

# FALCON GL AND FAIRMONT WAGONS

Thoroughbreds all of the time...  
workhorses when you need them.

Ford Australia - We're moving with you.

**Thoroughbred design and appearance:** Falcon GL and Fairmont Wagons have real ability to perform their function in today's motoring environment. At the front, you'll notice the sleek look of these wagons. The bonnet, two-bar grille, front bumper and intake valance have all been designed in the interest of efficient air-flow management, for excellent aerodynamic qualities. At the rear the familiar choreographed lines of the wagons are evident. The integrated tailgate features an effective wiper/wash system. And large tail light assemblies indicate your intentions clearly. Fairmont gives you distinctive touches with its

chrome finish roof rack and styled wheel covers. **Interior Comfort:** Inside, you'll find that the wagons offer real family sedan comfort. Falcon GL and Fairmont Wagons feature passenger courtesy lamps which illuminate when the front and rear doors are opened. In the Falcon GL Wagon, a centre console provides ample moulded trays for coats, tapes, sunglasses, etc. Good locking, practical cloth seat covers are a standard feature, and make for real comfort. The windscreen is laminated and side and rear glass areas are tinted. In the Fairmont Wagon there are distinguishing

features like a full centre console and armrest, a digital clock and windscreen wipers with an intermittent setting. The driver's seat cushion angle can be varied by a three-position lever and both front seat backrests provide for the adjustment of the seat back contour to support the lumbar spinal region. All of Fairmont's seating is faced in Veropal Beaumont cloth.

**Australian's largest loadspace:** When the sun is over and the work begins, Falcon GL and Fairmont Wagons with their long wheelbase and wide track are equal to the task. The rear seat can be folded down to provide more loadspace than any other

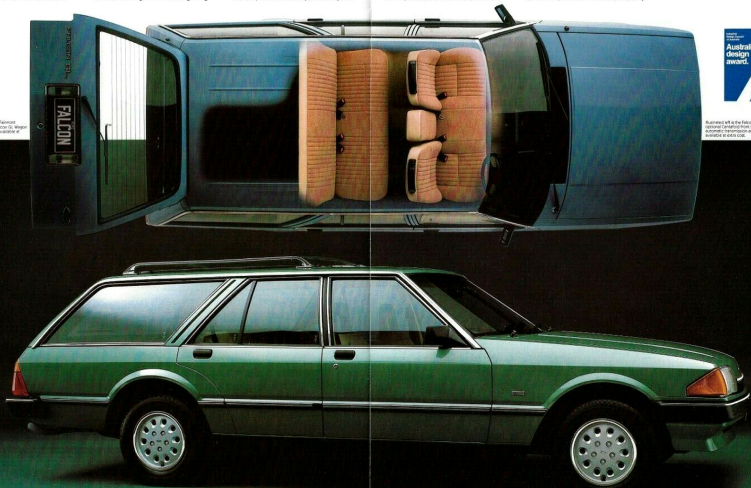

stage comes into operation to give increased power and performance. **A Viscous Clutch Fan:** Being temperature sensitive, the fan speed is not dictated by engine speed. It works only as hard as it needs to in order to provide adequate cooling. This reduces engine drag, which saves fuel, and contributes to quiet running. **Optional 5-speed transmission**

This transmission is available with the 3.3 litre engine at extra cost. The gear ratios in this 5-speed transmission have been selected to permit a reduction in the engine revolutions required, and provide a potential improvement in overall fuel economy. **Alloy Head II Efficiency:** The 3.3 litre Alloy Head II engine is standard in the Falcon GL Wagon. And in both wagons, these second generation engines incorporate features that give good fuel economy and performance. **A 9-Stage Carburettor:** This advanced fuel metering device utilises only the first stage (or venturi) under normal steady driving and so provides excellent fuel economy for a six-cylinder car. When rapid acceleration is needed, the second

**Proven Suspension:** A rugged, torsion leaf spring rear suspension system is a part of the Falcon and Fairmont Wagons. This system provides very little intrusion into the loadspace, one of the major reasons for buying a wagon in the first place. It works with the long wheelbase and wide track to provide excellent load carrying characteristics, along with good ride and handling.

## Select options that suit your style.

The full list of extra-cost optional equipment is printed on the specification sheet. More important among these are:

# EFI

Ford is proud to offer an electronic fuel-injected engine developed expressly for Australian produced cars. This EFI engine is based on the successful Ford Alloy Head II 4.1 litre six cylinder engine. It incorporates the Bosch LE Jetronic fuel injection system, which is widely recognised as one of the finest in the world. The EFI six cylinder engine develops outstanding torque and smooth power. It is a logical choice for drivers who wish to enjoy similar levels of acceleration and the smooth effortless cruising of a V8.

Illustrated as a cost option, this seat is available on Falcon GL, Wagon and 5 speed GL models with chrome front trim (see below) and comprehensive air conditioning (below).

Illustrated from the 5 speed level with an optional extra air-falcon GL, Wagon and 5 speed GL models with chrome front trim (see below) and comprehensive air conditioning (below).

**Vinyl Trim:** With cloth seat facings standard, vinyl is available as an option in Falcon GL.

**Centralfold:** With a column gearshift the Centralfold front seat can be specified in place of the front bucket seats on Falcon GL Wagon. Then your Falcon GL Wagon can be changed from a 3 to 6 seater at the flip of an armrest.

**Integrated Air-Conditioning:** By ordering factory fitted air conditioning you will automatically have the added benefits of a larger radiator and a heavy duty alternator. These assist the performance of the unit. On all wagons with a floor mounted transmission and fitted with air-conditioning, additional ducting is provided to take cool air to the rear passengers. On GL, a full floor console featuring a centre armrest is fitted when air-conditioning is specified.

**5-speed Manual:** The 5-speed manual transmission is available as an option with the 3.3 litre engine, and improves the overall fuel economy potential of your wagon.

About this brochure. This brochure is designed to provide you with a general introduction to the Ford Products (including available optional equipment) referred to, and should be read in conjunction with the latest specification sheets. Because of changes in conditions and circumstances Ford reserves the right, subject to all applicable laws, at any time, at their discretion, and without notice to discontinue or change the features, designs, materials, colours and other specifications and the prices of their products, and to either permanently or temporarily withdraw any such products from the market without incurring any liability to any prospective purchaser or purchaser. The latest specification sheet should be referred to for information on the availability, ordering and use of optional equipment.

Always consult an Authorised Ford Dealer for the latest information with respect to features, specifications, prices, optional equipment and availability before deciding to place an order.
