

 TOYOTA **RAV4 07**

RAV4. The confidence to handle anything.

RAV4 07

Don't confuse the 2007 Toyota RAV4 with one of those vehicles that looks like an SUV, but can't really rise to the challenge. RAV4 is an SUV built to outsmart most obstacles in your way – including the gas pump. Inside and out, Toyota designers made the RAV4 larger, putting ingenious utility into a sleek body. Then our engineers gave it a comfortable ride and an available V6 engine rated at 269 horsepower and 246 lb.ft. of torque. It's all a powerful argument for why RAV4 is one SUV that can handle just about anything, to help keep you on the move.
