The Ultimate
Driving Experience.®

THE BMW 6 SERIES COUPÉ AND CABRIOLET.

DRIVING ELEVATED TO ART.

BMW EfficientDynamics
Less emissions. More driving pleasure.

Information Provided by
DEALER
e-PROCESS

TO YOU, DRIVING IS A NON-SPECTATOR SPORT.

In the BMW 6 Series, driving is a singularly exciting experience to be savored. Some 6 Series drivers seek their thrills in sleek Coupé form; others find nirvana under the open sky in the Cabriolet. But the choices do not end there. The BMW 6 Series further personalizes your driving pleasure by offering the hands-on thrill of a slick-shifting 6-speed manual transmission¹ or a silky-smooth 8-speed Sport Automatic; rear-wheel drive¹ or xDrive[®] All-Wheel Drive; and an endless array of personalizing colours, features and options. Best of all, no matter how you build your 6 Series Coupé or Cabriolet, every kilometre will deliver its own unique pleasures.

¹ Only available for the BMW 650i Cabriolet.

U.S. model shown. Canadian models may vary slightly. Please see your local BMW Retailer for details.

Editorial

REDEFINING THE EQUATION FOR 2+2.

The concept of the 2+2 has been with us for decades. Defined, it's a two-seat sports car with two more seats – two plus two. It's for those who want a thrilling driving experience without fully compromising practicality.

That is the definition. Now we present the redefinition: the BMW 6 Series Coupé and Cabriolet.

On the thrilling driving side of the 2+2 equation, our engineers and designers have honed the BMW 6 Series' sporting character to a fine edge. Outside, a longer, lower and wider body flashes a more aggressive yet graceful stance. Under its long hood we offer you a 400hp TwinPower Turbo V-8, connected to the road via a 6-speed manual transmission¹ or an 8-speed Sport Automatic with fast-acting steering wheel-mounted paddle shifters.

On the practical side you'll discover a full range of standard and optional driving systems to keep you firmly in control, fully informed, richly entertained and sumptuously comfortable. This includes BMW ConnectedDrive for fast access to your music collection stored on the hard drive, full-colour Head-up Display, Bluetooth® Mobile Office and more. On the entertainment side you can select either a 9 speaker HiFi audio system, or an available Bang & Olufsen 16-speaker High-End Surround Sound System especially designed for the 6 Series. Each delivers sparkling audio range and presence while you listen in the supple comfort of a lovingly crafted and exquisitely detailed interior.

The ultra-advanced and elegantly refined BMW 6 Series Coupé and Cabriolet take the 2+2 driving experience to the next level. Now the only element missing from the equation is you.

bmw.ca/6series

¹ Only available on the BMW 650i Cabriolet.

AN ATHLETIC SOUL,
ELEGANTLY EXPRESSED.

Longer, wider, lower, more muscular. We've made the sporting character of the BMW 6 Series even more emphatic. Its flowing lines frame a gracefully athletic stance. The redesigned front end area features the signature BMW double-kidney grille, flanked by four Corona headlight-rings – now framing available Full LED headlights with Adaptive and Automatic high beams functionality and LED turn signals. All curved surfaces and character lines are sharply defined and tightly curved to create an elegant, elongated silhouette. Bulging wheel arches frame the striking alloy wheels, a visual manifestation of dynamic road-holding ability. The total effect is breathtaking.

A masterpiece down to the smallest detail: the long side line draws your attention to the Full LED foglights, which give the front of the vehicle even more impressive character.

YOU'VE NEVER FELT POWER
IN THIS WAY.

Power as an extension of your desires: a standard 8-speed Sport Automatic with steering wheel-mounted paddle shifters sprints you forward.

We creatively engineer power to a standard of how it feels to the driver. Let us explain. Do you feel power instantly? Do you feel power flowing smoothly yet decisively throughout the acceleration event? Do you feel in control of power delivery? Indeed, the BMW 6 Series' raw power is impressive: 400hp from a TwinPower Turbo V-8, transmitted through either a silky shifting 6-speed manual¹ or 8-speed Sport Automatic with steering wheel-mounted paddle shifters.

¹ Only available for the BMW 650i Cabriolet.

ation Provided by:

ON THIS STAGE, THE CAR
SUPPORTS THE STAR – YOU.

BMW ConnectedDrive makes everyday driving easier. In the BMW 6 Series Coupé and Cabriolet, innovative assist systems are focused on you, the driver – connecting you, the vehicle and the road. A full-colour Head-up Display streams relevant data, such as your speed, Navigation system instructions, even warning messages from driver assistance systems, directly onto the windshield, helping you keep your eyes focused on the road. And when you arrive, not only can the Park Assistant¹ feature tell whether you'll fit into a parking spot – it can even do the parking for you.

¹ Only available for the BMW 650i Cabriolet.

Enjoy the road ahead with the full-colour Head-up Display that projects vital driving data into clear view.

Speed limit display not available in Canada.

ZERO TO SKY
IN 19 SECONDS.

Forward-thinking rear window: the glass rear window can be raised or lowered with a touch of a button – independent of the softtop – for customized ventilation on demand.

The BMW 6 Series Cabriolet takes the softtop to new heights. BMW advances cabriolet softtop technology in several ways. The first is how quickly it operates, retracting in 19 seconds and closing in 24 seconds, all while traveling up to 40 km/h. Next is flexibility and comfort: the upright heated glass rear window can be raised and lowered electrically – and independently of the softtop. This allows for what our engineers call a “California” mode: driving top-up with the rear window down. You’re protected from the sun while the open side and rear windows allow a generous flow of fresh air. Trust BMW to present sun and sky in a whole new way.

Information Provided by:

**RIDE AND HANDLING THAT MOVE YOU
IN MORE WAYS THAN ONE.**

Enjoy a unique combination of sporting performance and comfort. Confidence-inspiring handling without a harsh ride is always our engineering mandate. Expect nothing less in the BMW 6 Series. Dynamic Damping Control delivers the precise amount of ride control to match your unique driving style and road conditions. Electro-hydraulic brakes instantly activate a range of technologies to help keep you in control, whether slowing on wet or dry roads. Available Integral Active Steering¹ adapts steering effort to you, not the other way around, and enhances cornering geometry by adding rear-wheel steering. Dynamic Stability Control anticipates slides before you feel them and corrects them in a flash, while Dynamic Traction Control minimizes wheelslip on slick surfaces. Available for the first time in the BMW 6 Series, the xDrive intelligent All-Wheel Drive system reads the road and reacts instantly to your driving demands. Sound intriguing? These are merely a few of the countless intelligent chassis control systems that go into this version of The Ultimate Driving Experience.®

Enjoy spirited driving with precision and confidence, thanks to BMW's array of innovative, intelligent chassis systems and driver aids.

ADVANCED INFORMATION TECHNOLOGY
NOW COMES IN A SMART PACKAGE.

Communication technology that looks beautiful and performs brilliantly – from jewel-like turn indicators to the full-colour Head-up Display.

Keep totally informed. In the BMW 6 Series Coupé and Cabriolet, an advanced network of systems provides up-to-the-second vital information. BMW ConnectedDrive systems can be monitored and controlled through a large free-standing, 10.3" flatscreen Display. This includes BMW Assist™ available infrared BMW Night Vision with Pedestrian Detection, Rear-view Camera and much more. No matter where you are, we're with you all the way.

INDULGE YOUR PASSION
WHILE PRESERVING THE ENVIRONMENT.

BMW EfficientDynamics: solutions to sustainability challenges. BMW owners love driving – and the environment in which they drive. The aerodynamic BMW 6 Series satisfies these demands by combining high performance with low fuel consumption and emissions. The entire drivetrain, from engine to transmission, bristles with high-efficiency technologies – electronically controlled engine cooling is just one innovative example. Another is the 8-speed Sport Automatic transmission that makes the most of the engine's power in all gears. The drivetrain even enhances efficiency every time you take your foot off the accelerator: kinetic energy lost when coasting or braking is converted into electrical power via Brake Energy Regeneration.

Sustainability and precision is achieved through an advanced array of innovative technologies.

Auto start/stop not available in Canada.

LIGHT UP THE FUTURE.

This is the first BMW Series to showcase Full LED headlights with Adaptive and Automatic high beams functionality. Their bright white light is an active safety feature that helps make every journey more comfortable. Thanks to the unique light design and distinctive profile, you not only see better in the dark, but are more visible to other drivers.

Good vision is one of the most important requirements for steering safely through traffic. To experience this at night, you need high-power, high-contrast light.

The lighting concepts produced by BMW have always been a little brighter than those of other manufacturers. Just under 20 years ago, the BMW 7 Series was the first to offer

headlights using Xenon technology. These HID (High-Intensity Discharge) lights provide daylight-like brightness to illuminate the street with double the luminosity of standard halogen headlights. And now this brilliant technology is followed by the latest in lighting: LED systems.

The BMW 6 Series Coupé and Cabriolet are the first BMW models to offer Full LED

Low and high beams can be generated by available LED technology. As with the Adaptive turning lights and Automatic high beams, the headlights follow the course of the road and adapt to traffic conditions.

headlights with Adaptive and Automatic high beams functionality, providing a new visual experience. Light-emitting diodes (LED) are used in the parking lights, daytime running lights, high and low beams, turn-indicator lights and Cornering Lights. Additionally, the LED headlights incorporate the functionality of Adaptive turning lights and integrated Automatic high beams. Pivoting light cones provide extra visibility in corners.

The key difference between LED lights and the bright bluish arcs of Xenon lights or the yellowish hue of conventional halogen lamps is the extremely white light typical of LED technology. No other car lights approximate natural daylight so effectively. As a result, drivers find this light even brighter, with more intense contrast, than the already superb Xenon technology.

Experts, such as BMW light engineer Ulrich Henseler, predict that these light diodes have a bright future ahead of them. "The light-emitting efficiency of LED technology has increased in just a few years from 50 to just under 100 lumens per watt. LEDs also score high because they have an almost unlimited shelf life and their properties open up new design opportunities."

In the BMW 6 Series Coupé and Cabriolet, the headlight design symbolizes athletic elegance. The light architecture behind the dynamically curved glass is also unique in terms of functionality. For the first time, Full LED headlights with Adaptive turning lights are being used in a distinctively

sporty BMW design. The light-rings are three-dimensional, and flattened at top and bottom. Double-round headlights project the LED low and high beams from two Corona headlight-rings. The shortened accent lights are similar to a pair of eyebrows; at night they produce a unique, signature look – one that makes the BMW 6 Series Coupé and Cabriolet seem even more focused and purposeful.

HIDDEN BEAUTY.

A light installation by Paul Cockledge for BMW and Flos.

As part of the Milan Salone del Mobile 2011, BMW and designer light company Flos presented a very special, innovative project.

The British designer Paul Cockledge was commissioned to create the fascinating light installation, "Sesto Senso." The focal point was the allure of the unseen – namely BMW LED technology and the BMW 6 Series Coupé. Cockledge installed a seamless, curving white wall extension to the Flos showroom in Milan, featuring huge lamps. Thanks to LED technology, the light sources within each lamp remained largely invisible. Observers were able to step into the lamps and, from there, see a video of the BMW 6 Series Coupé.

Because of its strong emotional significance and relation to the driving experience, lighting design has always been given a high degree of importance within the BMW Group. The BMW Design team focuses on human perception of light, harnessing new technologies in a creative way to achieve user-oriented solutions. As for inspiration and ideas, cooperation with designers and artists has a significant role to play for BMW.

IT'S AS IF IT WERE
CUSTOM-MADE FOR YOU.

Slip into the driver's seat to be instantly impressed at how natural it feels. This is not by chance. BMW designers and engineers pay particular attention to even the most minor details. From the dramatic interior Ambiance lighting, to the strategically arrayed and angled instrumentation, to the lovingly selected materials that delight to the touch, this cabin is designed to keep you comfortably in control – and entertained. Beyond our already exceptional standard HiFi audio, you can select a Bang & Olufsen® Surround Sound System for your BMW 6 Series. It's the perfect aural complement to the visual and tactile delights of this stunning interior.

A match made in heaven: the available 1200-watt Bang & Olufsen Surround Sound System in the BMW 6 Series is custom-tuned and precisely matched to the unique acoustics of the interior. The effect is pure heaven for audiophiles who love to drive.

HERE, DRIVER AND PASSENGERS
BECOME HOST AND GUESTS.

Available contrast stitching throughout the cabin displays the loving care with which this interior is crafted.

This is one 2+2 in which everyone enjoys the ride. In this welcoming environment you can see and feel the extraordinary craftsmanship in every detail. The available 20-way adjustable Multi-contour front seats with ventilation are surrounded by the beauty of natural wood trim. With the Cabriolet's top down, even the darkest-coloured Nappa Leather seats stay cooler, thanks to Sun-Reflective Technology. Further enhancing cabin comfort is a climate control system that adapts to the individual needs of driver and all passengers. Is everyone comfortable? Perfect. Let's go for a drive.

Concert hall.

With its excellent acoustics, outstanding design and elegant lighting, the powerful Bang & Olufsen® Surround Sound System fills the BMW 6 Series interior with rich, authentic sound.

Sixteen speakers in the BMW 6 Series Coupé and 12 in the Cabriolet generate 1000-1200 watts and a maximum of 118 decibels of acoustic pressure. Two subwoofers are under the front seats.

Dynamic design. Innovative technology. Impressive details. The interior of the BMW 6 Series provides a highly rewarding on-road experience – and the on-board entertainment has a central role to play.

The available Bang & Olufsen Surround Sound System, for example, offers a level of sound perfection that even the best home audio systems rarely achieve. Driven by 1200 watts of power, the 16 speakers in the BMW 6 Series Coupé and the 12 speakers in the Cabriolet generate up to 118 decibels of acoustic pressure, turning music into a sensuous feast. You'll feel a bass-heavy drum performance deep in your body; emotional solos will give you goosebumps. Close your eyes – the immediate surroundings of the interior will melt away, leaving you feeling as if you have been transported to a concert hall.

These effects are the product of the finest HiFi components, as well as outstanding digital signal processing. And whether the signals come from the CD drive or a connected MP3 player, in the BMW 6 Series, sound is transferred precisely and cleanly via a specially balanced amplifier. It is then generated by two subwoofers under the front seats, as well as seven midrange and high-range speakers in the dashboard, the interior paneling and rear shelf. With their neodymium magnets and special honeycomb structure membranes, these components are nothing less than first class.

The Bang & Olufsen Surround Sound System was specifically designed to perfectly counter-balance any acoustic disadvantages inherent in car design. Revolutionary Dirac Dimensions Technology calculates and corrects, in advance, all sound distortions arising from the structures

of the interior; asymmetrically positioned speakers also address the issue. The result: clean, natural sound throughout the cabin. Choose the Expanded mode, and music in the BMW 6 Series sounds as if the speakers are positioned around the car at a greater distance from each other than they actually are. Thanks to the Acoustic Lens technology, all on board, wherever they are sitting, will perceive the acoustic pattern of the system with the same degree of quality.

Thanks to its tasteful, modern design, the Bang & Olufsen Surround Sound System is also easy on the eyes. Speaker frames are made of anodized aluminum and discreetly illuminated by white LEDs. In addition, the central speaker in the middle of the dashboard raises and positions the Acoustic Lens. It all combines to make any journey with the Bang & Olufsen Surround Sound System a unique entertainment experience.

Information Provided by:

BMW ConnectedDrive In touch with your world.

Every day, our world is becoming increasingly networked. Many BMW drivers, however, are better connected than the rest, obtaining information on the road, communicating by phone or email, and always updated on the latest events. BMW ConnectedDrive encompasses all these services, including traffic features that allow BMW vehicles and their occupants to network with the outside world.

BMW CONNECTED DRIVE: A MELDING OF IMPRESSIVE IDEAS AND INNOVATIVE TECHNOLOGY.

Wherever the road may take you, you'll always be in touch, thanks to BMW ConnectedDrive. These advanced safety, convenience and infotainment capabilities make any trip easier and more pleasurable than ever before.

Park Assistant (available on the BMW 650i Cabriolet) makes parking a breeze by searching for suitable parking spots and then steering your vehicle into them. Simply press the "Park Assistant" button, then drive along potential parking spaces on the left or right side of the road, staying below 35 km/h and no more than 1.5 metres away. Using ultrasonic sensors integrated into the side indicators, the system searches for and measures parking spaces. When a space at least 1.2 metres longer than your vehicle is spotted, it is shown on your Control Display. Shift into reverse and Park Assistant takes control of steering your vehicle into the selected space; you operate the accelerator and brake pedals. The acoustic and visual warnings of Park Distance Control (PDC) provide assistance.

Rear-view Cameras with Surround View show the surroundings on the Control Display, for enhanced visibility. The Top-view Camera provides a bird's-eye view of the road alongside the doors. These images, taken by cameras positioned in the exterior mirrors, help guide you when manoeuvring in tight spaces. Side-view Cameras in the front bumpers show traffic approaching the front of the vehicle from the sides, such as when exiting a garage. The Rear-view Camera, located behind the BMW badge on the trunk lid, shows the area behind the vehicle. Working with Park Distance Control, interactive guidelines indicate if the vehicle can fit in a parking space, and display parking trajectories and turn angles.

Active Cruise Control with Stop & Go function and Front Collision Warning System lets you preset both desired speed and following distance. When Active Cruise Control recognizes slower vehicles ahead, it reduces your speed to maintain a preset distance. Once the lane ahead becomes free, the system accelerates up to the desired speed. In slow-moving traffic, Stop & Go can bring you to a complete stop, if needed. The Front Collision Warning System alerts you if your vehicle is in danger of running into the vehicle ahead. If necessary, the brake system also prepares to engage. Even when not using the Active Cruise Control technology, the Front Collision Warning System is still active.

STAY TOTALLY IN TOUCH
WHEREVER YOU GO – WITH
BMW CONNECTED DRIVE.

Whether you're far from home or just in the next town, BMW Assist™ offers convenience and peace of mind. There are new ConnectedDrive features that extend BMW's leadership in wireless communications. Marvel at an extensive array of new Mobile Office functions. Get a visual image of your callers. With BMW Assist, you enjoy all this – and more.

BMW Assist gives you peace of mind knowing that a friendly response specialist is there to help you 24/7, at the touch of a button. The Safety Plan includes Advanced Automatic Collision Notification, Emergency Request (SOS), TeleService, Enhanced Roadside Assistance, Door Unlock, Stolen Vehicle Recovery, Customer Relations and MyInfo.

Use the time you spend in your vehicle even more effectively with BMW's **Mobile Office** feature.¹ For example, when your vehicle is paired with a selected Bluetooth® interface, text messages and emails are transferred to your iDrive Display screen – and our system even reads them aloud to you. Thanks to Bluetooth audio streaming, you can enjoy wireless playback of your music files; your personal audio library can even be accessed via the iDrive Controller.

¹ Not all mobile phones are compatible with Mobile Office, and some compatible phones support a limited number of Mobile Office functions. Please contact your local BMW Retailer for details.

What's on today's agenda? Bring up the **Calendar** and **To-do List** on your Display screen while en route, to help you stay on schedule. Need to call your 11 o'clock appointment? Use the iDrive Controller knob to **click on the phone number** in the Calendar – and it's ringing. Meeting with several people? Conduct conference calls; the Display screen keeps you informed of the status of incoming calls. Who's calling you? If you've uploaded photos to your on-board phonebook, you'll see the caller's picture. Even missed calls are listed on the Display screen. It's never been easier to stay in touch while in transit.

Enhanced functions for the iPod® and USB adapter add to the ease and pleasure of using your iPod or iPhone®. Want to know which CD that song comes from? The album cover is shown on your Display screen. Don't purchase additional cables – your iPod or iPhone's original USB cable connects to your BMW's USB port. Another rare feature: with BMW Assist and Bluetooth audio streaming, you can wirelessly play music through the BMW audio system from any Bluetooth compatible music player or mobile phone, from anywhere in your vehicle. In fact, the audio library appears on the Display screen, where you can use the iDrive Controller knob to make your selection.

MyInfo allows you to send locations and street addresses to your BMW from Google Maps.™ Destinations and phone numbers can be accessed and exported to your Navigation system for immediate route guidance, while you can call the destination with your Bluetooth linked phone.

"Whenever I'm far from home, I have peace of mind knowing that BMW Assist is right there, ready to help me should I need it."

BMW Apps lets you access Social Networks, music PlugIn and Video Playback through your iPhone, and see them on the Display screen.²

Please note: Not all features available while vehicle is in motion; see dealer for details.

Access content from your **Twitter™** and **Facebook®** accounts to stay on top of what's happening with friends and family.² The system can even read posts aloud, so you can keep your focus on the road. You can quickly post prewritten tweets that are further personalized by your BMW to let everyone know where you are and that you're enjoying the drive.

When you select **PlugIn** from the BMW Apps menu, the iPhone exports a typical iPod look and control to your BMW through the video connection.² You can then search for your favorite music by playlist, artist, album, song, genre or composer, just as you would on your iPhone.

Please note: The BMW App must be installed on your iPhone for the PlugIn to connect.

² Requires BMW Apps option and an iPhone.

BMW EfficientDynamics

Less emissions. More driving pleasure.

BMW is passionate about researching and developing systems that ensure advanced and efficient mobility. Which is why the BMW 6 Series Coupé and Cabriolet, like every BMW, come with comprehensive, multi-award-winning BMW EfficientDynamics technology. BMW EfficientDynamics innovations reduce fuel consumption and CO₂ emissions while maximizing engine output and dynamic performance. Less fuel, more driving pleasure – a contradiction that BMW has resolved once and for all.

BMW Vision EfficientDynamics: Vision becomes reality. In 2014 BMW plans to debut the BMW Vision EfficientDynamics test model – a 2+2 sports car featuring groundbreaking plug-in hybrid technology that combines sports-car performance with compact-class consumption. Powered by the latest-generation, full-hybrid system, the vehicle – in concept form – generates a total of 328hp through a 161hp, three-cylinder turbo diesel engine with 214 lb-ft of torque, as well as a hybrid synchronous engine on the front axle and fully hybrid drive system on the rear axle. With a range of up to 700 kilometres, its ratio of performance to fuel consumption is without equal, positioning BMW as the world's leading manufacturer of exceptionally efficient, sporty vehicles.

BMW EFFICIENT DYNAMICS. VEHICLES THAT REQUIRE LITTLE AND GIVE A LOT.

BMW was one of the first automotive manufacturers to pursue efficient driving technologies – one part of our award-winning sustainability strategy. Our commitment to EfficientDynamics means we are continuously developing innovative systems that bring us closer to our long-term goal of emissions-free mobility. However, we remain equally committed to driving pleasure, which is being pursued in different ways. First, there is the continuing optimization of conventional diesel- and gasoline-powered models. Second, BMW hybrid vehicles are already on the road. Third, the first 100% electrically powered BMW – the BMW ActiveE – is being distributed in a field trial to customers. And fourth, the fleet of BMW Hydrogen 7 vehicles impressively demonstrated the potential for combining hydrogen drive with a combustion engine.

Since 1995 BMW has been able to reduce the CO₂ emissions of its entire fleet by approximately 30%. BMW has rolled out more than two million vehicles equipped with EfficientDynamics: 31 models already produce less than 140g of CO₂ per kilometre, and BMW intends to achieve a further 25% reduction by 2020. BMW EfficientDynamics represents the most comprehensive package of innovative technologies currently in production, for reducing fuel consumption and emissions while simultaneously creating The Ultimate Driving Experience.®

Different paths to the same destination: unmistakable BMW driving pleasure.

In early 2010 BMW launched its first production models with hybrid drive: the BMW ActiveHybrid 7 and the BMW ActiveHybrid X6. Both models offer an unparalleled combination of increased fuel efficiency, reduced emissions and thrilling performance. The BMW ActiveE, with its innovative 100% electric drive system, will introduce a whole new form of dynamic performance, paving the way for the future of emissions-free mobility. Finally, a completely new vehicle concept targeted at meeting the need for sustainable mobility in fast-growing metropolitan areas will soon become reality: the BMW i3.

AT A GLANCE: BMW EFFICIENT DYNAMICS INNOVATIONS IN THE BMW 6 SERIES COUPÉ AND CABRIOLET.

BMW TwinPower Turbo technology.

This innovative turbocharging technology efficiently reclaims the energy contained in exhaust gases, using both turbochargers in the BMW 650i.

High Precision Injection.

In this latest-generation direct fuel injection system, the piezo injectors are positioned very close to the spark plugs. They inject fuel at high pressure, with extreme precision, for very efficient combustion.

Double-VANOS valve timing.

BMW's VANOS valve timing system "steplessly" varies the points in the combustion cycle when valves open and close. Double-VANOS refers to the fact that it operates on both the intake and exhaust camshafts. Electronically controlled in response to engine speed, temperature and load, it reduces emissions, and enhances low- to medium-speed torque, as well as fuel efficiency.

8-speed Sport Automatic transmission.

The close spacing of gear ratios in this 8-speed Sport Automatic transmission makes maximum use of the optimum rev range, reducing fuel consumption and allowing smoother shifts.

Optimized fuel efficiency.

BMW EfficientDynamics enables every BMW engine to provide maximum power while using a minimal amount of fuel. In the BMW TwinPower Turbo V-8 engine, two parallel turbochargers are positioned between the cylinder banks. This compact design with shorter intake paths provides power and performance at a previously unattainable level.

Brake Energy Regeneration.

The alternator generates electricity only when the driver takes his or her foot off the accelerator. Kinetic energy that was previously unharnessed is transformed into electrical energy, which is then fed into the battery. In this way, electricity is generated without consuming additional fuel.

Information Provided by:

IT ALL REVOLVES AROUND YOU. SEVERAL THOUSAND TIMES PER MINUTE.

Engines that power innovation. Year after year, BMW engines have garnered accolades for their output, refinement and high-revving ability. Beneath the long hoods of the BMW 6 Series Coupé and Cabriolet are two of the world's most sophisticated engines. They are designed to deliver on BMW's EfficientDynamics philosophy: increased power with decreased fuel consumption and emissions. You'll enjoy the thrill of BMW performance while helping to protect the environment every day.

BMW 650i Cabriolet and 650i xDrive Coupé and Cabriolet.

BMW's 4.4-liter TwinPower Turbo V-8 is the essence of an iron fist in a velvet glove. Calling on two parallel turbochargers, its robust 400hp accelerates the 650i xDrive Coupé smoothly from 0 to 100 km/h in 4.9 seconds, while the boost from 450 lb-ft of peak torque is sustained from 1750 all the way to 4500 rpm. Thanks to High Precision injection, this V-8 is also extremely fuel efficient.

A choice of quick-shifting transmissions.

Make full use of the BMW 6 Series' deep reserves of power through a seamless 8-speed Sport Automatic transmission, which also lets you shift gears using steering wheel-mounted paddles or the shift lever. For those who desire even greater hands-on control, the BMW 650i Cabriolet can also be ordered with a smooth-shifting 6-speed manual transmission.

THE BEST FOUNDATION FOR DYNAMIC PERFORMANCE: A SUPERIOR CHASSIS.

The BMW 6 Series Coupé and Cabriolet can be equipped with a whole host of innovative technologies to help you get the most out of each drive. Many of these systems are intelligently networked with each other, maximizing your active safety quotient – and your driving pleasure.

Integral Active Steering.

At speeds of up to 50 km/h, with Integral Active Steering, a small turn of the steering wheel yields a greater turn of the front wheels for more direct response. This feature also steers the rear wheels up to 2.5 degrees in the opposite direction, giving the effect of a shortened wheelbase for enhanced manoeuvrability. When changing lanes at speeds over 80 km/h, both front and rear wheels turn in the same direction, giving the feel of an extended wheelbase. While you experience greater responsiveness and directional stability, your passengers enjoy greater ride comfort from reduced body roll. (Available only on the BMW 650i Cabriolet.)

8-speed Sport Automatic transmission.

This transmission adjusts to your style – from comfortable cruising to very dynamic driving. To change gears, you can use the selector lever or steering wheel-mounted gear shift paddles. In Sport mode, modified settings allow very quick adjustments in engine speed, for minimal shift times. The close spacing of the eight gears optimizes acceleration, while also maximizing efficiency and comfortable shifting.

Driving Dynamics Control.

In vehicles equipped with the 8-speed Sport Automatic transmission, you can adjust the driving characteristics by simply pressing a button. Choose from four settings, COMFORT, NORMAL, SPORT and SPORT+, to adjust engine-throttle response, transmission shift characteristics, and power-steering assist. In addition, the traction control feature can be disengaged when driving on sand, gravel, or deep or packed snow.

Dynamic Damping Control.

Ride-enhancing Dynamic Damping Control instantly adjusts shock absorbers from the softest to the firmest settings. The result is exceptional ride comfort and fluid handling at all times – during changes in vehicle speed, load, or road and driving conditions.

xDrive intelligent All-Wheel Drive system.

BMW's intelligent All-Wheel Drive system in the 650i xDrive Coupé and 650i xDrive Cabriolet provides maximum traction, even in the most slippery conditions. The system monitors data such as engine speed, steering angle, wheel speeds and acceleration. On smooth, dry roads, more power is normally sent to the rear axle, giving vehicles with xDrive the feel of their rear-wheel-drive counterparts. But hit a wet uphill curve, for instance, and even before wheelspin can occur, the system immediately recognizes any need for a change in power distribution. Using a controlled clutch, it sends more torque to the front axle to enhance stability and achieve greater traction.

Every BMW vehicle is engineered to provide the most thrilling and precise connection to the road. This is achieved through innovative axle technologies that increase stiffness front and rear, while reducing weight through the use of lightweight aluminum components. The BMW 6 Series' near-perfect 50/50 weight distribution offers strikingly well-balanced road feel, with responsive characteristics virtually unmatched by any competitor on the road today.

xDRIVE ALL-WHEEL DRIVE KEEPS YOU ON TRACK – WHATEVER THE CONDITIONS.

xDrive.

For maximum traction even in difficult road conditions. With the xDrive intelligent All-Wheel Drive system and Dynamic Stability Control (DSC), BMW models remain stable and on track. xDrive monitors data such as steering angle and wheel speeds. As soon as these indicate that the vehicle is at risk of oversteer or understeer, the system responds within fractions of a second, using a controlled clutch to flexibly redistribute drive torque between the vehicle's axles and ensure optimum ground contact. In this way, xDrive combines the advantages of all-wheel drive – traction, safety and stability – with the hallmark agility of a BMW.

8-speed Sport Automatic transmission Steptronic.

This transmission enables very fast and very comfortable gearshifts using the selector lever or gearshift paddles on the sport leather steering wheel. The close spacing of the eight gears optimize acceleration, while also improving efficiency and shift comfort.

Dynamic Stability Control (DSC).

Highly sensitive sensors track vehicle status on a permanent basis and optimize directional stability and traction as required, via engine and brake management interventions. This makes it easier to control the vehicle even in poor road conditions, enhancing both safety and driving pleasure. The xDrive models also include Hill Descent Control (HDC), ensuring that the BMW automatically handles steep descents safely, at just a little more than walking speed, without the driver having to use the brakes. (Available on xDrive models.)

Passive safety.

All safety components complement each other perfectly. Six airbags offer specific protection, while active headrests at the front reduce the risk of whiplash injuries. In addition, the Advanced Automatic Collision Notification¹ feature forwards relevant data such as injury risk and vehicle location to the emergency services. In this way, rescue coordinators can assess likely injuries more quickly and act more effectively.

Information Provided by:

¹ Requires active BMW Assist Subscription.

HIGH-TECH BODYGUARDS: ACTIVE AND PASSIVE SAFETY.

The 6 Series is designed with BMW's full range of standard state-of-the-art active and passive safety technologies. Active safety features, such as Xenon Adaptive Headlights, powerful engines and large brakes, help you see and respond to potentially dangerous situations. Should an accident prove unavoidable, passive safety features, such as airbags and, in the BMW 6 Series Cabriolet, Rollover Protection, are designed to help protect you and your passengers. After a severe impact, a host of features spring into action: the doors automatically unlock, headlights and taillights flash, the starter cable is disconnected from the battery and the fuel supply is cut off. Should any airbags deploy, BMW Assist™ response specialists are automatically alerted and notified of your location.

Dynamic Stability Control (DSC). This system provides remarkable tenacity on slippery road surfaces. If it senses over- or understeering, it modulates engine power and can apply brakes individually to help keep the vehicle under control and going in the intended direction. Start-off Assistant, a feature of DSC, prevents the vehicle from rolling backward on a hill for 1.5 seconds after taking your foot off the brake. The system also includes Brake Fade Compensation, which lets you use the same amount of pedal force, even when the brakes are heated; Brake Stand-by, which pre-tenses the brakes for quicker action if you suddenly remove your foot from the accelerator pedal; and Brake Drying, which periodically brings the brake pads into contact with the rotors to eliminate accumulated moisture when it rains.

Run-flat tires. Thanks to reinforced sidewalls, run-flat tires maintain their shape and rim position even after suffering a complete loss of pressure. In fact, you can drive up to 240 kilometres at reduced speeds, so you don't have to stop in an unsafe area to change a tire or wait for Roadside Assistance. The Tire Pressure warning system alerts you when there is a drop in tire pressure; if the loss is severe, an acoustic warning is triggered.

Dynamic Traction Control (DTC). This sub-function of Dynamic Stability Control raises the threshold for engine and braking intervention. Activated by simply pushing a button, this traction mode allows increased yet controlled wheelslip, helping to improve propulsion in deep snow or sand. When activated, it also provides an even sportier driving style.

Xenon Adaptive Headlights for low- and high-beams enhance illumination of the road ahead at night or in poor visibility. Four LED Corona headlight-surrounds, which can be used as Daytime Running Lights, also serve as parking lights. Adaptive Headlights provide optimum illumination of the road ahead when the car enters a turn. Light distribution is automatically adapted to the road speed and steering angle. Cornering Lights, positioned in the two inner headlights, are automatically activated by using the turn indicator or changing the steering wheel angle, even when the vehicle is at rest.

Airbags. In the event of a collision, BMW's supplemental restraint system (SRS) determines which airbag(s) to deploy for optimal protection. When a safety belt is used, airbags deploy only at a higher crash severity; the force of the deployment depends upon the severity of the impact. Four airbags offer specific protection: front airbags with advanced technology for driver and front passenger, and front-seat-mounted side-impact airbags.

Note: These pictures of airbags are for illustrative purposes only. Depending upon the type of accident, none, some or all airbags may deploy.

Active Head Restraints in the front seats reduce the risk of whiplash or neck/head/spine injury. When sensors detect a rear-end collision, the headrests rapidly and automatically pivot forward, supporting the driver's and front-seat occupant's heads.

Rollover Protection System, together with the reinforced A-pillars and windshield frame, is designed to create an occupant "safety cell" in the BMW 6 Series Cabriolet. Highly accurate sensors continually monitor vehicle angle, longitudinal and lateral acceleration, and amount of ground contact. When data indicate a rollover is imminent, rollover bars integrated behind the rear-seat headrests are deployed. Within fractions of a second they spring up and lock into place, helping to withstand rollover forces.

Body stiffness. The intelligent use of high-strength multi-phase steel and aluminum provides a high degree of body stiffness and crash resistance. Components, such as the A-pillars and windshield frame, include special reinforcements to provide optimum occupant protection.

THE ART OF KEEPING YOUR EYES WHERE THEY BELONG.

In addition to vehicle speed and Check Control data, the full-colour Head-up Display can show Navigation system prompts, as well as warning messages from the Lane Departure Warning system and Night Vision with Pedestrian Detection system.

The full-colour Head-up Display projects all important information in the driver's direct field of vision. This lets you keep track of everything that's happening on the road ahead.

The term "eyes-off-the-road time" means the amount of time it takes you to read information displayed in a vehicle's instrument panel, such as current vehicle speed and Navigation system instructions. Depending on the complexity of the data, eyes-off-the-road time can last between one and three seconds. However, in just two seconds, a car driven at 100 km/h will have traveled a distance of 55 metres with the driver unable to pay full attention to what's happening on the road.

In 2003, BMW was the first European automotive manufacturer to offer a Head-up Display.

The concept of Head-up Display technology is to project essential information onto the windshield in the driver's field of vision. The projected image appears at an ergonomically ideal distance, seeming to hover above the front edge of the hood. The name of this technology speaks for itself: you can literally

keep your head up. The system allows you to keep an eye on key driving information while staying focused on the traffic ahead – so looking at the instrument panel is rarely necessary. Understanding data projected by the Head-up Display takes only half as long as reading them off the instrument panel. This minimizes the risk of missing the brake-lights of a vehicle ahead, as well as potential hazards in the roadway.

The display creates an optical illusion of hovering further out over the hood, to make focusing on traffic easier.

The Head-up Display projector is positioned behind the instrument panel. The image is projected onto the windshield, and reflected by it. To you, the driver, it does not appear on the windshield itself – instead it seems to hover outside the vehicle, at a distance of around two and a half feet. This virtual lengthening of the viewing distance makes reading data off the Head-up Display much easier than consulting the instrument panel. Your eyes do not have to adjust from near to far, or adapt from the well-lit road to the darker displays in the cockpit. This increases comfort and reduces eye strain.

The 6 Series Coupé and Cabriolet feature a full-colour Head-up Display.

While previous versions of the Head-up Display showed only red, orange, yellow and green, the latest system can display the entire colour range. In addition to vehicle speed and Navigation instructions, the Head-up Display can show warning messages from driver assistance systems, such as the Lane Departure Warning and the infrared BMW Night Vision with Pedestrian Detection. The Head-up Display greatly reduces eyes-off-the-road time, providing an important contribution to active safety. You can access the Head-up Display features and adjust brightness and image position via the iDrive Controller. As a result, you can react faster in extreme situations – and you'll be less prone to fatigue.

From the driver's point of view, the Head-up Display seems to hover above the front edge of the vehicle's hood.

Express yourself.

Let the BMW 6 Series Coupé reflect your true nature. Outside, your sport-tuned personality is expressed in the gleam of ultra-thin 20" V Spoke alloy - Style 356, wheels and performance tires, set off by the subtle glow of

Mineral White Metallic paint. Inside, the warmth of Cinnamon Brown Nappa Leather rimmed with contrast stitching and Finesline Oak Wood trim reflect your sensuous side.

Inner tranquility.

It's easy to remain unruffled in traffic. First, close the windows of your BMW 6 Series Coupé and immerse yourself in the superb sound system. Then fill your eyes with the beauty of the Ivory Dakota Leather interior, tastefully set

off by Finesline Oak Wood Trim. Once you arrive at your destination feeling rejuvenated, the exterior painted in rich Space Gray Metallic reflects your becalmed attitude.

Dynamic character.

Your exciting first experience associated with the BMW 6 Series Cabriolet: selecting the exterior and interior colours and trim. Express your powerful passion by combining Black Sapphire Metallic paint and Black softtop with the fiery richness of Vermilion Red Nappa Leather upholstery. The Aluminum

interior trim boldly anchors the vibrant colours, generating a look that's both dynamic and sophisticated. The addition of massive 20" V Spoke alloy wheels - Style 356 with low-profile performance tires rounds out the confident stance.

Elegant appearance.

A composition of pure style starts with rich Havanna Metallic exterior paint, complemented by the warmth of supple Ivory Nappa Leather and Finesse Oak Wood interior trim. Add the supreme comfort of Active, ventilated, Multi-contour front seats to make every drive a pleasurable event. The sleek

exterior is enhanced by the gleam of 19" Star Spoke alloy wheels - Style 367. The BMW 6 Series Cabriolet attracts many admiring glances, whether the triple-lined softtop is up, creating a coupé-like silhouette, or neatly folded inside the trunk.

The M Sport Package.

The M Sport Package puts the emphasis on the BMW 6 Series' athletic capabilities.

When equipped with the M Sport Package, the BMW 6 Series reveals in its serious performance side. LED foglights enhance the way it looks and helps you see in the dark. Subtly reshaped by the M Aerodynamics package, the BMW 6 Series takes on a more aggressive stance from the front air dam to the rear bumper. 20" Double Spoke alloy wheels take full advantage of the inspiring cornering and performance capabilities of the 6 Series Coupé. Open the door and you are welcomed into the interior by the gleam of aluminum M door sills; the sporty metallic look is repeated in the choice of exclusive Aluminum Hexagon interior trim. Sit back in supportive Multi-contour seats and grab the thick M sport steering wheel. Above you, racing-inspired ambiance continues with an Anthracite Alcantara headliner in the 6 Series Coupé, and in the 6 Series Cabriolet, the availability of the Moonlight Black softtop. Finally, start up the engine to hear the athletic purr of the sound-enhancing sports exhaust system.

M entry door-sill finishers with chrome inserts and the M logo perfectly complement the M Sport Package.

Multi-function M sport steering wheel has a thick textured rim and thumb indents for performance driving.

Rear diffuser features a sporty bumper insert and dark chrome tailpipe frames.

Double Spoke - Style 373M, 20 x 8.5 front, 20 x 9.0 rear light alloy wheels with 245/35 front and 275/30 rear run-flat performance tires.

BMW Individual. The most exclusive way to drive a BMW.

For those who dream of a vehicle that reflects their own unique personality, there is BMW Individual.

The BMW Individual collection of exclusive paints, leathers and trims takes the BMW 6 Series to all-new heights of quality and exclusivity. Only the finest, perfectly matched materials are selected to create each expertly handcrafted interior.

BMW Individual exterior colours are noted for their brilliant, iridescent effects. One dramatic example is the Ruby Black Metallic paint finish. Under the light, it develops a dark red luminosity that seems to emanate from countless ruby pigments. This contrasts with the BMW Individual Platinum Full Merino Leather, giving the BMW Individual 6 Series a compellingly balanced character.

Or consider the BMW Individual 6 Series in Tanzanite Blue Metallic, which owes its name to tanzanite – a precious mineral distinguished by its perfectly clear dark blue crystals. In direct sunlight, this deep-blue finish is given a radiant glow by turquoise pigments beneath the surface. Juxtaposed against this extraordinary exterior is an interior upholstered in BMW Individual Merino Leather in Opal White. The naturally silky-soft and breathable surface of this fine-grain leather is rendered in an exquisite colour inspired by the timeless elegance of Mediterranean yachts. BMW Individual White Ash Wood trim, with its unique, delicately marbled finish, perfectly complements the light interior.

20" V Spoke alloy wheels in Style 374 add an elegant gleam to the BMW Individual 6 Series exterior.

The exacting hand craftsmanship of BMW Individual is symbolized by the perfectly matched White Ash Wood interior trim veneers.

Enjoy the rich look and feel of an interior swathed in Opal White Full Merino Leather.

Sink back into a sumptuous interior that extends all the way to the leather-covered dashboard.

BMW 6 Series Cabriolet Leather includes Sun-Reflective Technology.

¹ Nappa Leather includes seat surfaces and backrests of front and rear seats, headrests, side seat and backrest parts, interior door mirror, and armrests in the doors and rear paneling. Requires Comfort seats.

² BMW Individual Merino Leather includes front and rear seats, headrests, door mirrors, center console, armrests and the lower part of the instrument panel. Upper part of the instrument panel and lower door panel are covered with Black Nappa Leather.

³ Requires M Sport Package.

⁴ Not available with M Sport Package.

⁵ Not available with Merino Leather; included with leather-covered instrument panel option. Contrast stitching matches seat colour, except for Gray contrast stitching with Black Nappa Leather upholstery.

Equipment features and options.

Adaptive LED headlights for both high and low beams project an intense white light that simulates daylight for excellent visibility. Convenient features that improve visibility include Automatic headlights, Adaptive turning, Cornering Lights, four Corona headlight-rings, and Automatic high beams.

Foglights with LED technology improve visibility while adding a distinctive nighttime look.

Front signature kidney grille is framed in chrome.

Xenon Adaptive Headlights optimize road illumination when entering a turn or corner, helping to enhance visibility when driving at night. Adaptive sensors continuously monitor the angle of the steering wheel to determine the direction in which your vehicle is heading. The outer headlights swivel accordingly, up to 15 degrees left or right.

Xenon low- and high-beam headlights illuminate the road ahead and to the side with brilliant clarity. An auto-leveling feature adjusts for varying passenger and cargo loads.

LED Corona headlight-rings that frame the perimeter of both headlights and high beams also act separately as Daytime Running Lights and parking lights.

Taillight cluster with taillight, brakelight and turn-signal indicators incorporate LED technology for greater visibility.

Adaptive Brakelights warn following vehicles by increasing in brightness when the intensity of your braking action is increased.

xDrive is an intelligent All-Wheel Drive system that distributes drive power flexibly and variably to the front and rear axles for maximum traction, directional stability and driving safety in every road situation. This is the first time it is available in the BMW 6 Series.

Power tilting glass panel roof on the BMW 6 Series Coupé gives the interior an even brighter, more spacious feel. It tilts up for greater ventilation, while a power sliding interior roofliner keeps the hot sun out.

BMW 6 Series Cabriolet softtop, with its streamlined, aerodynamic shape, gives the Cabriolet a coupé-like silhouette. Triple-lined, the middle layer helps reduce wind noise and enhances insulation all year round. In conjunction with the retractable rear window, it provides effective airflow. Available in Black, Beige and Moonlight Black.

Fully automatic roof operation.

Feel the need for sky? At speeds up to 40 km/h, simply press a button and in just 19 seconds this fully automatic softtop lowers and stores neatly in the trunk. It takes a mere 24 seconds to reverse the process. In Cabriolets equipped with Comfort Access, the softtop can also be opened via remote control.

Power glass rear window can be raised or lowered independently of the softtop. Raised with the softtop down, it minimizes road noise and breeze. When the top is up and the rear window is down, you enjoy enhanced ventilation throughout the cabin.

Cabriolet trunk with a compressible softtop storage box. The softtop takes up very little space when stored in its compartment behind the two rear seats. Even with the softtop down, the BMW 6 Series Cabriolet trunk can hold two golf bags. When the roof is up, the unused softtop storage compartment can be compressed, increasing available trunk space.

Equipment features and options.

Star Spoke - Style 367, 19 x 8.5 light alloy wheels with 245/40R-19 run-flat all-season tires.

V Spoke - Style 356, 20 x 8.5 front, 20 x 9.0 rear light alloy wheels with 245/35R-20 front and 275/30R-20 rear run-flat performance tires.

Three-spoke leather-wrapped multi-function sport steering wheel, featuring power tilt/telescoping adjustments, lets you keep both hands on the steering wheel while adjusting the audio, as well as your BMW-tested, Bluetooth® enabled mobile phone. The left-hand buttons operate all Cruise Control functions, while those on the right control audio functions, such as the radio, your mobile phone and Voice command.

Instrument cluster displays speedometer, tachometer, fuel gauge and engine oil temperature. Below the four dials is a high-resolution Info Display that shows data such as current fuel consumption, range, on-board computer functions, mileage and trip information.

Black Panel Display technology shows the instrument cluster as a matte black surface when the ignition is switched off, with only the chrome rings of the circular instruments visible in 3-D. When the ignition is switched on, the chrome rings turn into full circles, and the dials and displays appear. Turning on the ignition also activates the Check Control messages.

Contrast stitching is included with the extended Black Nappa Leather instrument panel, door and side trims, and center console. Two distinctively stitched flat-felled seams of the same colour as the Nappa Leather upholstery add a custom effect to the instrument panel to embellish the interior. Contrast stitching for Black Nappa Leather upholstery is Gray.

Heated steering wheel is a feature that, like heated seats, becomes a "must-have" once it's experienced. The heating switch is conveniently located on the multi-function steering wheel.

8-speed Sport Automatic transmission with Adaptive Transmission Control (ADT) provides extremely fast synchronized shifting in either the Sport or Manual shift mode. Includes racing-inspired steering wheel-mounted paddle shifters.

Driving Dynamics Control adjusts driving characteristics by pressing a button to select one of four settings. Choosing COMFORT, NORMAL, SPORT or SPORT+ mode adjusts the engine-throttle response, shift characteristics and power-steering assist. Another button disengages the traction control feature when driving on sand, gravel, or deep or packed snow.

Ceramic controls present a deep black glazed finish to various controls, such as the iDrive Controller bezel, front and rear ventilation controls, and audio controls. The black ceramic provides a rich, custom look and unusually unique feel to the interior.

Equipment features and options.

Ambiance lighting adds the drama of a warm reddish light that runs from front to rear beneath the inner door ledge. Ambiance lighting also includes soft on/off interior lights; reading lights; vanity mirror lighting; illumination in the front footwells, trunk, and storage compartments in the center console and doors; and illuminated door trims and entry sills with metal inserts.

Comfort Access unlocks and lets you start the vehicle simply by carrying the remote fob in a pocket or purse. In the Cabriolet, this feature also lets you raise and lower the roof remotely. Vicinity lights are included in the door handles.

Soft-close doors feature gently closes the doors.

Black Nappa Leather with contrast stitching covers the instrument panel, upper door, side trims and center console, extending the rich look and feel of the interior. The contrast stitching matches the Nappa Leather seat upholstery colour; Black Nappa Leather seats come with Gray contrast stitching.

Control Display shows the functions supported by the iDrive Controller, vehicle settings and radio, as well as the Navigation system. The free-standing, high-resolution flatscreen 10.3" colour monitor is glare-free, and positioned at an ideal viewing height and distance.

Integrated Owner's Manual provides immediate access to all vehicle-specific information. This digital version of the traditional printed manual that is included with your BMW can be accessed via the iDrive and is shown on the Control Display. The system's user-friendly features include multi-media elements, such as animations and dynamic illustrations.

BMW Night Vision with Pedestrian Detection can scan up to 300 metres ahead using an infrared camera in the front bumper.¹ It can detect people and animals, as well as the direction of their movement, up to approximately 100 metres away, and displays their presence on the iDrive screen and Head-up Display (if so equipped). The system gives a visual warning as soon as pedestrians or animals move toward the road, alerting you to potential dangers significantly earlier, so you can react more quickly.

¹ Under optimal road conditions. Night Vision performance is also limited by rain, fog, humidity and other weather conditions.

Active Blind Spot Detection warns you if a vehicle is in your blind spot, or if a vehicle is approaching at high speed in the passing lane, by displaying a visual signal in the exterior mirror casing. The system also warns you by making the steering wheel vibrate.

Rear-view Camera shows, on the Control Display, the area behind your vehicle. Working with Park Distance Control, interactive guidelines indicate if a parking space can accommodate your vehicle, and display parking trajectories and turn angles. Located behind the BMW badge on the trunk lid, the feature is activated by engaging either the reverse gear or the iDrive system.

Park Distance Control (PDC) sounds a warning beep as your front or rear bumper approaches an object, turning into a constant tone when the item is less than 12 inches away. Distance to the item is also shown in the Control Display.

Park Assistant searches for suitable parking spots and then steers your vehicle into them. Press the "Park Assistant" button, then drive along potential parking spaces on the left or right side of the road, staying below 35 km/h and no more than 1.5 metres away. Using ultrasonic sensors integrated into the side indicators, the system searches for and measures parking spaces. When a space at least 1.2 metres longer than your vehicle is spotted, it is shown on your Control Display. Shift into reverse and Park Assistant takes control of steering your vehicle into the selected space; you operate the accelerator and brake pedals. Acoustic and visual warnings of Park Distance Control (PDC) provide assistance.

Equipment features and options.

HiFi Sound System Professional with Radio Data System (RDS), Auto-Store, and 3-channel FM diversity antenna. Includes 12 speakers (16 speakers on the Coupé) with DIRAC signal processing and Surround mode, discrete 5.1 multi-channel sound, 7-band equalizer incorporating an analog amplifier with 500-watt (600-watt on the Coupé) output power and vehicle-specific equalizing.

2-zone automatic climate control allows driver and front passenger to select individual temperatures and choice of fan speeds, as well as choose automatic or manual airflow and recirculation. The automatic recirculation control activates whenever certain air pollutants are detected. The system also offers a mist-up sensor, solar sensor and residual heat use.

Heated front seats are a welcome feature for driver and front passenger in cooler weather. By pressing the icon button, seat surface and backrest are heated and quickly radiate comfortable warmth in your choice of settings.

20-way power Multi-contour front seats conform to your body to provide optimum support and exceptional comfort over long distances. In addition to horizontal, vertical and angled adjustments, Multi-contour seats include an articulated upper backrest, comfort headrest (two-way power, two-way manual "relax headrest"), and four-way power-adjustable lumbar support. Both driver's and front-passenger's seats include memory function.

Active front seats (not shown) imperceptibly raise and lower the left and right halves of the seating surface. This movement keeps the spine in motion, exercising various support muscles to help reduce fatigue on longer trips.

Ventilated front seats (not shown) gently blow warm or cool air through the micro-perforations in the leather to keep driver and front passenger comfortably dry in hot weather, and warm in colder weather.

10-way power driver's and front passenger's seats with horizontal, vertical and angled adjustments.
Lumbar support adds four-way power-adjustable support for the lower back.
Memory function retains settings for driver and front passenger seats, steering wheel and outside mirrors.

Integrated safety-belt system provides optimal protection and ergonomic comfort for the driver and front-seat passenger. The seat-integrated design also helps make entering and exiting the rear cabin easier.

Rear seating consists of two individual seats. Both include an ergonomic belt system with integrated belt catches, two three-point safety belts and headrests. A LATCH child-seat fastening system is also included in the 6 Series Coupé.

Equipment features and options.

Door entry sills include metal inserts finished in high-gloss chrome with a fine-brushed aluminum surround for durability. When the doors are opened, the BMW logo and adjacent strips in each door sill illuminate – a practical and elegant design feature.

Comfort entry to the rear seats is facilitated by enabling the seatbacks to be released easily with one hand to move the seat back and seat base forward.

Ski bag¹ accommodates up to two pairs of skis or other long objects for practical transport inside the vehicle even when rear seats are occupied. The bag protects transported items as well as the vehicle interior from damage, and can be tucked away out of sight in the backrest when not in use.

¹ Ski bag offered exclusively through BMW Accessories.

Power rear sunshade can be extended with the touch of a button to protect the Coupé's cabin from the sun's rays in warm weather, or retracted to allow the sun to help warm the interior in colder weather.

Original BMW Accessories.

BMW 6 Series Cabriolet: 20" Cross Spoke alloy wheels - Style 312¹.

BMW 6 Series Coupé: 20" V Spoke, bicolour cast alloy wheels - Style 356; carbon-fiber exterior mirror caps.

¹ Wheel Style 312 not offered in Canada.

Snap-in Adapter with USB interface plays stored music through your vehicle's speakers, charges the phone, and accesses the vehicle's antenna for better reception.

Multi-functional trunk mat with collapsible box helps organize cargo and keeps your trunk protected, clean and looking new.

Carbon-fiber exterior mirror caps are perfectly designed for the lines of the BMW 6 Series.

A BMW always delivers a special drive, and Original BMW Accessories make the experience better still. Combining great ideas, immaculate design, and sheer practicality to create innovative solutions. Original BMW Accessories are available in many categories: Exterior, Interior, Communications and Information, and Transport and Luggage.

CRAFT YOUR OWN BMW – BMW.CA/BYO.

At BMW, we believe that the Ultimate Driving Experience is unique. That's why BMW offers one of the widest model ranges of any luxury automotive manufacturer. And each BMW model offers its own universe of personalizing possibilities.

Want to learn more? It's easy to get the latest information on your favorite BMW model. Simply visit bmw.ca and click on the BMW model of your choice. Select **Brochures** to see all the standard features and available options and packages, as well as technical specifications.

You can customize the exact BMW model that fulfills your needs by clicking on **"Build Your Own."** Here you'll be able to select from among the many interior and exterior colours and trims, personalizing options and value-added packages. Build a BMW model that reflects your style, then view it in 360° detail. At the press of a button, see payment and financing options, get a same-day quote, download a product brochure and even schedule a test drive. BMW makes it easier than ever to make your ultimate driving dreams come true, at www.bmw.ca/byo.

BMW Welt. Taking delivery of a new vehicle is a proud moment for every automotive enthusiast. Make it an even more unforgettable experience by visiting the BMW Welt, a state-of-the-art brand experience and delivery centre in Munich. Spend the day marvelling at historic BMWs on display in the Museum, learn about our engineers' newest innovations in the

Technology and Design Studio, and take a tour of our plant to experience with your own eyes the exacting methods used to create every BMW. Then get behind the wheel of your new BMW, where the fascination continues for years to come. To learn more, visit the BMW World online at www.bmw.ca/europeandelivery.

JOY IS THE FEELING OF BEING LOOKED AFTER BY THE BEST.

Service. When you buy a BMW, you can look forward to superb service and comprehensive customer care. 2012 model year BMW vehicles purchased from an authorized BMW Retailer in Canada are covered by No-Charge Scheduled Maintenance for four years or 80,000 kilometres, whichever occurs first. Depending on the model you choose, your car informs you of its service requirement via the Service Interval Indicator or CBS (Condition Based Service). Then simply get in touch with your BMW Service Retailer, who will provide expert care for you and your car. Staffed by highly trained personnel, your BMW Service Retailer is also equipped with the latest computer-aided information and diagnostic tools. Important data such as V.I.N. number, mileage, and current service requirements are all stored on your car key, ensuring quick assessment of your vehicle's status. This means that staff have more time to help you. All in all, quality and safety are the watchwords of BMW Service.

BMW Roadside Assistance.

One of the most extensive roadside assistance programs in Canada. As a holder of the BMW Service Card, you and any additional drivers of your registered BMW will be entitled to an extensive range of services and benefits, including

- Emergency Service Calls
- Towing, in case of Mechanical Breakdown
- Winching
- Trip Interruption Benefits
- Traffic Accident Services
- Emergency Message Service
- Emergency Cash
- Travel Planning Services

For complete details and conditions, please refer to your BMW Warranty and Service Guide.

BMW.ca. Offering the ultimate online experience, our website is designed to offer you access to a wealth of information on BMW Service and BMW Financial Services, in an easy-to-explore format. When you visit our website, you will discover in-depth information on BMW Service, including details on the BMW Service Card, scheduled maintenance, warranty coverage, value service packages, and BMW SPA® services. Always up to date, our easy-to-navigate website allows you to quickly and easily find the information you require on your vehicle's servicing needs.

SHAPING THE FUTURE – RESPONSIBLY.

The BMW Group has been ranked the most sustainable automotive company worldwide in the Dow Jones Sustainability Index for the sixth time in a row. Sustainability is an integral part of our value chain – it encompasses every stage from the development of fuel-saving and alternative vehicle concepts to environmentally friendly production processes and recycling. Our research and development philosophy BMW EfficientDynamics delivers tangible benefits to customers, our climate, and the environment. This is reflected in the reduction of CO₂ emissions by nearly 30 % across our European fleet of new cars since 1995.

JOY COMES IN MANY FORMS.

BMW Financial Services.

BMW Financial Services offers a comprehensive portfolio of leasing and financing solutions, designed to make your transition from showroom to highway hassle-free. For information on how you can benefit from the flexibility, convenience, and expertise that only BMW Financial Services can offer, contact your local BMW Retailer or visit www.BMWfinance.ca. Our comprehensive website allows you to learn about the vast financing and leasing opportunities available. Interactive tools, including an advanced model selector/payment calculator, downloadable guides, and an online credit application, make it easy for you to interact with BMW Financial Services.

Magazine: How do the designers at BMW come up with the next generation of industry-leading vehicles? Who are the people behind the brand and the product? Read about this and much more in BMW Magazine, the official publication from BMW. Not available on newsstands, BMW Magazine is just another exclusive benefit of owning a BMW.

BMW Assist. Providing you with a suite of services that add confidence and convenience to your driving experience. You are just a push of a button away from emergency help, roadside assistance, and much more. When you have the BMW Assist Safety Plan, you enjoy peace of mind whenever you're behind the wheel. Speak to your preferred BMW Retailer or visit www.BMW.ca/assist for more information.

Car manufacturing requires a great deal of water, which is why we've developed an intelligent circulatory system for our factories that ensures water is reused as often as possible. The dream of a manufacturing process that does not produce any wastewater has already been made a reality at our engine plant in Steyr. In 2008, 733,500 engines were manufactured without producing a single drop of wastewater.

Sustainability is taken very seriously at the BMW Group. For this reason, we prioritize environmentally friendly methods of transport such as rail and shipping and work towards capacity optimization. Each year, we cover around 15.8 billion

tonne-kilometres transporting materials and new vehicles. Of this, 79 % of the total transported volume is delivered by sea – which benefits both road traffic and the environment.

The BMW Group has their sights set on tomorrow. Your BMW is part of a comprehensive recycling concept. Every single vehicle can be easily and economically recycled. Please contact your BMW Retailer on all matters regarding the return of your end-of-life vehicle. For more information, visit
