

2005 CORVETTE

2005 CHEVROLET® CORVETTE®

Power. Passion. Precision. These hallmarks of greatness are the heart and soul of the all-new 2005 Corvette. The sleeker, dimensionally leaner Corvette skirts the wind with a low drag coefficient of less than .29 and features a new, standard LS2 V8 engine that delivers 400 horsepower — 50 more than last year — and 400 lb.-ft. of torque. All that power is transmitted to the road through a standard short-throw six-speed manual transmission or available automatic transmission with computer-controlled Performance Shifting. This sixth-generation Corvette affirms more than 50 years as an American performance icon. Available fall 2004.

2005 Corvette Coupe in Precision Red.

Preproduction model shown. Production model may vary. Available fall 2004.
