demountable closed car top adds to
winter use of Scripps-Booth road-
sters the luxury and comfort of
a completely enclosed coupe
for three, thus offering
two distinctive body
types on one
chassis

SCRIPPS-BOOTH COMPANY
DETROIT

CLOSED CAR EQUIPMENT *for* SCRIPPS-BOOTH ROADSTERS

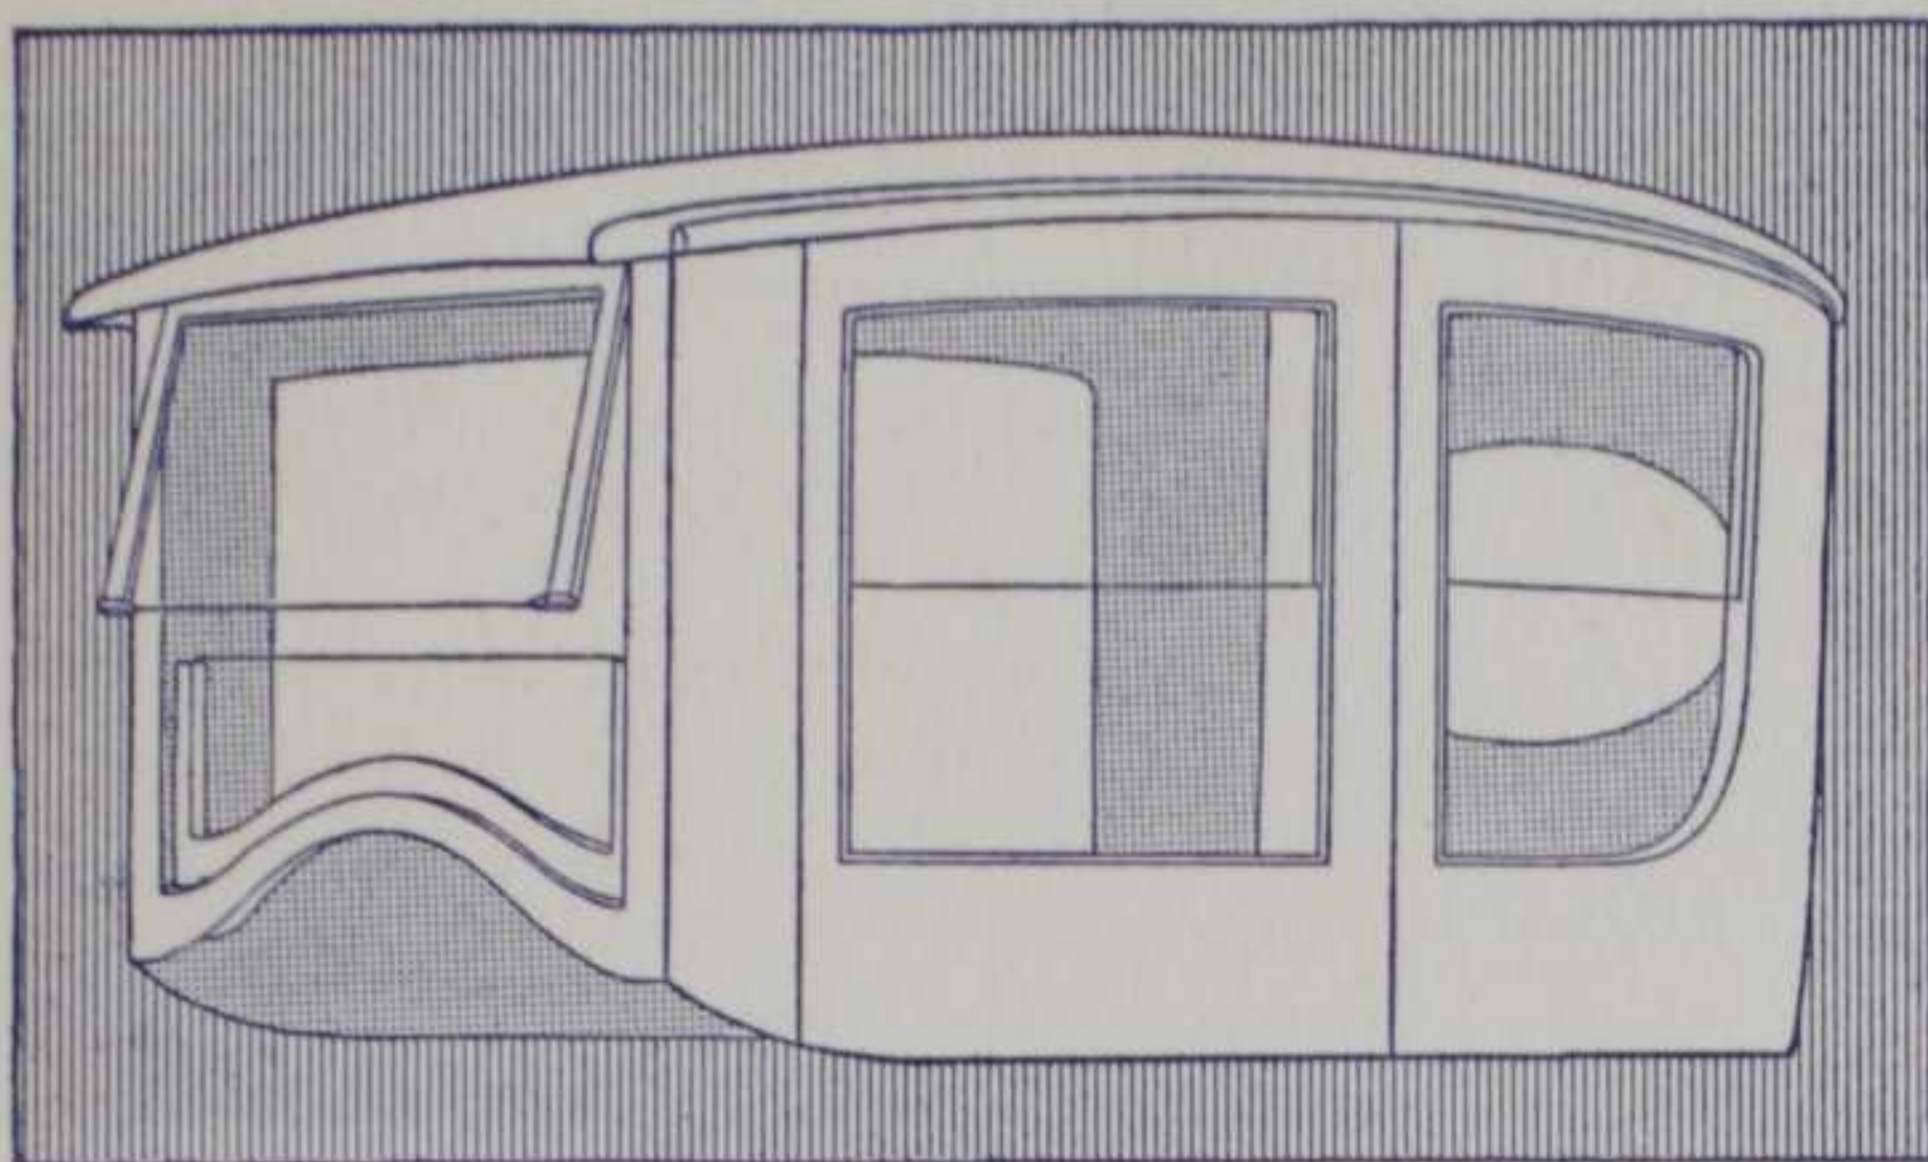

THE automobile, with this present season, ceases to be a Summer or nine-months-in-the-year vehicle. Practically every automobile owner driving a car today is planning on the uninterrupted use of his motor car during the Winter. This new attitude on the part of owners is creating a demand for Winter top equipment which will convert the practically unprotected roadster, with mere top and side curtains, into a warm and cosy enclosed body car.

The new Scripps-Booth closed car top is especially designed to fit this luxurious little roadster, and to attach as simply as possible to the outlines of the already familiar Scripps-Booth body.

In fitting this equipment, an entirely new type of windshield protection has been developed, fitted to Winter use especially, with careful reference to snow and ice as compared to the rain-protection type of windshield used for Summer equipment. This materially strengthens the lines of the car when in place.

The top is very strongly framed and shaped, but made as light as possible consistent with warmth, and so arranged that the fastenings and joint between the body and equipment are as inconspicuous as possible.

A coupe top fitment which can be attached to any Scripps-Booth roadster body, transforming it at once into a comfortable Winter car with every luxury of the more expensive coupes. An exceptionally luxurious comfort feature, fitted to a car particularly adapted to this type of Winter protection.

The top may be easily put on by anyone, with only the care that is necessary to avoid scratching finish, and is designed to be free from squeaks and weaving from road inequalities.

The interior trimmings are designed with reference to the well-known interior of Scripps-Booth roadsters, and matches with the same style of trimming.

The Winter top idea has come to stay, and the Scripps-Booth equipment is being made to appeal to the class of buyers who have been so enthusiastic over their present Scripps-Booth mounts.

The price of the Scripps-Booth demountable closed car top is \$200, f. o. b. Detroit. Further information may be obtained from our nearest representatives.
