Sheer
Driving Pleasure

THE NEW BMW 5 SERIES.

OUTSTANDING. STYLISH.

BMW EfficientDynamics
Less consumption. More driving pleasure.

PERFECTION IN EVERY MOMENT.

Achieving the best possible results, in every way, has always been the objective of the new BMW 5 Series. This is what makes it so much more than a straightforward executive vehicle. Whatever the lines; Luxury or M Sports package - the new BMW 5 Series exudes composure and strength of character that meet your wishes. Be it design, handling, interior comfort or functionality, it's perfect for anyone who expects more than a stylish appearance from their vehicle.

STRIKING FORM. PURPOSEFUL LOOK.

The high standards of the new BMW 5 Series are self-evident from front to rear. It begins with the charismatic face of the car, with its optional Adaptive LED headlights, levelled slightly at the top, and the now more acutely angled double kidney grille. To the rear, the newly developed taillights, which reveal the highest precision in every detail, express complete self-assurance. With their visual depth and L-shape form, they integrate perfectly with the rear profile with its new-look bumper while ideally complementing the overall aesthetic.

TAKE CONTROL OF THE BUSINESS CLASS.

The comfort offered by the new BMW 5 Series is as impressive as the extensive functions from BMW ConnectedDrive. Have a complete control over the vehicle with the new iDrive Touch Controller which allows you to enter letters and numbers with your own handwriting. Or the voice control, so that you can enjoy maximum driving pleasure and keeping both hands on the steer. The updated Navigation System Professional including roadmaps for Indonesia will keep you in the know – wherever you are. The result is the best driving experience with the best BMW 5 Series ever.

PETROL ENGINE: BMW recommends the use of RON 95 super unleaded petrol. Output and fuel consumption figures apply to RON 98 fuel. All engines comply with the EU5 emissions standard. Fuel consumption is determined in accordance with the ECE driving cycle made up of approximately one-third urban traffic and two thirds extra-urban driving (based on the distance covered).
DIESEL ENGINE: BMW recommends the use of diesel fuels in compliance with DIN EN 590 only. All diesel engines comply with the EU3 emissions standard. Fuel consumption is determined in accordance with the ECE driving cycle made up of approximately one-third urban traffic and two thirds extra-urban driving (based on the distance covered).
