# SCION

SCION.COM

# no haggle, no hassle

## Scion's "Pure Price" Experience

### Build your Scion

Log onto Scion.com and go to Build Your Scion. Choose your model, transmission and color. Check out the extensive standard features. Pick your favorites from nearly 40 accessories

### Save your masterpiece

Save your configuration on scion.com, or Print out a personalized e-brochure, or E-mail it to the dealer of your choice, or Fill out an online credit application.

### What to expect from your Scion dealer

Scion delivers a "pure price" purchase experience whereby all products and services offered by dealers are menu priced based on current market conditions.

From your vehicle to accessories to the finance rate, it's a "what you see is what you get" sales approach. It's simple, straightforward and most important, respectful of your time.

Experience it for yourself and if you have any questions or comments, visit us at Scion.com for a live chat with one of our Scion Customer Experience representatives.

Scion's "Pure Price" purchase experience means no haggle, no hassle. The price you pay for all products and services offered equals the dealership's posted and advertised price. Price menus are clearly posted in the dealership showroom for all products and services.

you create your scion. this is just the guide.

# accessory intro

**Your car says something about you. Tell it what to say.**

In the interest of suiting your Scion to your personality and tastes, we offer over 50 accessories. And not just average stuff like floor mats and trunk organizers. Think more along the lines of strut bars, and subwoofers, components that will compete with what you'll find in any aftermarket shop. And our accessories won't void your factory warranty; in fact, they're all covered under the Scion warranty.

That's the good news. The better news is you buy each Scion accessory separately. That means no overstuffed and overpriced 'factory packages' chock full of features you never even asked for. Instead, you pick and choose every single add-on you want. You want 7-spoke wheels, that's all, nothing else? As you wish.

All of the extras you choose can be installed by your dealer before you even purchase your Scion. Just go to [Scion.com](http://Scion.com) and configure your car, send the info to your nearest dealer, and your Scion will be customized and delivered exactly per your specifications. Or if you want to keep it stock for now and add accessories later, that's fine, too.

Personalization is optional. It's up to you. Your car says something about you, and no one should put words in your mouth.

## iPod Compatible Pioneer Audio System Upgrade

Scion is proud to bring the iPod experience to the car, with a Pioneer AM/FM/CD head unit with iPod control now available as an accessory upgrade for all 2006 Scions. These are the first cars in their class to integrate track, artist and album information from the iPod into a one-line display on the head unit's screen—making your stereo an extension of your iPod. Connectivity is achieved by simply plugging in your iPod via a connector cable. The result is outstanding sound quality through the car's stereo system, while continuously charging your iPod. You control your music through the head unit, or through buttons conveniently located on the steering wheel. The MSRP for this accessory upgrade is only \$260, which includes installation.

### Upgrade Features:

- iPod Connection
- Charges any iPod with a dock connector
- 160 Watts of sound power
- Built-In DSP Sound Equalization
- Scion Sound Processing (SSP)
- MP3 Compressed Audio Playback (up to 10 hours of playback on one disc)
- MP3 File Text Capability
- Satellite Radio Control
- XM Satellite Radio Tuner
- Mini-Audio Jack
- 10 Color Change LCD Display

# TRD accessories

From the racetrack to the street, Toyota Racing Development USA, Inc. develops performance aftermarket parts for Toyota vehicles. TRD has stepped it up by developing a comprehensive line of accessories, made especially for Scion. When you're ready to take your Scion's performance to the next level, TRD will help get you going - **fast.**

## Toyota Racing Development (TRD) USA, Inc. Accessories

TRD item	xA	xB	tC	description
High-Performance Air Filter	•	•	•	High-performance reusable air filter design can help provide greater and smoother air flow and can help reduce turbulence and increase combustion efficiency. The filter body's 100% polyurethane construction can promote longer life even in the most extreme conditions.
Lowering Spring Set	•	•	•	Lower xA 20mm, xB 30mm, and tC 28mm (Front), 33mm (Rear). Springs are finished in pearl white.
Performance Shock Set	•	•	•	Direct replacement for the OE front struts and rear shocks. The revised valving provides a more compliant ride with the TRD Lowering Springs.
High-Performance Oil Filter	•	•	•	Features a heavy gauge steel mounting plate that can reduce flexing under high-RPM conditions.
Performance Clutch Assembly	•	•	•	With increased strength and clamping force, a Performance Clutch provides quicker engagement and faster shifts during aggressive acceleration.
Quickshifter	•	•	•	Shortens throws on manual transmission.
TRD Radiator Cap	N/A	N/A	•	Direct replacement for the standard tC radiator cap and handles pressures of 1.1 kg/cm2.
Sport Muffler	•	•	•	Stainless Steel with wide diameter tip.
Leather Shift Knob	•	•	•	Leather Trimmed
Sequential Shift Light Kit	•	•	•	Racing style high intensity indicator notes optimal shift points, with record/playback function.
Supercharger**	N/A	N/A	•	Supercharger develops higher engine output by forcing increased airflow to the cylinders.

TRD USA, Inc (Toyota Racing Development), an aftermarket performance parts company, markets a line of parts through some Scion dealers. These aftermarket parts are not Genuine Scion parts, and cannot be utilized for Scion warranty replacement. TRD parts are warranted by TRD, not Scion. See the TRD warranty for details. Note that certain aftermarket equipment may not be street legal in all states and may impact your vehicle's performance or safety.

\* Available Fall 05

\*\* The tC Supercharger System is to be sold only as a dealer installed or over the counter option, after retail sale of the vehicle. The Supercharger may not be sold to the customer at the same time as the new vehicle and may not be financed together with the new vehicle.

# TRD scion supercharger<sup>\*\*†</sup>

## How does the TRD supercharger work?

The TRD Scion tC supercharger is a centrifugal supercharger design. This design features a housing (scroll) and an impeller that is shaped similar to a turbocharger. It is, however, not driven by hot exhaust gases as is the case with a turbo. Instead the supercharger uses a patented extended drive to couple the supercharger with a drive belt that is driven off the engine's crankshaft. Unlike some other systems, centrifugal blowers are true compressors. As the supercharger draws in air it accelerates and compresses the air internally. The scroll collects the compressed air and forces it (at an accelerated speed) into the discharge tube, and then into the intake manifold. This compressed air is mixed with additional fuel (via sophisticated calibration) which results in higher power output.

\* Available Fall 05

† The tC Supercharger System is to be sold only as a dealer installed or over the counter option, after retail sale of the vehicle. The Supercharger may not be sold to the customer at the same time as the new vehicle and may not be financed together with the new vehicle.

### How about performance?

During design, the ability to configure and match several components of the centrifugal supercharger (compressor, pressure ratio and boost) to intake volume and intake manifold tuning allows the engineer to tune the performance attributes of the supercharger to specific vehicle requirements.

The centrifugal supercharger system has, traditionally, a performance curve that is directly proportional to engine rpm and provides a linear building of power. A centrifugal system is able to exceed the peak power potential of other boosting systems with excellent driveability, performance and less impact on fuel economy.

A compressor bypass valve incorporated in the system allows smooth operation at idle or part throttle conditions by relieving unwanted supercharger pressure at low speeds and reducing heat build-up.

Helical cut supercharger drive gears, as opposed to straight cut gears, significantly reduce gear noise to a sporting hum. It still has a supercharged sound, but without intrusive noise.

### What about The Durability?

The centrifugal supercharger system's characteristic of progressive and linear power addition (over the naturally aspirated engine) allows for peak power targets to be achieved without overwhelming drivetrain components such as transmissions, driveshafts, clutches and rear axle assemblies.

The maintenance-free supercharger lubrication system uses engine oil that is pre-filtered and injected directly onto the drive gears. This type of lubrication has been proven to be the best, even under sustained boost conditions.

The system is covered by a TRD five year/60,000 mile warranty when installed by a Scion dealer and is emissions legal in all 50 states.

tC Instrument Panel with Standard Cast-Aluminum Temperature Dial and Manual Transmission

## interior

Standard Cloth Interior Including Standard Center Armrest with Storage Compartment

Standard Business Class-like Split Folding and Reclining Rear Seating

# the tC always comes in first

**The first standard all-glass Panorama Moonroof in its class. The first sports coupe with comfortable rear seating, featuring standard split folding and reclining rear seats, which allow rear passengers to tilt their seats back as far as 45 degrees.**

For the first time, the 2006 Scion tC also offers a new three-spoke steering wheel with integrated audio controls along with a redesigned Pioneer AM/FM/CD head unit. A mini-jack port located in the center console compartment allows for connectivity to most portable music players, so you can crank your portable music collection up to 160 watts through the tC's Pioneer speakers. Simply closing the center console keeps your MP3 player hidden from prying eyes.

Did we mention that the 2006 Scion tC sports coupe is also the top-rated car in its segment according to the recent J.D. Power survey of initial quality?

To learn even more of the tC's Standard Features, refer to the chart on page 22

- Color-tuned Interior Fabric
- Badged Floor Mats with Cargo Mat

Absolutely Red Body Kit and Red Pedestal Spoiler also available in limited quantities for an additional cost.

\* Scion tC Release Series 18" tires: "Wheels with 18" tires are expected to experience greater tire wear than conventional tires. Tire life may be substantially less than 20,000, depending on driving conditions."

## tC special features

When Scion designers set out to create the tC, they knew it had to be special. Something that took the concept of sports coupe and raised the bar. They knew that meant creating a lot of unexpected touches and making them standard on every tC. So be it.

After enjoying the view through the standard Panorama Moonroof, the next thing you'll notice when you slide into a tC is the vast interior space — an unusual feature in a sports coupe. Designers even added business class-like rear seating, with rear seat backs that can recline up to 45 degrees. What does it mean? It means no more contests for the coveted front passenger seat. In the tC, back seat passengers are no longer riding in economy class.

Designers also added little touches to the instrument panel. In addition to amber illumination, when the ignition is turned on all gauge needles bounce to the top and then settle down into place. Next, pay special attention to the cast-aluminum dial that controls interior temperature. Finally, run your hands over all the interior surfaces, from the metal-tone cover that hides the radio from prying eyes to the unique texture on the doors and instrument panel. Feels good, doesn't it?

Standard Business Class-like Split Folding and Reclining Rear Seating

Steering Wheel Mounted Audio Control

Cast-Aluminum Temperature Dial

Front Floor Mats with Removable Carpet Inserts

Panorama Moonroof with Power Retractable Front Glass Panel and Dual Manual Sunshades

Optional Upgraded Pioneer Audio (MP3, iPod Connection jack, Auxiliary Input and Satellite controller capable)

## scion audio

Scions were designed  
with music in mind.

In addition to interior sound absorption materials, each Scion comes equipped with a Pioneer AM/FM/CD sound system with a maximum output of 160 watts through six speakers (including two tweeters). The powerful Pioneer head unit also plays MP3 CDs (up to 10 hours on one disc) and offers MP3 file text display. The proprietary Scion Sound Processing (SSP) and Digital Sound Processing (DSP) Sound Equalization will bring your music alive. And should you want to go Beyond FM or get Sirius, the stereo comes with Satellite Radio Control capability.

## easter eggs

The Pioneer head unit features some hidden special features we call Easter Eggs. To access the "Secret Mode," press and hold the "A" button and turn the ignition to "ACC." From "Secret Mode" you've got 15 seconds to create a new screen message by entering any of the following sequences.

### "WhatMovesYou"

Press and hold 'A' and 'TEXT' simultaneously and turn the key so 'ACC' is off.

### "PushMyButtom"

Press & hold 'M' and 'A' and '2' simultaneously and turn the key so 'ACC' is off.

### "Scion=A+B+C"

From the AM setting, press and hold 'FOLDER UP' and 'SCAN' simultaneously and turn the key so 'ACC' is off.

### "サイオン" ("Scion" in Japanese)

Insert CD and set to track number 2, press and hold 'FOLDER DOWN' and 'TEXT' simultaneously and turn the key so 'ACC' is off.

### Custom Welcome Screen

To create your own custom message, press and hold 'M' and turn the key so 'ACC' is off. You now have one minute to use the '+' and '-' buttons to scroll through any ASCII characters. Use the 'A' button to enter your characters.

## iPod Compatible Pioneer Audio System Upgrade

Scion is proud to offer a Pioneer AM/FM/CD head unit with iPod control, now available as an accessory upgrade. Connectivity is achieved by simply plugging in the connector cable, which also charges the iPod. The head unit will then display track, artist, and album information. Additionally, you may control your iPod through the head unit, or with buttons conveniently located on the steering wheel.

iPod Connection\*

### Upgrade Features

- iPod Connection
- Charges any iPod with a dock connector
- 160 Watts of sound power
- Built-In DSP Sound Equalization
- Scion Sound Processing (SSP)
- MP3 Compressed Audio Playback (up to 10 hours of playback on one disc)
- MP3 File Text Capability
- Satellite Radio Control
- XM Satellite Radio Tuner
- Mini-Audio Jack
- 10 Color Change LCD Display

### Scion Sound Processing (SSP)

In every Scion, each speaker is tuned to match the specifications of the Scion Sound Processor. With SSP, you can give your music a different sound and feel at the touch of a button.

### SSP features three settings:

- **SSP Neutral:** Keeps the music in the background, with balanced bass and treble.
- **SSP Hear:** Enhances the highs and lows.
- **SSP Feel:** Gives the woofers a workout.

8" Bazooka Subwoofer (xA/xB)

10" VSE Bazooka Subwoofer (tC)

### Bazooka Subwoofer

When you're ready to test the low-end theory, look no further than Bazooka Mobile Audio. Scion proudly offers two types of amplified Bazooka subwoofers, both with dual voice coils and 100 watts of power. In the xA and xB, the legendary 8" Bazooka tube fits conveniently into the cargo space.

For the tC, Bazooka created a specially designed enclosure that hugs the contours of the right rear cargo wall. The 10" woofer definitely gets down, providing thunderous lows without sacrificing storage space.

\*iPod not included

Available Satellite Radio Antenna (shown on TC)

## Satellite Radio

Are you tired of the same old FM radio stations, with the same songs every hour, endless commercial breaks, bad reception, and puritanical censorship policies? Step up to satellite. Satellite offers a huge variety of channels, commercial-free and uncensored, and you'll never go out of signal range.

The standard Pioneer sound systems in every Scion feature Satellite Radio Control capability, good to go when you accessorize with the optional satellite radio tuner and antenna. And Scion now offers both of the most popular satellite radio services in the country: **XM** and **Sirius**.

### XM\*

With two powerful satellites ("Rock" and "Roll") orbiting 22,000 miles up, America's most popular satellite radio service gives you the power to choose what you want to hear—wherever you might find yourself. XM features over 150 digital channels—100% commercial-free music, over 30 channels of news, sports, talk and entertainment, and the deepest playlist in the industry with access to over 2 million titles.

And to keep your Scion out of a jam, the XM Instant Traffic and Weather channels provide constant, continuous, real-time updates on conditions in 21 major metropolitan areas across the United States—24 hours a day, seven days a week.

### SIRIUS\*\*

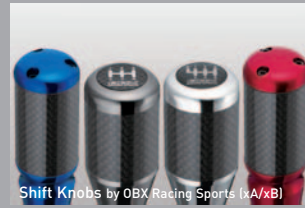

SIRIUS delivers digital quality from three satellites in constant orbit over the lower 48 states. For the price of one CD each month, SIRIUS offers over 120 channels of music, sports, and entertainment. Roll with the ups and downs of play-by-play coverage of the NFL, NBA, and NHL. Get uncensored hip hop on the Shade 45 channel, where Marshall bites his thumb at the FCC. Pose with the Faction channel, with hosts Kelly Slater, Tony Hawk, and Bam Margera. Or embark a long, strange tangent with Bill Walton as he waxes poetic. Whatever your trip might be, SIRIUS has you covered, from the left coast to right, from Howard Stern all the way to the Fox News Channel.

\*Required monthly subscription sold separately. Reception of the XM signal may vary depending on location. All fees and programming subject to change. Subscriptions subject to the terms and conditions available at [www.xmradio.com](http://www.xmradio.com). Available only in the 48 contiguous United States. \*\*Required monthly subscription sold separately. Reception of the Sirius signal may vary depending on location. All fees and programming subject to change. Subscriptions subject to the terms and conditions available at [www.sirius.com](http://www.sirius.com). Available only in the 48 contiguous United States.

Optional Upgraded Pioneer Audio features 10 Illumination Colors at the touch of a button

xA/xB LED Light Enhancements installed underdash and in Cupholder (Available in Red, Amber, Green and Blue)

tC LED Light Enhancements installed underdash and in Cupholder (Available in Red, Amber, Green and Blue)

# interior accent colors

Scion's standard black and gray interior color scheme is purposely understated. But maybe you want to have a little fun with your cabin, make it a little louder, a little brighter?

Along with an assortment of Shift Knobs, Sport Pedals, Molded Dash Appliqués, and Color Steering Wheels, Scion also offers LED Light Enhancements for your interior. With the flick of a single multi-function switch, you can modify the color of ambient light in your Scion with our optional underdash and cupholder lighting kits. These lighting kits use the latest LED technology, which is far more reliable and draws less power than traditional neon tubes.

# standards

## You have high standards? So do we.

Air conditioning? A thumping six-speaker sound system? Power windows, mirrors, and door locks? Anti-lock brakes? What other companies call options, we call Standard Features. The means they come standard on every Scion.

\*The Scion drivers and front passengers airbags and drivers knee airbag are Supplemental Restraint Systems (SRS). The drivers, front passengers and drivers-knee airbags are designed to deploy in severe (usually frontal) collisions where the magnitude and duration of the forward deceleration of the vehicle exceeds the design threshold level. In all other accidents, the airbags will not deploy. To decrease the risk of injury from a deploying airbag, always wear your seatbelt, sit upright in the middle of the seat, and do not lean against the door. Do not put objects in front of an airbag or around the seatback. Do not use a rearward-facing child seat in any front passenger seat. The force of a deploying airbag SRS may cause serious injury or death. Please see your Owners Manual for further instructions.

\*\*Scion Vehicle Stability Control (VSC) is an electronic system designed to help the driver maintain vehicle control under adverse conditions. It is not a substitute for safe driving practices. Factors including speed, road conditions and driver steering input can affect whether VSC will be effective in preventing a loss of control. Please see your Owner's Manual for further instructions.

Standard equipment, options, accessories, and other information is subject to change.

S = Standard, N/A = Not Available, A = Available

Scion is a marque of Toyota Motor Sales, U.S.A., Inc. 00430-mag06-05
