With its 203 mm cross members, beefed-up centre side rails, and rear inner-channel reinforcements, Tacoma's rigid frame can stand up to virtually any challenge.

# Safety

Standard on all 2011 models are side curtain and front seat-mounted side airbags plus Vehicle Stability Control which identifies loss of traction and acts automatically to help maintain directional stability. Traction Control employs brake and throttle control to help reduce wheelspin and transfer torque to the wheel with the most traction. Should the wheels begin to lock-up during urgent braking, the standard 4-wheel Antilock Brake System helps maintain steering control. Electronic Brake-force Distribution optimizes the amount of brake force applied to each wheel, while Brake Assist applies additional brake pressure in the event of an emergency stop.

## SELECT FEATURES

- Driver and front passenger airbag, front seat-mounted side airbags, roll-sensing front and rear head/side curtain airbags Supplemental Restraint System.<sup>1</sup>

# Toyota Quality

Quality is built right into the production process from the selection of raw materials, right down to the vehicle's final inspection. And it is the responsibility of everyone to ensure the highest quality possible on each and every vehicle. It's through Toyota's philosophy of 'Kaizen' that we are always looking for ways to continually improve. That's how we make things better.

**THE TOYOTA PRODUCTION PROCESS** is one that is constantly evolving. With our "Just-In-Time" practice, the goal is to make certain that during the manufacturing process, only what is needed gets produced. The result is twofold: because there's no excess supply, any issues are exposed and promptly resolved to ensure that everything off of the Toyota assembly line is of exceptional quality.

**THE HUMAN TOUCH.** As impressive as the machinery is, the achievement of perfect fit and finish is also the result of continuous human touch for every step of the way.

**TOYOTA CANADA COLD RESEARCH CENTRE.** Located in Timmins, Ontario, our teams test Toyota vehicles in actual Canadian winter conditions at our cold weather testing track to ensure that they remain dependable throughout the long winter months.
