4-WD Jimmy Leaves the Tough Outside

Step into an interior designed for your pleasure and convenience. Seats are ergonomically shaped to keep you comfortable mile after mile. Grab handles over all passenger positions add security in off-road situations. Deluxe heater/ventilation system plus strategically placed insulation help maintain a comfortable level of sound and temperature. (See pages 6 through back cover for details of Sierra, Sierra Classic, and Gypsy Sport standard and available equipment.)

COMMITMENT PLUS

Commitment Plus is one of the most complete joint sales and service customer satisfaction program available on light-duty trucks today. It offers the following benefits:

- a thorough new-vehicle inspection
- one full tank of fuel
- complimentary 1000-mile inspection
- complimentary 3000-mile maintenance service including oil change and filter at no extra charge.

GMC Truck and GMC Dealerships are truly committed to making GMC Light Duty Trucks easy to live with. Our customers' total satisfaction is indeed our goal!

Applies to retail sales only.

Sierra Classic 4-WD S-15 Jimmy. Take the wheel for a stirring drive to adventure.

New-Design Instrument Panel

For 1986 all S-15 Jimmys have a completely restyled instrument panel. A tray at the panel bottom provides handy storage for small articles. The instrument cluster has a new, high-tech look, and the available gage-type cluster (standard on Sierra Classic and Gypsy Sport models) now incorporates tell-tale lamps in addition to the voltmeter and oil pressure and temperature gages for added information. And, available 1986 GM-Delco radios offer some of the very latest in sound quality and features including illuminated control graphics for electronic-tuned radios.

Improved Powerplants

As part of GM's ongoing commitment to product improvement, both the standard 2.5 Liter Tech IV and the available 2.8 Liter V6 gasoline engines have modifications aimed at enhancing performance (see page 5).

With either engine, you may select the transmission that fits your driving style: a standard 4-speed manual, available 5-speed manual overdrive, or available 4-speed automatic overdrive.

Available 2.8 Liter V6 gasoline engine

GMC 2-WD S-15 JIMMY TRUCK

Two-wheel-drive S-15 Jimmy is a smart cosmopolitan runabout, very maneuverable in traffic, with a 100.5" wheelbase that makes it easier to park than a station wagon. 2-WD Jimmy is equally at home on the highways and byways, carrying up to four people and their luggage (requires available rear seat), or, when properly equipped, towing a trailer (see page 6).

2-WD S-15 Jimmy offers a choice of Sierra, Sierra Classic, or Gypsy Sport models. Standard Sierra includes many of the luxury trim features and conveniences reserved for uplevel trim on other GMC Light Duty Trucks. (See standard and available equipment details on back cover chart.)

New Appearance and Convenience for '86

Outside, there are two new paint colors with resultant new two-tone combinations plus a new six-stripe Italy decal available with solid color paint (see page 7 and back cover). A

handy new available spare tire carrier, hinge-mounted to the right rear corner of the body, can be swung out of the way for normal tailgate and liftgate opening, and is capable of supporting all available tire sizes.

In the spacious interior there's a new-design instrument panel incorporating a high-tech instrument cluster (see pages 2 and 3). Door trim panels are newly-styled, and switches for available power windows are relocated on the panels for easier accessibility. All models have new steering wheels of black molded urethane; the Gypsy Sport wheel includes a simulated stitched leather-look. New tweed-pattern deluxe cloth seat trim also is featured for Gypsy Sport models.

Read about all the other S-15 Jimmy advantages in this catalog, but don't stop there. Arrange for a test drive and experience Jimmy for yourself.

Gypsy interior with available equipment.

When tilted, front passenger seat slides forward for easy entry to rear. Place the backrest upright, push rearward, and the seat automatically returns to its preset position.

Available rear seat with new tweed-pattern Gypsy deluxe cloth.

GMC TOUGH TRUCK

4-WD S-15 Jimmy cutaway

4-WD Front-Axle Differential.

(1) Power comes from transfer case. (2) In 4-WD, locking sleeve engages right side of axle transmitting power to both front wheels. (3) In 2-WD, sleeve is disengaged for front free-wheeling efficiency.

Double-Wall Construction is used in the hood, cowl, windshield pillars, front fenders, rear side panels, and tailgate.

Welded Steel Body. One-piece fabrication of major body panels for structural rigidity, including rear quarter panels, wheelhouses, door and tailgate opening frames.

Carbon Steel Full Frame has a welded front box section and open-channel rear section. Entire frame is coated with hot wax to resist corrosion.

New-Design Radiator features lighter weight; incorporates a standard copper-brass core arranged for crossflow coolant movement and plastic side tanks.

Higher-Capacity Delcotron Generators are featured for all models. See chart on page 7 for details.

Higher-Capacity Delco Freedom II Batteries. For 1986, the available V6 engine comes equipped with a higher-capacity battery. Capacity of the heavy-duty battery, available for both the L4 and V6 engines, also is increased. See chart on page 7 for details.

2.5 Liter L4 Tech IV Engine. The standard Jimmy engine is of crossflow design and features Electronic Fuel Injection and a low-weight-to-horsepower ratio. Lighter-weight pistons of high silicon alloy are used in 1986 to reduce reciprocating forces for cooler engine operation.

2.8 Liter V6 Engine. An available engine with power and torque to move larger payloads efficiently. In 1986 this engine features new Electronic Fuel Injection, resulting in easier starting and smoother drivability. The option includes a new "2.8 Fuel Injection" nameplate on the vehicle front end.

ENGINE TECHNICAL DATA

DISPLACEMENT/TYPE	2.5 LITER (151 CID) L4	2.8 LITER (173 CID) V6
Ordering Code	L188	L12
Bore and Stroke (mm)	101.6 x 76.2	89 x 76
Compression Ratio	9.0:1	8.9:1
Fuel Delivery	Electronic Fuel Injection

SAE Net Torque (lb-ft) @ RPM	134 @ 2800	150 @ 2200

A WORD ABOUT ENGINES

GMC trucks are equipped with engines produced at facilities operated by GM car and truck groups, subsidiaries, or affiliated companies worldwide.

GMC AVAILABLE EQUIPMENT

TRUCK

4 WD S-15 Jimmy (shown) can tow up to 4000 lb. 2 WD up to 5000 lb (includes trailer, passengers, equipment, and cargo). Tires are supplied by various manufacturers.

GMC S-15 Jimmy offers a large selection of available accessories. Certain items may require the purchase of other options; check with your GMC Truck Dealer.

Heavy-Duty Trailing Special Equipment (4/5000 lb).

With Heavy-Duty Trailing Special Equipment (282) and other required equipment, a 2 WD S-15 Jimmy can tow up to 5000 lb (4 WD up to 4000 lb), including passengers, equipment, cargo, and trailer. The package includes a weight-distributing platform hitch, 7-wire trailer harness, and heavy-duty flasher. The chart below lists powertrain requirements. For complete details on recommendations and other requirements, ask your GMC Dealer for a 1986 Trailing Guide.

Light-Duty Trailing Special Equipment (2000 lb).

This package includes a deadweight-type trailer hitch and 5-wire trailer harness. For details on requirements and recommendations, ask your GMC Dealer for a 1986 Trailing Guide.

TRAILERING DATA

MODEL TYPE	2 WHEEL DRIVE	4 WHEEL DRIVE

PAINT SCHEMES

Solid color paint with new 6-stripe Rally decal

Sport Two-Tone scheme with moldings

Custom Two-Tone scheme

Special Two-Tone scheme

Solid Color Paint (see back cover) is standard on all models except Gypsy Sport. Available 4-stripe lower decal (Sierra only) or new 6-stripe upper Rally decal can be ordered with solid color paint.

Available Custom Two-Tone paint scheme for all models includes color-coordinated upper decal stripe to separate upper primary color from lower secondary color.

Available Special Two-Tone paint scheme for all models except Gypsy Sport extends middle secondary color around to front and rear of vehicle. Black body side moldings and bright wheel opening moldings are included on Sierra models (standard on Sierra Classic).

Available Sport Two-Tone (standard on Gypsy Sport) extends lower secondary color around to front and rear bumpers. Includes 4-stripe lower decal on Sierra models.

CCA = Cold Cranking Amps
1 - At ground, each

2 - Tire chains should not be used with available P225/75R-15 tires, as they may cause damage to the vehicle.

IMPORTANT! A WORD ABOUT THIS CATALOG

We have tried to make this catalog as comprehensive and factual as possible and we hope you find it helpful. However, since the time of printing, some of the information you'll find here may have been updated. Also, some of the equipment shown or described throughout this catalog is available as factory-installed options, as dealer accessories, and as specialized equipment from various independent suppliers at extra cost. Your dealer has details and, before ordering, you should ask him to bring you up to date.

The right is reserved to make changes at any time, without notice, in prices, colors, materials, equipment, specifications, and models. Check with your GMC Dealer for complete information.

A WORD ABOUT ASSEMBLY, COMPONENTS, AND OPTIONAL EQUIPMENT IN THESE GMC PRODUCTS

The GMC Trucks described in this catalog are assembled at facilities operated by General Motors. These vehicles incorporate thousands of different components produced by car and truck groups and various component divisions of GM and by various suppliers worldwide to General Motors. From time to time during the manufacturing process, it may be necessary, in order to meet public demand for particular vehicles or equipment, or to meet federally mandated emissions, safety, and fuel economy requirements, or for other reasons, to produce

GMC products with different components or differently sourced components than initially scheduled. All such components have been approved for use in GMC products and will provide the quality performance associated with the GMC name.

With respect to extra-cost optional equipment, make certain you specify the type of equipment you desire on your vehicle when ordering it from your dealer. Some options may be unavailable when your truck is built. Your dealer receives advice regarding the current availability of options. You may ask the dealer for this information. GM also requests the dealer to advise you if an option you ordered is unavailable. We suggest that you verify that your truck includes the optional equipment you ordered, or if there are changes, that they are acceptable to you.

These vehicles also are available under the Chevrolet nameplate as the Series S-10 Blazer.

A WORD ABOUT UPDATED SERVICE INFORMATION:

GMC Truck & Coach Operation regularly sends its dealers useful service bulletins about GMC Truck products. GMC Truck & Coach Operation monitors product performance in the field. We then prepare bulletins for servicing our products better. Now you can get these bulletins, too. Ask your Dealer. To get ordering information, call toll free 1-800-551-4123.

Let's Get it Together...Buckle Up

Every new 1986 GMC Light Duty Truck delivered by a GMC Truck Dealer in the United States comes with a one-year, \$10,000 safety belt insurance certificate from MIC General Insurance Corporation at no additional charge. \$10,000 will be paid to the estate of any occupant who suffers fatal injuries as a result of an accident involving that vehicle while wearing a GM safety belt. Buckle up every time you drive.

GMAC

At your GMC Truck Dealer, financing or leasing your new GMC Truck is as easy as saying GMAC...the financial services people from General Motors.
