The 2009 Rondo
Wide open spaces
also come standard.

Rondo EX V6 shown in Bright Silver

Take the high road.

Rondo EX shown in Bright Silver

"I liked the Rondo so much that my wife made me buy one... nothing speaks more highly of a car than that."
Graeme Fletcher, National Post

By design, the 2009 Rondo is a role model for urban utility vehicles. It combines the power and versatility of an SUV with the performance and safety of a sedan. With this handsome, four-door hatchback, you have a choice of the 2.4-litre, 4-cylinder engine with 4-speed Steptronic automatic transmission, or the available 2.7-litre, V6 with a 5-speed Steptronic automatic transmission. Rondo has available seating for seven and many innovative new safety features. Add a spacious interior with all the amenities and you'll find Rondo is a blend of performance, comfort and economy. Perfect for roaming city streets or exploring mountain roads.

*Always
room for more.*

Good looks can be deceiving. Rondo's compact exterior conceals a roomy interior which comfortably seats up to seven, with a comfortable eight-way power adjustable driver's seat available and legroom and headroom to spare. By folding down the 60/40 split rear seats, you have more than enough space to accommodate almost anything you and your passengers need to bring along.

FOLDING SEATS

The 60/40 split and reclining second-row seats and available 50/50 split third-row seats fold down completely flat, creating loads of cargo space. If you're going camping, moving goods or just taking family and friends for a drive, the multiple seating configurations ensure everyone travels in comfort.

ONE-TOUCH POWER WINDOWS

All models include power door locks, mirrors and convenient power windows with a driver's window express one-touch-down feature.

EXTRA STORAGE

Additional under-floor storage in the rear compartment lets you store travel essentials out of sight. They are still easily accessible when you need them. Standard on 5 seater models.

CENTRE CONSOLE

The armrest centre console features 12-volt outlets, extra storage space and dual cup holders.

HEATED SEATS

A sure cure for the Canadian cold. Heated seats, in either cloth or leather seating, keep you warm and comfortable all winter long. Standard on all EX models.

You're in Control.

SUNNY SKIES

Available power tilt and sliding sunroof with manual shade lets you enjoy the sun and the breeze on those leisurely drives.

AUTOMATIC CLIMATE CONTROL

Exclusive to the EX-V6 Luxury model, you will be able to enjoy the comforts of automatic climate control and an air filtration system that filters out potentially annoying pollen and dust. An outside temperature display is also included.

ON-BOARD ENTERTAINMENT

Rondo is built to keep unwanted road noise out. It's also built to keep rich sound in, with the 6-speaker AM/FM/CD/MP3 stereo system with auxiliary and USB jacks*, and available Sirius Satellite Radio. Optional accessories for Rondo include a 10" DVD entertainment system with colour LCD monitor and remote control.

*Standard on all EX models.

Slide behind the wheel of the new Rondo and everything is right at your fingertips. Dials are easy to read. Controls are easy to reach. And the sheer comfort is undeniable. So sit back and appreciate the interior's sleek curves, smooth lines and distinctive style.

5-STAR CRASH TEST RATING
 NHTSA - Frontal impacts

SAFETY GUARDS
 Rondo comes equipped with six air bags. Advanced dual front, dual side and full-length side curtain airbags provide maximum protection for you and your passengers.

POWERPLANTS
 Rondo is engineered to provide all the power and protection you need. You can choose between a 175 hp 2.4-litre, 4-cylinder engine or a 192 hp 2.7-litre, V6 engine. The advanced safety features that protect you and up to seven passengers come standard in every model.

Designed with safety in mind.

We understand you have a lot to focus on when you're driving: road conditions, changing weather and other drivers. That's why Rondo comes equipped with an extensive array of standard safety features to help keep you protected, no matter what occurs. Leading-edge features include four-wheel disc brakes with anti-lock braking system (ABS), electronic stability control (ESC), traction control system (TCS) and electronic brake-force distribution (EBD). These monitor your vehicle's movement, instantly distributing engine or braking power as needed to keep you firmly in control.

ELECTRONIC BRAKE-FORCE DISTRIBUTION
 EBD enhances control by calculating and applying the braking pressure needed individually at each wheel.

ACTIVE FRONT HEADRESTS
 Front active anti-whiplash headrests are designed to absorb energy during rear-end collisions.

STEPTRONIC TRANSMISSION
 The available 5-speed Steptronic automatic electronic transmission has a sequentially gated shift mode for sporty, on-the-fly shifting. The fifth gear provides added fuel efficiency and reduced engine noise.

Your Future

Kia is committed to environmental sustainability and protecting the future for both you and your family. Through extensive research and development, we are actively researching alternative fuels and expanding the use of eco-friendly technology with the development of more efficient engines, exhaust systems and transmissions.

Kia has played a leading role in developing alternative-fuel vehicles to help significantly reduce fuel emissions. Our Fuel Cell Electric Vehicle (FCEV) program is developing and testing hydrogen fuel cell powered Kia Sportages as well as using more materials made from recyclable aluminum and magnesium - that are 30% to 40% lighter than steel to boost fuel economy. The Kia Rio hybrid, now in testing, is expected to reduce air pollutants by 30% and increase fuel efficiency by 50%.

We also continue to improve our recycling efforts with the establishment of an automotive recycling centre with the goal of making vehicles that are 95% recyclable.

"Clear simplicity is the ultimate design that is impossible for anyone to imitate. It is difficult to create something entirely new, but Kia Motors will create a new design future through honesty, purity and simple beauty."

Peter Schreyer, Chief Design Officer
One of the most respected authorities on product design in the automotive industry. His outstanding creative work has led to many national and international awards for his sporty and innovative designs.

Our Future

Kia Motors* recently became the fifth-largest automaker in the world and Kia Motors continues to be one of the fastest-growing with annual sales in excess of 1.4 million vehicles. We also understand that our continued success will be dependent upon our commitment to design.

Reflecting this, Kia Motors' state-of-the-art 100,700 sq.-ft. North American Design Centre features a \$45 million studio which engineers, models and creates new vehicles. But our commitment to you goes beyond design. In 2009, we will be opening our first automotive plant in North America.

At Kia, when we talk about changes in the future, we're talking about changes for the better.
