

# THE FIRST-EVER GENESIS GV70

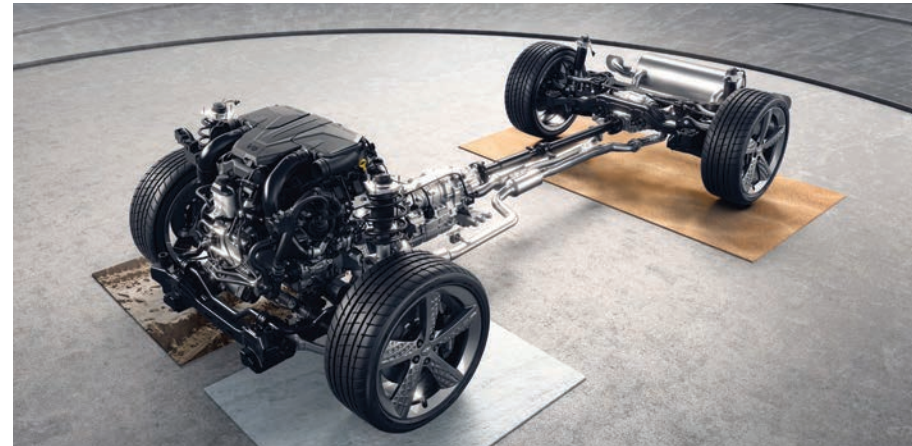

# DISCOVER THE GENESIS GV70

Introducing the first-ever Genesis GV70, a premium urban SUV sporting a design that embodies the athletic elegance of Genesis, a dynamic driving experience, an interior that further enhances the beauty of openness, and state-of-the-art technology for connected vehicles.

# DYNAMIC PERFORMANCE

## 01 ALL-WHEEL DRIVE

The standard All-Wheel Drive system automatically senses slippery or unstable driving conditions that even the driver may not detect and proactively balances power between the front and rear wheels to ensure optimal stability at all times.

## 02 ELECTRONICALLY CONTROLLED SUSPENSION WITH ROAD PREVIEW

Utilizing both the front camera and navigation map information to analyze the road conditions ahead, the damping force of the suspension is automatically adjusted to control the movement of the vehicle. It provides a smooth and comfortable ride by recognizing and responding to situations that may have an impact on the vehicle, such as speed bumps.

Available on 3.5T models only.

## 03 ELECTRONIC LIMITED SLIP DIFFERENTIAL (eLSD)

This system appropriately distributes power to the left and right wheels according to the road surface and driving conditions to ensure stable driving. If one wheel spins out due to a sudden/ high-speed turn or a ride across rough terrain, the eLSD helps to overcome the situation by concentrating power on the other wheel.

Available on 3.5T Sport Plus models only.

## 04 8-AIRBAG SYSTEM

Designed with protection at every angle in mind, the GV70 offers an advanced 8-airbag system complete with a centre-side airbag positioned between the front occupants mitigates impact with each other or with interior materials in the event of a collision.

## 05 SHIFT-BY-WIRE (SBW)

Delivering excellent responsiveness, GV70's 8-speed transmission provides great acceleration from a standstill and optimal fuel economy. The new dial-type Shift By Wire (SBW), made with real tempered glass, offers a firm touch with its flat springs and rolling structure. Ambient lights reveal the beauty of the dial's delicate woven patterns.

## 06 DRIVE MODE CONTROL

Drivers can choose from Eco, Comfort, Custom, Sport, and Sport+ drive modes, depending on driver preferences and road conditions. Eco for fuel efficiency, Comfort for smooth driving, Sport and Sport+ for performance and responsiveness.

# TECHNOLOGY & CONVENIENCE

**01 14.5" HD TOUCH-SCREEN WITH NAVIGATION SYSTEM**

The 14.5" high-definition widescreen can be split to display media, weather, and GPS information separately and features a new graphical user interface (GUI) designed exclusively for Genesis.

**02 FINGERPRINT AUTHENTICATION SYSTEM**

Load individual driver profiles and settings or activate Valet Mode with the world's first in-vehicle fingerprint reader.

**03 HEAD-UP DISPLAY**

With the available Head-Up Display, key vehicle information, including driving speed, GPS information, and advanced driver-assisting information, is projected on the front windshield with optimized brightness for both day and night.

**04 SURROUND VIEW MONITOR (SVM)**

The available Surround View Monitor uses cameras mounted around the vehicle to show diverse images of the vehicle's surroundings, including 3D, 360-degree images from any point of your vehicle, to assist with parking.

**05 BLIND-SPOT COLLISION-AVOIDANCE ASSIST (BCA)**

If a risk of collision with a vehicle at the rear is detected while changing lanes, the BCA system warns and assists braking if necessary to avoid a collision. It also detects the risk of collision with vehicles approaching from the rear side when leaving a parallel-parked position and automatically assists in braking.

**06 REMOTE SMART PARKING ASSIST (RSPA)**

Available Remote Smart Parking Assist helps to identify a parking space and then automatically controls the steering wheel, speed, and gears to conveniently assist in entering/exiting the parking space. This feature can also be activated remotely via buttons on the smart key to move the vehicle forward, backward, or to park in reverse.

# SPORT VS. NON-SPORT

## REGULAR

2.5L INLINE 4 TURBO

**Max Power** 300 HP @ 5,800 RPM    **Max Torque** 311 lb.ft. @ 1,600-4,000 RPM
