

NO COMPROMISE, NO CONCESSION.

Some vehicle alternatives require that you choose versatility rather than style, or a good look instead of utility. With Mercury Monterey you get it all.

THE 2006 MERCURY MONTEREY.

With seating for seven or a maximum of 131.5 cu. ft. of cargo space, Monterey is ready and willing. Yet this is a very attractive vehicle, offering a unique blend of contemporary styling and fine materials.

**KEEPING THINGS SIMPLE,
KEEPING THINGS SMART.**

Monterey was designed and built in the belief that a minivan should meet the needs of an active lifestyle. With second-row seats that fold and tumble for access to the third row, and available driver and front-passenger seats that can be both heated and cooled, Monterey is refreshingly convenient and consistently comfortable. Fold the third-row seat into the floor and Monterey can accommodate almost 72 cu. ft. of cargo. Remove the second-row seats and enjoy a full 131.5 cu. ft. of load space. For all its utility, this is a very attractive passenger cabin. For example, Monterey's first- and second-row seats are trimmed in an available two-tone blend of fine leather and Preferred Suede®.

THE REAL-WORLD BENEFITS OF ADVANCED MECHANICAL SYSTEMS.

Mercury Monterey performs with a proficiency that defies minivan stereotypes. It accelerates briskly, thanks to a 201-hp 4.2-liter V-6 — the largest engine in any minivan built today. A refined suspension system delivers precise handling and a comfortable, controlled ride. These performance-enhancing mechanicals are augmented by a full range of safety equipment, including a Safety Canopy™ System featuring side-curtain airbags,* a rollover sensor and front-seat-mounted side-impact airbags. An available AdvanceTrac® electronic stability enhancement system adjusts braking and throttle to help keep you on the straight and narrow, even in slippery conditions.**

*Always wear your safety belt and secure children in the rear seat.

**Remember that even advanced technology cannot overcome the laws of physics. It's always possible to lose control of a vehicle due to inappropriate driver input for the conditions.

A HELPING HAND.

Monterey's available power liftgate opens automatically when a button is pressed on the key fob or on the overhead console.

SORTING IT OUT.

The available cargo-management system helps you organize the small stuff. It can be removed from the rear cargo well when not in use.

TEST DRIVE THE 2006 MERCURY MONTEREY.

BACKSEAT BLISS.

Monterey's available Rear-Seat DVD Entertainment System with flip-down seven-inch LCD screen entertains second- and third-row passengers.

YOU'RE HOT, THEY'RE COOL.

Tri-zone climate control allows driver, front-seat passenger, and second- and third-row passengers to independently control temperature. Those seated in the rear can regulate fan speed as well.
