

tC Shown with Standard Panorama Moonroof and Standard 17" Alloy Wheels with Graphite Appearance and Optional TRD Lowering Springs

DEFINITIONS ARE CHANGING.

Because the 2005 Scion tC takes the classic definition of sports coupe and reinvents it completely. Consider the sleek exterior styling of a coupe, but with the hidden convenience of a hatchback. An interior that will amaze you with room for you and your friends... even in the back seat. The first standard all-glass Panorama Moonroof in its class. And all backed up by a potent 2.4 liter engine, double wishbone rear suspension, and 17" Alloy Wheels. If you've been waiting for things to change, wait no more. The tC is here.

SHOULD A SPORTS COUPE DO MORE THAN JUST LOOK GOOD?

Should it offer standard equipment levels that can rival many luxury cars? Should it handle remarkably well, and put a smile on your face every time you drive it? Are you ready to experience Scion's interpretation of the sports coupe? **Yes.**

Standard equipment, options, accessories, and other information is subject to change.

*The Scion driver, front passenger, front seat-mounted side airbags and side curtain airbags are Supplemental Restraint Systems (SRS). The driver and front passenger airbags are designed to deploy in certain types of (usually frontal) collisions where the magnitude and duration of the forward deceleration of the vehicle exceeds the design threshold level. The side airbags and side curtain airbags are designed to inflate in certain types of severe side-impact collisions. In all other accidents, the airbags will not inflate. To decrease the risk of injury from a deploying airbag, always wear seatbelts, sit upright in the middle of the seat as far back as possible from the airbag modules and do not lean against the door. Do not use rearward facing child seats in any front passenger seat. The force of a deploying airbag SRS may cause serious injury or death. Please see your Owner's Manual for further instructions.

tC SPECIAL FEATURES

When Scion designers set out to create the tC, they knew it had to be special. Something that took the concept of sports coupe and raised the bar. They knew that meant creating a lot of unexpected touches and making them standard on every tC. So be it.

After enjoying the view through the standard Panorama Moonroof, the next thing you'll notice when you slide into a tC is the vast interior space—an unusual feature in a sports coupe. Designers even added business class-like rear seating, with rear seat backs that can recline up to 45 degrees. What does it mean? It means no more contests for the coveted front passenger seat. In the tC, back seat passengers are no longer riding in economy class.

Designers also added little touches to the instrument panel. In addition to amber illumination, when the ignition is turned on all gauge needles bounce to the top and then settle down into place. Next, pay special attention to the cast-aluminum dial that controls interior temperature. Finally, run your hands over all the interior surfaces, from the metal-tone cover that hides the radio from prying eyes to the unique texture on the doors and instrument panel. Feels good, doesn't it?
