

# TALKIS CHEAP - SHOW ME.

You've been around trucks long enough to recognize the difference between a truck builder that talks a good story and one that delivers. Talking tough is no substitute for what really matters - and that's vast capabilities backed by ironclad reliability. GMC answers your demands by putting its 100 years of truckbuilding expertise to work - putting everything it has learned into the most capable pickup in GMC's history - the 2013 Sierra HD. Take a look at how GMC's Professional Grade engineering puts distance between Sierra HD and its rivals. With a foundation provided by the only full-length fully boxed high-strength steel frames in the HD segment.\* Plus the massive power of the available Duramax® 6.6L turbo diesel V8 engine and six-speed Allison® transmission combination that produces 397 horsepower and an earth-shaking 765 lb.-ft. of torque. It adds up to one serious rig - with a maximum fifth-wheel trailering capacity of 10,478 kg (23,100 lb.) that humbles both the Ford F-350 Super Duty and RAM 3500 Heavy Duty pickups.\*\* But the stats only go so far - the real test of a heavy-duty pickup is how it continues to perform in the real world where you work. GMC's reliability continues to be the envy of the industry - and of dedicated truck owners like you. You said: "Show me." That's exactly what the 2013 Sierra 2500HD and 3500HD will do for you every day.

### gmc.gm.ca

- \*Based on Wardsauto.com 2012 Large Pickup segmentation and latest 2012 competitive information available at time of printing. Excludes other GM models.
- \*\* 2013 GMC Sierra HD 5th-wheel towing of 10,478 kg (23,100 lb.) based on model K30903 DRW with available Duramax® diesel. Competitive information based on comparably equipped 2012 model year data available at time of printing.

SIERRA 3500HD CREW CAB SLT WITH DUAL REAR WHEELS IN QUICKSILVER METALLIC shown with available equipment.

# CHASSIS/SUSPENSION/PAYLOAD

### POWER/PULLING/PAYLOAD.

It isn't difficult to identify what you really need out of a heavy-duty pickup. It's all about capability - as defined by power, pulling and payload. What makes Sierra HD such a stalwart partner are its frame, suspension, steering and braking systems that are all engineered to stand up to the kind of tests you put them through on the front lines of your business. Brute strength and advanced technologies help every GMC Sierra HD earn its keep. They're always on duty.

### 1 ASYMMETRICAL REAR LEAF SPRINGS

The leaf springs found in Sierra HD's rear suspension feature unequal front and rear spring half lengths. The result is less axle hop during hard acceleration, more stability and improved traction control performance.

### 2 INDUSTRY-EXCLUSIVE EATON® LOCKING REAR DIFFERENTIAL

Sierra is the only heavy-duty pickup to offer an Eaton® locking rear differential. When one rear wheel starts turning about 100 rpm faster than the other, the differential automatically locks up to ensure that power goes equal to both sides. No need to activate it and no spinning wheels. The Eaton® locking rear differential is standard on 2500HD SLT, Denali and all 3500HD models.

"Its performance continues to affirm what we've seen from previous 2011-12 GM HD pickups. Their chassis and on-road performance should be in the crosshairs of Ram and Ford."

- PickupTrucks.com

### PLOW-READY

Sierra's smooth-riding short-long arm/torsion bar independent front suspension features strong, lightweight forged-steel upper control arms and precision-machined cast-iron lower control arms. The result is Front Gross Axle Weight Ratings (FGAWR) of up to 2721 kg (6000 lb.), allowing a snow plow to be fitted on all 4x4 models. The suspension trim height can also be easily adjusted to compensate for the weight of the plow. That neans superior wheel-toround contact and better running ground clearance which translates into a more capable truck, GMC's engineers have even designed a comprehensive Snow Plow Prep package that makes the installation of a plow assembly easier - it includes increased alternator capacity, a skid plate package and fused wiring for forward/backup and roof emergency lighting.

### INDEPENDENT FRONT SUSPENSION

For ride comfort with no sacrifice of strength, Sierra HDs have an independent front suspension designed specifically for the constant punishment of HD use. A unique and exclusive characteristic of the torsion-bar suspension design is that it allows you to make seasonal ride-height adjustments in minutes, to accommodate the added weight of a snow plow.

### POWER FOUR-WHEEL DISC BRAKES

The most powerful HD GMC has ever produced demands the most powerful brakes it has ever developed for an HD pickup. Up front, they measure a generous 14 inches in diameter and utilize twin piston calipers for superior fade resistance under hard use. down (SRW models only).

### INTELLIGENT BRAKE ASSIST

In an abrupt stop, milliseconds can be your margin of safety. Sierra's Intelligent Brake Assist senses when you are making an emergency stop, then automatically applies full braking force before your foot can press the pedal all the way

### **DIESEL EXHAUST BRAKE**

You can engage an extra measure of braking confidence on long grades with the diesel exhaust brake that's included with the available Duramax® Diesel engine. It uses engine compression to create "negative torque" to help slow the vehicle. It's factory installed and calibrated to work with the rest of Sierra HD's braking system.

### **CONVENIENT 4-WHEEL DRIVE**

4x4 models feature a proven two-speed part-time transfer case with an automatic connect/disconnect mechanism in the front axle. That means you can shift on the fly from 2-HI to 4-HI in the warmth of your Sierra's cabin instead of kneeling in the snow and mud to lock your front hubs manually.

### STABILITRAK® ELECTRONIC STABILITY CONTROL StabiliTrak® constantly

monitors wheelspin for lateral skids. When it detects one, it automatically steps in to help put you back in control by applying the appropriate brake(s). In many cases, StabiliTrak® ends the skid before you even know it's begun. Research shows that electronic stability control systems like StabiliTrak® reduce fatal single-vehicle light truck crashes by 63 percent.\* StabiliTrak® is standard on all Sierra HD

### HIGH-STRENGTH STEEL BACKBONE

...the exhaust brake and transmission work extraordinarily well

together. They've been engineered that way from the start."

Every 2013 Sierra HD rides on a segment-exclusive high-strength steel frame featuring fully boxed rails front-to-rear. The resulting structure is immensely strong and resistant to bending and twisting. It's a major reason why Sierra HD tops Ford Super Duty F-350 in both maximum payload as well as fifth-wheel and ballhitch towing capacities.\*\*

- PickupTrucks.com

### SUPERIOR MOUNTING HARDWARE

Large engine and transmission mounts reduce vibration in the cab. Extended Cab and Crew Cab models also use hydraulic body mounts for increased isolation from vibration on models with single rear wheels. rough roads.

\*\* 2013 GMC Sierra HD payload of 3276 kg (7222 lb.) based on model C30903 DRW, ball-hitch towing of 8165 kg (18,000 lb.) based on models K30953/K30943 and 5th-wheel towing of 10,478 kg (23,100 lb.) based on model K30903 DRW and comparably equipped 2012 Ford Super Duty F-350 models. Maximum payload capacity includes the weight of the driver, passengers, optional equipment and cargo and is approximate. Maximum trailer weight rating is calculated assuming a properly equipped base vehicle, except for any options necessary to achieve the rating, plus driver. Weight of other optional equipment, passengers and cargo will reduce the maximum trailer weight that your vehicle can tow.

# DURAMAX® DIESEL/ALLISON® TRANSMISSION

SURE THERE ARE OTHER DIESELS - BUT THERE'S ONLY ONE DURAMAX®.

When it comes to the biggest workloads, there is no substitute for the robust power and durability of the Duramax® 6.6L turbo diesel V8 engine. It's not the only diesel in heavyduty pickups, but serious truckers recognize its strengths versus the competition. The output is enormous, with 397 horsepower and 765 lb.-ft. of torque. But what makes this diesel so advanced is a series of technologies that enhance everything from fuel efficiency to reliability. What makes it even more effective is the fact it's mated with the proven reliability of the GM-exclusive Allison® 1000 six-speed automatic transmission that's loaded with features that help you get the most out of your Duramax®. Overkill? No - just Professional Grade engineering, THE choice for heavy-duty diesel power: Duramax® and Allison®.

"The GMC Sierra led with best-in-class performance, with wins in almost every test we put the trucks through."

- PickupTrucks.com

### 3 ENVIRONMENTALLY CONSCIOUS

To help minimize its impact on the environment, the Duramax® 6.6L turbo diesel V8 uses a nontoxic urea-based solution or Diesel Emissions Fluid (DEF) and a special catalytic converter to break down oxides of nitrogen (NOx) into harmless nitrogen gas and water vapour. Compared with other NOx-reducing systems, DEF allows for optimum fuel efficiency by increasing the range between Diesel Particulate Filter burn-off cycles up to 1100 km. Here are some additional facts about DEF:

- DEF is non-toxic, non-polluting, non-hazardous and non-flammable.
- DEF is readily available from a variety of retailers.
- The DEF refill interval is approximately 8000 km.\*

### MASSIVE LOW-END TORQUE

long-term reliability.

**B20-COMPATIBLE** 

to conventional diesel fuel.

PROVEN DURABILITY

The Duramax® engine produces its 765 lb.-ft. of peak torque at 1600 rpm – just above idle, right where you need it most when you're handling big loads and heavy trailers.

The Duramax® engine has been engineered to

Since the original Duramax® turbo diesel V8

was launched in 2000, more than 1,3 million

units have been sold. Its service record speaks

outstanding durability. Refinements to the latest

version enhance oil film thickness and increase

oil pressure at lower speeds, for even greater

for itself, gaining a well-earned reputation for

run reliably on B20 fuel - a blend of 80 percent

diesel and 20 percent biodiesel - as an alternative

### FAST WINTER STARTS

Even at temperatures in the -30° C range, the Duramax<sup>®</sup> diesel is ready to start in less than three seconds, thanks to advanced microprocessorcontrolled glow plugs. Cold starting performance is further enhanced by the standard block heater.

### SMART EXHAUST BRAKE

When engaged by the driver, the exhaust brake feature increases backpressure in the exhaust to help slow the truck on downhill grades. The result is improved confidence and control, especially when hauling or towing heavy loads. It also helps reduce wear and tear on brake pads

### 4 ALLISON® 1000 TRANSMISSION

The Duramax<sup>®</sup> diesel V8 is teamed exclusively with a six-speed automatic transmission by Allison®, a world leader in transmissions for commercial and military duty. This differentiates the Allison® 1000 transmission from competitors that rely on beefed-up lightduty truck transmissions. Gear ratios and shift characteristics of the 1000 have been selected specifically to optimize the performance of the Duramax® engine and exhaust brake system. Tap-up/tap-down shifting, auto grade braking and a tow/haul mode are all included.

# VORTEC™ V8/HYDRA-MATIC TRANSMISSION

VORTEC™ SETS THE STANDARD FOR HEAVY-DUTY GASOLINE POWER.

Just as Duramax® is the name professionals trust for heavy-duty diesel power, Sierra HD's standard Vortec™ 6.0L V8 is the engine people count on for gasoline power. It generates a substantial 360 horsepower\* and 380 lb.-ft. of torque. The engine was specifically developed for heavy-duty applications, with a cast-iron engine block and cast stainless steel exhaust manifolds engineered to stand up to extreme operating conditions. The engine's durability is further enhanced by polymer-coated pistons that help reduce engine wear - and exhaust valves made of inconel, a super-alloy capable of withstanding very high temperatures. The Vortec™ 6.0L V8 is mated with the heavy-duty, electronically controlled Hydra-Matic 6-speed automatic transmission that, just like the Allison®, is specifically engineered for heavy-duty applications. Together, the Vortec™ and Hydra-Matic combination delivers the power you need and dependability you can rely on.

### 5 VARIABLE VALVE TIMING (VVT)

VVT adjusts the opening and closing of the intake 

Proven cam-in-block architecture makes for a and exhaust valves to optimize efficiency and performance across the engine's entire rpm range. The result is an ideal combination of smooth idling, abundant low-end torque and generous horsepower.

### HIGH-FLOW CYLINDER HEADS

The Vortec<sup>™</sup> V8 features high-flow cylinder heads similar to those used in Corvette V8s. The result is increased horsepower without a high compression ratio that would require premium fuel. The head design and valve placement allow for a single, centrally located long-life spark plug per cylinder. This eliminated the need for 2 spark plugs, wires and coils per cylinder, like some competitors use, and additional maintenance costs.

### CAM-IN-BLOCK ARCHITECTURE

compact engine with fewer moving parts than more complex overhead-cam designs with complex timing chain/tensioner assemblies that eventually need replacement.

### COMPRESSED NATURAL GAS SYSTEM

New for 2013, a Compressed Natural Gas (CNG) system is available with the Vortec™ V8 engine on Sierra 2500HD WT and SLE Extended Cab models with standard and long boxes. It is a bi-fuel system that can be run on either gasoline or CNG.

### **LOW-MAINTENANCE DESIGN**

The Vortec™ V8 is engineered to help keep maintenance costs and downtime to a minimum. The extended-life spark plugs only need changing every 160,000 km, and the engine coolant will last up to 240,000 km.\*\* The Vortec<sup>™</sup> engine also features an oil life monitoring system, which calculates actual usage and indicates an oil change only when it's actually required.

### 6 7 HYDRA-MATIC 6L90E TRANSMISSION

The Vortec<sup>™</sup> 6.0L V8 is paired exclusively with a Hydra-Matic six-speed automatic transmission that's fitted with a wide range of gear ratios. First gear is exceptionally low, to maximize pulling power, while sixth gear is a very tall overdrive, for reduced engine speed, fuel consumption and engine noise at highway speeds. The transmission also includes tapup/tap-down shift controls that enable you to select a preferred gear, giving you even more precise control. And for 2013, the transmission was modified to include the same grade-braking capability in the normal driving mode that it had previously only when tow/haul mode was selected. Just how strong is the Vortec™/Hydra-Matic combination? With a fifth-wheel hitch, a 2500HD Regular Cab 2WD model is capable of towing up to 6668 kg (14,700 lb.).

6 | SIERRA HD SIERRA HD 17

<sup>\*</sup>Estimate. Actual consumption may vary.

<sup>\* 322</sup> horsenower on 3500HD models.

<sup>\*\*</sup> Maintenance needs vary with different uses and driving conditions. Please refer to the vehicle Owner's Manual for more information.

# GMC SIERRA HD TRAILERING

# THE BIGGER THE TRAILER, THE BETTER IT LOOKS.

The real test of a heavy-duty pickup is how it performs in the most demanding situations - fully loaded, with a trailer in tow. That's where Sierra HD really excels - and distances itself from the competition. Its capabilities are unquestioned, with a fifth-wheel trailering capacity of 10,478 kg (23,100 lb.) - outhauling both the Ford F-350 Super Duty and RAM 3500 Heavy Duty pickups.\* But sheer capacity is only one part of the overall trailering story for Sierra HD. A series of advanced technologies make managing that massive load so much easier. A good example is the push-button exhaust brake that is included with the available Duramax® Diesel. It helps save on brake and transmission wear by closing the diesel engine's turbocharger vanes, creating back pressure that serves as an engine-brake. This feature really shines on steep downhill grades, reducing one of the principal stresses of towing an enormous load. Just one more way that Sierra HD takes a load off you.

\*2013 GMC Sierra HD 5th-wheel towing of 10,478 kg (23,100 lb.) based on model K30903 DRW with available Duramax® diesel. Competitive information based on comparably equipped 2012 model year data available at time of printing.

"The Sierra was the most comfortable rig over our long days. It was also the quickest for the driver to get comfortable with the trailer and load."

- PickupTrucks.com

HILL HOLD ASSIST

This feature makes it easier to move off smoothly from a

truck and trailer from rolling backwards when you release

the brake pedal, it automatically holds the brakes for an

additional 1.5 seconds or until you press the accelerator.

Included on all models with single rear wheels.

stop on grades of about five percent or more. To keep your

### TRAILER BRAKE CONTROLLER

The available integrated trailer brake controller is activated by a switch mounted on the instrument panel close to the steering wheel for easy adjustment. The system measures brake force and applies the trailer brakes as needed. The level of brake force or "gain" is displayed on the Driver Information Centre.

shown in Fire Red with available equipment.

SIERRA 3500HD CREW CAB SLT LONG BOX 4X4 WITH DUAL REAR WHEELS.

### SIERRA HD GROSS COMBINATION WEIGHT RATINGS (GCWR)

	GCWR kg (lb.)	7258 (16,000)	9299 (20,500)	11,113 (24,500)	13,835 (30,500)						
7	ENGINE AXLE RATIO REQUIRED (AUTOMATIC TRANSMISSION STANDARD)										
	Vortec™ 6.0L V8 (L96)	3.73	4.10								
15	Duramax® 6.6L V8 (LML)			3.73	3.73*						

\* Rating for 3500HD models with Dual Rear Wheels (DRW).

### TRAILER SWAY CONTROL

TRANSMISSION GRADE BRAKING

control and reduced brake wear

Both Sierra HD six-speed automatic

transmissions include an automatic grade

braking feature. When the transmission detects

a downhill grade, it will automatically shift down

a gear when the brakes are applied to provide

additional engine braking for improved speed

Any time this system detects trailer sway, it activates individual truck and/or trailer brakes and reduces engine power, if necessary, to bring the trailer back under control and keep it on its intended path. Included on all models with single rear wheels.

### **BUILT-IN 5TH-WHEEL PREP**

With pre-drilled access holes in the rear frame section, Sierra HD makes it easy to install the 5th-wheel or gooseneck-style hitch of your choice. You can also specify an available 8-way wiring harness that's conveniently routed to the front of the pickup box.

# ONSTAR®- A CLEAR DIFFERENCE MAKER.

How can one system do so much to enhance the safety, security and convenience of your driving? Read the long list of benefits that accompany OnStar®¹ and you'll discover why so many people have adopted this important innovation in technology. On Star® is standard on GMC Sierra HD, along with six months of the Directions & Connections Plan featuring Turn-by-Turn Navigation<sup>2</sup> and the OnStar RemoteLink™ mobile app.<sup>3</sup>

### **AUTOMATIC CRASH RESPONSE**

In most collisions, on-board sensors automatically alert OnStar® that you've been hit You don't have to do a thing. A specially trained Emergency Advisor is immediately connected to your vehicle. If you request help, or can't answer, emergency responders are sent to your precise GPS location. Advisors monitor the OnStar® network 24 hours a day, so there's always someone there to help when you need it most.

### **EMERGENCY SERVICES**

When you need help, just push the Emergency OnStar® button for a priority connection to a specially trained Advisor.

### **CRISIS ASSIST**

During a natural or man-made crisis, OnStar® Advisors can contact emergency responders on your behalf, provide directions to help you get out of harm's way, locate a nearby hotel and help you connect with loved ones - at no extra charge.

### STOLEN VEHICLE ASSISTANCE

If your vehicle is stolen, OnStar® works with police to attempt to recover it - swiftly and safely.

### ROADSIDE ASSISTANCE

If you find yourself stranded, vou're never alone: with one push of the OnStar® button, Roadside Assistance can be on the way. An Advisor will contact a nearby dealership, towing service or gas station and send them to your precise location. REMOTE SERVICES

If you lock your keys in your car, OnStar® Remote Door Unlock4 can get you back in your vehicle in minutes. Call OnStar® and an Advisor will confirm your account information and security verification, and then can send a signal to unlock your doors. No locksmith. No hassle.

### TURN-BY-TURN NAVIGATION

to places you haven't thought of yet, OnStar®'s Turn-by-Turn Navigation<sup>2</sup> connects you to your destination effortlessly. Just push a button for an Advisor to help you get anywhere. And, with OnStar®, you'll have the most up-to-date routes right at your fingertips.

### HANDS-FREE CALLING

Eyes on the road, hands on the wheel - OnStar®'s Hands-Free Calling<sup>5</sup> keeps you connected. This built-in feature makes it easy to take full advantage

of OnStar®'s robust network. Even in places where handheld cell phones are banned while driving, OnStar® enables you to call hands-free by purchasing minutes for Hands-Free Calling.

### ONSTAR REMOTELINK™ MOBILE APP<sup>3</sup>

The OnStar RemoteLink™ mobile app places the power of OnStar® in the palm of your hand. It gives you an amazing level of control and connection with your vehicle through your mobile device. It lets you access real-time vehicle data, like oil-life and tire pressure With RemoteLink<sup>™</sup> you can lock and unlock doors4 or contact an OnStar® Advisor all from your smartphone. If you're a Subscriber with Directions and Connections, From the places you need to find. you can also find a location with OnStar RemoteLink™ and send directions right to your vehicle.

### VEHICLE DIAGNOSTICS

Every month, OnStar® automatically runs numerous diagnostic and maintenance checks on your vehicle's key operating systems, such as the engine, airbags and brakes OnStar® Vehicle Diagnostics then sends you monthly email reports showing what's going on with your vehicle.

### MYGMC APP

GMC helps you get even more out of your vehicle with an intelligent app that lets you access a number of features right from vour smartphone. Better yet, it's complimentary and available with every new GMC. You can check parking reminders and read your

Owner's Manual - as well as other functions – straight from your iPhone® or Android™ smartphone. It also integrates with the OnStar you to lock or unlock your doors, or remotely start your vehicle (when factory equipped) anywhere

vou have cellular service. You can even check your fuel level or remaining oil life. In addition, vou can select a destination and RemoteLink™ mobile app. allowing have directions sent right to your vehicle. Stay in touch with your vehicle - with the MvGMC app.

SIERRA HD 19

- 1. Visit onstar.ca for coverage map, details and system limitations. Services vary by model and conditions. OnStar® acts as a link to existing emergency service providers.
- 2. Requires OnStar® Directions and Connections Plan. Not available in certain areas. See coverage map for details.
- 3. Available on select iPhone®, Android™ and BlackBerry® (interim availability) devices. Services vary by phone, vehicle and conditions. Requires an active OnStar® subscription. 4. Requires automatic power door locks.
- 5. Requires an active OnStar® subscription.
- 6. Requires iPhone® or Android™ platform and active OnStar®subscription.

### REAR VISION CAMERA

The available rear vision camera makes it easier to see potential obstacles behind the truck when you are in reverse. It not only makes it easier to park, but also to back up to a trailer. The image is displayed in your rear-view mirror or navigation screen (if equipped).

### LISTEN UP

wireless hands-free phone connectivity that enables you to make, answer and end calls on compatible mobile phones, using standard

### CENTRE ARMREST STORAGE

Sierra HD offers convenient storage for all sorts of small items. SLE models feature a 40/20/40 split-bench front seat with a centre armrest storage compartment capable of handling 6.1 L of gear.

### LOCKABLE STORAGE

Lift the centre seat cushion of Sierra SLE's 40/20/40 split-bench front seat and you'll discover a lockable 9.1 L compartment complete with an auxiliary power outlet.

New for 2013, all Sierra HDs are equipped with standard Bluetooth® steering wheel-mounted controls.

WT and SLE models feature a convenient dual glovebox design that helps keep small cargo items organized and out of sight.

### SIERRA HD DENALI CABIN

The details make all the difference inside the Sierra HD Denali cabin, from the visual warmth of the woodgrain appearance to the literal warmth of the heated, leather-wrapped steering wheel.

### DENALI SEATING

Denali's heated and cooled power 10-way front bucket seats include a two-position driver's memory function.

<sup>\*</sup>Vortec™ 6.0 L V8 (L96) produces 322 hp @ 4400 rpm and 380 lb.-ft. of torque @ 4200 rpm on 3500HD models.

\*\*C20903 with 4536 kg (10,000 lb.) GVWR package.

\*\*OTES FOR 2500HD and 3500HD TRAILERING:

\*\*2500HD and 3500HD models have a weight-

<sup>• 2500</sup>HD and 3500HD models have a weight-carrying hitch limit of 3402 kg (7500 lb.) and require a weight-distributing hitch (or fifth-wheel) with trailer weights in excess of this limit.

or intervined with a diagram and a veiging in access of units minute.

Fifth-wheel kingpin loads are usually higher than ball hitch trailer longue loads, so careful attention must be given to the trucks payload capacity and Rear Gross Axle Weight Rating (RGAWR). Subtract the tow vehicle's weight plus passenger and cargo weights from the Gross Vehicle Weight Rating (GVWR) to determine the available payload and/or kingpin weight allowance.

Trailering kingpin weights should be 15-25% of the loaded trailer weight.

Trailering capacity may be limited by the tow vehicles ability to carry the hitch weight without exceeding

An Integrated Trailer Brake Controller (option JL1) is available in combination with the Trailering Special Equipment Package (option Z82). This facilitates hook-up of most electric trailer brakes.
