

**1980 PONTIAC**

**A SUCCESS STORY IN THE MAKING**

It's a whole new decade. Calling for dramatically new kinds of American cars. Cars that are trim. Cars that are roomy. Cars that are efficient. Cars that are designed to last.

Pontiac is committed to answering your call for these cars, not by relying on past successes, but by creating new ones.

And that's what this 1980 Pontiac Catalog is about...the dramatic ways Pontiac is striving to meet your needs.

You'll find exciting new performance in Firebird...an incredible new look of luxury in Pontiac's all-new full-size cars...and uncommon new personal luxury in Grand Prix.

You'll learn about engineering advancements that are making Phoenix one of the most

acclaimed new Pontiacs ever...the amazingly roomy new mid-size LeMans and Grand Am... functional and fun-to-drive new Sunbirds... and you'll discover important versatility in Pontiac's Safari wagons.

Great stories, all of them. So come on. There's a whole decade of excitement waiting for you from Pontiac!

**A word about this catalog:** We have tried to make this catalog as comprehensive and factual as possible. And we hope you find it helpful. However, since the time of printing, some of the information you'll find here may have been updated. Your dealer has details and before ordering, you should ask him to bring you up to date.

## SUCCESS STORY NO. 1:

### A NEW AGE OF PERFORMANCE FOR THOSE FABULOUS FIREBIRDS.

Just when you thought the days of exciting, sporty performance were over... POW!

Firebird goes turbo! That's right, Trans Am and Formula are now available as the first turbocharged V-8 production cars of the '80s. Which allows Pontiac to give you the advantages of a smaller block V-8 with the performance boost of turbo. But that's just the beginning of the good news!

#### TRANS AM

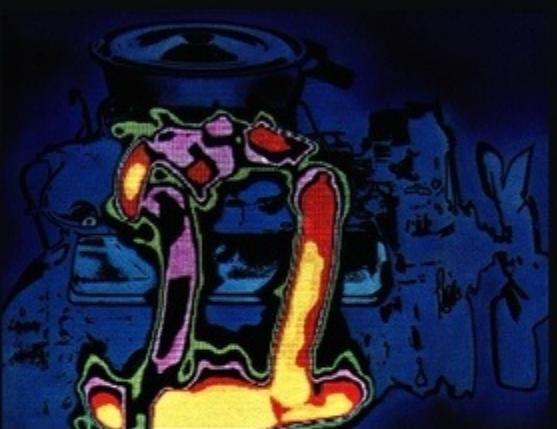

You expect something extra from Pontiac's ultimate sport. And you've got it.

Just order your new Trans Am turbofed, and get a specially modified hood. Plus special available decals.

Turbo or no, you still get the full standard contingent of spoilers, air dams, deflectors and sidesplitter tailpipes that say this is Pontiac's sports superstar.

Trans Am's interior is no slouch either. Deep contour bucket seats. Machine turned instrument panel with rally gauges, tachometer and clock. Console.

Of course, the real beauty of Trans Am is still on the road. Smooth. Agile. With quick ratio power steering. Heavy duty stabilizers. Power

brakes. A special handling package with four-wheel disc brakes, eight-inch wheels, wide 70-series tires and firmer suspension is available (also available on Formula).

#### FORMULA

As with Trans Am, new Formula Firebird is available with the new turbo V-8 and sexy new turbo styling.

But Formula has something all its own...a sleek, almost European sophistication.

The lines are trim, bullet-like, with dramatic blacked-out grille and tail

lamp treatment. Simulated dual hood scoops. And now, tungsten quartz halogen headlamps are available to light your path (also available on Trans Am).

#### ESPRIT

A success story in its own right, this new Firebird Esprit shows you can have luxury and sporty performance, too.

Beneath those sensuous contours is the plushest of Firebird interiors. Custom buckets. Luxury cushion steering wheel. And added sound insulation a monk could love.

If you really like it rich, choose from available features like the new seek and scan Delco Electronically Tuned Radio with extended range rear speakers. Power windows and door locks. And electric rear window defroster.

And for a tinge more, there's a new Yellow Bird package available on Esprit for extra flair. It features a two-tone yellow exterior; special striping and decals; yellow cast aluminum wheels, coordinating camel interior and more.

#### FIREBIRD

If you drive a hard bargain, you've picked the perfect year to drive our base-priced Firebird.

Because it offers so much. That sporty Firebird styling. Resilient body-color bumpers. Handsome buckets. Rich-looking rosewood vinyl accented instrument panel.

All this plus that sensational Firebird ride. With power steering and radial tuned suspension.

The new age of great Firebird performance is here. Come get your share.

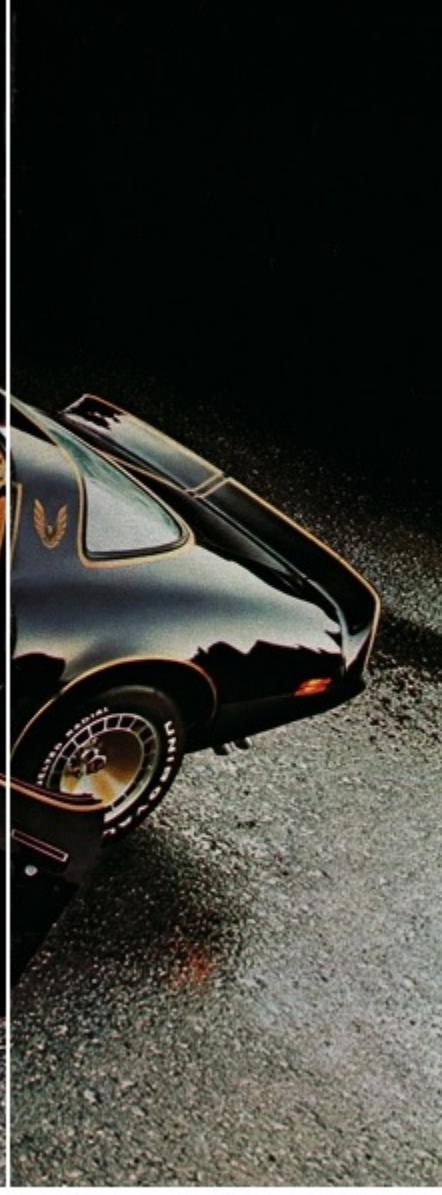

Formula Firebird with new modified turbo hood. And you thought the days of sporty excitement were over!

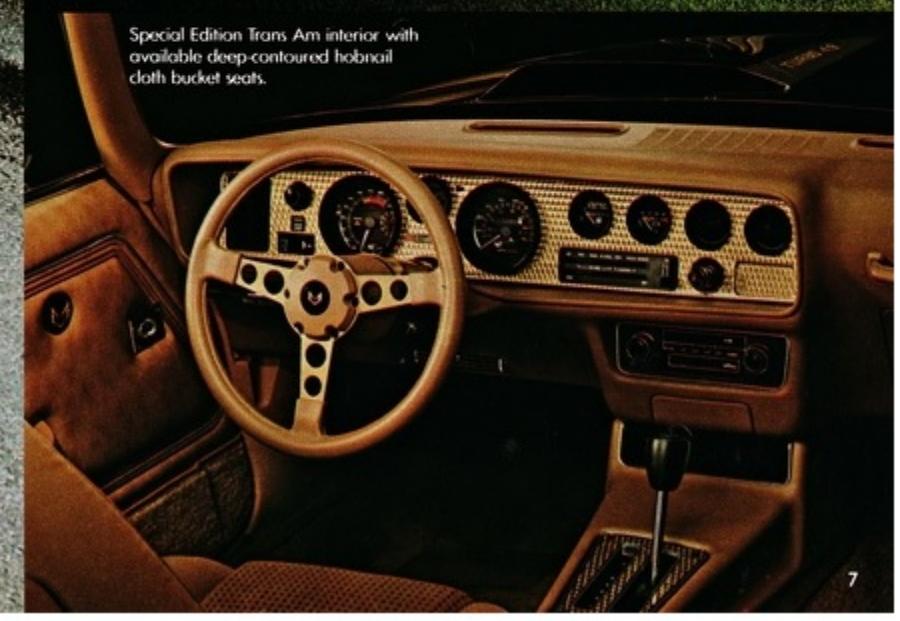

Black special edition of Pontiac's ultimate sport, Trans Am.  
It never looked better.

6

For an added tinge of excitement...  
Firebird Esprit with newly available  
Yellow Bird appearance package.

Special Edition Trans Am interior with  
available deep-contoured hobnail  
cloth bucket seats.

7

## SUCCESS STORY NO. 2: FRONT-WHEEL PHOENIX OPENS NEW ENGINEERING ERA.

What better way to start the '80s than with a vitally new car. Engineered to cope with just about anything this decade dishes out.

Since the '80 Phoenix was announced in early 1979, response has been overwhelming. Early sales have been unprecedented for Pontiac. Clearly, here's an innovative new car whose time has come.

Phoenix is the first Pontiac with front-wheel drive. The drivetrain pulls the car up hill, over dale and around corners. And you'll appreciate the new traction in mud and snow.

The engine sits sideways, for a more compact underhood arrangement—and to allow extra space in the passenger area.

This is the first Pontiac with responsive rack and pinion steering, MacPherson strut front suspension. And a simplified new rear suspension.

The Body by Fisher is an all-welded unit, with special rubber mounts cradling the engine. Noise-suppression treatments have been built into or sprayed onto virtually every area of the car. And extensive anti-corrosion treatments have been used throughout.

All of this innovation adds up to

some rather innovative mileage. Phoenix has an EPA estimated 24 MPG and a highway estimate of 37.

Remember: Compare the estimated MPG with that of other cars. Your mileage may vary depending on speed, trip length and weather. Your actual highway mileage will probably be less than the highway estimate. Mileage does not apply in California.

But the appeal of Phoenix isn't merely mechanical. With this car, stylists have finished off what engineers began.

The look is sleek and self-assured. With crisp lines. Vivid colors. You'll find the Coupe a tad classier, the 5-door Hatchback a bit sportier.

### PHOENIX 5-DOOR HATCHBACK

The Phoenix Hatchback looks aerodynamic... and it is, having undergone extensive wind tunnel testing. The hatch opens high and wide. High—so you won't hit your head. Wide—for oversize loads.

Inside the hatch (with rear seat folded) there are 40.9 cubic feet

of stowage—for sleds or sled dogs or what-you-will.

Attached to the hatch is a removable security panel (standard on LJ, available on other models) that lets you conceal valuable cargo. (The area under the panel, by the way, is a surprisingly spacious 19.6 cubic feet.)

### PHOENIX COUPE

Like the 5-door Hatchback, Phoenix Coupe has more leg and hip room than last year.

And inside, it thoroughly indulges the driver. With highback seats on the base model. Notchbacks with armrest on Phoenix LJ. A padded steering wheel. A modular instrument panel with aluminized trim.

For a spiffier Phoenix, consider the LJ models. Offering special wheel covers, seats and trim. Or exercise your sports option with the available SJ package. It includes blocked-out grille, sport wheels, bucket seats—the whole shebang. (For more details, see Facts and Figures section.)

Practically everything about Phoenix was reengineered. The way it drives, turns, stops. It was truly designed for tomorrow.

Practically everything about Phoenix was reengineered, including the way it drives, turns and stops. Shown is the Phoenix LJ Coupe.

This luxurious Phoenix LJ 5-door Hatchback has new drive up front and a handy hatch in back.

The Phoenix 5-door Hatchback  
anxiously awaits another load  
of pups, pup tents or peat moss.

The flight of the Phoenix starts here.  
Shown with available cloth bucket seats.

## SUCCESS STORY NO. 3:

PONTIAC ANNOUNCES A WHOLE NEW DIMENSION TO FULL-SIZE ENJOYMENT.

If you appreciate the room and comfort of a full-size automobile, you're really going to appreciate what Pontiac's done for 1980.

These new Bonneville Broughams, Bonnevilles and Catalinas offer a new perspective on full-size driving.

Even a quick glance reveals startling new design refinements. Hoods that appear lower, longer. Raised rear decks and formal new roof-lines. In short, dramatically new full-size Pontiacs.

Once inside, you'll find new spaciousness. There's actually more overall passenger and luggage volume than last year's full-size Pontiacs. Now trimmed in plush new fabrics and available with impressive new options.

And this is full-size style, roominess and comfort wisely matched to today's needs.

But read on. And discover three new Pontiacs that add a whole new dimension to full-size enjoyment.

### BONNEVILLE BROUGHAM

It takes more than sheer luxury to be Pontiac's top-of-the-line full-size

for 1980.

Because beyond the rich 60/40 notchback seating (now available with real leather in the seating area), power windows, power steering, power brakes...beyond all this and more, the new Bonneville Brougham is also remarkably sensible.

### BONNEVILLE

The more emphasis you place on how your full-size car responds to the road, the more you'll like Pontiac's 1980 Bonneville.

It's the first Pontiac to offer the practical benefits of a new diesel V-8.

And this luxurious new full-size incorporates more anti-corrosion materials than last year. And over

about 15%. And an available Rally Handling Package.

This emphasis has also resulted in extra attention to your driving comfort. With added acoustical insulation. And a choice of luxurious interiors in all-vinyl or cloth-and-vinyl at no extra charge. Or, for a sportier feel, Bonneville Coupe is available with bucket seats and floor shift console.

So if you place special emphasis on how well your full-size car drives, drive Pontiac's new 1980 Bonneville.

### CATALINA

Pontiac's third new full-size for 1980 is also the most affordable one.

Maybe that's why Catalina's comfort and roominess are so exciting. With full-width cloth seats. Thick cut-pile carpeting. Deluxe cushion steering wheel. Fully upholstered door panels. Courtesy lamps. Even a luggage compartment mat. All standard. All wrapped up in a sleek new style and ready to go with V-6 practicality.

Discover a new dimension in full-size affordability: the exciting new Catalina from Pontiac.

Bonneville Brougham Sedan. Suddenly, sheer luxury makes remarkable sense.

Bonneville Brougham's available interior, with leather in the seating areas, features front and rear fold-down armrests.

The 1980 Bonneville Coupe, redesigned for a lower, longer look.

Add a sporty feel to the Bonneville Coupe with these available cloth bucket seats.

The 1980 Catalina, all wrapped up in sleek new style.

Catalina's full-size comforts start with these standard full-width cloth seats.

## SUCCESS STORY NO. 4: AN UNCOMMONLY GOOD YEAR FOR GRAND PRIX LUXURY.

It isn't easy these days to escape the humdrum and the commonplace.

Which is why there's never been a bigger need for Grand Prix.

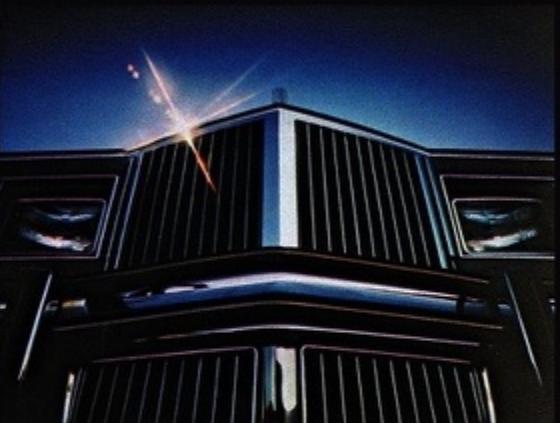

Grand Prix is Pontiac's premier mid-size. Pontiac's foremost statement of personal luxury. And the 1980 edition puts you so far ahead of the crowd, you'll forget all about the crowd.

Just look at the grand new styling. The finely tailored roofline. The formal front end. And especially, the commanding new vertical grille.

Or better yet, slide inside. Here's where Grand Prix separates itself from the also-rans. With sumptuous seating—standard notchbacks or available deep foam buckets.

Feel yourself succumb to the thick nylon-blend carpeting. The padded steering wheel. The richly upholstered door panels—with door straps, no less.

Now glance over to Grand Prix's acclaimed instrument panel. With a fascia that looks like laminated walnut. Trim that looks hand-stitched. Recessed easy-read dials. Even a standard quartz electric clock. It's

been said before: This could be the handsomest instrument panel on wheels.

Zincrometal.<sup>™</sup> Galvanized metal. Special sealants, cathodic primers and paints.

But that's just the beginning of the attention Grand Prix lavishes on both driver and passenger. This car surrounds you with spaciousness. It has more space for heads, legs and luggage than the old-size Grand Prix of just a few years ago. In fact, there's ample room for six adults.

And you'll appreciate its silky ride—courtesy of Pontiac's radial tuned suspension.

This car helps shield you from some of life's harsher realities. With tough anti-corrosion treatments.

### GRAND PRIX SJ GRAND PRIX LJ

For 1980, there are two special models offering even more Grand Prix. Grand Prix SJ and Grand Prix LJ.

The SJ carries Grand Prix sportiness to the max. With new custom finned wheels. Deep-support bucket seats. Brushed aluminum-like instrument panel. Special trim and trimmings.

The "L" in LJ stands for luxury, and it's certainly our most elegant edition. With deluxe wheel covers. Inviting loose-pillow seats. Thicker than thick carpet. New wider chrome wheel opening moldings (also on SJ). Extra plushness almost everywhere.

But no matter which one you buy—Grand Prix, Grand Prix SJ, Grand Prix LJ—you'll be getting a mid-size that's a far cry from the ordinary. Take a test-drive soon.

The Grand Prix SJ takes sportiness to the max.

What's even more luxurious than Grand Prix?  
The Grand Prix LJ, of course.

18

In appointing the 1980 Grand Prix, Pontiac used the soft touch. Shown with LJ's available 60/40 cloth seats.

This could be the handsomest instrument panel on wheels. Shown with available leather and vinyl bucket seats.

19

## SUCCESS STORY NO. 5:

ROOMINESS STAYS IN STYLE WITH PONTIAC'S NEW MID-SIZE CARS.

In this era of trimmer-wheelbase cars, Pontiac is more determined than ever to bring you the roominess you and your family deserve.

Obviously, that determination is paying off...with cars like the 1980 mid-size Pontiac LeMans, Grand LeMans and Grand Am.

You won't believe the space efficiency of these cars until you sit inside. Full-width seating for six honest-to-goodness adults. With even more head room, leg and luggage room than LeMans' longer-wheelbased '77 counterpart.

Pontiac has achieved this by increasing the proportion of passenger volume to the car's overall volume. Lowering the floor. Slimming the seats but not the comfort. And doing it all, Pontiac style.

### GRAND LEMANS

If it's spacious mid-size luxury you're after, this 1980 Grand LeMans is just your style.

This year, sink back into well-cushioned notchback cloth or vinyl seats. Or opt for an available 60/40 loose-pillow design notchback seat.

Experience a luxurious sense of quiet from the added acoustical insulation. Or fill those expansive spaces with a newly available Delco Electronically Tuned Radio with

extended range dual rear speakers.

While you're inside enjoying all this, the outside world gets to admire those rich new Grand LeMans contours, with intriguing new grille design and wraparound tail lamps.

### LEMANS

Is there still room in this world for a great mid-size car value with plenty of style?

You bet your Pontiac LeMans there is!

full-width seats and upholstered door panels.

Naturally, both LeMans and Grand LeMans are big on that smooth Pontiac ride, with radial tuned suspension. For further details, see the Facts & Figures section of this catalog.

### GRAND AM

Grand Am is one exhilarating piece of road machinery that just happens to hold families comfortably.

It certainly holds its own on the road. You get the Rally Handling Package, with heavy duty front and rear stabilizers. Plati-cell shocks. Wide steel-belted radial tires and specifically tuned suspension components. Plus power steering and brakes—all standard. All for a ride that's smooth yet nicely tuned to the road.

This mid-size Grand Am more than holds its own in the looks department. With sporty new ported-grille design. Two-tone paint. Accent stripes. Bucket seats with console. Custom sport steering wheel. Rally gauges with clock. And instrument panel padding that looks custom-stitched.

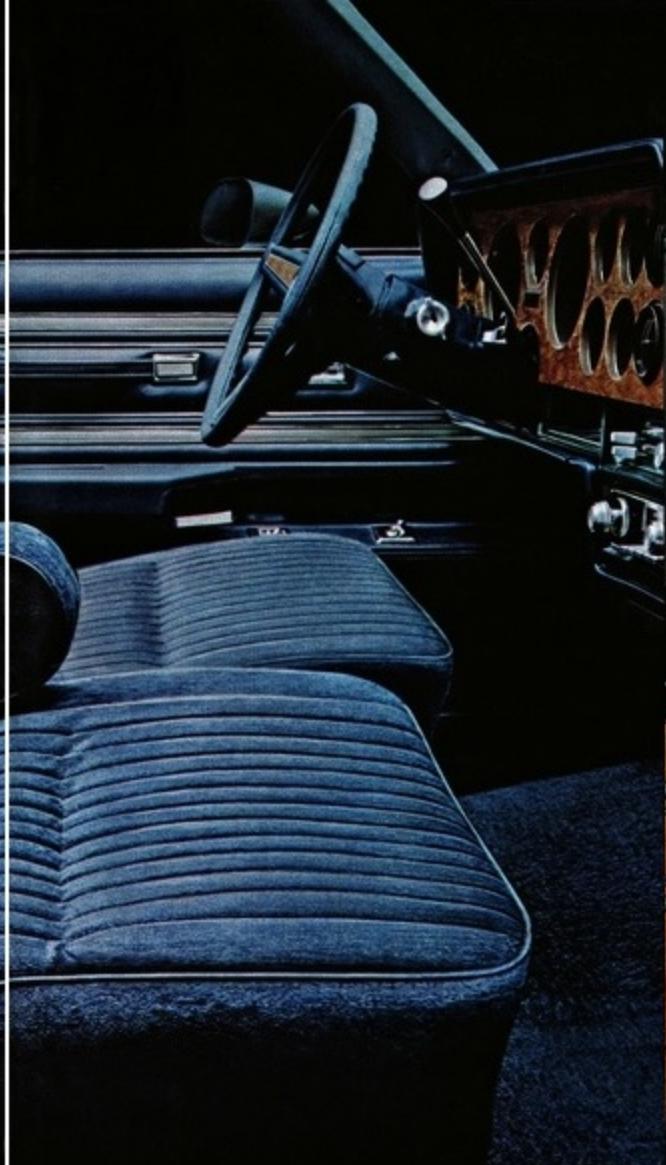

Roominess is still in style, and Pontiac's got it with three great mid-size cars. Now why don't you get one for yourself!

Grand LeMans Sedan. Now that's spacious mid-size luxury, Pontiac style.

Inner sanctum. Grand LeMans interior with available 60/40 loose-pillow design seats.

This LeMans instrument panel shows a great capacity for style.

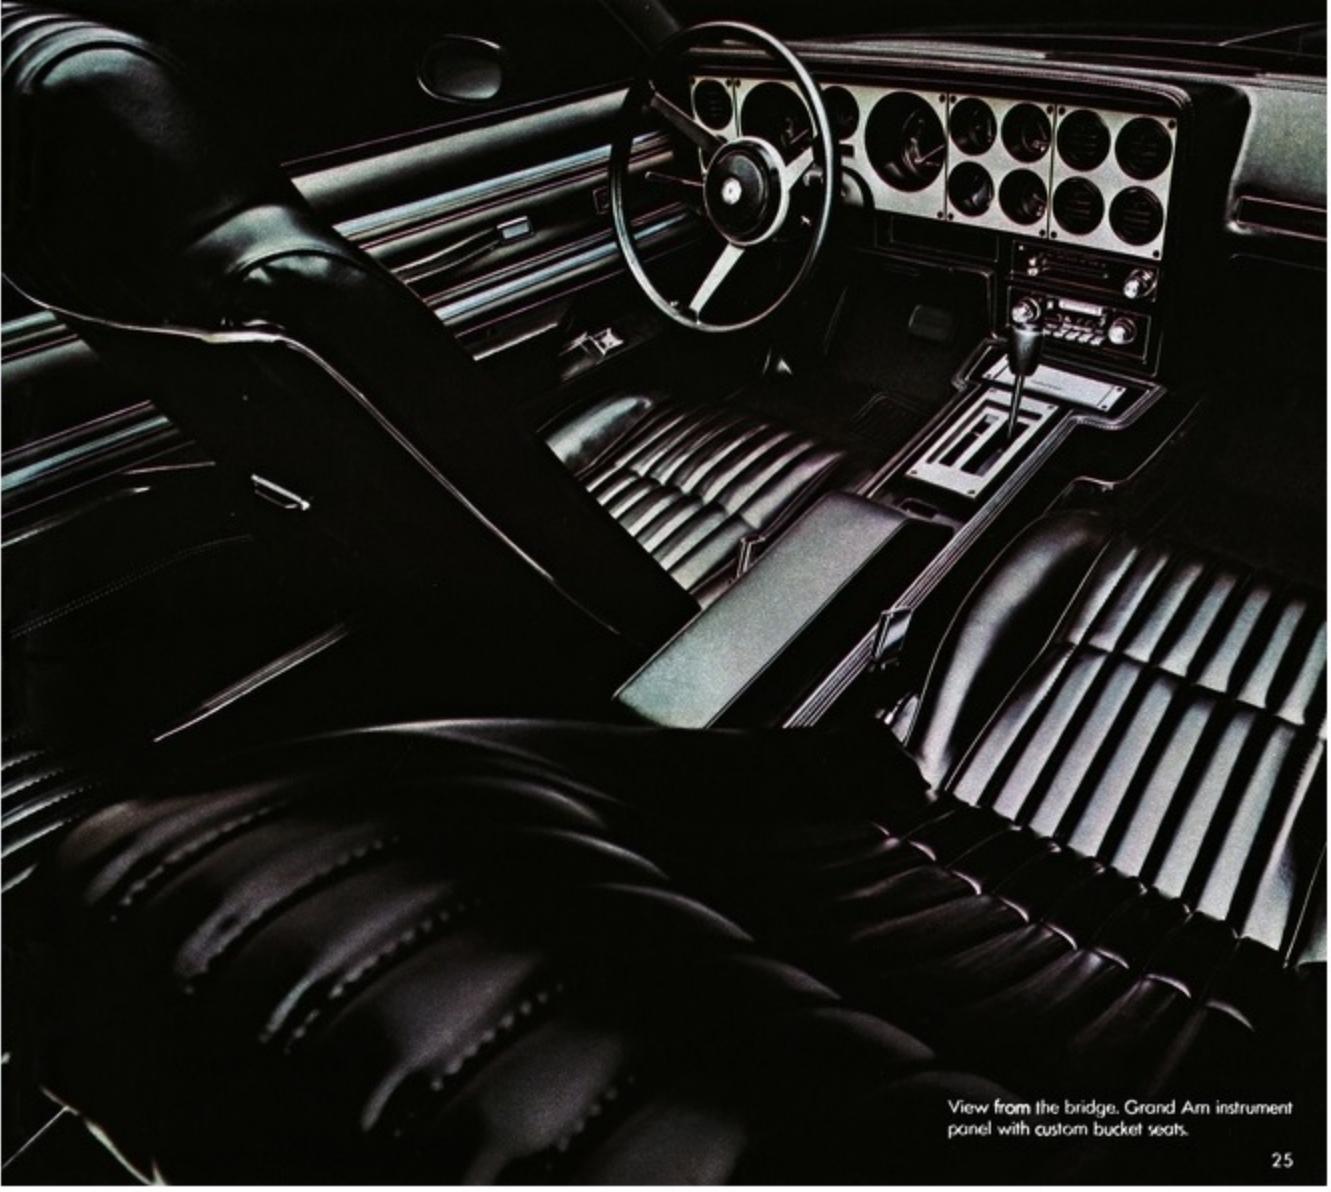

Yes, there's still room for a great mid-size value! LeMans Coupe.

Grand Am Coupe.  
One exhilarating road machine that's  
designed to seat families in comfort.

24

View from the bridge. Grand Am instrument panel with custom bucket seats.

25

## SUCCESS STORY NO. 6: SUNBIRD OFFERS NEW THRILLS FOR THE THRIFTY.

To christen a new decade, Pontiac presents a subcompact car that's both functional and fun to drive.

This snappy sports machine may not be big but it's enormously practical. Both coupe and hatchback models measure a mere 179 inches. A sensible size for moving into, out of, around and through city traffic.

Sunbird is sensibly powered. It offers a responsive 4-cylinder engine as standard, or an even more responsive V-6 you can order.

Sunbird also makes sense for the times. Just look at the '80 EPA mileage ratings listed elsewhere in this catalog.

Sunbird makes sense for shuttling around town. On those countless errands involving offspring, playthings, groceries and greenery.

And Sunbird's price makes the most sense of all. As our most

affordable Pontiac, it compares favorably with lots of other small cars.

### COUPE & SPORT COUPE

With its slick styling, Sunbird Coupe doesn't look like a so-called "econobox" or econo-anything. The lines are clean, uncluttered. And there's a gleaming, newly designed split grille.

Inside the car you'll find everything well arranged. Gages and warning lights that are constantly in view. Six adjustable ventilation

ports. Contoured bucket seats. A padded steering wheel. And available full instrumentation.

If you've been peeking across the page, you already know there's a sportier version called, appropriately enough, the Sunbird Sport Coupe. Custom bucket interior, special mirrors, moldings and trim. All to make sure that your Sunbird will never be overlooked in a crowd.

### SPORT HATCH

The Sunbird Sport Hatch looks a lot more than sensible. It comes on

sleek, swift and street ready. Beneath its sloping hatch design, there's almost 28 cubic feet of usefulness. Enough room for oversize things you'd never squeeze into a conventional trunk.

And the Sport Hatch offers the same standards as its coupe counterparts. The same long list of available accessories. Including center console. Rally gages. Removable sunroof. Stereo radios and tape players. A choice of sporty wheels for outside. Steering wheels for inside. (For more details, refer to the Facts and Figures section.)

Or, if you want to get really duded up, consider the Sunbird Formula Package. Including rear spoiler, distinctive trim and striping.

After you've seen the new Sport Hatch and Sport Coupe, we're certain you'll agree: The 1980 Sunbirds are both fun and functional.

Every errand becomes a sporting event with the Sunbird Sport Coupe.

You'll recognize this 'Bird by its distinctive tail feathers. Sunbird Sport Hatch, shown with available Formula Package.

You'll probably appreciate Sunbird best from here, nestled into the luxury cloth buckets you can order.

## SUCCESS STORY NO. 7: FOUR SAFARIS DEMONSTRATE PONTIAC'S NEW APPROACH TO VERSATILITY.

Today's wagon buyers expect more, demand more, than ever before. More room. More efficient designs. And more all-around versatility.

That's why Pontiac is proud to present four extraordinary solutions for a new decade of demanding wagon buyers.

You wouldn't settle for less.

### BONNEVILLE SAFARI

This is it. Full-size versatility in the most luxurious Safari Pontiac offers.

This is the first Pontiac Safari available with a new diesel V-8.

This is new luxury. Outside, there's an aerodynamic new look accented by handsome new planked siding. Inside, you'll discover the beautifully practical comforts of full-width vinyl seats, a fully carpeted load floor and added acoustical insulation.

This is today's versatility. Nearly 88 cu. ft.\* of load space that's ready to go to work. A three-way tailgate

Then Pontiac styling experts went to work, incorporating a Grand Prix-style instrument panel and fully carpeted load floor into a beautiful interior. And offering you a choice of simulated woodgrain siding or double two-tone paint treatment outside at no extra charge.

The end result? One very sensibly luxurious new mid-size Safari.

### LEMANS SAFARI

LeMans Safari is Pontiac's straight-ahead new mid-size wagon.

Built to handle a variety of tough jobs with V-6 practicality, there's enough wide-open cargo space for a weekend's worth of work. Plus a trim two-way tailgate. Tough radial tires. And more than enough Pontiac style to quiet the competition.

Looking for a versatile mid-size value? Head straight for LeMans Safari.

\*Load space with rear seat folded down.

with standard power window for easy access. And radial tuned suspension to tote cargo smoothly.

This is the luxurious new 1980

Bonneville Safari. And full-size versatility never looked this good.

### CATALINA SAFARI

Pontiac's new Catalina Safari is one of the best full-size values of the year.

Look beyond this roomy wagon's streamlined new appearance and its available diesel V-8. You'll notice how functionality has been

built right in. Power brakes and steering. Durable cut-pile carpeting. Lockable stowage areas. All for a price that's nicely affordable.

Catalina Safari. A valuable new full-size solution from Pontiac.

### GRAND LEMANS SAFARI

This new Grand LeMans Safari is how Pontiac gives a full measure of luxury to mid-size efficiency.

First, computer-assisted designers helped deliver over 72 cu. ft.\* of space or room for six adults.

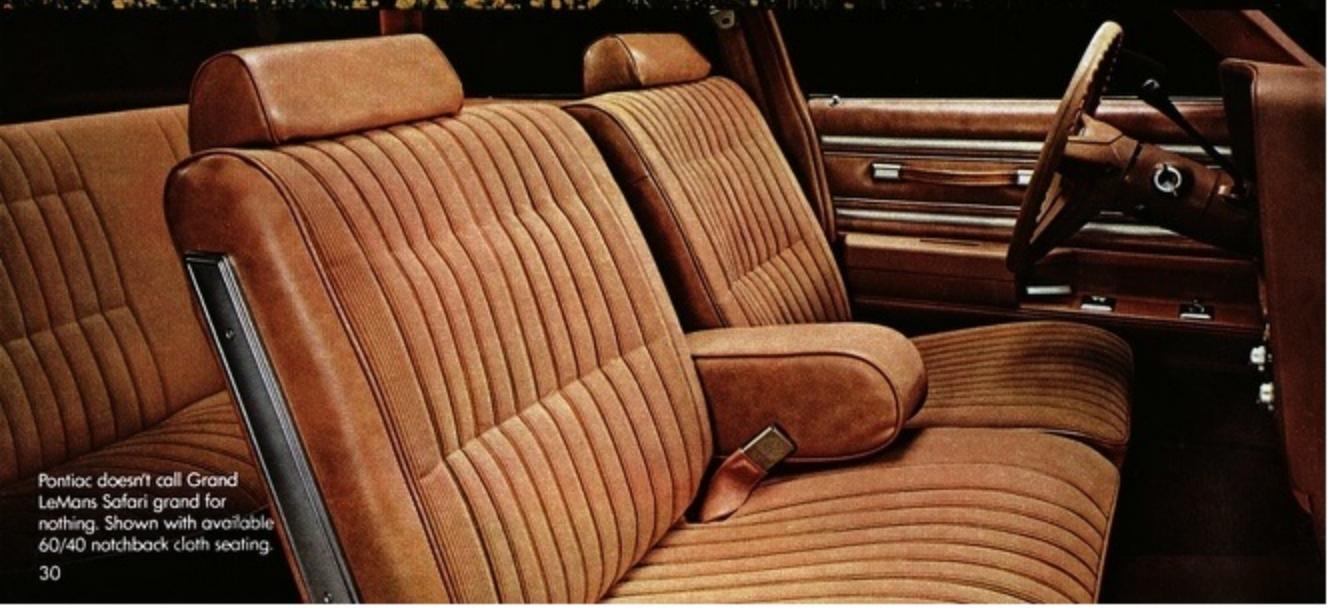

1980 Bonneville Safari. A new design. Available new diesel V-8. And terrific versatility.

Treat eight to Bonneville Safari's luxury with available third seat.

1980 Grand LeMans Safari.  
The efficiency of a mid-size  
with a full-measure of luxury.

Pontiac doesn't call Grand LeMans Safari grand for nothing. Shown with available 60/40 notchback cloth seating.

# PONTIAC ANNOUNCES TWO GREAT NEW ENGINES FOR THE '80s.

## TURBO V-8\*

Somehow it seems only natural that Pontiac be the first to offer a turbocharged production gas V-8 for the '80s... and make it available on those super sports, Trans Am and Formula Firebird.

The engine is a 4.9 liter 301 cubic inch V-8 that has been modified for turbocharging.

Under normal driving conditions, this V-8 operates like a conventional engine to provide power smoothly and capably.

But when extra power is needed to pass or accelerate, a special turbocharging unit kicks in quickly and evenly to boost the power output.

This is accomplished by a turbine

driven by the engine exhaust gases. The turbine powers a compressor, which forces a dense air/fuel mixture into the engine's cylinders, producing more power.

This process is constantly monitored by an Electronic Feedback Control that provides the most efficient spark advance during boost conditions.

The result is extra horsepower when you need it. And that's what makes turbocharging so ideal for Trans Am and Formula Firebird.

Take a closer look at the first turbocharged V-8s for the '80s, available, naturally, in Pontiac's new Trans Am and Formula Firebird.

\*Not available in California.

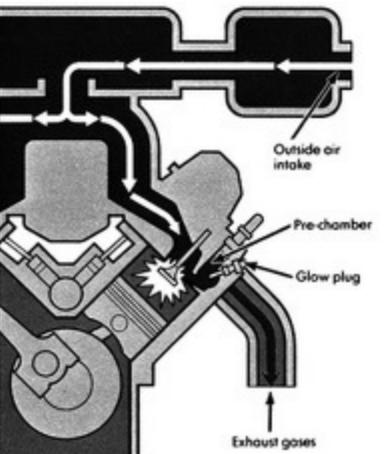

## DIESEL V-8

To help you stretch your fuel dollars, Pontiac is proud to offer an available 5.7 liter 350 cubic inch diesel V-8 engine in the 1980 Bonneville, Brougham, Bonneville Safari and Catalina Safari.

Diesels have been proven to offer several appreciable advantages over the conventional gasoline engine. For example, a diesel engine burns fuel more efficiently than a comparable gasoline engine. And with a diesel, there's no carburetor, distributor or spark plugs to service or replace.

That's because the diesel engine operates on a principle known as compression ignition. Here's how it works... First, the diesel's piston draws air into the cylinder, then compresses it. As the air pressure goes up, temperature rises to over 1000°F.

Meanwhile, in a small area called

the pre-chamber at the top of the cylinder, a precise amount of diesel fuel is mixed with a small portion of pressurized air from the cylinder. High temperature causes the fuel mixture to start burning.

At this point, the burning fuel mixture then expands with great force into the cylinder full of hot pressurized air. Full combustion occurs and the piston is pushed downwards to provide power.

To help provide necessary temperatures for combustion in a cold diesel engine, each cylinder features a heating unit known as a glow plug to warm the pre-chamber for quick, reliable starting.

Ask your Pontiac dealer for a test drive in a new diesel V-8-equipped Pontiac. You'll discover a great new way to help stretch your fuel dollars for the '80s.

## A WORD ABOUT ASSEMBLY, COMPONENTS AND OPTIONAL EQUIPMENT IN THESE PONTIACS

The Pontiac products described in this brochure are assembled at facilities of General Motors Corporation operated by Pontiac, GM Assembly Division or GM of Canada. These vehicles incorporate thousands of different components produced by various divisions of General Motors and by various suppliers to General Motors. From time to time during the manufacturing process, it may be necessary

in order to meet public demand for particular vehicles or equipment, or to meet federally mandated emissions, safety and fuel economy requirements, or for other reasons, to produce Pontiac products with different components or differently sourced components than initially scheduled. All such components

have been approved for use in Pontiac products and will provide the quality performance associated with the Pontiac name.

With respect to extra cost optional equipment, make certain you specify the type of equipment you desire on your vehicle when

ordering it from your dealer. Some options may be unavailable when your car is built. Your dealer receives advice regarding current availability of options. You may ask the dealer for this information. GM also requests the dealer to advise you if an option you ordered is unavailable. We suggest you verify that your car includes the optional equipment you ordered or, if there are changes, that they are acceptable to you.

**A WORD ABOUT ENGINES:** These Pontiacs are equipped with GM-built engines produced by various divisions. See your dealer for details.

The right is reserved to make changes at any time, without notice, in prices, colors, materials, equipment, specifications and models, and to discontinue models. Check with your Pontiac dealer for complete information.

## A WORD ABOUT OPTIONS:

Some of the equipment shown or described throughout this catalog is available at extra cost. Check with your Pontiac dealer for complete information.

## STANDARD FEATURES ON ALL 1980 PONTIACS

### SAFETY FEATURES Occupant Protection

- Seat Belts with Push-button Buckles for all Passenger Positions
- Two Front Combination Seat and Inertia Reel Shoulder Belts for Driver (with Reminder Light and Buzzer) and Right Front Passenger

### Energy-absorbing Steering Column

- Passenger-guard Door Locks
- Safety Door Latches and Stamped Steel Hinges

### Folding Seatback Latches

- Energy-absorbing Padded Instrument Panel and Front Seatback Tops\*

### Laminated Windshield

- Safety Armrests

\*Including intermediate seatback tops on three-seat station wagons.

### Accident Avoidance

- Side Marker Lights and Reflectors
- Parking Lamps that Illuminate with Headlamps
- Four-way Hazard Warning Flasher
- Backup Lights
- Lane Change Feature in Direction Signal Control
- Delco Freedom\* Battery

**THE NEW GM CONTINUOUS PROTECTION PLAN.**

The GM Continuous Protection Plan is now available to anyone purchasing a new Pontiac. It is one of the most extensive programs of its kind, providing added repair protection (over and above the usual Pontiac warranty) against the cost of UNEXPECTED REPAIRS

plus reimbursement for towing expenses during and after the GM New Vehicle Limited Warranty period. The Plan covers nine major assemblies (including engine, axles, factory air conditioning, even the electrical system) plus seals and gaskets. The Plan offers an allowance toward the cost of a RENTAL VEHICLE should your car be inoperable and kept overnight

for repairs (for any failure covered by the GM New Vehicle Limited Warranty or this plan). The Plan also provides an allowance for TOWING or EMERGENCY ROAD SERVICE in the event any part covered by the Plan should fail—and during the New Vehicle Limited Warranty period if your car is disabled for any reason at all. The GM Continuous Protection

Plan lets you cancel within 60 days and receive a full REFUND, providing you have filed no claims under the Plan. Best of all, the GM Continuous Protection Plan is honored at participating Pontiac dealers across the country plus the repair facility of your choice. See your Pontiac dealer today for complete details and conditions of this exciting new GM Protection Plan.
