

TURBO

Sigma Turbo.

The new Sigma Turbo.
A car you will fully appreciate
only when you drive it.

Then you will never forget it.

When that Turbo begins to cut
in, you have a reserve of power to
accelerate out of trouble, and to
overtake in a flash.

However, the additional power
has brought with it a few additional
performance features.

The suspension, for example,
has been refined. There are now
disc brakes on all four of the new
Montego 15" cast alloy wheels. And
they, in turn, are now fitted with
Pirelli P6 steel belt radials.

So, on the road the Sigma Turbo
is solid and firm. With five people
and all their luggage aboard, the
car can safely handle the corkscrew
curves and hairpin bends of the
roads that drivers love to drive.

As far as the exterior of the car
is concerned, you can identify it by
the striking two tone paint
treatment, vents on the bonnet for
extra under bonnet cooling, and a
different grille and badging—all of
which are exclusive to the Sigma
Turbo.

Then, inside the car, there's an
AM/FM/MPX radio-tape deck
combination with four speakers
which you can enjoy in the comfort
of airconditioning and the luxury of
honeycomb velour upholstery.

These additions and refine-
ments give the Turbo an individual
and distinctive character.

But in engineering terms, the car
is still very much a Sigma, the car
that changed the image of the four
cylinder car.
