¹The Toyota driver and front passenger air bags are Supplemental Restraint Systems (SRS). The driver and front passenger air bags are designed to inflate in a severe frontal collision. In all other accidents, the air bags will not inflate. To decrease the risk of injury from a deploying air bag, always wear seatbelts and sit upright in the middle of the seat as far back as possible from

the air bag modules. Do not put objects in front of an air bag. Do not use rearward-facing child seats in any front passenger seat without switching off the passenger-side air bag. The force of a deploying air bag SRS may cause serious injury or death. Please see your Owner's Manual for further instructions. for details.
