

**On the road of life there are
passengers and there are drivers.**

On the road of life there are passengers and there are drivers.

At Volkswagen, we're first and foremost an engineering-driven company. Which means we don't design our cars at focus groups. Instead, we toss off our lab coats and hit the Autobahn. **Drive a Volkswagen and you'll feel the road, the car and everything around you.** Buy one and you'll appreciate the lengthy list of standard features. All this – without emptying your wallet. That's what German engineering means to us. Why not get behind the wheel and see if we speak the same language?

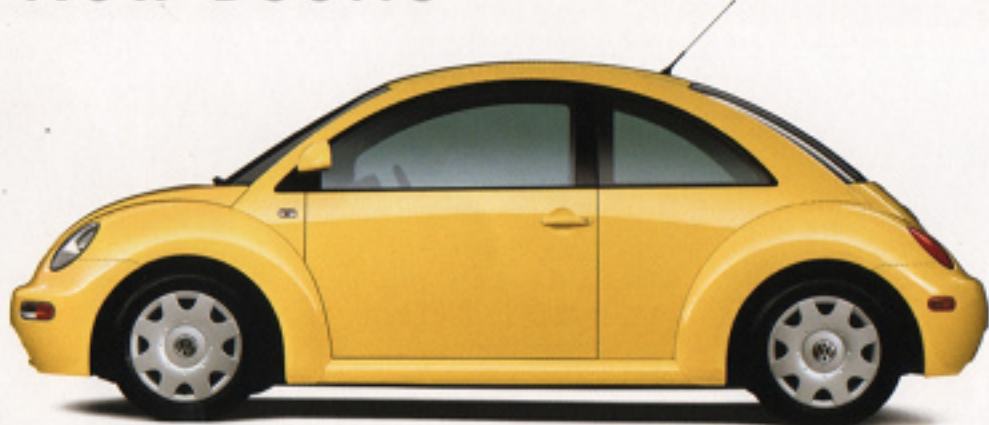

Drivers wanted. 

Drivers wanted.

Welcome to our family portrait. It sort of feels like everybody got haircuts and new wardrobes. First the New Beetle and Passat. Now the new Jetta, Golf and Cabrio have been completely redesigned to give you even more of that same old feeling. Here's your chance to eyeball the sheet metal and give the specifications a good once-over. Then it's off to your local dealer, where words like these take on a much deeper meaning.
