Certified  
**PreLoved**

# Welcome to Certified PreLoved

Volkswagen owners love their cars more than most (it's true, we have honest to goodness statistics to prove it). Whether they're getting their oil changed or road-tripping to national parks, VW owners and their cars are having fun. That's why we call them Pre-Loved. But sometimes they

trade them in for new VW models, which is where you get lucky. Of course they all must go through our 112-point inspection before they can become Certified Pre-Loved. And we back it all up with a 2-year/24,000-mile limited warranty and 2 years of 24-hour Roadside Assistance.\*

\*The Volkswagen Certified Pre-Loved limited warranty is for 2-years or 24,000 miles, whichever comes first. See dealer for details. Roadside Assistance is provided by Cross Country Automotive Services, Inc. in the United States.

Before a Pre-Loved VW can become "Certified," it has to go through our 112-point inspection. That's 112 points of poking, prodding, turning, flipping, driving, flexing, adjusting and other exacting scrutiny. Yes we're tough on them, but it's a tough love.

# Rabbit Golf

These two cars are small, nimble and fuel efficient\* — the perfect cars for city driving. Their suspensions are precise, balanced and über-responsive. But even though these Rabbit and Golf models have had some fun in the city, we make sure they've seen plenty of love. Our 112-point inspection checks for any dents or dings that might come with urban adventures. Of course, we also take them thru the other 111 inspection points. Then we back them with a 2-year/24,000-mile limited warranty.

\*2002–2005 Golf: 1.9L TDI 34 city/45 hwy auto, 42 city/45 hwy man; 2.0L 23 city/29 hwy auto, 24/31 man; 2006 Rabbit: 2.5L 22 city/30 hwy man and auto. EPA and fuel mileages are estimates only. Your fuel consumption may vary.

Every Certified Pre-Loved VW comes backed by a 2-year/24,000-mile limited warranty. It's a little extra security. If you consider 2 years and 24,000 miles a little security.

These days cynical is considered smart, brood and you're deep, get angry and you're considered passionate. But you don't have to buy into it. You can be different. A rebel. Dare to be happy. A Certified Pre-Loved New Beetle is the perfect companion to share some happiness. It's a rare combination of technology, engine performance and charm. And you'll be even happier to know it's all backed up by our 112-point inspection and our 2-year/24,000-mile limited warranty. Ensuring that the New Beetle has been Pre-Loved and will continue to be loved.

# New Beetle

## New Beetle Convertible

Inspection Point #15. Clock. It may seem like a tiny detail to you, but it's still a detail. And we're very detail-oriented.

Inspection Point #85. Headlight Test. We make sure your headlights point in the right direction at the right angle. We don't want any Certified Pre-Loved VW models driving around cross-eyed.

Inspection Point #22. Alarm System. We make sure it's loud and on guard.  
In the event that someone ever tries to love your car when you're not around.

# Jetta

Safe happens. That's why every Certified Pre-Loved Volkswagen gets its safety features thoroughly inspected during our 112-point inspection. No use in having all that award-winning protection if you're not certain it will be there when you need it. All you should be worrying about is where you, your friends and your Jetta are headed next. Of course our 112-point inspection covers all aspects of the Certified Pre-Loved Jetta. Like its superior performance and handling, as well as everything else inside, outside and around the car.

At Volkswagen we have a lot of love for the wagon. It is part of our name, after all. And we have even more love for a Certified Pre-Loved Jetta Wagon. Because we know each one has been on some great adventures. Whether it's just cruising down the PCH with friends or hauling recyclables to collection, it's a vehicle that's got purpose. Of course, our 112-point inspection ensures that your Certified Pre-Loved Jetta Wagon won't be able to share those stories with you. But if you wanted to track down the past owner, that could be fun. And our 2-year/24,000-mile limited warranty ensures that you'll create some stories of your own.

# Jetta Wagon

Inspection Point #59. Wipers/Washers. We check to make sure that they work properly and that the jets aim at your windshield and not at the car, pedestrian, or toll booth operator next to you.

Inspection Point #14. Mirrors. All mirrors must operate correctly and have no cracks. Cracks wouldn't be very safe. Plus we don't want any of our owners driving around with bad luck.

Inside most of us there is a fast. And the GTI was designed down to the last detail to satisfy it. Born on the German autobahn, this turbocharged, torqued-out, wound-up wundercar is an automobile built by enthusiasts for enthusiasts. And not to worry, every Certified Pre-Loved GTI goes through our 112-point inspection, which includes checking all the parts that will be making your fast happy. Plus we back it up with a 2-year/24,000-mile limited warranty which should make you happy too.

# GTI

Inspection Point #12. Safety Belts and Retractors. Although it might be an obvious one, it's an important one.

Inspection Point #32. Engine Starting and Performance. In order to inspect the engine, we have to take the car out on the road. Our favorite part of the a 112-point inspection.

# Passat

Inspection Point #110. Hoses. We make sure they're all there, and that there's no damage or leaks. "Hoses" is a funny word. But not to worry, we still take hoses seriously.

Inspection Point #3. Steering Wheel. Just making sure it does what its supposed to do — steer.

With its restrained German design and features that you'd expect in much higher priced luxury sedans, it's easy to forget what's under the hood. But make no mistake, you'll be reminded as soon as you take the wheel. And because VW owners love their cars, you can feel good knowing they haven't abused all that power. Of course if you want more proof, just look to our 112-point certification and our 2-year/24,000-mile warranty to be sure.

# Passat Wagon

Inspection Point #17. Instrument Lights. Because you'll need these unless you're a bat, in which case you can't reach the pedals anyway.

The perfect vehicle for when your priorities shift from performance vehicle to performance vehicle plus canoe, mountain bike, snowboard or whatever project you might get into that day. If a Certified Pre-Loved Passat Wagon could talk, we're sure you could pick up a lot of do-it-yourself tips. But since it can't, you'll have to learn them on our own. And even if a Passat Wagon has seen some action in its day, you'll feel good knowing our Certified Pre-Loved inspection made sure it wasn't heavy action.

Inspection Point #62. Internal/External Noises. This is where we check to make sure the Certified Pre-Loved car doesn't make any noises other than the purr of the engine.

There are questions surrounding the Touareg's recent wins at the DARPA Grand Challenge, the Pikes Peak race and its 10 stage wins at Dakar. Among other things, testing has revealed that the Touareg can drive at a 35-degree lateral inclination (that's kind of like driving around the inner circumference of a Jell-O® mold). Some have even attributed these accomplishments to high levels of OGT (Off-Road German Technology) found in its system. And while a Certified Pre-Loved Touareg may already know the course at Pikes Peak and the dunes of Dakar, rest assured you won't be able to tell thanks to our 112-point inspection.

\*2005 DARPA Grand Challenge, 2006 Pikes Peak International Hill Climb and 2006-2007 Dakar Rally wins. Touareg racing models are not available in dealerships.

Inspection Point #94, Tread Depth. We check to make sure that each tire has 4/32 depth remaining. 4/33 just wouldn't cut the mustard with us.

# Touareg

# Certified PreLoved Warranty

Each Certified Pre-Loved Volkswagen comes with a 2-year/24,000-mile limited warranty. So if there's a defect in materials or workmanship during the warranty's life span, other than the usual wear and tear, we'll take care of it. Plus, we'll honor the existing balance of any other limited warranties remaining on your Volkswagen.

## Certified PreLoved Roadside Assistance

And just in case you and your Certified Pre-Loved VW are ever in a jam, we offer 24-hour Roadside Assistance for 2 years after your purchase, regardless of mileage. Not that we think you'll ever need it. But just in case you do, jumpsuit-clad experts will show up to help you, virtually wherever you are 24/7.

# 112-Point Inspection

## A few points to note.

112 to be exact. In order to become a Certified Pre-Loved vehicle, each Volkswagen has to go through and pass all 112 points of our 112-point inspection. We start off by rejecting any car over 5 model years old, or with over 75,000 miles. Then we check each vehicle's history by pulling a CARFAX® History Report. If everything looks good, we subject the car to the 112-point inspection, where we will scrutinize it and then scrutinize

it again, taking a detailed account of everything inside, outside and under the car. If anything is amiss, we repair or replace it with genuine Volkswagen parts. We would list a few highlights of the inspection, but with 112 points, it's hard to be brief. By the time we're done with these vehicles the only way you'll be able to tell that they're Certified Pre-Loved is by looking at the odometer.

# Certified PreLoved

For the third year in a row we've won the IntelliChoice Best Non-Luxury Certified Pre-Owned Program.\* What does this mean? IntelliChoice is an independent company that is committed to helping consumers make better purchase decisions. So really it means that they think the Certified Pre-Loved VW is a pretty good decision. Hey, we don't like to gloat, but we felt that this is something we should include, only because it might help you make an informed decision.

\*September 2006 review of 28 manufacturer programs. See [www.intellichoice.com](http://www.intellichoice.com) for additional details, explanation of results and program updates.
