

Everything is in its place. Waiting for your touch.

#### **Equipment**

■ Xenon headlights illuminate the road ahead and to the side with brilliant clarity. These headlights also feature auto-levelling to adjust for varying passenger and cargo loads. In conjunction with the new Adapative Headlights (optional on the 530i), this also means much improved visibility in bends, as the adjustable headlights are directed into the bend as soon as the vehicle begins cornering.

☐ Star Spoke alloy wheels (performance run-flat tires) - Style 123, 18 X 8.0. (Available only on the 530i.)

☐ Star Spoke alloy wheels (performance run-flat tires) - Style 124, 18 X 8.0 front, 245/40R-18; 18 X 9.0 rear, 275/35R-18. (Available only on the 545i.)

■ Multi-function leather steering wheel allows for convenient operation of numerous functions without being distracted from road traffic - which means you keep your hands on the wheel all the time. Buttons are included for audio, cruise control and telephone. Functionality of two separate buttons may be defined by the user.

☐ Active Cruise Control enables comfortable driving at a pre-set speed. When driving in columns of traffic, your BMW automatically adapts to the speed of a preceding vehicle and maintains a pre-set distance, allowing drivers to concentrate fully on the traffic around them.

■ Automatic Air Conditioning, with Automatic Air Recirculation (AAR), solar sensor and mist sensor, automatic temperature control and air distribution (separate for driver and front passenger), as well as air quantity control. Also features an air-conditioned storage compartment in the centre console.

□ **Navigation System** presents information in the dazzle-free Control Display, including the BMW Professional CD/radio. Driving information is provided by the voice computer, with further data added by the direction arrow or map.

☐ Telephone and BMW Assist preparation enhances driving safety even further with Bluetooth technology; including one year of BMW Assist Safety and Security Services at no extra charge. With the BMW Assist Safety and Security Package you get access to Emergency Roadside Assistance service. Please see your local BMW Retailer for further details.

 $\Box$  **CD Changer,** for six CDs, integrated into the back of the glovebox.

#### **Equipment**

☐ Sequential Manual Gearbox (SMG®) offers both normal and sport manual transmission modes via the paddles on the steering wheel or the shifter. The sport mode may be selected by depressing the "sport" button. (European model shown.)

☐ Comfort seats at the front, electrically adjustable with multi-function control of seat angle, headrest position, backrest angle, seat height and active headrests for the driver and front passenger. Also include lumbar support, seat depth adjustment, and backrest width adjustment.

□ **Ventilated seats** for the driver and front passenger. Ventilator fans are built into the outside seats and blow air upwards through an internal web and the micro-perforated Nasca Leather to provide active ventilation.

☐ Park Distance Control (PDC) uses ultrasonic sensors in the bumpers to help you judge the distance to other cars and unseen objects when parking. The beeping becomes faster as your bumper approaches the object, turning into a constant tone when the distance is less than 30 centimetres.

■ Glass sunroof allows natural light to enter the cabin. For convenience, it has a "one touch" open-and-close feature with anti-trapping, as well as a tilt function for ventilating the inside of your car on hot summer days.

■ Dynamic Stability Control (DSC) including Dynamic Traction Control (DTC), Cornering Brake Control (CBC) and Dynamic Brake Control (DBC). DSC recognizes the risk of swerving from the start and stabilizes the car within milliseconds. DTC is a subsidiary function of DSC and permits increased wheel slip within defined limits, in order to maximize propulsion in specific situations.

■ Airbag system: In the event of a collision, only the airbags that are needed are deployed. Up to eight airbags offer specific protection: the driver and front passenger airbags (which are released at different speeds, depending on the strength of the impact), the front-to-rear head airbags, the side airbags in the front and the optional side airbags at the rear.
