THE
DEVELOPMENT
PROCESS

Looking back, moving forward.

Vorsprung durch Technik

Innovation is vital to progress. And progress is all about building on past achievements to make new ideas a reality. Overall, it's a conviction that the status quo is never quite good enough, because something better is always waiting around the next turn. It's been our philosophy for over 100 years. And it can all be summed up in one short phrase: Vorsprung durch Technik.

From the versatile A3 to the progressive Q5, this philosophy is built into every Audi from the inside out. It is this standard of excellence that is revered the world over by automakers and drivers alike.

It's no surprise that with this passion for progress, our history is one marked by innovation and achievement. From the unparalleled traction and control of quattro® all-wheel drive, and the extraordinary strength and lightness of our Audi Space Frame (ASF®), to the striking look of our efficient LED lights, we've always been at the forefront of automotive technology and design. And through constant refinement, we continue to improve on the technologies that have given Audi its trailblazing reputation.

Beyond the foundations.

Design and Craftsmanship

Inspiring lines and the best materials are a given. But more important to truly great design is an extraordinary attention to detail, a dedication to craftsmanship, and an irrepressible sense of purpose. From form to function, ergonomics to aesthetics, interior to exterior, our goal is to create a design that speaks to driver and passenger in a brilliant new way. From the contrast between aluminum and leather to the interplay of design and technology, or even the way sunlight illuminates the subtle accents, Audi stops at nothing to help the exceptional reach its full potential.

Exterior

LED Lights

The unique LED daytime running lights are some of the most obvious examples of beauty and functionality in glorious combination. They also serve to effectively indicate the vehicle's presence with headlights and tail lights that are brighter, longer-lasting, and more efficient than incandescent lighting.

S line

Call it elegance with attitude. Through a host of custom details, the S line package brings a sportier, more athletic look to an already streamlined experience. Add a custom wheel size, a multi-function leather steering wheel, and a full body kit, and suddenly the little extras have cumulatively become a whole lot more.

Interior

Fit and Finish

Open the door of an Audi and it's clear that even the smallest details have been carefully considered. The highest-quality materials are used to sculpt industry-leading surroundings, resulting in a sensory experience unlike any other.

Bang & Olufsen® Sound System

There are car stereos, and then there are concert halls on wheels. For the ultimate acoustic driving experience, it couldn't be anything but the latter. The optional Bang & Olufsen® Advanced Sound System represents the pinnacle of car audio.

Audi Multi-Media Interface®

A visual and tactile marvel, the extraordinarily intuitive MMI® dashboard interface is the control centre for all “infotainment” components and vehicle functions. With it, directing everything from Bluetooth® connections to SIRIUS® Satellite Radio or your iPod® becomes second nature.

MMI® Touch Pad

It's as simple as it is safe. As a part of MMI® Navigation Plus, this ingenious touch-sensitive pad enables the driver to intuitively operate the Multi-Media Interface® without needing to look away from the road. Using handwriting recognition, it can immediately detect everything from destination inputs to address book selections and up to six radio stations. Acoustic feedback of the input selection is given to the driver immediately after the selection is made.

Panoramic Sunroof

Though the road ahead may be a constant source of excitement, nothing inspires quite like spectacular views of the sun or the stars. An available panoramic sunroof turns your vehicle into a mobile observatory.

Presence of mind, ease of travel.

European models shown.

Safety and Convenience⁵

Being progressive is all about thinking ahead. And when it's a question of safety, this conviction becomes more important than ever. Which is why at Audi we not only take measures to protect you at every turn, but we also create the technology that helps prevent risky circumstances from arising in the first place. And with worries left by the wayside, you can be sure the driving experience becomes that much more thrilling.

Head-Up Display

The Audi Head-Up Display projects the most vital driving data onto the interior of the windshield. In addition, the optional night vision assistant uses a thermal camera to highlight pedestrians on the road ahead, so all-important safety considerations are never far from view.

Audi Pre Sense

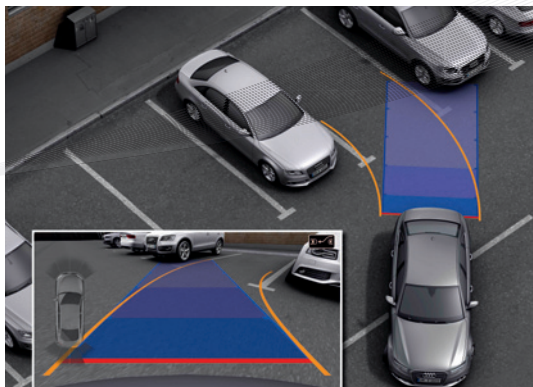

If you've ever wished for a car with a sixth sense, Audi is a step ahead of you. Audi Pre Sense permanently monitors and analyzes the readings from numerous sensors indicating the stability of the vehicle, the driver's momentary response, and the vehicle's immediate vicinity. It categorizes driving situations as critical or as an impending collision, with the aim of preparing the vehicle and its occupants as thoroughly as possible.

In addition to the functions of Audi Pre Sense Basic, Audi Pre Sense Rear uses the rear sensors of the optional Audi Side Assist to alert you to the presence of vehicles behind the car to help detect and avoid a possible rear-end collision.

Finally, Audi Pre Sense Plus activates Audi Braking Guard in certain situations where a collision is unavoidable; it then prompts hard braking in order to reduce the impact of the collision as much as possible. (Audi Pre Sense Plus is only available in conjunction with the Assistance Package.)

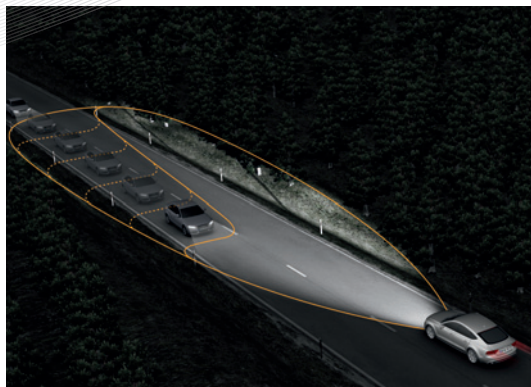

Audi Side Assist

Audi Side Assist monitors traffic in the driver's blind spots and detects fast-approaching vehicles from the rear. If a vehicle is detected, the system informs the driver by illuminating an LED light in the corresponding side-view mirror. If the driver has activated the turn indicator with another vehicle in the adjacent lane, the system warns the driver by flashing the LED. And to help you feel even safer, there's Audi Lane Assist. It uses a camera to detect road markings and will alert the driver if the vehicle starts to drift out of its lane by vibrating the steering wheel.

Audi Parking System

Audi Parking System (APS) provides all-round assistance for parking and manoeuvring in tight spaces. Ten ultrasonic sensors detect how far your vehicle is from an obstacle, and as the object nears, an intermittent signal sounds, becoming a continuous tone as the distance drops to 30 cm or less. Meanwhile, footage from a rear view camera is displayed on the dash. The system calculates the parking path, and provides visual guidance for the driver. Also available are the Audi top view and corner view cameras. With the freedom to switch between cameras, they give an unprecedented 360-degree view of your vehicle, especially useful for entering and exiting tight parking spaces or driveways.

Adaptive Headlights

Conventional headlights only perform ideally on straight roads. Adaptive headlights dynamically adjust, swivelling to match the direction of travel. This allows the driver to see in the dark by illuminating the road through corners and bends more effectively.

Adaptive Cruise Control

The adaptive cruise control uses radar, video, and ultrasonic data to calculate the distance between your car and the vehicles ahead, controlling speeds to help maintain a safe distance. If this distance is compromised, it automatically applies the brakes and alerts the driver if further intervention is required. Once the road is clear, the vehicle is brought back up to speed.

Dramatization; all bags will not normally be deployed.

Airbags and Crash Safety Ratings

Safety is always paramount, which is why Audi includes so many airbags in their vehicles. Dual-stage, dual-threshold front airbags are accompanied by comprehensive Sideguard® protection. With a plethora of safety and assist features, it's no wonder so many Audi models have earned a five-star safety rating from the National Highway Traffic Safety Administration (NHTSA®).

Electronic Stabilization Program (ESP®)

The Electronic Stabilization Program (ESP®) acts like a sixth sense, offering the driver the utmost in intuitive control. Through fine adjustments in the Anti-Lock Braking System (ABS) and the traction control (ASR) system, the program identifies the car's overall direction and helps it stay on course even under unstable conditions.

Potential made real.

Performance and Efficiency

No decision is made, no material selected, and no design undertaken without asking ourselves the question: How will it perform? The answer, reflected in every model from the A3 to the R8, is: Beautifully. Unlimited power. Efficient performance. Impassioned spirit. In other words, a result that's as close to perfection as we can possibly achieve. More proof that from design to technology and the gloriously exciting outcome of each combination, we always strive to get the most out of every driving experience.

Performance

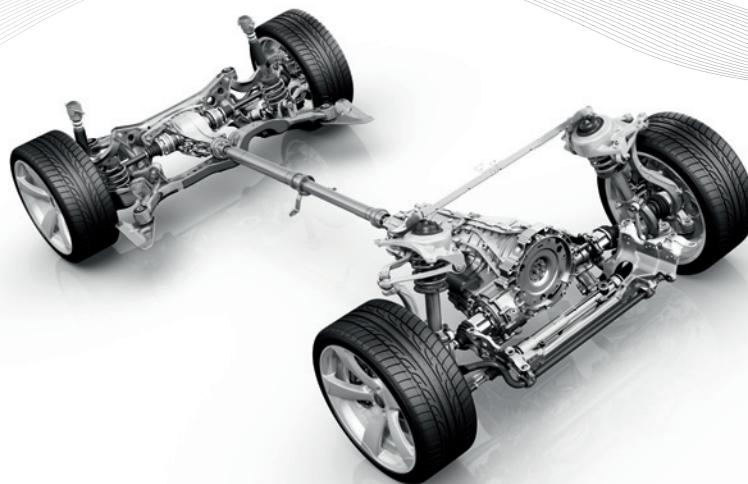

Transmissions

Because a superlative drive is directly related to the personality and style of the driver, several transmissions are available to suit individual tastes. While manual transmissions are also available, additional state-of-the-art systems provide exciting options, making the driving experience both more nuanced and more personal.

S tronic®, a revolutionary direct-shift gearbox, offers all the advantages of a standard 6-speed manual transmission with the convenience of a modern automatic transmission. A double-clutch system facilitates the process. The first clutch maintains power, while the second engages the next pre-selected gear. The result is a smooth blend of agility and control, dynamics, and uninterrupted power flow.

Information Provided by:
DEALER
e-PROCESS

The Tiptronic® automatic transmission is available on the majority of Audi models and features gear changes that are so smooth and seamless they practically become one continuous motion.

Audi quattro®

If there was ever a definitive technology to describe Audi, perhaps nothing comes closer than the legendary quattro® all-wheel-drive system. Dating back to its inception in March 1980, this revolutionary driving concept has since brought unprecedented confidence and control to drivers worldwide. Unlike its conventional 4WD counterparts, quattro® offers more than just a capacity for four wheels in tandem. Its unique power is adaptive, dynamically shifting between each of the wheels as needed.

Audi Drive Select

Once again, Audi demonstrates that details are the key to the exceptional. Audi Drive Select allows the driver to make adjustments in the steering, suspension, throttle response, and shifting aspects of the vehicle. Three modes are available for distinctly different driving qualities: automatic mode for everyday driving, comfort mode for long drives, and dynamic mode for a more performance-oriented experience.

Efficiency

Audi Space Frame (ASF®)

Strength. Efficiency. Lightness. These are the results of Audi Space Frame (ASF®) technology, yet another first in the automotive industry. To date, Audi has sold more than 500,000 cars with an aluminum frame. And no wonder: the combination of less weight, greater rigidity, improved economy, and better road dynamics makes one of the world's most intelligently designed cars an obvious choice.

Aerodynamics

It has long been accepted that the body of a car should be shaped for minimum wind resistance in order to conserve fuel. Ahead of the curve, Audi conducted its first experiments on its Type K model in 1923, buffering its streamlined structure with a body made of aluminum instead of traditional steel.

Today, with experiments carried out in a specially designed wind tunnel and with a unique underbody cladding designed to reduce drag, Audi has made its study of aerodynamics an even more exact science.

TDI Clean Diesel®

Although long known for its ability to achieve better mileage, diesel fuel technology of the past fell short when it came to cleanliness and its impact on the environment. Since then, TDI (Turbocharged Direct Injection) Clean Diesel® technology has changed the face of diesel, coupling extraordinary efficiency with low emissions. The breakthroughs are evident with AdBlue®, a biodegradable liquid mixture that automatically treats the exhaust after-system, converting 90% of nitrous oxides into harmless nitrogen and water molecules. The result is an engine that not only consumes less fuel than a conventional gasoline engine, but is also capable of the immense power and torque previously seen only in the sports car segment.

FSI/TFSI®

It's a simple premise with far-reaching implications: a more efficient engine means better performance and in turn, less impact on our environment. FSI® direct injection technology increases the torque and power of spark-ignition engines, making them more economical while reducing exhaust emissions. TFSI® is the forced induction version of the same technology, with greater power and even less displacement.

Start-Stop Technology

Our most efficient engine feature to date. This technology automatically shuts the engine off when the vehicle comes to a standstill; even for brief moments, such as traffic lights. Seamless, quiet, and virtually undetectable to the driver, this start-stop system saves energy and reduces CO₂ emissions, making our already efficient engines even more economical.

Cylinder-on-Demand Technology

This incredibly intuitive technology optimizes the engine efficiency based on the driver's individual driving style and environment. When the driver requires less power, such as cruising at highway speeds, it automatically deactivates certain cylinders to maximize fuel economy. And when more power is needed, it switches back in an instant. Plus, it's so smooth and seamless, it will never sacrifice the driving experience.

Momentum comes in many forms.

Boundless efficiency.

Audi A3

Audi's boundless efficiency applies to everything from the technology to the performance of the A3. With a choice between an award-winning 2.0-litre TFSI® engine or a TDI Clean Diesel®, it delivers an impressive 236 lb-ft of torque. With a sleek, aerodynamic design, an efficient 6-speed S tronic® transmission, 4.7L/100 km highway and 6.7L/100 km city diesel fuel consumption,³ its presence and reputation are already unforgettable.

A4

Audi A4

For the A4, forward motion begins with available quattro® all-wheel drive that provides unparalleled traction and control. A turbocharged 4-cylinder 2.0-litre TFSI® engine and an optional 8-speed Tiptronic® automatic transmission deliver effortless power and seamless gear shifting, and, at the same time, efficient fuel consumption. The distinctive appearance of the A4 is enhanced with signature LED lighting, providing a bright and safe driving experience while conserving energy. And when you add the S line Sport Select Package to the equation, customization and handling are pushed to the limit like never before.

Inside the A4, performance becomes even more personal. The available Audi Multi-Media Interface (MMI®) logic makes everything accessible with a single dial, from the navigation system to your iPod®. With hands-free Bluetooth® technology¹, an optional memory driver's seat, and an available Bang & Olufsen® sound system, everything is there to make your life easier. The A4 sedan is as intuitive as it is beautiful.

E-PROCESS

Audi A5

The Audi A5 coupé is an inspired design that translates to pure excitement the instant your foot hits the pedal. It comes equipped with a 2.0-litre TFSI® I-4 engine that delivers 211 hp and an impressive 258 lb-ft of torque. Its unique combination of FSI® technology, turbocharging, and a 4-cylinder engine delivers remarkable efficiency. And with quattro® permanent all-wheel drive to keep you firmly in control of the road, this car is nothing if not confident.

Extraordinary attention to detail sets the A5 apart from the pack. Its distinctive appearance is enhanced with remarkable new LED lights, that are as energy efficient as they are bright.

Inside, every interior aspect has been carefully considered; even the aluminum trim has been seamlessly integrated into the cabin. The Multi-Media Interface (MMI®) provides intuitive centralized control of all vehicle systems for an even more enjoyable driving experience. Open-air aficionados will find that nothing has been lost in translation with the cabriolet: the acoustic soft top keeps noise

to a minimum when closed, and can open in a mere 15 seconds at driving speeds of up to 50 km/h. Further, a set of rear folding seats, an industry first in a cabriolet, ensures plenty of room for additional cargo. Plus, we've taken your driving experience to new comforts with adjustable cooling seats and head-level heating.

Audi S5

With its powerful 3.0-litre TFSI® that roars to 333 hp, the Audi S5 is a coupé to be admired, whether you're in the cockpit or on the sidelines. Power that's both effective and efficient can take it from 0 to 100 km/h in an impressive 5.1 seconds.² And with Audi Drive Select with quattro® Sport Differential, performance is sportier and more agile, making the S5 a highly athletic contender in any environment.

The Audi S5 cabriolet is an open-top sensation. And with a 3.0-litre TFSI 333 hp engine under the hood, it's just waiting to be driven. Fine nappa leather seating, a power driver's seat with memory function, and 3-zone climate control ensure the utmost comfort and pleasure throughout. The Multi-Media Interface (MMI®) provides intuitive centralized control of all vehicle systems. A true beauty to behold, this luxurious, powerful vehicle intensifies even the shortest journey. Put the top down. It's time to feel, hear, and smell the road like never before.

Audi RS 5

New to the lineup is the long-awaited, highly anticipated RS 5 coupé. The refined, aggressive exterior is seamlessly balanced by unbridled power and unprecedented sports car handling. It's propelled by a 4.2-litre V8 engine, pumping out an impressive 450 hp at 8250 rpm that can take you from 0 to 100 km/h in 4.7 seconds, with a top track speed of 280 km/h.² Add in the stunningly fast 7-speed S tronic[®] transmission, Audi Drive Select with quattro[®] Sport Differential, dynamic steering, and optional ceramic brakes, and it's clear the RS 5 coupé isn't just a head turner, but a total game changer.

Lighter, stronger, better.

Audi A6

With a 3.0-litre TFSI® V6 engine, the A6 takes power and elegance to new heights. The 3.0-litre engine employs start-stop technology to lower fuel consumption, and its 8-speed Tiptronic® automatic transmission improves efficiency and reduces CO₂ emissions. Featuring Audi ultra lightweight technology, previously only found in our flagship models, it's no surprise that it was our first model to be named World Car of the Year. Constructed partly of aluminum, it's up to 35 kg lighter than its predecessor, making it even more agile, fuel efficient, and eco-friendly. It also boasts greater safety, improved handling, and increased performance thanks to the Audi Space Frame. This high-strength aluminum frame structure fuses with the aluminum body to create exceptional stiffness and above-average crash protection. Safety meets comfort with intuitive features like adaptive cruise control, anticipatory control reactions, and Audi Pre Sense Rear. All work to provide a more natural and comfortable driving experience.

On the outside, available striking LED lighting that is as bright as it is energy efficient, the distinctive Audi single-frame grille, and a low, muscular dynamic line, buoyed by a hybrid aluminum construction body and frame. Clearly, the exterior of the A6 is in its finest form to date.

Inside, ample head and shoulder room for the driver and passengers, as well as spacious cargo capacity, ensures that everyone and everything is comfortable. And from the intuitive Multi-Media Interface (MMI®) operating system featuring Audi Music Interface (AMI), climate control, and an electromechanical parking brake, every possible

comfort and amenity is right where you need it. Still, the technology doesn't stop there. With available Audi Side Assist, Audi Adaptive Lights, advanced key, and Audi MMI Navigation Plus,⁴ the A6 continues to prove that it's a luxury car for the uncompromising driver.

And this year, the A6 you love comes with our highly efficient 2.0 TFSI 4-cylinder engine. Featuring a 2.0-litre, 4-cylinder engine with TFSI technology and an 8-speed Tiptronic transmission, it's the perfect blend of luxury, comfort, and fuel efficiency, and truly stands above the rest in its class.

Audi S6

What do you get when you combine superior performance with the ultimate in luxury? None other than the new Audi S6. Performance begins with a 420-hp V8 engine caged under a sleek aluminum hood. The intuitive Audi cylinder-on-demand technology decides independently between 8 or 4 of the engine's cylinders as the driving situation requires – 8 cylinders for maximum performance and 4 cylinders for minimum consumption. This helps maintain economy and fuel efficiency, even in the most powerful engine. Meanwhile, a rear-biased quattro® all-wheel-drive system helps keep you in complete control of the road.

The extra-light aluminum hybrid construction of the S6 also provides a progressive balance between maximum performance and high efficiency. And with its S Sports adaptive air suspension and quattro with sport differential, it turns corners with ease.

But make no mistake, it turns heads just as easily, with its striking single-frame grille, S Sports body styling, and standard 19" 5-parallel-spoke alloy wheels. The S Super Sports front seats and a variety of optional interior trim are just the icing on the cake when it comes to this remarkable new vehicle.

Imagination meets engineering.

A7

Information Provided by:
DEALER
E-PROCESS

European models shown.

Audi A7

The A7 offers a combination of design, utility, and technology like never before. It's constructed from lightweight technology previously only found in our flagship models. Its low, accentuated roofline and balanced proportions convey an immediate athleticism. And though its profile, featuring seamlessly integrated rear doors, suggests a coupé, its spaciousness indicates a sedan. Its 3.0-litre, 6-cylinder engine with TFSI® technology and start-stop functionality work together with its 8-speed Tiptronic® automatic transmission to lower fuel consumption and CO₂ emissions. On the exterior, available striking all-LED lighting ensures even better illumination and brightness, and with a distinctive, retractable rear spoiler and an unexpected fifth door, a unique functionality is brought to the fore.

Inside, the senses of driver and passenger alike are treated to elegant wood veneer accents, and an available Multi-Media Interface (MMI®) Touch Navigation⁴, including an 8-inch retractable display. And how better to enjoy them than from the comfort of one of four full-sized seats, each offering ample head, shoulder, and leg room. For larger cargo, the rear seats can be folded back for increased luggage capacity with the added convenience of standard power tailgate function.

The A7 is available in two model lines: A7 3.0 TFSI quattro® and A7 3.0 TFSI quattro Premium, powered by a 3.0-litre supercharged V6 engine with 310 hp and 325 lb-ft of torque.

Audi S7

If there were ever a car that breathed passion and enthusiasm, it would be the S7. Truly dynamic in every detail, it's as striking both inside and out. Boasting a twin-turbo charged 4.0-litre, V8 engine with Audi cylinder-on-demand technology and 420 hp, this powerhouse will take you from 0 to 100 km in under 5 seconds.² Armed with 7-speed S tronic[®] transmission, S Sports adaptive air suspension and quattro[®] with sport differential, get ready to experience an exceptionally smooth ride, phenomenal grip, and superior handling that really puts you in the driver's seat. The design of the S7 is seamless. It radiates confidence and elegance on

the outside matched by luxury and comfort inside. Designed with the driver in mind, it includes heated Valcona leather S Super Sport front seats, or optional Comfort seats with massage function. Plus, enjoy a 3-spoke, multi-function steering wheel with gearshift paddles and an innovative Multi-Media Interface (MMI[®]) Touch Navigation,⁴ that really put the "control" back into control panel.

On the outside, the S7 is characterized by its main bodyline, called the “tornado line”, which gives it that slim, taut and sporty shape. The low, dynamically tensioned roof gives the 5-door model the character of the coupé. And its striking single-frame grille is outfitted with a luxurious high-gloss black finish and chrome application. The S7 does more than just get noticed, it sets the standard on every road it crosses.

Dynamic in every detail.

A force of luxury.

Information Provided by:

Audi A8

The A8 represents the pinnacle of Audi design and technology. Clean exterior lines, unbelievable power, and luxurious amenities are melded to perfection. It all starts with the Audi Space Frame (ASF®), a high-strength aluminum frame structure into which the panels are integrated. The aluminum body is characterized by exceptional stiffness and above-average crash protection, yet at the same time by substantially lower weight. The addition of available distinctive all-LED headlights ensures optimal illumination and brightness. For the first time, the A8 introduces TFSI® technology with a high-performance V6 3.0-litre engine boasting 333 hp. It features our unique start-stop technology, which helps save fuel and reduce CO₂ emissions. Also new to the family is the V8 4.0 TFSI with 420 hp and start-stop technology, plus the well-known and even more powerful 6.3-litre FSI® engine with impressive 500 hp. All come together with an 8-speed Tiptronic® transmission, quattro® permanent all-wheel drive and Audi Adaptive Air Suspension, ensuring that the A8 is engineered to take the road with grace and style.

A driver's seat featuring optional climate comfort ventilation with massage functions is proof that no opportunity for luxury has been overlooked. Additional options like hand-stitched leather amplify the sensual interior of the A8. Meanwhile, an available 19-speaker Bang & Olufsen® advanced sound system with acoustic lens tweeters fills the cabin with 1,400 watts of stunningly rich sound. Of course, both music and navigation are right at your fingertips, displayed by a brilliant eight-inch colour display. Every detail has been exquisitely refined and crafted, because the A8 demands nothing less.

DEALERS
ET PROCE

Audi S8

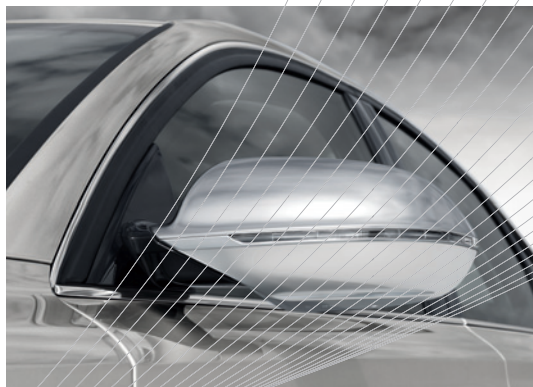

The S8 is your official welcome to the high life. It sits at the head of the S model family – large and luxurious with supreme performance. Featuring the new 4.0 TFSI® engine, it delivers 520 hp and a constant 481 lb-ft of torque. The result? Unparalleled performance that takes you from 0 to 100 km in just 4.1 seconds.²

Standard to the S8 is S Sports adaptive air suspension for even sportier driving and precision handling. And lying at the heart of the new S8 is the Audi cylinder-on-demand technology. It optimizes the engine efficiency based on your individual driving style and environment by deactivating certain cylinders. And when you need more power, it switches back in an instant. Talk about intuitive.

The pinnacle of premium.

Stepping into an S8 means entering the realm of luxury. The multi-way, power-adjustable Comfort Sport front seats are standard on this model, upholstered in deluxe Valcona leather, and equipped with massage and ventilation functions at the front. The upper inlays and the selector lever are trimmed in Carbon Atlas, a nod to the car's sport inspiration.

And of course, the S8 exterior is as remarkable as the interior. Form truly meets function, with features that include a sharp, single-frame grille in platinum grey with eight double bars covered in chrome, standard 21" cast aluminum alloy wheels in 'S' design, full LED headlights, and unprecedented rear door power closures.

With its unequalled performance, elite styling, and the most intuitive functions in its class, it's clear that the new S8 is more than just a luxury vehicle. It's a tour de force on wheels.

Audi Q5

The SUV that couldn't get any better, just did. Featuring its most striking exterior yet and a more powerful supercharged 3.0 TFSI® engine, the Q5 represents a new era for the category. There has truly never been a sport utility vehicle like it – as progressive as it is sporty, and as spacious as it is functional. A distinct profile, quattro® permanent all-wheel drive, and an 8-speed Tiptronic® transmission provide ample evidence. With an available ultra-efficient 2.0 TFSI engine that delivers 258 lb-ft of torque and an 8-speed Tiptronic transmission, efficiency and performance have never been better matched.

Its styling, with a coupé-like roofline and wraparound tailgate, is just the beginning. It is now acquiring distinctive new traits. The horizontal lines of the high-performance SUV's front end are emphasized more strongly than ever before. LED daytime running lights and tail lights combine innovation and aesthetics to spectacular effect. A high-gloss black single-frame grille with vertical chrome struts, and its bevelled upper edges, offers a look that is both sporty and elegant. And the tailgate not only lends an unmistakable appearance to the rear of the Q5; it also makes for easier loading and unloading. Suddenly, its industry counterparts seem like things of the past.

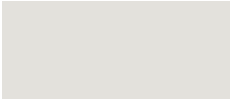

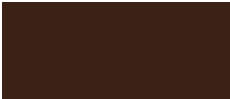

For an even more eco-friendly version of this powerful SUV, the Audi Q5 is now available as a hybrid. As one of the only hybrids in its class, it accomplishes what no other SUV can – power and efficiency in one. It features a turbocharged 2.0-litre 4-cylinder engine combined with an electric motor, that is powered by a lithium-ion battery. The Q5 is progressive Audi innovation at its finest.

Power and sophistication in equal measure.

Audi Q7

With the ability to accommodate up to seven passengers, the performance of the Q7 is no less expansive. Size aside, an 8-speed Tiptronic® transmission and a rear-biased quattro® permanent all-wheel-drive system make for handling like a larger-than-life sports car. Off-road, it's in its element with Electronic Stabilization Program (ESP®), available Audi Adaptive Air Suspension, and off-road detection. But with the choice between two 3.0-litre TFSI® engines featuring 280 hp and 333 hp respectively, or a TDI Clean Diesel® variant that produces 407 lb.-ft. of torque and remarkably low emission figures, the Audi Q7 easily takes command of any environment.

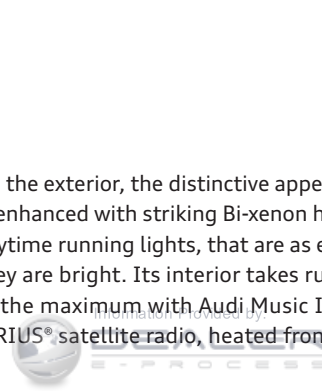

Information on the Audi Q7
Diesel
 E-PROCESS

On the exterior, the distinctive appearance of the Q7 is enhanced with striking Bi-xenon headlights with LED daytime running lights, that are as energy efficient as they are bright. Its interior takes rugged splendour to the maximum with Audi Music Interface (AMI), SIRIUS® satellite radio, heated front and rear seats,

and automatic climate control. Meanwhile, the enhanced driver information system display analyzes energy consumption and gives the driver tips on how to optimize fuel efficiency. Built with equal parts grace and strength, the Q7 is without parallel in its category.

DEALER'S
EDGE

The evolution of an icon.

Audi TT

The long-loved Audi TT has just been taken to groundbreaking new heights. With an Audi Space Frame (ASF®) that's 69% lightweight aluminum and 31% rigid steel, the safety, performance, handling, and fuel consumption of the TT are truly second to none. Add in a slick looking, speed-activated spoiler, quattro® permanent all-wheel drive, and optional Audi Magnetic Ride, it's clear the sports car that couldn't get any better just did. The available Sport button further improves the vehicle's response times and activates sportier, more aggressive steering for the toughest roads. And with the efficient 211-hp, 2.0-litre TFSI® engine using Audi Valve-Lift technology, not to mention a 6-speed S tronic® transmission and a whole host of interior upgrades, this car deserves to be set free.

Audi TTS

From a distinctive radiator grille, front-brake calipers, and a sleek tail profile to high-resolution dials, a lap timer, and an ergonomically designed gear knob, the TTS coupé and roadster are the epitome of spectacular sport-specific design. While a 265-hp TFSI® engine delivers all the power required to rocket this four-wheeled escape pod into the stratosphere, quattro® all-wheel drive guarantees it will hug the road with conviction.

Aggressively stylish.

Audi TT RS

Every nuanced curve of the Audi TT RS suggests potential. And with good reason. The latest member of the TT line is the most powerful yet. Outside, its bumpers taper down to large, square air inlets with honeycomb inserts, which sit on either side of a high-gloss black grille with a brushed-aluminum frame. Meanwhile, dramatic flared wheel arches house 5-arm rotor design alloy wheels. Distinctive matte-finish door mirrors with LED turn indicators offer a design touch, and a fixed rear spoiler ensures optimized aerodynamics.

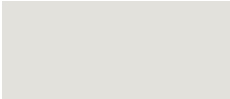

Powerful impressions.

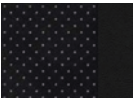

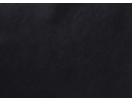

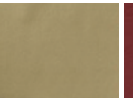

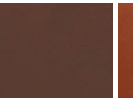

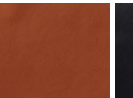

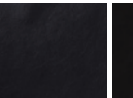

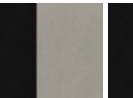

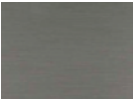

Under the hood, a 5-cylinder 2.5-litre TFSI® engine is a clear indication that this car means business. With 360 hp available between 5,500 and 6,700 rpm, the TT RS is capable of reaching 100 km/h in a mere 4.3 seconds, and a top track speed of 280 km/h.² All in all, it's a perfect example of performance at its most inspired.

Audi R8 Coupé

The R8 has earned its place in the hearts and minds of sports car enthusiasts the world over. With a design that is unmistakable and performance that is meant to thrill, it is, at its core, the epitome of Vorsprung Durch Technik. Everything about the R8, from the ultra-light Audi Space Frame and mid-engine construction, to its unique quattro® all-wheel drive and magnetic ride suspension, is driven by the conviction that a true sports car must be progressive in every way possible. Combine this with its potent 4.2 FSI® V8 producing 430 hp or the even faster 5.2 FSI V10, offering 525 hp, and it's clear that the R8 Coupé is as much the outcome of our own aspirations as it is our drivers'.

Information
DEALER
E-PROCESS

For 2013, Audi introduces an available 7-speed S tronic® transmission into the R8, giving it even sharper and more efficient performance. New LED headlamps adorn the newly designed front end of the R8 while the interior is immersed in aluminum accents and matte black silk inlays. And for those yearning for even more, the R8 V10 plus, all new for this year, produces an exhilarating 550 hp and comes equipped with numerous weight-saving carbon fibre components. All this culminates in a car that brings the driver closer to the racing roots of the R8.

Audi R8 Spyder

The striking silhouette of the new Audi R8 Spyder makes a bold statement the moment you see it. Like the R8 Coupé, the prominent single-frame grille and LED headlights contribute to the striking visual impact of this car's composition. It offers the driver the opportunity to enjoy the exhilarating driving dynamics expected of the R8, but with the liberating feeling of its convertible soft-top roof. In just a matter of seconds, you can go from shade to sun. Utilizing its sophisticated Bang and Olufsen® sound system to produce crystal clear sound, or the clarity of the seatbelt Bluetooth® microphones, the tranquility of a cabin no longer becomes necessary. Add to this the range of engines for this model, from the high-revving 430-hp 4.2 FSI V8 or lightning quick 5.2 FSI V10, and the R8 Spyder becomes an incredible driving machine no matter what the elements.

Like the R8 Coupé, the Spyder also receives an available 7-speed S tronic® transmission. The front and rear of the car have been updated to give it a sharper look, and interior enhancements to trim give the already well-appointed R8 an even finer touch. More than just another rendition of the R8, the Spyder is a uniquely different way to experience the thrill of driving an icon.

Audi Genuine Accessories

For every taste and lifestyle, a unique Audi accessory exists. Add a roof rack to hold everything from snowboards to bicycles. Or accessory wheels to dramatically change the profile of your vehicle. From spoilers and running boards to full body kits, a multitude of options are available to customize the look, personality and functionality of your car. Specifically designed for your Audi, our Genuine Accessories are always the perfect fit.

1. Your Audi vehicle may be equipped with a phone preparation utilizing Bluetooth® interface to enable hands-free functionality (compatible mobile phones sold separately). You will need a Bluetooth®-enabled mobile phone in order to utilize this function. Not all Bluetooth®-enabled mobile phone models are compatible with Audi's phone preparation. Contact your local Audi dealer for the latest listing of compatible phones.

2. Please drive safely and obey all traffic laws, including speed limits.

3. Fuel consumption estimates and figures are based on the Government of Canada's approved criteria and testing methods. Refer to the Government of Canada publication Fuel Consumption Guide (EnerGuide) or Natural Resources Canada's Fuel Consumption Figures website. Actual fuel consumption may vary based on driving conditions, driver habits and vehicle's additional equipment.

4. The Audi Navigation System depends upon signals from the worldwide Global Positioning Satellite network. The vehicle's electrical system, and existing wireless and satellite technologies, must be available and operating properly for the system to function. The system is designed to provide you with suggested routes in locating addresses, destinations and other points of interest. Changes in street names, construction zones, traffic flow, points of interest or other road system changes are beyond the control of Audi Canada. Complete, detailed mapping of lanes, roads, streets, toll roads, highways, etc., is not possible, therefore you may encounter discrepancies between the mapping and your actual location. Please rely on your individual judgment in determining whether or not to follow a suggested Audi Navigation System route. Periodically new mapping data is available. HDD update is required in order to maintain the latest navigation information. Updates are available for purchase from time to time at additional cost. Consult your dealer or call 1-800-FOR-AUDI for details.

5. Audi Side Assist, Audi Pre Sense and all other safety and convenience features are means of assisting the driver only. Drivers must continue to devote their full attention to safe driving. Some features are available as options and may not be available on all models. Airbags are supplemental restraints only and will not deploy under all accident circumstances. Always use safety belts and seat children only in the rear seats, using restraint systems appropriate for their size and age.

6. Government star ratings are part of the U.S. National Highway Traffic Safety Administration (NHTSA's) New Car Assessment Program (safercar.gov). Crash performance was based on a U.S.-equipped vehicle. Some features on that model may be optional in Canada.

Audi Canada believes the specifications in this brochure to be correct at the time of printing. However, specifications, standard equipment, options, fabrics and colours are subject to change without notice. Audi Canada is not responsible for errors in typography or photography. Some equipment may be unavailable when your vehicle is built. Some vehicles are pictured with options that may be available at extra cost or may not be available on some models. Please ask your dealer for advice concerning current availability of standard and optional equipment and verify that your vehicle will include the equipment you ordered. Vehicles in this brochure are European models shown with optional equipment or accessories that may not be available in Canada. Tires are supplied and warranted by their manufacturer. Your vehicle is sold equipped with all-season tires. However, please remember the use of winter tires may be mandatory in your province or territory. Make sure your vehicle is equipped with the proper tires at all times. Tires supplied by various manufacturers. See your dealer for complete details on the limited warranty, the Audi 24-hour Roadside Assistance (provided by Sykes Assistance Services Corporation), or the 12-year limited warranty against corrosion perforation. Certain conditions apply, please see your dealer for details.
