

# Holden Commodore Tourer

**Holden**  
Let's go there

## For adventure.

**Modern life is an endless stream of appointments, commitments and engagements.**

We're out and about more than ever. Shops are open later, working days are never-ending - we're forever on the run. With the amount of time we spend in our cars, shouldn't the greatest drives be the ones we do each and every day?

Cue the Commodore Tourer.

To camping spots miles from home. To the supermarket around the corner. To school drop-offs and pick-ups. The Commodore Tourer All-Wheel Drive is here to make every journey a lot easier, a lot safer, and a lot more fun, that's for sure.

Calais-V Tourer in Cosmic Grey

## For more than looks.

Collaborating closely with local engineers, the Tourer was designed and built in Germany. If ever there was a glowing example of balance in styling, here you have it. But make no mistake, these impressive looks don't come at the expense of driving prowess.

Underpinning its eye-catching shape lies thousands of hours of meticulous engineering and over 200,000 kilometres of brutal testing, ensuring the Tourer fits New Zealand roads perfectly. Add to this a raised ride height for better ground clearance, and whether you're cruising along beaten tracks or meandering through roads less travelled, this unique Commodore is right at home.

Back to styling, head to the side and you'll find stunningly sculpted 18" Alloy Wheels. While at the front, flanking its arresting grille, are Adaptive LED Matrix Headlamps. Not only striking to look at, these lights actually pivot, shifting light towards wherever you're turning giving you even greater visibility. And, how's this for ingenious: you'll enjoy high-beam-like brilliance at all times, because these intuitive lights automatically switch off the individual parts of the beams that would otherwise be directed at oncoming drivers.

Calais-V Tourer in Cosmic Grey

## For safety.

Loaded with innovations designed to help and protect, the Tourer is not only a comfortable place to be, but a safe one.

We refer to our suite of active safety features as HoldenEye®.

This state-of-the-art safety offering comes equipped with features like Lane Keep Assist; think of it as a little helping hand to keep things on the straight and narrow.

While Advanced Park Assist is a larger helping hand - in fact, we're talking not needing to touch the wheel at all to park. Then there's Autonomous Emergency Braking (AEB) with Pedestrian Detection which kicks in if it senses a potential collision.

Beyond HoldenEye®, the Tourer's nifty 360 degree camera gives you a comprehensive view of your world around the car when reversing.

All the while, Adaptive Cruise Control (ACC) constantly scans the changing speed of vehicles in front of you, and if the car in front stops, you'll do the same.

## For the latest tech.

One minute you could be ferrying kids to a dance concert, the next you might be on your 4th trip in a day to the home improvement store - either way, you're always connected with the very latest tech in the Tourer.

Apple CarPlay® & Android® Auto puts the Tourer at one with your phone, providing a comprehensive entertainment hub. Once connected it mirrors your phone, allowing you to navigate it in the same way via a large 8" colour touch-screen display or by using voice control. On the subject of phones, Wireless phone charging\* is a welcome addition to the Tourer, because we can all do with less cords in our lives, right?

You'll love the comforting technology of Ventilated driver and front passenger seats¹, ideal for keeping you even cooler on those ridiculously hot days. Then when the temperature outside drops a little, you can open the impressive dual-panel panoramic sunroof and say hello to the sunny sky above. A superb Bose® premium audio system¹ pitches exquisite sound from multiple speakers.

And how's this for a party trick: the Tourer is equipped with a Hands-free power tailgate. Simply kick your foot underneath the rear bumper and the tailgate opens. Voila!

Of course, all of this ingenious technology is in addition to the staples of modern driving, such as Embedded satellite navigation (GPS), Remote Start, and much, much more.

Calais-V Tourer in Cosmic Grey

## For drivers.

Let's talk oomph. Power from the Tourer's impressive 235kW 3.6L V6 engine is delivered via an advanced 9 speed automatic transmission to an Adaptive All-Wheel Drive (AWD) system.

Designed for the ultimate in drivability, wet road performance and an effortless launch, the Tourer's all-new Adaptive All-Wheel Drive provides new-generation, state-of-the-art Twinster technology. The twin clutch system reads road inputs up to 100 times per second and distributes power between front and rear axles. In short, the Tourer's Adaptive All-Wheel Drive system makes sure the most effective wheels are driving the vehicle at all times.

All of this translates to more opportunities for adventure and more confidence. Especially when towing a caravan or trailer, both of which this Tourer can haul, up to a weight of just over 2 tonnes.
