

 LEXUS
THE PURSUIT OF PERFECTION.

LS

2010 LEXUS

Vehicles shown with available equipment.

THE PURSUIT OF PERFECTION.

It is a philosophy that extends well beyond the confines of meticulously assembled sheet metal. An approach to the automobile not as a machine, but rather, an art form. Every curve, deliberate. Every detail, inspired. And where every aspect of the ownership experience is intended to be as rewarding and accommodating as the vehicles themselves. Because while there are certainly easier ways to build an automobile, pursuing perfection is the only way to create a Lexus.

With advanced technology in every 2010 LS, you can experience the comfort of owning a true luxury vehicle, and enjoy all of life's perfect moments.

REFINEMENT
AT EVERY TURN.

The pinnacle of our pursuit: the LS 460. In countless ways, it redefines the luxury automobile with its groundbreaking achievement in design, craftsmanship, technology and precision engineering. The LS 460 RWD and LS 460 L feature a V8 engine that delivers 380 horsepower³ and an eight-speed automatic transmission that set the bar for the industry. The LS 600h L, the world's first premium luxury hybrid, takes power to an entirely new level with an unprecedented

438 total system horsepower.^{3,19} For performance enthusiasts, the new LS 460 with Sport Package offers exclusive Brembo[®] brakes, 19-inch forged-alloy wheels and a sport-tuned air suspension to let you handle even the tightest curves. Along with all of the available amenities, including a 30GB HDD Navigation System that can display real-time traffic and an all-wheel drive system for dealing with all types of driving condition, the LS delivers the ultimate in luxury, innovation and performance.

POWERED BY CHANGE

THE WORLD'S **FIRST** PREMIUM LUXURY HYBRID.

**LEXUS
HYBRID
DRIVE**

Through innovation, Lexus has helped reshape how the world views the automobile. First and foremost, how to power them. The LS 600h L, for example, is the world's first V8 hybrid. By pairing a 5.0-litre V8 gasoline engine with fifth-generation hybrid technology, the LS hybrid delivers smoother, quieter acceleration; greater responsiveness; and 438 total system horsepower.^{3,19} Which is about what you'd get from a far less

considerate 6.0-litre V12. The LS 600h L now features an ECO indicator gauge on the instrument panel that helps guide you to the most efficient use of fuel. And there's also an ECO mode function that, when engaged, automatically reduces the throttle response and switches the climate-control system to an energy-saving mode.²⁰ All the performance with a more efficient use of fuel? It's no longer a contradiction. It's the LS 600h L.

THIN-FILM TRANSISTOR DISPLAY

The instrument cluster in the LS 600h L uses an electronic, LED-backlit TFT display to provide the driver with a variety of information, from turn-by-turn directions and hybrid energy flow to menus where you can personalize select settings for your vehicle.

The V8 gasoline engine (A) and/or the electric motor (B) primarily provide the power necessary during acceleration. The engine-driven generator (C) predominantly produces electricity that is captured and then stored in the hybrid battery (D). During braking or coasting, energy is regenerated and the motor-generator (B) recharges the hybrid battery (D), helping to ensure that it never runs out of energy.

The image shows the interior of a Lexus LS, focusing on the driver's side. The steering wheel is black with a wood-grain top and bottom rim and features the Lexus logo in the center. The dashboard is black with a wood-grain trim and a digital instrument cluster. The center console has a gear shifter and various controls. The text "ADVANCED TECHNOLOGY DESIGNED TO RESPOND TO REAL LIFE SITUATIONS." is overlaid on the image.

ADVANCED TECHNOLOGY DESIGNED TO RESPOND TO REAL LIFE SITUATIONS.

Everyone loves Advanced Technology. But when it's in an automobile, does it make for a better driving experience? It's a question we ask every day. When the answer is yes, we strive to make it seamless, intuitive and, of course, just a little bit awe-inspiring. The LS showcases many of our most advanced innovations. Available features like the Advanced Parking Guidance System that uses sonar to help drivers parallel park—hands-free; and Lane Keep Assist with Lane Departure Warning, which helps keep drivers from accidentally veering out of their lane of travel.

ADVANCED PARKING GUIDANCE SYSTEM

Once the vehicle's frame is aligned on the navigation screen, put the LS in reverse and remove your hands from the wheel. A push of a button engages the system, and the vehicle, assisted only by your braking, eases expertly into place.

DYNAMIC RADAR CRUISE CONTROL

This available feature uses radar technology to measure the distance between your LS and the vehicle travelling directly ahead. Should your vehicle get closer than your pre-set following distance, the throttle is automatically reduced and brakes are applied. As soon as the road clears, your vehicle returns to your pre-selected speed.

LANE KEEP ASSIST WITH DRIVER ATTENTION MONITOR

Part of the available Advanced Pre-Collision System,⁸ available Lane Keep Assist with Lane Departure Warning uses a camera to watch lane markings. When the system determines you are drifting, the feature warns, then physically steers the vehicle back into place. Available Driver Attention Monitor uses a camera and near-infrared illumination to continuously monitor the position of your face. If your face is turned away from the road when the LS's radar detects an object ahead, you're instantly alerted.

ADAPTIVE FRONT LIGHTING SYSTEM AND INTELLIGENT HIGH-BEAM HEADLAMPS

At night, to help illuminate more of the road while cornering, the Adaptive Front Lighting System pivots the left headlamp up to 20 degrees and the right up to 10 degrees. Available intelligent high-beam headlamps; meanwhile, continuously monitor the lights of approaching cars. If an oncoming vehicle is detected, they automatically switch from high to low beam out of consideration for other drivers.

XM NavTraffic^{®1}

The LS comes equipped with a standard backup camera¹⁰ as well as available XM[®] Radio;¹¹ XM NavTraffic^{®1} capabilities. These features can provide helpful, real-time traffic updates to the Navigation System.¹

SOME DETAILS REQUIRE THE ONE THING
ROBOTS LACK: PASSION.

As forward-thinking as the LS is, building it to our standards required returning to a time when passion and craftsmanship prevailed. We did it by recruiting 10 experts to become master craftsmen to oversee all aspects of the LS's development. The steering wheel's leather is hand-buffed for hours with a soft bristle. The headlamps were painstakingly developed to accurately mimic the look and effect of Baccarat crystal. And for consistency in colour and grain, all the interior wood trim is hand-selected. As a final quality check, each LS is individually track tested before release—extraordinary for any production vehicle.

WELCOME TO A NEW PERSPECTIVE ON LUXURY.

Few automobiles are so well-appointed that they warrant guided exploration, but the LS is the exception. Hand-chosen from premium full-grain stocks, the semi-aniline leather-trimmed seating is so supple, it must be experienced firsthand. The Mark Levinson® Reference Surround Sound Audio System² orchestrates 19 speakers for an impressive crystal-clear listening experience. The LS 460 L's and LS 600h L's Executive Package can easily turn your LS into something closely resembling the feel of a private jet. The right rear seat has a built-in ottoman-style leg rest and an indulgent shiatsu massager. For added comfort and convenience, the DVD Rear-Seat Entertainment System features a 9-inch LCD screen and wireless headphones⁴ for private DVD viewing. Other available amenities include infrared sensors that measure body surface temperature and automatically adjust the four-zone climate control and power-reclining rear seats with power headrests and memory setting.

A silver Lexus LS is shown from a front-quarter perspective, driving on a dark road that curves through a snowy mountain landscape. The background features steep, rocky slopes partially covered in snow, with a blurred effect suggesting motion. The car's headlights and grille are clearly visible.

ALL-WHEEL DRIVE. UNTIL ALL ROADS ARE FLAT, DRY AND IMPECCABLY PAVED.

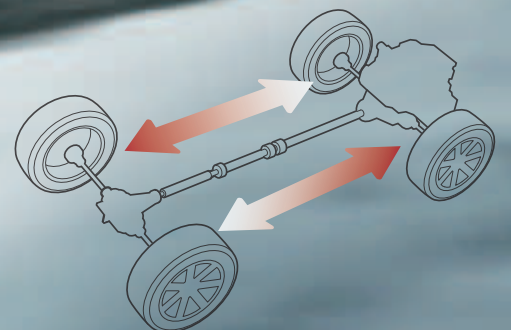

Roads can be coy and difficult. They can be slippery, hide under snow and twist and turn away. So, for this purpose, the LS comes prepared—including the LS 600h L, the world's first all-wheel drive V8 hybrid. This system uses a sophisticated torque-sensing TORSEN^{®21} limited-slip centre differential to automatically distribute power as needed between the front and rear axles. All-wheel drive then works in conjunction with Traction Control to transfer

AWD
ALL-WHEEL DRIVE

power to the wheel with the best grip. This helps enhance the vehicle's traction and control during acceleration and cornering.

With the all-wheel drive system available on the LS, the torque distribution between the front and rear wheels changes in accordance to the current driving situation. For example, during straight-line driving, the torque distribution ratio remains at 40/60 (front/rear). However, when the LS is accelerating through a turn, the torque distribution ratio changes to help suppress understeer of the vehicle as well as enhance control.

THE DEALERSHIP EXPERIENCE

When you visit one of our dealerships, make yourself at home by helping yourself to a beverage and internet access.[†] When picking up your new Lexus, our associates will make the transition seamless. We can help you with everything from setting your favourite radio stations to connecting and transferring your compatible cell phone's contacts to the available *Bluetooth*[®] system on your vehicle. Rest assured your car will experience the finest treatment as well, with a complimentary car wash with every service.

CLUB LEXUS

A complimentary Club Lexus membership is offered to all new, pre-owned or leased Lexus owners. Club Lexus provides an exceptional compilation of services, offers, special events, and pertinent information that's of interest to Lexus drivers. You can also view your service history, the status of your factory warranty or Extra Care Protection (ECP) coverage, and the current status of your Lexus Financial Services (LFS) loan or lease. Sign up today and start taking advantage of all of the features at www.clublexus.ca.

LEXUS LIFESTYLE COLLECTION

Enhance your ownership experience even further with the "The Lexus Lifestyle Collection" Catalogue. Every year, Lexus assembles a wide range of brand name products that exemplify the finest design and craftsmanship in the world, which include designer luggage, Lexus apparel, stunning watches, Titanium golf clubs and much more. An exceptional item can be found for every driver.

To learn more about the various exclusive services that Lexus offers, please visit www.lexus.ca.

SERVICE COMMITMENT

On top of enjoying the highest quality product, Lexus also delivers through a professional Dealer network, a unique and uncompromising level of after-sales service: First Class Service Concept. The highest level of professionalism and vehicle support ensure that the Lexus ownership experience is as luxurious as the vehicles.

MAINTENANCE

We offer the first two scheduled maintenance services at no charge to you. The first service at 1,600 km will include a thorough vehicle inspection and a road test. The second inspection at 8,000 km will include a change of engine oil and oil filter.

EXTRA CARE PROTECTION

Extend beyond the new vehicle warranty and enhance your peace of mind with Lexus Extra Care Protection.

WARRANTY

Our Lexus Warranty Comprehensive Coverage includes:

- 48 months/80,000 km (includes tires).
- Hybrid-Related Components: 96 months/160,000 km (applies to battery control module, hybrid vehicle control module, hybrid battery and the inverter/converter).
- Powertrain: 72 months/110,000 km.
- Corrosion Perforation: 72 months/unlimited kilometres.
- Major Emission Control Components: 96 months/130,000 km.

Please see your Lexus Dealer for details.

Lexus will even provide five days of alternate transportation if your vehicle is required to stay at the dealership for an extended period of time due to a warrantable condition.

ROADSIDE ASSISTANCE

As a proud owner of a Lexus vehicle, you won't have to worry about obtaining assistance when mishaps requiring Emergency Roadside Service or Mechanical Breakdown Towing are needed. Throughout Canada and the continental U.S., our Central Emergency Roadside Services Operator will always be there to ensure you receive prompt, efficient services from one of the many facilities qualified under our approved Roadside Assistance Program. Twenty-four hours a day, 365 days a year, we will be there to help.

[†]Internet is available in most Lexus locations.

THE BEST WAY TO FINANCE YOUR NEW LS – EASILY, QUICKLY, AFFORDABLY.

LEXUS Financial Services • Lexus Financial Services does nothing but finance or lease Lexus vehicles; thus, we know financing and we know Lexus. • Our interest rates are fully competitive and our terms flexible (up to 72 months). • Since we offer Web services, you can: A: check out our rate; B: save time by getting credit approved on-line – before checking out the vehicle(s) of your interest. • Finally, one-stop shopping (at all Lexus Dealerships) saves you time. We invite you to visit us at lexus.ca or call us at 1-800-26-LEXUS.

LEXUS CANADA. Every effort has been made to ensure the specifications and equipment shown are accurate based on information available at time of printing. In some cases, certain changes in standard equipment, options or product delays may occur, which would not be reflected in this brochure. Lexus Canada reserves the right to make these changes without notice or obligation. Your Lexus Dealer is the best source for up-to-date information.

CLUB LEXUS Lexus invites you to join us in Club Lexus, a very exceptional compilation of services, offers, special events and pertinent information available only to Lexus owners. To register for Club Lexus, please visit lexus.ca or call 1-800-26-LEXUS.

Lexus is always looking for new ways to be respectful of the environment. As part of this effort, this paper contains post-consumer recycled material and has earned the Mixed Sources label as designated by the Forest Stewardship Council.

1. The Navigation System is designed to assist in locating an address or point of interest. XM NavTraffic® requires a monthly service fee and is designed to provide real-time traffic or alternative routes of travel. Discrepancies may be encountered between the system and your actual location. Road system changes may affect the accuracy of the information provided. Rely on your common sense to decide whether to follow a specified route. Detailed coverage not available for every city or roadway. Periodic updates available at an additional cost. See your Navigation System *Owner's Manual* for further details. NavTraffic will only be available in Montreal, Vancouver and Toronto. Both Montreal and Vancouver will only have incident data and Toronto will have both incident and flow data. **2.** Mark Levinson is a registered trademark of Madrigal Audio Labs, Inc. a division of Harman International. **3.** Ratings achieved using the required premium unleaded gasoline with an octane rating of 91 or higher. **4.** Headphones are for passenger use only. Do not use while operating vehicle. **5. FUEL CONSUMPTION RATING.** These estimates are based on the Government of Canada's approved criteria and testing methods. The actual fuel consumption of the vehicle may vary. Refer to the Government of Canada publication *EnerGuide Fuel Consumption Guide*. **6.** Brake Assist is designed to help the driver take full advantage of the benefits of ABS. It is not a substitute for safe driving practices. Braking effectiveness also depends on proper brake-system maintenance and tire and road conditions. **7.** Vehicle Stability Control (VSC) and if applicable Vehicle Dynamics Integrated Management (VDIM) are electronic systems designed to help the driver maintain vehicle control under adverse conditions. They are not substitutes for safe driving practices. Factors including speed, road conditions and driver steering input can all affect whether VSC and VDIM will be effective in preventing a loss of control. Please see your *Owner's Manual* for further details. **8.** The Pre-Collision System is designed to help reduce the crash speed and damage in certain frontal collisions only. It is not a collision-avoidance system and is not a substitute for safe and attentive driving. System effectiveness depends on many factors, such as speed, driver input and road conditions. Please see your *Owner's Manual* for further information. **9.** iPod is a registered trademark of Apple Inc. **10.** The backup camera, available only with the Navigation System, does not provide a comprehensive view of the rear area of the vehicle. You should also look around outside your vehicle and use your mirrors to confirm rearward clearance. **11.** Functioning Satellite Radio requires a compatible receiver and monthly service fee. Please see your Lexus Dealer for further details. Reception of satellite signal may vary depending on location. **12.** Lexus tests certain Bluetooth® capable phones for compatibility with Lexus vehicles. Please see your Lexus Dealer for details. Note that the recommendation of Lexus is not a warranty of the performance for any phone and that some problems may occur with any type of handset based on the phone software version or the service coverage available in your area. **13.** Continuous average power, all channels driven, at less than 0.1% THD; 20-20,000 Hz. **14.** The Lexus Tire Pressure Monitor alerts the driver when tire pressure is critically low. For optimal tire wear and performance, tire pressure should be checked regularly with a gauge; do not rely solely on the monitor system. Please see your *Owner's Manual* for details. **15.** All the airbag ("AB") systems are Supplemental Restraint Systems. All ABs (if installed) are designed to inflate only under certain conditions and in certain types of severe collisions: frontal and knee ABs typically inflate in frontal collisions; side and side curtain ABs in side collisions; Roll-Sensing Curtain ABs at a severe tilt degree, roll or lateral G-force. In all other accidents, the ABs will not inflate. To decrease the risk of injury from an inflating AB, always wear seatbelts. Do not use a rearward-facing child seat in any front passenger seat. Please see your *Owner's Manual* for further information/warnings. **16.** The SmartAccess system may interfere with some pacemakers or cardiac defibrillators. If you have one of these medical devices, please talk to your doctor to see if you should deactivate this system. **17.** HomeLink is a registered trademark of Johnson Controls. **18.** Active headrests can help reduce the extent of whiplash in certain types of rear-end collisions. **19.** Maximum output indicates engine plus HV battery output. **20.** The Lexus Hybrids have nearly 70% fewer smog-forming emissions compared against similarly equipped conventional gasoline power vehicles. Based on North American sales data and Federal Tier 2 engine emission requirements. **21.** TORSEN® is a registered trademark of Zexel Torsen, Inc.

Vehicles in this brochure shown with optional equipment. Some features mentioned and/or shown in this brochure may only be available as part of an optional package.

Under very cold conditions, the operation of some vehicle electronic systems using liquid crystal technology (such as CD, DVD, NAV and Audio displays) may be adversely affected until a warmer interior vehicle temperature is reached.

Lexus reminds you to place small children in CSA-approved car seats - in the rear seats, to always wear your seatbelts, and to drive safely.
